Minnesota proposes to issue and sell the 1,219,856 shares of its common stock by (a) offering said shares to the holders of its common stock on the basis of one share for each ten shares held and at a subscription price to be determined by Minnesota at a later date (which subscription price will be less than the last reported sale price on the New York Stock Exchange prior to the time the subscription price is fixed, but not less than $13.50 per share), the right to subscribe to be evidenced by subscription warrants; and (b) selling at such subscription price, pursuant to the competitive bidding requirements of Rule U-50, such of the above shares of common stock as are not subscribed for plus any of the outstanding shares of common stock of Minnesota acquired by the Company in connection with stabilization transactions. Minnesota may make purchases of not to exceed 60,993 shares (being a number of shares equal to approximately 5 percent of the new shares of common stock to be issued by Minnesota) of its presently outstanding stock in order to facilitate the proposed offering and sale of additional shares of its common stock or to stabilize the market price therefor. If the number of shares of common stock held of record by any shareholder is not evenly divisible by ten, the warrant such shareholder will receive will entitle him to subscribe for one share in lieu of the fraction of a share to which he would otherwise be entitled.

The additional shares of preferred stock of Minnesota, to be known as Cumulative Preferred Stock, $_____ Series, will be sold pursuant to the competitive bidding requirements of Rule U-50, the price (which shall be not more than $102.75 per share nor less than $100 per share) and the annual dividend rate (which shall be a multiple of 4 cents) to be fixed as a result of the bidding.

It is stated that the proceeds of the sale of additional shares of common and preferred stock by Minnesota and the proceeds of the sale of additional shares of common stock by Wisconsin, together with other corporate funds, will be used for the purpose of retiring $20,000,000 of bank loans of Minnesota evidenced by its promissory notes maturing July 15, 1954, and $2,500,000 of bank loans of Wisconsin evidenced by its promissory notes maturing June 9, 1954, and to finance new construction. Minnesota estimates that the expenditures of it and its subsidiaries for construction during 1954 will aggregate approximately $52,360,000.

The application-declaration, as amended, further states that no State commission, other than the Public Service Commission of North Dakota, or Federal commission, other than this Commission, has jurisdiction over the transaction proposed by Minnesota, that the issuance and sale of common stock by Wisconsin is subject to the authorization by the Public Service Commission of Wisconsin; and that the necessary authorizations of said two State Commissions have been obtained.

Fees and expenses are estimated as follows:

MINNESOTA

Description of items	150,000 shares of cumulative preferred stock	1,219,856 shares of common stock	Total
Registration fee under the Act of 1933	$1,500	$1,921	$3,421
Federal documentary stamps	16,500	7,700	24,200
State qualification fees and expenses	1,000	1,000	2,000
Printing, engraving and stationery	13,000	33,000	46,000
Accounting services, Haskins & Sells	1,600	1,600	3,200
Legal fees of company counsel, Flynn & Clerkin	10,000	15,000	25,000
New York Stock Exchange, listing fee	-------	3,050	3,050
Fees and expenses of the subscription agents namely, Northwestern National Bank of Minneapolis, First National Bank of Minneapolis, First Trust Co. of Saint Paul, Guaranty Trust Co. of New York, and Continental Illinois National Bank & Trust Co. of Chicago	-------	41,500	41,500
Fees of Pioneer Service & Engineering Co.:			
Transfer agent's service	300	10,500	10,800
Other fiscal service	600	13,600	14,200
Registrars' fees	750	5,350	6,100
Postage and express	500	10,000	10,500
Miscellaneous, including traveling, telephone tolls, and other out-of-pocket expenses	6,190	7,779	13,969
Total	52,000	152,000	204,000

WISCONSIN

Description of items	Amount
Secretary of State of Wisconsin—Fee relating to increase in authorized capital stock	$10,000
Public Service Commission of Wisconsin—Fee paid relating to application for authority to issue shares	4,000
Federal documentary stamps	4,400
Legal fees	1,700
Miscellaneous expenses	600
Total	20,700

It further appears that the proposed fee of Gardner, Carton, Douglas, Roemer & Chilgren, counsel for the successful bidders for Minnesota's Preferred Stock and Common Stock, is $11,500 of which $5,000 is to be paid on account of the Preferred Stock and $6,500 is to be paid on account of the Common Stock, said amounts to be paid by the respective successful bidders.

Applicants-declarants request that this Commission's order become effective upon issuance.

Notice of the filing of the application-declaration having been given in the manner prescribed by Rule U-23 promulgated under the act, and the Commission not having ordered a hearing thereon; and

The Commission finding with respect to the application-declaration, as amended, that the applicable provisions of the act and rules thereunder are satisfied and that it is not necessary to impose any terms and conditions other than those set forth below; that the estimated fees and expenses are not unreasonable provided they do not exceed the estimates; and that the application-declaration should be granted and permitted to become effective forthwith:

It is ordered, Pursuant to said Rule U-23 and the applicable provisions of the act that the application-declaration be and the same is hereby, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rules U-24 and U-50 and to the following additional terms and conditions:

So long as any shares of the Cumulative Preferred Stock, $_____ Series (the Series permitted to be issued pursuant to this order) of Minnesota (hereinafter referred to as the Corporation) are outstanding:

1. The Corporation shall not, without the consent (given in writing or by vote at a meeting duly called for that purpose) of the holders of a majority of the total number of shares of the Preferred Stock then outstanding:

A. Issue any unsecured notes, debentures or other securities representing unsecured indebtedness, or assume any such unsecured securities, for purposes other than the refunding or renewal of outstanding unsecured securities theretofore issued or assumed by the Corporation resulting in longer maturities, or the redemption or other retirement of all outstanding shares of the Preferred Stock, if immediately after such issue or assumption, the total outstanding principal amount of all unsecured debt will thereby exceed 10 percent of the aggregate of (i) the total principal amount of all bonds or other securities representing secured indebtedness issued or assumed by the Corporation and then to be outstanding, and (ii) the capital and surplus of the Corporation (including all earned surplus, paid-in surplus, capital surplus or other surplus of the Corporation) as then to be stated on the books of account of the Corporation;

B. Merge or consolidate with or into any other corporation or corporations or sell or otherwise dispose of all or substantially all of the assets of the Corporation, unless such merger or consolidation or sale or other disposition, or the issuance or assumption of all securities to be issued or assumed in connection with any such merger or consolidation or sale or other disposition shall have been ordered, approved or permitted pursuant to the provisions of the act; provided that the provisions of this clause shall not apply to a purchase or other acquisition by the Corporation of the franchises or other assets of another corporation, or otherwise apply in any matter which does not involve a merger or consolidation.

2. The Corporation shall not, after the termination of twelve months subsequent to the authorization of any class of stock (or security convertible into shares of any stock) which shall be preferred as to assets or dividends over the Preferred Stock, issue any such security unless the consent (given by a vote at a meeting duly called for that purpose in accordance with the provisions of its by-laws) is obtained of the holders of at least two-thirds of the total number of shares of Preferred Stock then outstanding, without regard to series.

3. The Corporation shall not redeem, purchase or otherwise acquire less than all of the shares of the Preferred Stock, if, at the time of such redemption, purchase or other acquisition, dividends payable on the preferred stock shall be in default in whole or in part, unless prior to or concurrently with such redemption, purchase or other acquisition all such defaults shall have been cured or unless approval of such redemption, purchase or other acquisition shall have been ordered, approved or permitted pursuant to the provisions of the act.

4. The Corporation shall not, without the consent (given by a vote at a meeting duly called for the purpose in accordance with the provisions of the By-Laws) of the holders of at least two-thirds of the total number of shares of Preferred Stock then outstanding, issue or sell additional preferred stock ranking on a parity with the outstanding Preferred Stock, or reissue reacquired Preferred Stock, unless the aggregate of the capital of the Corporation applicable to all stock of any class ranking junior to the Preferred Stock, plus the surplus of the Corporation, as defined in Article V (10) (B) of the Articles of Incorporation, shall be not less than the aggregate amount payable upon involuntary liquidation, dissolution or winding up of the affairs of the Corporation to the holders of all shares of (i) Preferred Stock and (ii) of any shares of stock of any class ranking prior thereto or on a parity therewith to be obtained outstanding immediately after such proposed issue, excluding from such computation all indebtedness and stock to be retired through such proposed issue. No portion of the surplus of the company utilized to satisfy the foregoing requirements shall be available for dividends (other than dividends payable in stock of any class ranking junior to the Preferred Stock) or other distributions upon or in respect of shares of stock of the Corporation of any class ranking junior to the Preferred Stock or for the purchase of shares of such junior stock until such number of additional shares of Preferred Stock or of stock, or securities convertible into stock, ranking prior to or on a parity with the Preferred Stock are retired or until and to the extent that the capital applicable to such junior stock shall have been increased.

5. In computing the capitalization ratio for all the purposes set forth in the Corporation's Articles of Incorporation, the capital represented by the common stock shall not include premiums over par value of any other class of stock.

6. In determining, for the purposes set forth in the Corporation's Articles of Incorporation, the sum of total capital and surplus, there shall be included therein an amount equal to the excess, if any, of (i) the aggregate amount payable on involuntary dissolution, liquidation or winding up of the Corporation upon all outstanding shares of stock having a preference over the common stock, over (ii) the aggregate stated or par value of such shares.

7. Any provision herein or in the Corporation's Articles of Incorporation which requires the vote of approval or consent of a specified fraction or percentage of a number of shares of the Preferred Stock as a class prior to taking specified action, shall be deemed to require not only the vote or consent of the specified fraction or percentage of a number of shares but also the vote or consent of the same fraction or percentage of votes entitled to be cast (bearing in mind that under paragraph 5 (a) of Article V of the Corporation's Articles of Incorporation each share of the "$4.80 Series" and of the "$3.60 Series" of Preferred Stock is entitled to three votes per share, while each share of the "$4.10 Series" and the Series presently being permitted to be issued is entitled to one vote per share).

By the Commission.

[F. R. Doc. 54-2605; Filed, Apr. 7, 1954; 8:51 a. m.]

[File No. 70-3234]

EASTERN UTILITIES ASSOCIATES

NOTICE OF FILING REGARDING ISSUE AND SALE TO BANK OF SHORT-TERM PROMISSORY NOTE

APRIL 2, 1954.

Notice is hereby given that Eastern Utilities Associates ("EUA"), a registered holding company, has filed a declaration pursuant to the Public Utility Holding Company Act of 1935 ("act"), designating section 7 of the act and Rule U-42 (b) (2) promulgated thereunder as applicable to the proposed transactions, which are summarized as follows:

EUA proposes to issue and sell to The First National Bank of Boston an unsecured promissory note in the principal amount of $2,000,000. Said note will be outstanding for a period not to exceed six months from April 19, 1954, and will bear interest at the prime rate in effect on April 20, 1954 (April 19, 1954, being a legal holiday in Boston). Upon 10 days written notice said note may be prepaid in whole or in part without premium.

At the present time EUA has outstanding bank indebtedness in the principal amount of $2,000,000 which bears interest at 3¼ percent per annum and matures April 19, 1954. The purpose of said proposed note is to extend or renew this bank indebtedness for a period not to exceed six months. It is contemplated by EUA that the proposed note will be retired through the sale of a sufficient number of its common shares to raise approximately $2,000,000 of equity capital at the earliest practicable date but not later than October 1, 1954, market conditions for the EUA shares being favorable.

EUA's expenses in connection with the issuance of said note, including counsel fees and expenses estimated at $600, are estimated not to exceed $700. It is stated that no State commission or Federal commission, other than this Commission, has jurisdiction over the proposed transactions.

It is requested that the Commission's order become effective upon issuance.

Notice is further given that any interested person may, not later than April 15, 1954, at 5:30 p. m., request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said declaration which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date said declaration, as filed or as amended, may be permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 54-2603; Filed, Apr. 7, 1954; 8:50 a. m.]

[File No. 812-868]

E. I. DU PONT DE NEMOURS AND CO. AND CANADIAN INDUSTRIES, LTD.

NOTICE OF FILING OF APPLICATION REQUESTING ORDER EXEMPTING CERTAIN TRANSACTIONS BETWEEN AFFILIATES

APRIL 2, 1954.

Notice is hereby given that E. I. du Pont de Nemours and Company ("Du Pont"), which is controlled by Christiana Securities Corporation, a registered closed-end non-diversified investment company, which in turn is controlled by Delaware Realty and Investment Company, also a registered closed-end non-diversified investment company, and Canadian Industries Limited ("CIL"), a jointly controlled subsidiary of Du Pont, and Imperial Chemical Industries of Canada Limited ("ICI of Canada"), the latter company a wholly owned subsidiary of Imperial Chemical Industries, Limited ("ICI"), a British corporation, have filed an application pursuant to section 17 (b) of the Investment Company Act of 1940 ("act") for an order exempting from the provisions of section 17 (a) of the act a proposed plan of Compromise and Arrangement ("Plan") under section 126 of The Companies Act of Canada, whereby the business and assets of CIL would be divided and transferred to two new Canadian operating companies. The applicants have requested in the alternative that an order be issued pursuant to section 6 (c) of the act exempting from the provisions of the act the transactions pursuant to the Plan or a ruling that such transactions are not covered by the act.

CIL is primarily a chemical manufacturing concern, producing in Canada such products as agricultural and industrial chemicals, ammunition, cellophane, explosives, "Fabrikoid", nylon, paint and varnish and polythene. It also resells in Canada certain related products of Du Pont, ICI and others.

CIL has outstanding 7,059,081 shares of common stock of which 2,952,655 shares (41.8 percent) are owned by Du Pont, 2,952,655 shares (41.8 percent) are owned by ICI of Canada, and the remaining 1,153,771 shares (16.4 percent) are held by approximately 3,000 public minority stockholders. CIL also has outstanding 46,500 shares of $100 par value non-redeemable 7 percent preferred stock, all held by the public. United States citizens own 3.0 percent of CIL common stock and 6.2 percent of the CIL preferred stock.

The United States District Court for the Southern District of New York entered a final judgment on July 30, 1952 in the case of United States of America v. Imperial Chemical Industries Limited, E. I. du Pont de Nemours and Company, et al. (Civil Action 24-13) 100 F. Supp. 504, 105 F. Supp. 215, which judgment ordered Du Pont and ICI to terminate their joint interests in CIL (and in certain other jointly owned companies) either by the sale of the CIL shares owned by one or both of the parties, or by segregation or physical division of the plants and properties of CIL.

Du Pont and ICI have determined that a segregation and physical division of the plants and properties of CIL between ICI and Du Pont is the most feasible method of complying with the decree of the court. Accordingly, a Compromise or Arrangement under section 126 of The Companies Act of Canada was formulated. Under this proposed Plan CIL's business and assets will be divided and transferred to two new operating companies to be known as Canadian Industries (1954) Limited ("CIL 54") and Du Pont Company of Canada Limited ("Du Pont of Canada"). ICI of Canada will become the principal common stockholder in CIL 54; the remainder of the CIL 54 common stock will be held by CIL's present minority stockholders and all of its preferred stock will be held by CIL's existing preferred stockholders. The present CIL company, which will become a holding company under the name of Du Pont of Canada Securities Limited ("Du Pont Securities") will be the only shareholder in Du Pont of Canada. Du Pont will be the principal common stockholder in Du Pont Securities and the remainder of the Du Pont Securities' common stock will be held by CIL's present minority common stockholders and all of its preferred stock will be held by CIL's existing preferred stockholders. This holding company arrangement, it is stated, is necessitated by certain tax considerations.

The above allocation of securities of the new companies will be accomplished by giving to the minority common stockholders of CIL, in place of each share of CIL common stock held, (a) 1 1/10 shares of common stock of CIL 54 and (b) 1 1/10 shares of common stock of Du Pont Securities. ICI of Canada will, in place of each share of common stock of CIL presently held, receive 2 shares of common stock of CIL 54 but no shares of Du Pont Securities. On the other hand, Du Pont will, in place of each share of common stock of CIL presently held, receive two shares of common stock of Du Pont Securities but no shares of CIL 54.

Holders of the existing CIL cumulative non-redeemable 7 percent $100 par value preferred stock will receive for each share thereof (a) one share of cumulative non-redeemable 7½ percent $50 par value preferred stock of CIL 54 and (b) one share of cumulative non-redeemable 7½ percent $50 par value preferred stock of Du Pont Securities. Du Pont will reimburse those CIL shareholders who are subject to United States Federal income taxes, for estimated United States income taxes resulting from the exchange of CIL stock for stock of CIL 54. Du Pont estimates that the amount of such reimbursement will be approximately $1,000,000.

Under the proposed Plan the assets being transferred to Du Pont of Canada comprise principally CIL's business of cellophane and nylon and the principal assets being transferred to CIL 54 consist of the agricultural chemicals, chemicals, polythene, ammunition, explosives, "Fabrikoid," paint and varnish departments and certain subsidiary companies of CIL.

It is stated in the application that at the commencement of negotiations it was agreed that the business and assets of CIL should be so divided as to place in each of the two new companies properties from which an approximately equal volume of earnings over the near future might be anticipated.

The Plan also provides that the residual assets and liabilities of CIL are to be so allocated that all of the assets of CIL would be equally divided between Du Pont of Canada and CIL 54. The application indicates that if the Plan had been consummated on December 31, 1953, the net assets, on the basis of book values, proposed to be transferred to each of the new companies would be approximately $45,500,000.

Applicants state that the agreement finally reached represents a fair and equitable arrangement and that the requested order of exemption from the provisions of section 17 (a) of the act should be granted for the reason that the proposed transactions will be, on the basis of business judgment, the most effective means of achieving compliance with the judgment of the United States District Court for the Southern District of New York, at the same time protecting Du Pont and its shareholders.

The application also states that this Plan, which is a modification of an earlier plan approved on April 7, 1953, by the United States District Court for the Southern District of New York, was approved by the same court on January 21, 1954. The Plan must also be approved under The Canadian Companies Act by an appropriate Canadian court, after it has been approved by the stockholders of CIL, before it can be consummated.

Section 17 (a) of the act, among other things, prohibits an affiliated person of a registered investment company, or any affiliated person of such a person, from selling to, or purchasing from, any company controlled by such registered investment company any securities or property unless the Commission upon application pursuant to section 17 (b) of the act grants an exemption from the provisions of section 17 (a). Section 17 (b) provides that the Commission shall grant such exemption and issue an exemptive order if the evidence establishes that (1) the terms of the proposed transactions, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned, (2) the proposed transaction is consistent with the policy of each registered investment company concerned, as recited in its registration statement and reports filed under the act, and (3) the proposed transaction is consistent with the general purposes of this title.

Section 6 (c) of the act provides that the Commission, among other things, by order upon application may conditionally or unconditionally exempt any person, securities, or transaction, or any class or classes of persons, securities, or transactions, from any provisions of the act to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the act.

Notice is further given that any interested person may, not later than April 19, 1954, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest and the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 29086]

ANIMAL OR POULTRY FEED FROM MASON CITY, ILL., TO MISSISSIPPI, LOUISIANA, AND ALABAMA

APPLICATION FOR RELIEF

APRIL 5, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. G. Raasch, Agent, for carriers parties to schedule listed below.

Commodities involved: Animal or poultry feed, carloads.

From: Mason City, Illinois.

To: Meridian, Enterprise, Hattiesburg, Laurel, Lumberton, and Columbus, Miss., New Orleans, La., and Mobile, Ala.

Grounds for relief: Competition with rail carriers, circuitous routes, and additional routes.

Schedules filed containing proposed rates: R. G. Raasch, Agent, I. C. C. No. 776, supp. 28.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
Secretary.

[4th Sec. Application 29087]

CAST IRON PIPE FROM THE SOUTH TO TEXAS

APPLICATION FOR RELIEF

APRIL 5, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Cast iron pipe and related articles, carloads.

From: Birmingham, Ala., and points grouped therewith, Chattanooga and Nashville, Tenn., Atlanta and Roseland, Ga.

To: Houston, Galveston and Texas City, Texas.

Grounds for relief: Competition with rail carriers, circuitous routes and additional routes.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1374, supp. 21.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 29088]

CREOSOTE OIL SOLUTION FROM GOOD HOPE, LA., TO HATTIESBURG, MISS.

APPLICATION FOR RELIEF

APRIL 5, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for the Fernwood, Columbia & Gulf Railroad Company and other carriers named on page 1 of the application.

Commodities involved: Creosote oil solution (creosote oil and tar), carloads and tank-car loads.

From: Good Hope, La.

To: Hattiesburg, Miss.

Grounds for relief: Competition with rail carriers and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 29089]

VARIOUS COMMODITIES FROM TRUNK LINE AND NEW ENGLAND TERRITORIES TO CERTAIN OTHER TERRITORIES

APPLICATION FOR RELIEF

APRIL 5, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin and Frank Van Ummersen, Agents, for carriers parties to tariffs shown in exhibit A of the application, pursuant to fourth-section order No. 17220.

Commodities involved: Various commodities, carloads.

From: Points in trunk-line and New England territories.

To: Points in central, southern, trunk-line and New England territories.

Grounds for relief: Competition with rail carriers, and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 29090]

AMMUNITION BOXES FROM BIRMINGHAM, ALA., TO JOLIET ARSENAL (AREA 2), ILL.

APPLICATION FOR RELIEF

APRIL 5, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1351, pursuant to fourth-section order No. 16101.

Commodities involved: Boxes, ammunition or shell shipping, wooden, carloads.

From: Birmingham, Ala.

To: Joliet Arsenal (Area 2), Ill.

Grounds for relief: Rail competition, circuity, and operation through higher-rated territory.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 29091]

PAPER AND PAPER ARTICLES FROM OFFICIAL TERRITORY TO LOWER MISSISSIPPI RIVER CROSSINGS

APPLICATION FOR RELIEF

APRIL 5, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to Agent Frank Van Ummersen's tariff I. C. C. No. 610, and other tariffs, pursuant to fourth-section order No. 16101.

Commodities involved: Paper and paper articles, carloads.

From: Points in official territory.

To: Lower Mississippi River Crossings, Memphis, Tenn., and south thereof.

Grounds for relief: Competition with rail carriers, circuitous routes, and operation through higher-rated territory.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
Secretary.

[4th Sec. Application 29092]

PAPER ARTICLES FROM THE SOUTHWEST TO MEMPHIS, TENN., AND NATCHEZ AND VICKSBURG, MISS.

APPLICATION FOR RELIEF

APRIL 5, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Paper and paper articles including pulpboard, and paper boxes, carloads.

From: Specified points in Arkansas, Louisiana and Texas.

To: Memphis, Tenn., Natchez and Vicksburg, Miss.

Grounds for relief: Rail competition, circuity, and market competition.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 4063, supp. 39.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
Secretary.

[4th Sec. Application 29093]

PEANUTS FROM ALABAMA, FLORIDA AND GEORGIA TO CAMDEN, N. J.

APPLICATION FOR RELIEF

APRIL 5, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Peanuts, in the shell or shelled, carloads.

From: Points in Alabama, Florida and Georgia.

To: Camden, N. J.

Grounds for relief: Competition with rail carriers, circuity, to maintain grouping, and additional destination.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 887, supp. 149.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission,

in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[No. 31479]

NORTH CAROLINA INTRASTATE FREIGHT RATES AND CHARGES

NOTICE OF INVESTIGATION AND HEARING

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 26th day of March A. D. 1954.

It appearing, that in Ex Parte No. 175, Increased Freight Rates, 1951, 280 I. C. C. 179; 281 I. C. C. 557; 284 I. C. C. 589, and 289 I. C. C 395, the Commission authorized carriers subject to the Interstate Commerce Act parties thereto to make certain increases in their freight rates and charges for interstate application throughout the United States, and that increases under such authorizations have been made.

It further appearing, that a petition, dated March 10, 1954, has been filed by the Aberdeen & Rockfish Railroad Company and other common carriers by railroad operating to, from, and between points in the State of North Carolina, averring that the North Carolina Utilities Commission has refused to permit petitioners to establish, for the intrastate transportation upon their railroads in North Carolina, increases in freight rates and charges corresponding to those authorized by this Commission and made by petitioners on interstate traffic in the proceeding above cited; such refusal being alleged in the manner and to the extent as more fully set forth in the said petition;

It further appearing, that petitioners allege that the refusal of the North Carolina Utilities Commission to permit the increase on intrastate traffic referred to in the preceding paragraph causes and results in undue or unreasonable advantage, preference, and prejudice as between persons or localities in intrastate commerce, on the one hand, and interstate commerce, on the other hand, and in undue, unreasonable and unjust discrimination against interstate or foreign commerce, in violation of section 13 of the Interstate Commerce Act;

And it further appearing, that there have been brought in issue by the said petition rates and charges made or imposed by the authority of the State of North Carolina;

It is ordered, That in response to the said petition, an investigation be, and it is hereby, instituted, and that a hearing be held therein for the purpose of receiving evidence from the respondents hereafter designated and any other persons interested, to determine whether the rates and charges of the common carriers by railroad, or any of them, operating in the State of North Carolina, for the intrastate transportation of property, made or imposed by authority of the State of North Carolina, cause or will cause, by reason of the failure of such rates and charges to include increases corresponding to those permitted by this Commission for interstate traffic in the proceeding cited above, any undue or unreasonable advantage, preference, or prejudice, as between persons or localities in intrastate commerce, on the one hand, and interstate or foreign commerce, on the other hand, and any undue, unreasonable or unjust discrimination against interstate or foreign commerce; and to determine what rates and charges, if any, or what maximum or minimum, or maximum and minimum rates and charges shall be prescribed to remove the unlawful advantage, preference, prejudice, or discrimination, if any, that may be found to exist;

It is further ordered, That all common carriers by railroad operating within the State of North Carolina which are subject to the jurisdiction of this Commission be, and they are hereby, made respondents to this proceeding; that a copy of this order be served upon each of the said respondents, and that the State of North Carolina be notified of the proceeding by sending copies of this order and of said petition by registered mail to the Governor of the said State and to the North Carolina Utilities Commission at Raleigh, N. C.;

It is further ordered, That notice of this proceeding be given to the public by depositing a copy of this order in the office of the Secretary of the Commission, at Washington, D. C., for public inspection, and by filing a copy with the Director, Division of the Federal Register, Washington, D. C.;

And it is further ordered, That this proceeding be, and the same is hereby assigned for hearing May 11, 1954, at 9:30 o'clock a. m., U. S. Standard Time (or 9:30 a. m. local daylight saving time, if that time is observed) at the rooms of the North Carolina Utilities Commission, Raleigh, N. C., before Examiner P. O. Carter.

By the Commission, Division 1.

[SEAL] GEORGE W. LAIRD,
Secretary.

DEPARTMENT OF JUSTICE

Office of Alien Property

[Vesting Order 19122, Amdt.]

LOUIS VERSEL

In re: Real Property owned by the personal representatives, heirs, next of kin, legatees and distributees of Louis Versel, also known as Louis Vershel, deceased. D-28-13143.

Vesting Order 19122, dated January 19, 1953, is hereby amended to read as follows:

Under the authority of the Trading With the Enemy Act, as amended (50 U. S. C. App. and Sup. 1-40); Public Law 181, 82d Congress, 65 Stat. 451, Executive Order 9193, as amended by Executive Order 9567 (3 CFR, 1943 Cum Supp.; 3 CFR 1945 Supp.); Executive Order 9788 (3 CFR, 1946 Supp.) and Executive Order 9989 (3 CFR, 1948 Supp.), and pursuant to law, after investigation, it is hereby found:

1. That the personal representatives, heirs, next of kin, legatees and distributees of Louis Versel, also known as Louis Vershel, deceased, who there is reasonable cause to believe, on or since December 11, 1941, and prior to January 1, 1947 were residents of Germany, are, and prior to January 1, 1947 were, nationals of a designated enemy country (Germany);

2. That the property described as follows: An undivided one-half (1/2) interest in real property situated in the County of Aransas, State of Texas, and particularly described as Lot No. 7 in Block No. 229, being the same property conveyed to Louis Vershel, Sherman, Texas, by O. J. Dutton, W. Amos Moore and W. H. Wilcox, Trustees, by deed dated March 3, 1910, numbered 156 and recorded April 18, 1910, in the office of the County Clerk of Aransas County, Texas, together with all hereditaments, fixtures, improvements and appurtenances thereto, and any and all claims for rents, refunds, benefits or other payments arising from the ownership of such property,

is property which is and prior to January 1, 1947, was within the United States owned or controlled by, payable or deliverable to, held on behalf of or on account of, or owing to, or which is evidence of ownership or control by the personal representatives, heirs, next of kin, legatees and distributees of Louis Versel, also known as Louis Vershel, deceased, the aforesaid nationals of a designated enemy country (Germany);

and it is hereby determined:

3. That the national interest of the United States requires that the persons referred to in subparagraph 1 hereof be treated as persons who are and prior to January 1, 1947, were nationals of a designated enemy country (Germany).

All determinations and all action required by law, including appropriate consultation and certification, having been made and taken, and, it being deemed necessary in the national interest,

There is hereby vested in the Attorney General of the United States the property described in subparagraph 2 hereof subject to recorded liens, encumbrances and other rights of record held by or for persons who are not nationals of designated enemy countries, to be held, used, administered, liquidated, sold or otherwise dealt with in the interest of and for the benefit of the United States.

The terms "national" and "designated enemy country" as used herein shall have the meanings prescribed in section 10 of Executive Order 9193 as amended

Executed at Washington, D. C., on April 5, 1954.

For the Attorney General.

[SEAL] DALLAS S. TOWNSEND,
Assistant Attorney General, Director, Office of Alien Property.

[F. R. Doc. 54-2627; Filed Apr. 7, 1954; 8:54 a. m.]

ARAMO STIFTUNG

NOTICE OF INTENTION TO RETURN VESTED PROPERTY

Pursuant to section 32 (f) of the Trading With the Enemy Act, as amended, notice is hereby given of intention to return, on or after 30 days from the date of publication hereof, the following property, subject to any increase or decrease resulting from the administration thereof prior to return, and after adequate provision for taxes and conservatory expenses:

Claimant, Claim No., Property, and Location

Aramo-Stiftung, Vaduz, Liechtenstein, Claim No. 37840; $50,000 in cash in the Treasury of the United States.

Executed at Washington, D. C., on April 1, 1954.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 951]

OREGON

REVOKING EXECUTIVE ORDER NO. 5176 OF AUGUST 23, 1929

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910, c. 421, 36 Stat. 847 (43 U. S. C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 5176 of August 23, 1929, withdrawing the following-described revested Oregon and California Railroad grant lands for classification and in aid of legislation, is hereby revoked:

WILLAMETTE MERIDIAN

T. 40 S., R. 3 W.,
Sec. 5. S½NE¼SW¼, N½SE¼SW¼.

The area described contains approximately 40 acres.

The described lands shall not become subject to disposition of any kind prior to 10:00 a. m. on the 35th day after the date of this order. At that time they shall become subject to such disposition as may by law be made of the revested Oregon and California Railroad grant lands.

ORME LEWIS,
Assistant Secretary of the Interior.

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

TABLE OF FREQUENCY ALLOCATIONS

In the matter of amendment of § 2.104 (a) of the Commission's rules and regulations to effect certain editorial changes therein.

The Commission having under consideration the desirability of making certain editorial changes in § 2.104 (a) of its rules and regulations; and

It appearing, that the amendments adopted herein are editorial in nature, and, therefore, prior publication of Notice of Proposed Rule Making under the provisions of section 4 of the Administrative Procedure Act is unnecessary, and the amendments may become effective immediately; and

It further appearing, that the amendments adopted herein are issued pursuant to authority contained in sections 4 (i), 5 (d) (I) and 303 (r) of the Communications Act of 1934, as amended, and paragraph F-6 of the Commission's Order Defining the Functions and Establishing the Organizational Structure of the Office of the Secretary, dated February 14, 1952, as amended;

It is ordered, This 5th day of April 1954, that, effective immediately, § 2.104 (a) of the Commission's rules and regulations is revised as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

PART 11—INDUSTRIAL RADIO SERVICES

PART 16—LAND TRANSPORTATION RADIO SERVICES

USE OF CERTAIN RADIO FREQUENCIES BY NON-GOVERNMENT STATIONS

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 31st day of March 1954.

The Commission having under consideration the provisions of Parts 2, 11 and 16 with respect to the use of certain radio frequencies by non-Government stations; and

It appearing, that the frequency 40.68 Mc, which is allocated for use by Industrial, Scientific and Medical Equipment and which is within the band of frequencies 40–42 Mc reserved for United States Government stations, has been made available to be authorized to non-Government fixed stations located in the states of Pennsylvania and West Virginia only, for the specific purpose of transmitting hydrological and meteorological data in cooperation with agencies of the Federal Government, but subject to the condition that harmful interference shall not be caused to stations of the Federal Government; and

It further appearing, that the Table of Frequency Allocations contained in § 2.104 (a) should be amended to show the availability of the frequency 40.68 Mc to non-Government fixed stations for the above-described purposes and under the above-described limitations; and

It further appearing, that in accordance with the provisions of Part 2 of the Commission's rules, the frequency 27.255 Mc, within the frequency band 27.23–27.28 Mc, is available to be authorized to non-Government fixed, land or mobile stations subject to no protection from interference due to the operation of industrial, scientific and medical devices on the frequency 27.12 Mc; and

It further appearing, that for the convenience of the public, Parts 11 and 16 of the Commission's rules should be amended to reflect the availability of the frequencies 40.68 and 27.255 Mc for assignment to non-Government stations under the above-described conditions; and

It further appearing, that the proposed amendments are solely for the purpose of listing frequencies which have already been made available to the respective services for the indicated uses, by previous action of the Commission or by action of the Interdepartment Radio Advisory Committee, and that therefore general notice of proposed rule making, as prescribed by section 4 (a) of the Administrative Procedure Act, is unnecessary; and

It further appearing, that authority for this action is contained in Sections 4 (i) and 303 (r) of the Communications Act of 1934, as amended;

It is ordered, That, effective May 3, 1954, Part 2 of the Commission's Rules and Regulations is amended as set forth below; and

It is further ordered, That, effective May 3, 1954, Parts 11 and 16 of the Commission's rules and regulations are amended as set forth below.

Released: April 5, 1954.

(Sec. 4, 48 Stat. 1066, as amended: 47 U. S. C. 154. Interprets or applies Sec. 303, 48 Stat. 1082, as amended, 47 U. S. C. 303)

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

1. Amend § 2.104 (a) of the Commission's rules and regulations governing Frequency Allocation and Radio Treaty Matters as follows:

In column 5 of the Table of Frequency Allocations add an additional footnote titled (US29) for the frequency band 40–42 Mc to read as follows:

US29 For the specific purpose of transmitting hydrological and meteorological data in cooperation with agencies of the federal government, the frequency 40.68 Mc may be authorized to non-Government fixed stations in the states of Pennsylvania and West Virginia on the condition that harmful interference will not be caused to Government stations.

2. Amend §§ 11.253 (c), 11.303 (c), 11.353 (c), 11.503 (c) and 16.353 (c) by the addition of the frequency [1] 40.68 Mc to the frequencies listed therein, together with the following footnote referring thereto:

3. Amend §§ 11.254, 11.304, 11.354, 11.404, 11.454, and 11.504 by the addition of a new paragraph (d) to each, to read as follows:

(d) The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed stations in this service, on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 27.12 Mc.

3. Amend Part 16 by the insertion of new §§ 16.255, 16.304, 16.356, 16.404, 16.454 and 16.504, to read as follows:

§ 16.255 *Frequencies available for Base, Mobile and Operational Fixed Stations.* The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed stations in this service on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 27.12 Mc.

§ 16.304 *Frequencies available for Base, Mobile and Operational Fixed Stations.* The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed stations in this service on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 27.12 Mc.

§ 16.356 *Frequencies available for Base, Mobile and Operational Fixed Stations.* The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed stations in this service on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 27.12 Mc.

§ 16.404 *Frequencies available for Base, Mobile and Operational Fixed Stations.* The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed stations in this service on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 27.12 Mc.

§ 16.454 *Frequencies available for Base, Mobile and Operational Fixed Stations.* The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed stations in this service on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 27.12 Mc.

§ 16.504 *Frequencies available for Base, Mobile and Operational Fixed Stations.* The frequency 27.255 Mc is available for assignment to Base, Mobile and Operational Fixed stations in this service on a shared basis with other services, subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the frequency 27.12 Mc.

[F. R. Doc. 54–2697; Filed, Apr. 7, 1954; 4:55 p. m.]

[1] Use of the frequency 40.68 Mc is limited to stations located in the states of Pennsylvania and West Virginia only, and is subject to no protection from interference due to the operation of industrial, scientific, and medical devices on the same frequency.

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[File No. 21–145]

PART 28—SOLID SECTION STEEL WINDOW INDUSTRY

ORDER RESCINDING TRADE PRACTICE RULES

Whereas, the Commission on July 31, 1931, promulgated trade practice rules for the Solid Section Steel Window Industry which were codified in the Code of Federal Regulations (16 CFR Part 28): and

Whereas, it appears that the rules for this industry are general in form and in some respects obsolete, and that there is no interest on the part of said industry in a revision thereof; and

Whereas, under the circumstances proceedings for revision of the rules for this industry do not appear to be essential to the public interest:

It is ordered, That the said rules be and the same are hereby rescinded.

Issued: April 6, 1954.

By the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

[F. R. Doc. 54–2669; Filed, Apr. 8, 1954; 8:51 a. m.]

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supplement 23]

PART 42—IRREGULAR AIR CARRIER AND OFF-ROUTE RULES

EN ROUTE LIMITATIONS

The purpose of this amendment is to establish en route limitations for Aero Commander 520, Beech 50, Grumman G–21, and Lockheed 10A aircraft. The proposed rules were published on November 28, 1953, in 18 F. R. 7613; interested persons were afforded an opportunity to submit data, views, or arguments; and consideration has been given to all relevant matter presented. The following rules are hereby adopted. Section 42.80–6, published on January 10, 1950, in 15 F. R. 93 is amended to read as follows:

§ 42.80–6 *En route limitations on multi-engine aircraft with maximum allowable take-off weights below 12,500 pounds (CAA rules which apply to §§ 42.16 and 42.80).* The following en route limitations data, applicable to Aero Commander 520, Beech D18C, Beech D18S, Beech 50, Grumman G–21, Lockheed 10A, Lockheed 10E, and Lockheed 12A aircraft, shall be used in determining compliance with § 42.80. These data are presented in table 1 and figures 1 through 5. En route performance data on other aircraft weighing less than 12,500 pounds and operated under § 42.16 will be made available upon application to the Administrator.

TABLE 1—EN ROUTE LIMITATIONS

AERO COMMANDER 520

Weight in pounds [1]	Terrain clearance [2] in feet and climb speed in miles per hour (TIAS)	
	Feet [3]	Miles per hour
5,500	(3,480)	94.8
5,000	6,820	93.5
4,500	10,130	92.4

NOTE: Inoperative propeller windmilling.

[1] The maximum permissible weight under § 42.16 and § 42.82 is 5,420 pounds.
[2] Highest altitude of terrain over which airplane may be operated in compliance with CAR 42.82.
[4] The "terrain clearance" in parentheses is not usable under § 42.16 and § 42.82 because the minimum terrain altitude is 4,000 feet under § 42.82.

BEECH D–18C

BEECH 50

Weight in pounds	Terrain clearance [1] in feet and climb speed in miles per hour (TIAS)	
	Feet	Miles per hour
5,500	4,140	96.4
5,000	7,710	94.6
4,500	11,340	92.7

NOTE: Inoperative propeller windmilling.

[1] Highest altitude of terrain over which airplane may be operated in compliance with CAR 42.82.

GRUMMAN G–21

Weight in pounds [1]	Terrain clearance [2] in feet and climb speed in miles per hour (TIAS)	
	Feet [3]	Miles per hour
7,500	(3,420)	111.5
7,000	4,010	111.1
6,500	4,580	110.6
6,000	6,750	110.1
5,500	7,350	109.6

NOTE: Propeller idling in high pitch. Airplane is equipped with de-icers.

[1] The maximum permissible weight under § 42.16 and § 42.82 is 7,310 pounds.
[2] Highest altitude of terrain over which airplane may be operated in compliance with CAR 42.82.
[3] The "terrain clearance" in parentheses is not usable under § 42.16 and § 42.82 because the minimum terrain altitude is 4,000 feet under § 42.82.

LOCKHEED 10A

Weight in pounds [1]	Terrain clearance [2] in feet and climb speed in miles per hour TIAS			
	Propeller feathered		Propeller idling	
	Feet [3]	Miles per hour	Feet [3]	Miles per hour
10,500	(3,600)	94.8	[illegible]	92.9
10,000	4,280	93.6	(3,120)	92.3
9,500	5,020	93.1	4,060	92.5
9,000	7,200	92.8	5,000	92.1
8,500	8,250	92.4	7,180	91.7
8,000	9,350	92.0	8,420	91.4

[1] The maximum permissible weights under § 42.16 and § 42.82 are 9,750 pounds with propeller idling, 10,544 pounds with propeller feathered.
[2] Highest altitude of terrain over which airplane may be operated in compliance with CAR 42.82.
[3] The "terrain clearances" in parentheses are not usable under § 42.16 and § 42.82 because the minimum terrain altitude is 4,000 feet under § 42.82.

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 76]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

PROCEDURE ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility; class and identification, procedure No., effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound), altitudes; limiting distances	Minimum altitude over facility on final approach course (ft.)	Course and distance, facility to airport	Ceiling and visibility minimums: Condition	Type aircraft: 75 m. p. h. or less	Type aircraft: More than 75 m. p. h.	If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished

5. The ground controlled approach procedures prescribed in § 609.13 are amended to read in part:

GCA-ASR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the ground controller. From initial contact with GCA to final authorized landing minimums, the instructions of the GCA controller are mandatory except when (A) visual reference with ground is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach.

City and State, airport name, elevation, effective date	Radar terminal area, maneuvering altitudes by sectors and limiting distances	Ceiling and visibility minimums: Runway No.	Condition	Precision approach (PAR): 75 m. p. h. or less	Precision approach (PAR): More than 75 m. p. h.	Surveillance approach (ASR): 75 m. p. h. or less	Surveillance approach (ASR): More than 75 m. p. h.	Except when the ground controller may direct otherwise prior to final approach, a missed approach procedure shall be executed as provided below when (a) communication on final approach is lost for more than 5 seconds; (b) directed by ground controller, (c) visual reference is not established upon descent to the authorized landing minimums, or (d) landing is not accomplished
1	2	3	4	5	6	7	8	9
JACKSONVILLE, FLA. Imeson, "2" Effective upon commissioning of facility	1,800' # within 20 miles #Radar control must provide 3 miles separation from Danger Area (D–1616).	5, 9, 12, 18, 23, 27, 30. *36 All runways	S–dn C–dn S–dn C–dn T–dn A–dn	---------- ---------- ---------- ---------- 	---------- ---------- ---------- ---------- 	500–1 500–1 NA 500–1 300–1 800–2	500–1½ 500–1½ NA 500–1½ 300–1 800–2	Climb to 1,300 ft. on E course of Jacksonville LFR or 090° course from Jacksonville VOR, within 25 miles. *Straight-in on Runway 36 not authorized due to danger area S of approach area.

These procedures shall become effective on the dates indicated in Column 1 of the procedures.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

TITLE 7—AGRICULTURE

Chapter I—Agricultural Marketing Service (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

SUBPART—UNITED STATES STANDARDS FOR GRADES OF TOMATO SAUCE [1]

On May 29, 1953, a notice of proposed rule making was published in the FEDERAL REGISTER (18 F. R. 3096) regarding a proposed issuance of United States Standards for Grades of Tomato Sauce.

After consideration of all relevant matters presented, including the proposals set forth in the aforesaid notice, the following United States Standards for Grades of Tomato Sauce are hereby promulgated pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., 7 U. S. C., 1621 et seq.) and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953).

The standards are as follows:

PRODUCT DESCRIPTION AND GRADES

Sec.
52.2371 Product description.
52.2372 Grades of Tomato Sauce.

FILL OF CONTAINERS

52.2373 Recommended fill of container for tomato sauce.

FACTORS OF QUALITY

52.2374 Ascertaining the grade.
52.2375 Ascertaining the rating for the factors which are scored.
52.2376 Color.
52.2377 Consistency.
52.2378 Defects.
52.2379 Flavor.

LOT CERTIFICATION TOLERANCES

52.2380 Tolerances for certification of officially drawn samples.

SCORE SHEET

52.2381 Score sheet for tomato sauce.

AUTHORITY: §§ 52.2371 to 52.2381 issued under sec. 205, 60 Stat. 290, Pub Law 156, 83d Cong.; 7 U. S. C. 1624.

PRODUCT DESCRIPTION AND GRADES

§ 52.2371 *Product description.* Tomato sauce is the concentrated product prepared from the liquid extracted from mature, sound, whole tomatoes, the sound residue from preparing such tomatoes for canning, or the residue from partial extraction of juice, or any combination of these ingredients, to which is added salt and spices and to which may be added one or more nutritive sweetening ingredients, a vinegar or vinegars, and onion, garlic, or other vegetable flavoring ingredients. The refractive index of the tomato sauce at 20 degrees Centigrade is not less than 1.3461 nor more than 1.3541.

§ 52.2372 *Grades of tomato sauce.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of tomato sauce that possesses a good color; that possesses a good consistency; that is practically free from defects; that possesses a good flavor; that possesses a good finish; and that scores not less than 85 points when scored in accordance with the scoring system outlined in this subpart.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of tomato sauce that possesses a fairly good color; that possesses a fairly good consistency; that is fairly free from defects; that possesses a fairly good flavor; that possesses a good finish; and that scores not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of tomato sauce that fails to meet the requirements of "U. S. Grade C" or "U. S. Standard."

FILL OF CONTAINER

§ 52.2373 *Recommended fill of container for tomato sauce.* The recommended fill of container is not incorporated in the grades of the finished

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

product since fill of container, as such, is not a factor of quality for the purposes of these grades. It is recommended that each container of tomato sauce be filled as full as practicable without impairment of quality and that the product occupy not less than 90 percent of the capacity of the container.

FACTORS OF QUALITY

§ 52.2374 *Ascertaining the grade.* The grade of tomato sauce is ascertained by considering the factor of finish, which is not scored, and the ratings for the factors of color, consistency, defects, and flavor, which are scored. The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given for each such factor is:

Factors:	Points
Color	25
Consistency	25
Defects	25
Flavor	25
Total score	100

(b) "Good finish" means that the product is evenly comminuted and has a uniform, smooth texture.

§ 52.2375 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for each factor and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "21 to 25 points" means 21, 22, 23, 24, and 25 points).

§ 52.2376 *Color—(a) General.* The amount of red in the tomato sauce is determined by comparing the color of the product with that produced by spinning a combination of the following Munsell color discs:

Disc 1—Red (5R 2.6/13) (glossy finish).
Disc 2—Yellow (2.5YR 5/12) (glossy finish).
Disc 3—Black (N1) (glossy finish).
Disc 4—Gray (N4) (mat finish).

(b) *(A) classification.* Tomato sauce that possesses a good color may be given a score of 21 to 25 points. "Good color" means that the color is typical of tomato sauce made from well ripened red tomatoes and which has been properly prepared and properly processed. Such color contains as much or more red than that produced by spinning the specified Munsell color discs in the following combinations: 65 percent of the area of Disc 1; 21 percent of the area of Disc 2; 14 percent of the area of Disc 3 or of Disc 4, or 7 percent of the area of Disc 3, and 7 percent of the area of Disc 4, whichever most nearly matches the reflectance of the tomato sauce.

(c) *(C) classification.* If the tomato sauce possesses a fairly good color, a score of 17 to 20 points may be given. Tomato sauce that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the color is typical of tomato sauce and contains as much or more red than that produced by spinning the specified Munsel color discs in the following combinations: 53 percent of the area of Disc 1; 28 percent of the area of Disc 2; 19 percent of the area of either Disc 3 or 4, or 9½ percent of the area of Disc 3, and 9½ percent of the area of Disc 4, whichever most nearly matches the reflectance of the tomato sauce.

(d) *(SStd) classification.* Tomato sauce that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 16 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2377 *Consistency—(a) General.* The factor of consistency refers to the viscosity of the product and the tendency to hold its liquid portion in suspension.

(b) *(A) classification.* Tomato sauce that possesses a good consistency may be given a score of 22 to 25 points. "Good consistency" means that the tomato sauce shows no more than a slight separation of free liquid when poured on a flat grading tray; is not excessively stiff; and flows not more than 14 centimeters in 30 seconds at 20 degrees Centigrade in the Bostwick consistometer.

(c) *(C) classification.* If the tomato sauce possesses a fairly good consistency, a score of 18 to 21 points may be given. Tomato sauce that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good consistency" means that the tomato sauce may show a noticeable, but not excessive, separation of free liquid when poured on a flat grading tray; is not excessively stiff; and flows not more than 18 centimeters in 30 seconds at 20 degrees Centigrade in the Bostwick consistometer.

(d) *(SStd) classification.* Tomato sauce that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 17 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2378 *Defects—(a) General.* The factor of defects refers to the degree of freedom from defects, such as dark specks or scale-like particles, seeds, particles of seed, tomato peel, core material, or other similar substances. This factor is evaluated by observing a layer of the product on a smooth white, flat surface. Such layer is prepared by drawing a scraper with a clearance of 3/32 inch high by 7 inches long rapidly through the product in two horizontal planes so as to form an approximate square.

(b) *(A) classification.* Tomato sauce that is practically free from defects may be given a score of 21 to 25 points. "Practically free from defects" means that any defects present do not more than slightly affect the appearance or eating quality of the product.

(c) *(C) Classification.* If the tomato sauce is fairly free from defects, a score of 18 to 20 points may be given. Tomato sauce that falls into this classification shall not be scored above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that any defects present may be noticeable but are not so large, so numerous, or of such contrasting color as to seriously affect the appearance or eating quality of the product.

(d) *(SStd) classification.* Tomato sauce that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 17 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.2379 *Flavor—(a) (A) classification.* Tomato sauce that possesses a good flavor may be given a score of 21 to 25 points. "Good flavor" means a good, distinct flavor characteristic of good quality ingredients. Such flavor is free from scorching or any objectionable flavor of any kind.

(b) *(C) classification.* If the tomato sauce possesses only a fairly good flavor, a score of 17 to 20 points may be given. Tomato sauce that falls into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good flavor" means a flavor characteristic of the ingredients in which there may be slight traces of undesirable flavor, such as scorched, bitter, or astringent, but is free from objectionable or off-flavors of any kind.

(c) *(SStd) classification.* Tomato sauce that fails to meet the requirements of paragraph (b) of this section may be given a score of 0 to 16 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.2380 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of tomato sauce, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to the containers comprising the sample:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of such total scores; and

(5) All containers meet all applicable standards of quality promulgated by the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

SCORE SHEET

§ 52.2381 *Score sheet for tomato sauce.*

Type of container			---

Grade			---

1 Indicates limiting rule.

Effective time. The United States Standards for Grades of Tomato Sauce (which is the first issue) contained in this subpart will become effective thirty (30) days after the date of publication of this subpart in the FEDERAL REGISTER.

Dated: April 5, 1954.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator,
Marketing Services.

[F. R. Doc. 54-2649; Filed, Apr. 8, 1954; 8:47 a. m.]

PART 53—MEATS, PREPARED MEATS, AND MEAT PRODUCTS (GRADING, CERTIFICATION, AND STANDARDS)

SUBPART B—STANDARDS

DELETION OF DEFINITION OF VEAL AND CALF CARCASSES

Pursuant to the authority of sections 203 and 205 of the Agricultural Marketing Act of 1946 (7 U. S. C. 1622, 1624), § 53.101 of Title 7, Code of Federal Regulations, setting forth a definition of veal carcasses and calf carcasses, is hereby deleted.

This amendment eliminates provisions which are unnecessary in that they relate to matters more accurately and more fully covered by other provisions of the standards for veal and calf carcasses. This amendment does not affect in any way the manner in which the standards have been and will be applied in the conduct of the Federal meat grading service, and is merely formal and intended for clarification. Therefore, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003) it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making the amendment effective less than 30 days after its publication in the FEDERAL REGISTER.

(Sec. 205, 60 Stat. 1090; 7 U. S. C. 1624. Interprets or applies sec. 203, 60 Stat. 1087; 7 U. S. C. 1622)

This amendment shall become effective immediately upon publication in the FEDERAL REGISTER.

Done at Washington, D. C., this 6th day of April 1954.

ROY W. LENNARTSON,
Deputy Administrator,
Agricultural Marketing Service.

[F. R. Doc. 54-2624; Filed, Apr. 8, 1954; 8:45 a. m.]

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 51]

UNITED STATES CONSUMER STANDARDS FOR FRESH CARROTS [1]

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the United States Department of Agriculture is considering the revision of United States Consumer Standards for Fresh Carrots (7 CFR, Part 51; 18 F. R. 7085) pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953).

All persons who desire to submit written data, views or arguments for consideration in connection with the proposed standards should file the same with the Chief, Fresh Products Standardization and Inspection Branch, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, South Building, Washington 25, D. C., not later than 30 days after publication hereof in the FEDERAL REGISTER.

The proposed standards are as follows:

STYLES

Sec.
51.495 Bunched carrots.
51.496 Carrots with short-trimmed tops.
51.497 Topped carrots.

[1] Packing of the product in conformity with the requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

GRADES

Sec.
51.498 U. S. Grade A.
51.499 U. S. Grade B.

OFF-GRADE

51.500 Off-grade carrots.

STANDARD SIZING

51.501 Standard sizing.

DEFINITIONS

51.502 Similar varietal characteristics.
51.503 Firm.
51.504 Clean.
51.505 Fairly well colored.
51.506 Fairly well formed.
51.507 Fairly smooth.
51.508 Damage.
51.509 Length.
51.510 Well trimmed.
51.511 Diameter.
51.512 Serious damage.

AUTHORITY: §§ 51.495 to 51.512 issued under sec. 205, 60 Stat. 1090, 7 U. S. C. 1624; Pub. Law 156, 83d Cong.

STYLES

§ 51.495 *Bunched carrots.* "Bunched carrots" means untopped carrots which are tied in bunches.

§ 51.496 *Carrots with short-trimmed tops.* "Carrots with short-trimmed tops" means carrots which have attached leafstems ranging up to 4 inches in length.

§ 51.497 *Topped carrots.* "Topped carrots" means carrots which have practically all of the tops clipped off.

GRADES

§ 51.498 *U. S. Grade A.* U. S. Grade A consists of carrots of similar varietal characteristics the roots of which are firm, clean, fairly well colored, fairly well formed, fairly smooth; which are free from soft rot, and from damage caused by freezing, growth cracks, sunburn, pithiness, woodiness, internal discoloration, oil spray, dry rot, other disease, insects or mechanical or other means. Bunched carrots or carrots with short-trimmed tops shall have tops or leafstems, respectively, which are fresh and free from decay and free from damage caused by freezing, seedstems, yellowing or other discoloration, disease, insects or mechanical or other means. Tops of bunched carrots may be full length or clipped back but shall be not less than 12 inches nor more than 20 inches in length. Each bunch shall weigh not less than one pound, including the tops, and contain at least 4 carrots. Topped carrots shall be well trimmed. Carrots on the shown face shall be reasonably representative in size and quality of the contents of the container.

(a) Unless otherwise specified, the diameter of each carrot shall be not less than three-fourths inch nor more than 1½ inches.

(b) Tolerances: Incident to proper grading and handling, the following tolerances shall be permitted:

(1) *For defects of roots.* Five percent, by count, for carrot roots in any lot which fail to meet the requirements of the grade, other than for size, including therein not more than 1 percent for carrot roots affected by soft rot;

(2) *For defects of tops of bunched carrots.* Ten percent, by count, for bunches in any lot which fail to meet the requirements of the grade, including therein not more than 5 percent for decay;

(3) *For defects of leafstems of carrots with short-trimmed tops.* Ten percent, by count, for carrots in any lot which fail to meet the requirements of the grade, including therein not more than 5 percent for decay;

(4) *For off-sized carrot roots.* Five percent, by count, for carrots in any lot which are smaller than the specified minimum diameter, and 10 percent, by count, for carrots which are larger than the specified maximum diameter;

(5) *For off-length tops of bunched carrots.* Ten percent, by count, for bunches in any lot which fail to meet the specified minimum or maximum length; and,

(6) *For excess length of leafstems of carrots with short-trimmed tops.* Five percent, by count, for carrots in any lot which have leafstems in excess of the specified length.

§ 51.499 *U. S. Grade B.* U. S. Grade B consists of carrots which meet the requirements of U. S. Grade A except for the increased tolerance for defects of the roots specified below:

(a) *Tolerances.* Incident to proper grading and handling, the following tolerances shall be permitted:

(1) *For defects of roots.* Twenty percent, by count, for carrots in any lot which fail to meet the requirements of the grade other than for size: *Provided*, That not more than one-half of this amount, or 10 percent, shall be allowed for defects causing serious damage, including therein not more than 1 percent for carrot roots affected by soft rot;

(2) *For defects of tops of bunched carrots.* Ten percent, by count, for bunches in any lot which fail to meet the requirements of the grade, including therein not more than 5 percent for decay;

(3) *For defects of leafstems of carrots with short-trimmed tops.* Ten percent, by count, for carrots in any lot which fail to meet the requirements of the grade, including therein not more than 5 percent for decay:

(4) *For off-size carrot roots.* Five percent, by count, for carrots in any lot which are smaller than the specified minimum diameter, and 10 percent, by count, for carrots which are larger than the specified maximum diameter;

(5) *For off-length tops of bunched carrots.* Ten percent, by count, for bunches in any lot which fail to meet the specified minimum or maximum length; and,

(6) *For excess length of leafstems of carrots with short-trimmed tops.* Five percent, by count, for carrots in any lot which have leafstems in excess of the specified length.

OFF-GRADE

§ 51.500 *Off-grade.* Off-grade consists of carrots which fail to meet the requirements of the foregoing grades.

STANDARD SIZING

§ 51.501 *Standard sizing.* (a) Carrots in packages of 2 pounds or less may be certified as "Standard Sizing", provided the variation in diameter of the carrots in any individual package is not more than three-eighths inch and the variation in length is not more than 2½ inches.

(b) Not more than 20 percent of the packages in any lot may contain carrots which fail to meet the requirements for "Standard Sizing".

DEFINITIONS

§ 51.502 *Similar varietal characteristics.* "Similar varietal characteristics" means that the carrots in any lot are of the same general type. For example, carrots with a short, but blunt growth like the Oxheart variety, shall not be mixed with long or half-long carrots like the Imperator or Danvers varieties.

§ 51.503 *Firm.* "Firm" means that the carrot is not soft, flabby or shriveled.

§ 51.504 *Clean.* "Clean" means that the individual carrot is practically free from dirt or other foreign matter.

§ 51.505 *Fairly well colored.* "Fairly well colored" means that the carrot has an orange, orange red, or orange scarlet color, but not a pale orange or distinct yellow color.

§ 51.506 *Fairly well formed.* "Fairly well formed" means that the carrot is not so forked or misshapen as to materially affect its appearance or cause a loss of more than 3 percent, by weight, in the ordinary preparation for use.

§ 51.507 *Fairly smooth.* "Fairly smooth" means that the carrot is not rough, ridged, or covered with secondary rootlets to an extent which materially affects its appearance or causes a loss of more than 3 percent, by weight, in the ordinary preparation for use.

§ 51.508 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the individual carrot root or the general appearance of the carrot roots in the container, or causes a loss of more than 3 percent, by weight, in the ordinary preparation for use, or which materially affects the appearance or shipping quality of the leafstems or tops. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Growth cracks which are not shallow and not smooth, or which materially affect the appearance of the carrot;

(b) Sunburn which causes a loss of more than 3 percent, by weight, in the ordinary preparation for use, except that superficial light green color at the stem end, which does not materially affect the appearance of the root shall be permitted; and,

(c) Yellowing or other discoloration to the tops or leaf-stems when the appearance of the bunch or leafstems is materially affected. The appearance of the individual bunch shall be considered materially affected when the tops are trimmed to the extent that only a relatively few leaves remain. The appearance of bunches with tops having slight discoloration such as yellowing, browning, or other abnormal color affecting a few leaflets shall not be considered materially affected if the tops as a whole show a predominantly normal green color.

§ 51.509 *Length.* "Length" means the greatest dimension of the root measured from the crown to the lowest point which is not less than one-fourth inch in diameter.

§ 51.510 *Well trimmed.* "Well trimmed" means that the tops shall be cut back to not more than 1 inch in length, except that occasional uncut leaves or leafstems or new top growth exceeding this length which do not materially affect the appearance of the carrots in the container shall be permitted. Carrots may have tips of roots cut or broken off: *Provided*, That these cuts or breaks are small and fairly smooth and do not materially affect the appearance of the carrots in the container.

§ 51.511 *Diameter.* "Diameter" means the greatest dimension of the root measured at right angles to the longitudinal axis.

§ 51.512 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the individual carrot or the general appearance of the carrots in the container, or causes a loss of more than 20 percent, by weight, in the ordinary preparation for use.

Dated: April 5, 1954.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator, Marketing Services.

NOTICES

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

FRESH IRISH POTATOES

NOTICE OF DIVERSION PAYMENT PROGRAM UMD 3A

In order to encourage the further utilization of fresh Irish potatoes by diverting them from the normal channels of trade and commerce into potato starch and potato flour, in accordance with section 32, Public Law 320, 74th Congress, approved August 24, 1935, as amended, a diversion payment program was made effective on March 26, 1954, and will continue to and including June 30, 1954, as needed, in areas where surpluses have created serious marketing problems and where starch and flour manufacturing facilities are available. Payments for diversion to starch and flour will be made at the rate of 35 cents per hundredweight for diverted potatoes of specified minimum grades and sizes. Information relative to this diversion program may be obtained from the State ASC Offices in the States of Maine, Minnesota, North Dakota, and Idaho, or the Fruit and Vegetable Division, Agricultural Marketing Service, Department of Agriculture, Washington 25, D. C.

(Sec. 32, 49 Stat. 774, as amended, 7 U. S. C. and Sup. 612c)

Done at Washington, D. C., this 6th day of April 1954.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

FRESH IRISH POTATOES

NOTICE OF PURCHASE PROGRAM UMP 3A

In order to encourage the domestic consumption of fresh Irish potatoes by diverting them from the normal channels of trade and commerce in accordance with section 32, Public Law 320, 74th Congress, approved August 24, 1935, as amended, fresh Irish potatoes will be purchased during the period April 1, 1954, to and including June 30, 1954, as needed, in areas where surpluses have created serious marketing problems, and subject to limitations imposed by the capacity of available outlets to utilize supplies without waste and by the amount of funds available for such purchases. The purchase price, grade and size requirements, and other specifications will be contained in purchase announcements issued by State ASC Offices in the States of purchase. Information relative to this purchase program may be obtained from the State ASC Offices in the States of purchase or the Fruit and Vegetable Division, Agricultural Marketing Service, Department of Agriculture, Washington 25, D. C.

(Sec. 32, 49 Stat. 774, as amended, 7 U. S. C. and Sup. 612c)

Done at Washington, D. C., this 6th day of April 1954.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

IDAHO

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

APRIL 2, 1954.

An application, serial number Idaho 04203, for the withdrawal from all forms of appropriation under the public land laws, except existing valid claims of the lands described below was filed on April 27, 1953, by United States Forest Service, Department of Agriculture. The purposes of the proposed withdrawal: National forest research purposes.

For a period of 30 days from the date of publication of this notice, persons having cause to object to the proposed withdrawal may present their objections in writing to the Regional Administrator, Region I, Bureau of Land Management, Department of the Interior at Swan Island Station, Portland 18, Oregon. In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where proponents of the order can explain its purpose.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER, either in the form of a public land order or in the form of a notice of determination if the application is rejected. In either case, a separate notice will be sent to each interested party of record.

The lands involved in the application are:

BOISE MERIDIAN

T. 2 N., R. 4 E.,
Sec. 12, S½SE¼,
Sec. 13, Lots 1 and 2, N½NE¼.
T. 2 N., R. 5 E.,
Sec. 7, S½SW¼, NE¼,
Sec. 8, NW¼, N½NE¼, SW¼NE¼,
Sec. 18, W½NW¼, NE¼NW¼, Lot 3.
T. 3 N., R. 46 E.,
Sec. 30, All except the 16 acres already withdrawn 10/23/07 for the Trail Creek Administrative Site.
T. 4 N., R. 5 E.,
Sec. 10, SW¼SE¼, SE¼SW¼.
T. 5 N., R. 6 E.,
Sec. 4, Lots 3, 4, 5, 6, 11 and 12, and SW¼,
Secs. 5, 6, 7, 8 and 9, All,
Sec. 10, SW¼,
Sec. 15, W½,
Secs. 16, 17 and 18, All,
Sec. 19, Lots 1 and 2, E½NW¼, NE¼,
Sec. 20, N½.
T. 6 N., R. 5 E.,
Sec. 22, W½NW¼, SE¼NW¼, NE¼, SW¼, N½SE¼, W½SW¼SE¼, E½SE¼SE¼,
Sec. 23, SW¼NW¼, NW¼SW¼,
Sec. 27, W½NW¼NE¼.
T. 9 N., R. 5 E.,
Secs. 28, 33 and 34, All.
T. 9 N., R. 44 E.,
Sec. 14, All,
Sec. 23, E½, N½NW¼, S½SW¼.

Also an unsurveyed area described as follows: Beginning at corner No. 25 of the Ditch Creek Placer Mining Claim No. 1120; thence N 4° 42' W. 1222.2 ft. to corner No. 26 of the Ditch Creek Placer Mining Claim; thence N 4° 58' E. 1416.1 ft. to corner No. 27 of the Ditch Creek Placer Mining Claim; then N 5° 34' E. 1307.6 ft. to corner No. 28 of the Ditch Creek Placer Mining Claim; thence E. 2490.70 ft. to a point; thence S. 3930.31 ft. to a point; thence W. 2640.00 ft. to the point of beginning at corner No. 25 of the Ditch Creek Placer Mining Claim; containing 238.31 acres, more or less.

The lands described aggregate 12,356.89 acres.

The lands described are situated within national forests, and it appears that they are suitable for the purpose for which the withdrawal is requested and that the withdrawal of the lands subject to existing valid claims will be in the public interest.

JAMES F. DOYLE,
Acting Regional Administrator.

Office of the Secretary

TULE RIVER TRIBE OF CALIFORNIA

FEDERAL INDIAN LIQUOR LAWS

Pursuant to the act of August 15, 1953 (Pub. Law 277, 83d Cong., 1st Sess.), I certify that the following ordinance relating to the application of the Federal Indian liquor laws on the Tule River Reservation was duly adopted by the Tule River Tribe of California which has jurisdiction over the area of Indian country included in the resolution:

Whereas Public Law 277, 83d Congress, approved August 15, 1953, provides that sections 1154, 1156, 3113, 3488 and 3618 of title 18, United States Code, commonly referred to as the Federal Indian liquor laws, shall not apply to any act or transaction within any area of Indian country provided such act or transaction is in conformity with both the laws of the State in which such act or transaction occurs and with an ordinance duly adopted by the tribe having jurisdiction over such area of Indian country, certified by the Secretary of the Interior, and published in the FEDERAL REGISTER.

Therefore, be it resolved that the introduction, sale or possession of intoxicating beverages shall be lawful within the Indian country under the jurisdiction of the Tule River Tribe: *Provided*, That such introduction, sale or possession is in conformity with the laws of California.

Be it further resolved that any tribal laws, resolutions or ordinances heretofore enacted which prohibit the sale, introduction or possession of intoxicating beverages are hereby repealed.

ORME LEWIS,
Assistant Secretary of the Interior.

FEDERAL POWER COMMISSION

[Docket No. G-2368]

TRANSCONTINENTAL GAS PIPE LINE CORP.

ORDER DENYING PETITIONS TO INTERVENE AND FIXING DATE OF HEARING

Transcontinental Gas Pipe Line Corporation (Applicant), a Delaware corporation, having its principal place of business in Houston, Texas, filed, on February 10, 1954, an application for a certificate of public convenience and necessity, pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of certain natural gas facilities as described in said application. Subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on February 27, 1954 (19 F. R. 1131, 1132), petitions for leave to intervene were filed by the following parties on the dates indicated:

Petitioner and Date Filed

United Gas Improvement Company, March 5, 1954.

Consolidated Edison Company of New York, Inc., March 12, 1954.

Long Island Lighting Company, March 12, 1954.

Brooklyn Union Gas Company, March 15, 1954.

City of Lawrenceville, Georgia, March 15, 1954.

Municipalities of Elberton, Hartwell, Toccoa and Winder, Georgia, March 15, 1954.

Owens-Corning Fiberglas Corporation, March 15, 1954.

Philadelphia Electric Company, March 15, 1954.

Public Service Electric and Gas Company, March 15, 1954.

Tennessee Gas Transmission Company, March 15, 1954.

All of the aforesaid petitioners, with the exception of Tennessee Gas Transmission Company (Tennessee), are existing customers of Applicant and seek to intervene in this proceeding on the ground that their interests may be affected by the Commission's action. In addition, several of the petitioners seek to purchase additional volumes of natural gas from Applicant.

Owens-Corning Fiberglas Corporation (Owens-Corning) is an existing customer of Applicant under a 20-year contract providing for "interruptible" deliveries. On December 11, 1953, Applicant virtually suspended deliveries to Owens-Corning as well as to Sun Oil Company in order to comply with the Commission order issued on that date allocating Applicant's capacity to its resale customers. Owens-Corning is presently receiving gas from Piedmont Natural Gas Company under an emergency arrangement covering the period from January 15, 1954, to November 1, 1955. Owens-Corning, by its petition, seeks to require service by Applicant on a firm basis or to provide "satisfactory service for petitioner's operations after November 1, 1955, in the manner in which it is contemplated such service will be provided for the Sun Oil Company or in any other manner."

The facilities for which authority is sought herein will increase Applicant's present sustained delivery capacity of 540,000 Mcf per day by 20,000 Mcf per day. Of this increase, 10,000 Mcf per day of capacity is to be used to deliver natural gas on a firm basis from Sun Oil Company's own supply to its refineries at Marcus Hook, Pennsylvania, under a transportation agreement between Applicant and Sun Oil Company. The remaining 10,000 Mcf per day of additional capacity is to be used by Applicant to enable it better to meet its present commitments under allocations totalling 555,000 Mcf per day authorized by orders of the Commission in Docket Nos. G-704, G-1277 and G-1411, et al.

Tennessee's petition to intervene states that the application in the instant docket involves a proposal directly related to Transcontinental's application in Docket No. G-2367 proposing to render additional service in the New York-New Jersey metropolitan area. Since Docket No. G-2367 is competitive to Tennessee's proposal in Docket No. G-2331,[1] Tennessee claims that it has an interest in Docket No. G-2368 which may be directly affected.

This application does not, however, propose to provide additional capacity in excess of that required to comply with extant Commission orders. There are no interests alleged by petitioners which can be adversely affected by the granting of this application.

Applicant has requested that its application be heard under the shortened procedure provided by § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, and no request to be heard, protest or petition has been filed other than those listed above and denied as hereinafter ordered.

The Commission finds:

(1) None of the above-listed petitioners has shown an interest in this proceeding, which can be adversely affected in the event of issuance of the requested certificate, that participation by such petitioners herein is or may be in the public interest, or that good cause exists for the granting of said respective petitions.

(2) This proceeding is a proper one for disposition under the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

The Commission orders:

(A) The petitions of the above-named petitioners for leave to intervene in this proceeding be and the same hereby are denied.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on April 26, 1954 at 9:30 a. m., e. d. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by the application: *Provided, however,* That the Commission may, after a noncontested hearing, forthwith dispose of the proceedings pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(C) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: March 31, 1954.

Issued: April 5, 1954.

By the Commission.

[SEAL] LEON M. FUQUAY,
Secretary.

[F. R. Doc. 54-2648; Filed, Apr. 8, 1954; 8:46 a. m.]

[1] Docket Nos. G-2331 and G-2367 have been consolidated for the purpose of hearing by order issued March 10, 1954, and Tennessee has been permitted to intervene in the latter docket.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 29094]

FERTILIZER FROM WOODWARD, ALA., TO COVINGTON, GA.

APPLICATION FOR RELIEF

APRIL 6, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for the Birmingham Southern Railroad Company, and the Central of Georgia Railway Company.

Commodities involved: Fertilizer and fertilizer materials, carloads.

From: Woodward, Ala.

To: Covington, Ga.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1221, supp. 54.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
Secretary.

[F. R. Doc. 54-2652; Filed, Apr. 8, 1954; 8:48 a. m.]

[4th Sec. Application 29095]

GRAIN FROM WILSON, N. C., TO SUMTER, S. C.

APPLICATION FOR RELIEF

APRIL 6, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for the Norfolk Southern Railway Company and Seaboard Air Line Railroad Company.

Commodities involved: Barley, corn, oats, rye, soybeans or wheat, in bulk, carloads.

From: Wilson, N. C.

To: Sumter, S. C.

Grounds for relief: Competition with rail carriers, circuitous routes, and competition with motor carriers.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1325, supp. 41.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 29096]

PLASTER AND RELATED ARTICLES FROM FORT DODGE, IOWA, TO KANSAS CITY, MO.-KANS., AND LEAVENWORTH, KANS.

APPLICATION FOR RELIEF

APRIL 6, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: W. J. Prueter, Agent, for carriers parties to schedule listed below.

Commodities involved: Plaster and related articles, plaster-wallboard and related articles, carloads.

From: Fort Dodge, Iowa.

To: Kansas City, Mo.-Kans., and Leavenworth, Kans.

Grounds for relief: Competition with rail carriers, circuitous routes, and competition with motor carriers.

Schedules filed containing proposed rates: W. J. Prueter, Agent, I. C. C. No. A-3917, supp. 33.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

ALCOHOLS FROM KINGS MILL, TEX., TO OFFICIAL TERRITORY

APPLICATION FOR RELIEF

APRIL 6, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Alcohols and related articles, carloads and tank-car loads.

From: Kings Mill, Texas.

To: Points in Official territory (east of Illinois-Indiana State line).

Grounds for relief: Rail competition, circuity, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 4064, supp. 21.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. PIPE FITTINGS FROM THE SOUTH TO OFFICIAL AND ILLINOIS TERRITORIES

APPLICATION FOR RELIEF

APRIL 6, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Pipe fittings, brass, bronze or copper, viz.: elbows, couplings and joints, carloads.

From: Points in southern territory.

To: Points in official and Illinois territories.

Grounds for relief: Rail competition, circuity, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 971, supp. 105.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

To: Minneapolis, Minnesota Transfer and St. Paul, Minn.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3863, supp. 22.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
Secretary.

[4th Sec. Application 29102]

ALCOHOL FROM MUSCATINE, IOWA, TO BOSTON, MASS.

APPLICATION FOR RELIEF

APRIL 6, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to his tariff I. C. C. No. 4542, pursuant to fourth-section order No. 17220.

Commodities involved: Alcohol, in bond, in tank-car loads.

From: Muscatine, Iowa.

To: Boston, Mass.

Grounds for relief: Competition with rail carriers and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
Secretary.

FEDERAL REGISTER

VOLUME 19 NUMBER 70

Washington, Saturday, April 10, 1954

TITLE 6—AGRICULTURAL CREDIT

Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

Subchapter B—Loans, Purchases, and Other Operations

[1953 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Barley]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1953-CROP BARLEY RESEAL LOAN PROGRAM

A reseal loan program has been announced for 1953-crop barley. The 1953 C. C. C. Grain Price Support Bulletin 1 (18 F. R. 1960, 3705 and 19 F. R. 1149), issued by the Commodity Credit Corporation and containing the general requirements with respect to price support operations for grains and related commodities produced in 1953, supplemented by Supplement 1, Barley (18 F. R. 1963, 4617, 5131, 5617 and 7813), containing the specific requirements for the 1953-crop barley price support program, is hereby further supplemented as follows:

Sec.

421.36 Applicable sections of 1953 C. C. C. Grain Price Support Bulletin 1, and Supplement 1, Barley.
421.37 Availability.
421.38 Eligible producer.
421.39 Eligible barley.
421.40 Approved storage.
421.41 Approved forms.
421.42 Quantity eligible for resealing.
421.43 Additional service charges.
421.44 Interest rate.
421.45 Transfer of producer's equity.
421.46 Storage and track-loading payments.
421.47 Maturity and satisfaction.
421.48 Support rates.
421.49 CSS Commodity offices.

AUTHORITY: §§ 421.36 to 421.49 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 301, 401, 63 Stat. 1054; 15 U. S. C. Sup., 714c, 7 U. S. C. Sup., 1421, 1447.

§ 421.36 *Applicable sections of 1953 C. C. C. Grain Price Support Bulletin 1 and Supplement 1, Barley.* The following sections of the 1953 C. C. C. Price Support Bulletin 1, and Supplement 1, Barley, published in 18 F. R. 1960, 1969, 3705, 4617, 5131, 5617, 7813 and 19 F. R. 1149, shall be applicable to the 1953 Barley Reseal Loan Program: § 421.1 *Administration;* § 421.5 *Approved lending agencies;* § 421.8 *Liens;* § 421.10 *Set-offs;* § 421.13 *Safeguarding the commodity;* § 421.14 *Insurance on farm-storage loans;* § 421.15 *Loss or damage to the commodity;* § 421.16 *Personal liability of the producer;* § 421.17 *Release of the commodity under loan;* § 421.19 *Foreclosure;* § 421.20 *Purchase of notes;* § 421.30 *Determination of quantity;* § 421.31 *Determination of quality.* Other sections of the 1953 Barley Price Support Program shall be applicable to the extent indicated in this subpart.

§ 421.37 *Availability*—(a) *Area.* The reseal program will be available in the States of California, Colorado, Idaho, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wisconsin and Wyoming. Under this program, 1953-crop farm-storage loans will be extended and farm-storage loans will be made on 1953-crop barley covered by purchase agreements. Neither warehouse-storage loans nor purchase agreements will be available to producers under this program.

(b) *Time.* (1) The producer who desires to participate in the reseal loan program must file an application for a farm-storage reseal loan with the county committee. In the case of a farm-storage loan, the producer will be required to apply for his reseal loan before the final date for delivery specified in the delivery instructions issued to him by the county committee.

(2) The producer who signed a purchase agreement on farm-stored barley is required, under the 1953 Barley Price Support Program to notify the county committee not later than April 30, 1954, if he intends to deliver the barley to CCC. If the producer has notified the county committee, on or before April 30, 1954, of his intention to deliver the barley or to participate in this program, he may obtain a farm-storage loan on the barley. The loan documents must be executed by the producer on or before the final date for delivery specified in the delivery

§ 421.38 *Eligible producer.* An eligible producer shall be any individual, partnership, association, corporation, or other legal entity who produced the barley in 1953 as landowner, landlord, tenant, or sharecropper and who either completed a farm-storage loan or signed a purchase agreement on farm-storage barley of the 1953 crop.

§ 421.39 *Eligible barley.* To be eligible, the barley must have been produced in 1953, must meet the requirements for eligible barley set forth in § 421.28 (c), must be in farm storage, must never have been commingled with barley produced by others, and must be under loan or covered by a purchase agreement.

(a) *Extended farm-storage loans.* If a producer makes application to extend his farm-storage loan, the commodity loan inspector shall, with the producer, reinspect the barley and the farm-storage structure in which the barley is stored. If recommended by either the commodity loan inspector or the producer, a sample of the barley shall be taken and submitted for grade analysis.

(b) *Farm-Storage barley covered by purchase agreement.* If a producer makes application for a farm-storage loan on barley covered by a purchase agreement, the commodity loan inspector shall inspect the barley and storage structure, obtain a sample if the barley and structure appear eligible, and proceed in the regular manner for the inspection of a commodity to be placed under loan.

§ 421.40 *Approved storage.* Barley covered by any loans extended and any new loans completed must be stored in structures which meet the requirements for farm-storage loans as provided in § 421.6 (a). Consent for storage for any loans extended or new loans completed must be obtained by the producer for the period ending June 30, 1955, if the structure is owned or controlled by someone other than the producer, or if the lease expires prior to June 30, 1955.

§ 421.41 *Approved forms.* (a) The approved forms, which together with the provisions of this subpart govern the rights and responsibilities of the producer, shall be a producer's note, Commodity Loan Form A, secured by a chattel mortgage on Commodity Loan Form AA, an application form, and such other forms as may be prescribed by CCC. Notes and chattel mortgages must have State and documentary revenue stamps affixed thereto where required by law.

(b) Where required by State law, a new producer's note and chattel mortgage shall be completed when a farm-storage loan is extended.

§ 421.42 *Quantity eligible for reseal-ing.* (a) The quantity of barley eligible for reseal on an extended farm-storage loan will be the quantity shown on the original note and chattel mortgage, less any quantity delivered or redeemed.

(b) A producer may obtain a loan on not in excess of the quantity of barley specified in the purchase agreement, minus any quantity of the barley under such purchase agreement (1) which has been previously placed under a loan or (2) on which he exercises his option to sell to CCC.

§ 421.43 *Additional service charges.* (a) When a farm-storage loan is extended, the producer will not be required to pay an additional service charge.

(b) At the time a farm-storage loan is made to the producer on barley covered by a purchase agreement, the producer shall pay an additional service charge of ½ cent per bushel on the number of bushels placed under loan, or $1.50, whichever is greater. No refund of service charges will be made.

§ 421.44 *Interest rate.* Beginning May 1, 1954, reseal loans shall bear interest at the rate of 3½ percent per annum, except that where there is a default in satisfaction of the loan the deficiency shall bear interest at the rate of 6 percent per annum from the date of default.

§ 421.45 *Transfer of producer's equity.* The producer shall not transfer either his remaining interest in or his right to redeem the barley mortgaged as security for a loan under this program. A producer who wishes to liquidate all or part of his loan by contracting for the sale of the barley must obtain written prior approval of the county committee on Commodity Loan Form 12 to remove the barley from storage when the proceeds of the sale are needed to repay all or any part of the loan. Any such approval shall be subject to the terms and conditions set out in Commodity Loan Form 12, copies of which may be obtained by producers or prospective purchasers at the office of the county committee.

§ 421.46 *Storage and track-loading payments*—(a) *Storage payment.* A reseal storage payment will be made as follows:

(1) *Storage payment for full reseal period.* A storage payment computed at the rate of 15 cents per bushel will be made to the producer on the quantity involved if he (i) redeems from the loan on or after April 30, 1955, (ii) delivers the barley to CCC on or after April 30, 1955, or (iii) delivers the barley to CCC prior to April 30, 1955, pursuant to demand by CCC for repayment of the loan solely for the convenience of CCC, if the commodity was not damaged or otherwise impaired due to negligence on the part of the producer.

(2) *Prorated storage payment.* (i) A prorated storage payment computed at the rate of .00049 per bushel a day but not to exceed 15 cents per bushel, according to the length of time the quantity of barley involved was in store after June 30, 1954, will be made to the producer (a) in the case of loss assumed by CCC under the provisions of the loan program, (b) in the case of barley redeemed from the loan prior to April 30, 1955, and (c) in the case of barley delivered to CCC pursuant to its demand and not solely for the convenience of CCC, or upon request of the producer and with the approval of CCC, prior to April 30, 1955: *Provided, however,* That no storage payment will be made where the delivered commodity is damaged or otherwise impaired due to negligence on the part of the producer. In the case of losses assumed by CCC, the period for computing the storage payment shall end on the date of the loss; and in the case of redemptions through the date of repayment.

(ii) In no case will any storage payment be made where the producer has made any false representation in the loan documents or in obtaining the loan, or where the commodity has been abandoned, or where there has been conversion on the part of the producer.

(b) *Track-loading payment.* A track-loading payment of 2 cents per bushel will be made to the producer on barley delivered to CCC, in accordance with instructions of the county committee, on track at a country point.

§ 421.47 *Maturity and satisfaction.* (a) Loans will mature on demand but not later than April 30, 1955. The producer must pay off his loan, plus interest, on or before maturity or deliver the mortgaged barley in accordance with the instructions of the county committee. Credit will be given at the applicable settlement value according to grade and/or quality for the total quantity delivered, provided the total quantity delivered was stored in the structure(s) in which the barley under loan was stored. The provisions of § 421.18 (a) (1), (e) and (f) and of § 421.35 (a) (1), and (2) shall be applicable hereto.

(b) If the settlement value of the barley delivered exceeds the amount due on the loan, the amount of the excess shall be paid to the producer by sight draft drawn on CCC by the ASC county office.

(c) If the settlement value of the barley delivered is less than the amount due on the loan, the amount of the deficiency plus interest thereon shall be paid by the producer to CCC and may be set off against any payment which would otherwise be paid to the producer under any agricultural programs determined by the Secretary of Agriculture, or any other payments which are due or may become due to the producer from CCC or any other agency of the United States.

§ 421.48 *Support rates.* (a) The support rate for an extended farm-storage loan shall remain the same as for the original loan. The support rate for barley covered by a purchase agreement placed under a farm-storage loan shall be the same as the support rate established for the barley in § 421.33 (c).

(b) Any discounts established for variation in quality as shown in the 1953 Barley Price Support Program Bulletin shall apply.

§ 421.49 *CSS commodity offices.* The CSS commodity offices and the areas served by them are shown below:

Chicago 5, Ill., 623 South Wabash Avenue: Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

Dallas 26, Texas, 3306 Main Street: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas.

Kansas City 6, Missouri, 911 Walnut Street: Colorado, Kansas, Missouri, Nebraska, Wyoming.

instructions, or on or before June 30, 1954, if the producer has not requested delivery instructions. The loan documents must be presented for disbursement within 15 days after execution

(c) *Source.* A producer desiring to participate in the reseal loan program should make application to the county committee which approved his loan or purchase agreement. Disbursements of loans completed on barley covered by purchase agreements shall be made to producers by ASC county offices by means of sight drafts drawn on CCC or by approved lending agencies under agreements with CCC.

Minneapolis 8, Minnesota, 1006 West Lake Street: Minnesota, Montana, North Dakota, South Dakota, Wisconsin.

Portland 5, Oregon, 515 Southwest Tenth Avenue: Arizona, California, Idaho, Nevada, Oregon, Utah, Washington.

Issued this 7th day of April 1954.

[SEAL] J. A. McCONNELL,
Executive Vice President,
Commodity Credit Corporation.

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1953-CROP WHEAT RESEAL LOAN PROGRAM

A reseal loan program has been announced for 1953-crop wheat. The 1953 CCC Grain Price Support Bulletin 1 (18 F. R. 1960, 3705 and 19 F. R. 1149), issued by the Commodity Credit Corporation and containing the general requirements with respect to price support operations for grains and related commodities produced in 1953, supplemented by Supplements 1 and 2, Wheat (18 F. R. 2733, 3979, 4153, 4489, 4990, 5131, 5465, 5619, 6281, and 6523), containing the specific requirements for the 1953-crop wheat price support program, is hereby further supplemented as follows:

Sec.
421.112 Applicable sections of 1953 CCC Grain Price Support Bulletin 1, and Supplements 1 and 2, Wheat.
421.113 Availability.
421.114 Eligible producer.
421.115 Eligible wheat.
421.116 Approved storage.
421.117 Approved forms.
421.118 Quantity eligible for resealing.
421.119 Additional service charges.
421.120 Interest rate.
421.121 Transfer of producer's equity.
421.122 Storage and track-loading payments.
421.123 Maturity and satisfaction.
421.124 Support rates.
421.125 CSS commodity offices.

AUTHORITY: §§ 421.112 to 421.125 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 101, 401, 63 Stat. 1051, 1054; 15 U. S. C. Sup. 714c, 7 U. S. C. Sup. 1441, 1421.

§ 421.112 *Applicable sections of 1953 CCC Grain Price Support Bulletin 1, and Supplements 1 and 2, Wheat.* The following sections of the 1953 CCC Grain Price Support Bulletin 1, and Supplements 1 and 2, Wheat, published in 18 F. R. 1960, 2733, 3705, 3979, 4153, 4489, 4990, 5131, 5465, 5619, 6281 and 6523 and 19 F. R. 1149, shall be applicable to the 1953 Wheat Reseal Loan Program: § 421.1 *Administration;* § 421.5 *Approved lending agencies;* § 421.8 *Liens;* § 421.10 *Set-offs;* § 421.13 *Safeguarding the commodity;* § 421.14 *Insurance on farm-storage loans;* § 421.15 *Loss or damage to the commodity;* § 421.16 *Personal liability of the producer;* § 421.17 *Release of the commodity under loan;* § 421.19 *Foreclosure;* § 421.20 *Purchase of notes;* § 421.105 *Determination of quantity;* § 421.106 *Determination of quality.* Other sections of the 1953 Wheat Price Support Program shall be applicable to the extent indicated in this subpart.

§ 421.113 *Availability*—(a) *Area.* The reseal program will be available in the States of California, Colorado, Idaho, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wisconsin and Wyoming. Under this program, 1953-crop farm-storage loans will be extended and farm-storage loans will be made on 1953-crop wheat covered by purchase agreements. Neither warehouse-storage loans nor purchase agreements will be available to producers under this program.

(b) *Time.* (1) The producer who desires to participate in the reseed loan program must file an application for a farm-storage reseal loan with the county committee. In the case of a farm-storage loan, the producer will be required to apply for extension of his loan before the final date for delivery specified in the delivery instructions issued to him by the county committee.

(2) The producer who signed a purchase agreement on farm-stored wheat is required, under the 1953 Wheat Price Support Program, to notify the county committee not later than April 30, 1954, if he intends to deliver the wheat to CCC. If the producer has notified the county committee, on or before April 30, 1954, of his intention to deliver the wheat or to participate in this program, he may obtain a farm-storage loan on the wheat. The loan documents must be executed by the producer on or before the final date for delivery specified in the delivery instructions or, on or before June 30, 1954, if the producer has not requested delivery instructions. The loan documents must be presented for disbursement within 15 days after execution.

(c) *Source.* A producer desiring to participate in the reseal loan program should make application to the county committee which approved his loan or purchase agreement. Disbursements of loans completed on wheat covered by purchase agreements shall be made to producers by ASC county officers by means of sight drafts drawn on CCC or by approved lending agencies under agreements with CCC.

§ 421.114 *Eligible producer.* An eligible producer shall be any individual, partnership, association, corporation, or other legal entity who produced the wheat in 1953 as landowner, landlord, tenant, or sharecropper and who either completed a farm-storage loan or signed a purchase agreement on farm-storage wheat of the 1953 crop.

§ 421.115 *Eligible wheat.* To be eligible, the wheat must have been produced in 1953, must be in farm-storage, must never have been commingled with wheat produced by others, must be under loan or covered by a purchase agreement, and must meet the requirements of eligibility for loans as set forth in § 421.103 (c) and (e).

(a) *Extended farm-storage loans.* If a producer makes application to extend his farm-storage loan, the commodity loan inspector shall, with the producer reinspect the wheat and farm-storage structure in which the wheat is stored. If recommended by either the commodity loan inspector or the producer, a sample of the wheat shall be taken and submitted for grade analysis.

(b) *Farm-storage wheat covered by purchase agreement.* If a producer makes application for a farm-storage loan on wheat covered by a purchase agreement, the commodity loan inspector shall inspect the wheat and storage structure, obtain a sample if the wheat and structure appear eligible, and proceed in the regular manner for the inspection of a commodity to be placed under loan.

§ 421.116 *Approved storage.* Wheat covered by any loans extended and any new loans completed must be stored in structures which meet the requirements for farm-storage loans as provided in § 421.6 (a). Consent for storage for any loans extended or new loans completed must be obtained by the producer for the period ending May 31, 1955, if the structure is owned or controlled by someone other than the producer, or if the lease expires prior to May 31, 1955.

§ 421.117 *Approved forms.* (a) The approved forms, which together with the provisions of this subpart govern the rights and responsibilities of the producer, shall be a producer's note, Commodity Loan Form A, secured by a chattel mortgage on Commodity Loan Form AA, an application form, and such other forms as may be prescribed by CCC. Notes and chattel mortgages must have State and documentary revenue stamps affixed thereto where required by law.

(b) Where required by State law, a new producer's note and chattel mortgage shall be completed when a farm-storage loan is extended.

§ 421.118 *Quantity eligible for resealing.* (a) The quantity of wheat eligible for reseal on an extended farm-storage loan, will be the quantity shown on the original note and chattel mortgage, less any quantity delivered or redeemed.

(b) A producer may obtain a loan on not in excess of the quantity of wheat specified in the purchase agreement, minus any quantity of the wheat under such purchase agreement (1) which has been previously placed under loan or (2) on which he exercises his option to sell to CCC.

§ 421.119 *Additional service charges.* (a) When a farm-storage loan is extended, the producer will not be required to pay an additional service charge.

(b) At the time a farm-storage loan is made to the producer on wheat covered by a purchase agreement, the producer shall pay an additional service charge of ½ cent per bushel on the number of bushels placed under loan, or $1.50, whichever is greater. No refund of service charges will be made.

§ 421.120 *Interest rate.* Beginning May 1, 1954, reseal loans shall bear interest at the rate of 3½ percent per annum, except that where there is a default in satisfaction of the loan the deficiency shall bear interest at the rate of 6 percent per annum from the date of default.

§ 421.121 *Transfer of producer's equity.* The producer shall not transfer either his remaining interest in or his right to redeem the wheat mortgaged as security for a loan under this program. A producer who wishes to liquidate all or part of his loan by contracting for the sale of the wheat must obtain written prior approval of the county committee on Commodity Loan Form 12 to remove the wheat from storage when the proceeds of the sale are needed to repay all or any part of the loan. Any such approval shall be subject to the terms and conditions set out in Commodity Loan Form 12, copies of which may be obtained by producers or prospective purchasers at the office of the county committee.

§ 421.122 *Storage and track-loading payments*—(a) *Storage payment.* A reseal storage payment will be made as follows:

(1) *Storage payment for full reseal period.* A storage payment in line with the 1954 Uniform Grain Storage Agreement yearly rate will be made to the producer on the quantity involved if the (i) redeems from the loan on or after March 31, 1955, (ii) delivers the wheat to CCC on or after March 31, 1955, or (iii) delivers the wheat to CCC prior to March 31, 1955, pursuant to demand by CCC for repayment of the loan solely for the convenience of CCC if the wheat was not damaged or otherwise impaired due to negligence on the part of the producer. Such storage payment will be computed at the rate of 13 cents per bushel in the States of California, Idaho, Nevada, Oregon, Utah and Washington; 14 cents per bushel in the States of Colorado, Illinois, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, North Dakota, South Dakota, Wisconsin and Wyoming; 15 cents per bushel in the States of Indiana, Michigan, New Mexico, Ohio, Oklahoma, and Texas.

(2) *Prorated storage payment.* (i) A storage payment determined by prorating such yearly rate according to the length of time the quantity of wheat involved was in store after June 30, 1954, will be made to the producer, (a) in the case of loss assumed by CCC under the provisions of the loan program, (b) in the case of wheat redeemed from the loan prior to March 31, 1955, and (c) in the case of wheat delivered to CCC pursuant to its demand and not solely for the convenience of CCC, or upon request of the producer and with the approval of CCC, prior to March 31, 1955: *Provided, however,* That no storage payment will be made where the delivered wheat is damaged or otherwise impaired due to negligence on the part of the producer. The prorated storage payment will be computed at the rate of .0.00047 per bushel a day (but not to exceed 13 cents per bushel) in the States of California, Idaho, Nevada, Oregon, Utah and Washington; 0.00051 per bushel a day (but not to exceed 14 cents per bushel) in the States of Colorado, Illinois, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, North Dakota, South Dakota, Wisconsin and Wyoming; 0.00055 per bushel a day (but not to exceed 15 cents per bushel) in the States of Indiana, Michigan, New Mexico, Ohio, Oklahoma, and Texas. In the case of losses assumed by CCC, the period for computing the storage payment shall end on the date of the loss; and in the case of redemptions, through the date of repayment.

(ii) In no case will any storage payment be made where the producer has made any false representation in the loan documents or in obtaining the loan, or where the wheat has been abandoned, or where there has been conversion on the part of the producer.

(b) *Track-loading payment.* A track-loading payment of 2 cents per bushel will be made to the producer on wheat delivered to CCC in accordance with instructions of the county committee, on track at a country point.

§ 421.123 *Maturity and satisfaction.* (a) Loans will mature on demand but not later than March 31, 1955. The producer must pay off his loan, plus interest, on or before maturity or deliver the mortgaged wheat in accordance with the instructions of the county committee. Credit will be given at the applicable settlement value according to grade and, or quality for the total quantity delivered, provided the total quantity was stored in the structure(s) in which the wheat under loan was stored. The provisions of § 421.18 (a) (1), (e) and (f) and of § 421.110 (a) (1) and (2) shall be applicable thereto.

(b) If the settlement value of the wheat delivered exceeds the amount due on the loan, the amount of the excess shall be paid to the producer by a sight draft drawn on CCC by the ASC county office.

(c) If the settlement value of the wheat delivered is less than the amount due on the loan, the amount of the deficiency plus interest thereon shall be paid by the producer to CCC and may be set off against any payment which would otherwise be paid to the producer under any agricultural programs administered by the Secretary of Agriculture, or any other payments which are due or may become due to the producer from CCC or any other agency of the United States.

§ 421.124 *Support rates.* (a) The support rate for an extended farm-storage loan shall remain the same as for the original loan. The support rate for wheat covered by a purchase agreement placed under a farm-storage loan shall be the same as the support rate established for the wheat in § 421.111 (b).

(b) Any discounts or premiums established for variation in quality as shown in the 1953 Wheat Price Support Program Bulletin shall apply.

§ 421.125 *CSS commodity offices.* The CSS commodity offices and the areas served by them are shown below:

Chicago 5, Ill., 623 South Wabash Avenue: Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

Dallas 26, Texas, 3306 Main Street: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas.

Kansas City 6, Missouri, 911 Walnut Street: Colorado, Kansas, Missouri, Nebraska, Wyoming.

Minneapolis 8, Minnesota, 1006 West Lake Street: Minnesota, Montana, North Dakota, South Dakota, Wisconsin.

Portland 5, Oregon, 515 Southwest Tenth Avenue: Arizona, California, Idaho, Nevada, Oregon, Utah, Washington.

Issued this 7th day of April 1954.

[SEAL] J. A. McCONNELL,
Executive Vice President,
Commodity Credit Corporation.

[1953 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Oats]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1953-CROP OATS RESEAL LOAN PROGRAM

A reseal loan program has been announced for 1953-crop oats. The 1953 C. C. C. Grain Price Support Bulletin 1 (18 F. R. 1960, 3705 and 19 F. R. 1149), issued by the Commodity Credit Corporation and containing the general requirements with respect to price support operations for grains and related commodities produced in 1953, supplemented by Supplement 1, Oats (18 F. R. 1973, 4787 and 5699), containing the specific requirements for the 1953-crop oats price support program, is hereby further supplemented as follows:

Sec.
421.161 Applicable sections of 1953 C. C. C. Grain Price Support Bulletin 1, and Supplement 1, Oats.
421.162 Availability.
421.163 Eligible producer.
421.164 Eligible oats.
421.165 Approved storage.
421.166 Approved forms.
421.167 Quantity eligible for resealing.
421.168 Additional service charges.
421.169 Interest rate
421.170 Transfer of producer's equity.
421.171 Storage and track-loading payments.
421.172 Maturity and satisfaction.
421.173 Support rates.
421.174 CSS commodity offices.

AUTHORITY: §§ 421.161 to 421.174 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 301, 401, 63 Stat. 1054; 15 U. S. C. Sup., 714c, 7 U. S. C. Sup., 1421, 1447.

§ 421.161 *Applicable sections of 1953 C. C. C. Grain Price Support Bulletin 1 and Supplement 1, Oats.* The following sections of the 1953 C. C. C. Price Support Bulletin 1, and Supplement 1, Oats, published in 18 F. R. 1960, 1973, 3705, 4787, 5699 and 19 F. R. 1149, shall be applicable to the 1953 Oats Reseal Loan Program: § 421.1 *Administration;* § 421.5 *Approved lending agencies;* § 421.8 *Liens;* § 421.10 *Set-offs;* § 421.13 *Safeguarding the commodity;* § 421.14 *Insurance on farm-storage loans;* § 421.15 *Loss or damage to the commodity;* § 421.16 *Personal liability of the producer;* § 421.17 *Release of the commodity under loan;* § 421.19 *Foreclosure;* § 421.20 *Purchase of notes;* § 421.155 *Determination of quan-*

tity; § 421.156 *Determination of quality.* Other sections of the 1953 Oats Price Support Program shall be applicable to the extent indicated in this subpart.

§ 421.162 *Availability*—(a) *Area.* The reseal program will be available in the States of California, Colorado, Idaho, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Ohio, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, Wisconsin and Wyoming. Under this program, 1953-crop farm-storage loans will be extended and farm-storage loans will be made on 1953-crop oats covered by purchase agreements. Neither warehouse-storage loans nor purchase agreements will be available to producers under this program.

(b) *Time.* (1) The producer who desires to participate in the reseal loan program must file an application for a farm-storage reseal loan with the county committee. In the case of a farm-storage loan, the producer will be required to apply for his reseal loan before the final date for delivery specified in the delivery instructions issued to him by the county committee.

(2) The producer who signed a purchase agreement on farm-stored oats is required under the 1953 Oats Price Support Program to notify the county committee not later than April 30, 1954, if he intends to deliver the oats to CCC. If the producer has notified the county committee, on or before April 30, 1954, of his intention to deliver the oats or to participate in this program, he may obtain a farm-storage loan on the oats. The loan documents must be executed by the producer on or before the final date for delivery specified in the delivery instructions, or on or before June 30, 1954, if the producer has not requested delivery instructions. The loan documents must be presented for disbursement within 15 days after execution.

(c) *Source.* A producer desiring to participate in the reseal loan program should make application to the county committee which approved his loan or purchase agreement. Disbursements of loans completed on oats covered by purchase agreements shall be made to producers by ASC county offices by means of sight drafts drawn on CCC or by approved lending agencies under agreements with CCC.

§ 421.163 *Eligible producer.* An eligible producer shall be any individual, partnership, association, corporation, or other legal entity who produced the oats in 1953 as landowner, landlord, tenant, or sharecropper and who either completed a farm-storage loan or signed a purchase agreement on farm-storage oats of the 1953 crop.

§ 421.164 *Eligible oats.* To be eligible, the oats must have been produced in 1953, must meet the requirements for eligible oats set forth in § 421.153 (c), must be in farm storage, must never have been commingled with oats produced by others, and must be under loan or covered by a purchase agreement.

(a) *Extended farm-storage loans.* If a producer makes application to extend his farm-storage loan, the commodity loan inspector shall, with the producer, reinspect the oats and the farm-storage structure in which the oats are stored. If recommended by either the commodity loan inspector or the producer, a sample of the oats shall be taken and submitted for grade analysis.

(b) *Farm-storage oats covered by purchase agreement.* If a producer makes application for a farm-storage loan on oats covered by a purchase agreement, the commodity loan inspector shall inspect the oats and storage structure, obtain a sample if the oats and structure appear eligible, and proceed in the regular manner for the inspection of a commodity to be placed under loan.

§ 421.165 *Approved storage.* Oats covered by any loans extended and any new loans completed must be stored in structures which meet the requirements for farm-storage loans as provided in § 421.6 (a). Consent for storage for any loans extended or new loans completed must be obtained by the producer for the period ending June 30, 1955, if the structure is owned or controlled by someone other than the producer, or if the lease expires prior to June 30, 1955.

§ 421.166 *Approved forms.* (a) The approved forms, which together with the provisions of this subpart govern the rights and responsibilities of the producer, shall be a producer's note, Commodity Loan Form A, secured by a chattel mortgage on Commodity Loan Form AA, an application form, and such other forms as may be prescribed by CCC. Notes and chattel mortgages must have State and documentary revenue stamps affixed thereto where required by law.

(b) Where required by State law, a new producer's note and chattel mortgage shall be completed when a farm-storage loan is extended.

§ 421.167 *Quantity eligible for reselaing.* (a) The quantity of oats eligible for reseal on an extended farm-storage loan will be the quantity shown on the original note and chattel mortgage, less any quantity delivered or redeemed.

(b) A producer may obtain a loan on not in excess of the quantity of oats specified in the purchase agreement, minus any quantity of the oats under such purchase agreement (1) which has been previously placed under a loan or (2) on which he exercises his option to sell to CCC.

§ 421.168 *Additional service charges.* (a) When a farm-storage loan is extended, the producer will not be required to pay an additional service charge.

(b) At the time a farm-storage loan is made to the producer on oats covered by a purchase agreement, the producer shall pay an additional service charge of ½ cent per bushel on the number of bushels placed under loan, or $1.50, whichever is greater. No refund of service charges will be made.

§ 421.169 *Interest rate.* Beginning May 1, 1954, reseal loans shall bear interest at the rate of 3½ percent per annum, except that where there is a default in satisfaction of the loan the deficiency shall bear interest at the rate of 6 percent per annum from the date of default.

§ 421.170 *Transfer of producer's equity.* The producer shall not transfer either his remaining interest in or his right to redeem the oats mortgaged as security for a loan under this program. A producer who wishes to liquidate all or part of his loan by contracting for the sale of the oats must obtain written prior approval of the county committee on Commodity Loan Form 12 to remove the oats from storage when the proceeds of the sale are needed to repay all or any part of the loan. Any such approval shall be subject to the terms and conditions set out in Commodity to the terms and conditions set out in Commodity Loan Form 12, copies of which may be obtained by producers or prospective purchasers at the office of the county committee.

§ 421.171 *Storage and track-loading payments*—(a) *Storage payment.* A reseal storage payment will be made as follows:

(1) *Storage payment for full reseal period.* A storage payment computed at the rate of 11 cents per bushel will be made to the producer on the quantity involved if he (i) redeems from the loan on or after April 30, 1955, (ii) delivers the oats to CCC on or after April 30, 1955, or (iii) delivers the oats to CCC prior to April 30, 1955, pursuant to demand by CCC for repayment of the loan solely for the convenience of CCC, if the commodity was not damaged, or otherwise impaired due to negligence on the part of the producer.

(2) *Prorated storage payment.* (i) A prorated storage payment computed at the rate of .00036 per bushel a day, but not to exceed 11 cents per bushel, according to the length of time the quantity of oats involved was in store after June 30, 1954, will be made to the producer (a) in the case of loss assumed by CCC under the provisions of the loan program, (b) in the case of oats redeemed from the loan prior to April 30, 1955, and (c) in the case of oats delivered to CCC pursuant to its demand and not solely for the convenience of CCC, or upon request of the producer and with the approval of CCC, prior to April 30, 1955: *Provided, however,* That no storage payment will be made where the delivered commodity is damaged or otherwise impaired due to negligence on the part of the producer. In the case of losses assumed by CCC, the period for computing the storage payment shall end on the date of the loss; and in the case of redemptions, through the date of repayment.

(ii) In no case will any storage payment be made where the producer has made any false representation in the loan documents or in obtaining the loan, or where the commodity has been abandoned, or where there has been conversion on the part of the producer.

(b) *Track-loading payment.* A track-loading payment of 2 cents per bushel will be made to the producer on oats delivered to CCC, in accordance with instructions of the county committee, on track at a country point.

§ 421.172 *Maturity and satisfaction.* (a) Loans will mature on demand but not later than April 30, 1955. The producer must pay off his loan, plus interest, on or before maturity or deliver the mortgaged oats in accordance with the instructions of the county committee. Credit will be given at the applicable settlement value according to grade and/or quality for the total quantity delivered, provided the total quantity delivered was stored in the structure(s) in which the oats under loan were stored. The provisions of § 421.18 (a) (1), (e) and (f) and of § 421.160 (a) (1) and (2), shall be applicable hereto.

(b) If the settlement value of the oats delivered exceeds the amount due on the loan, the amount of the excess shall be paid to the producer by sight draft drawn on CCC by the ASC county office.

(c) If the settlement value of the oats delivered is less than the amount due on the loan, the amount of the deficiency plus interest thereon shall be paid by the producer to CCC and may be set off against any payment which would otherwise be paid to the producer under any agricultural programs determined by the Secretary of Agriculture, or any other payments which are due or may become due to the producer from CCC or any other agency of the United States.

§ 421.173 *Support rates.* The support rate for an extended farm-storage loan shall remain the same as for the original loan. The support rate for oats covered by a purchase agreement placed under a farm-storage loan shall be the same as the support rate established for the oats in § 421.158 (c).

§ 421.174 *CSS commodity offices.* The CSS commodity offices and the areas served by them are shown below:

Chicago 5, Ill., 623 South Wabash Avenue: Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

Dallas 26, Texas, 3306 Main Street: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas.

Kansas City 6, Missouri, 911 Walnut Street: Colorado, Kansas, Missouri, Nebraska, Wyoming.

Minneapolis 8, Minnesota, 1006 West Lake Street: Minnesota, Montana, North Dakota, South Dakota, Wisconsin.

Portland 5, Oregon, 515 Southwest Tenth Avenue: Arizona, California, Idaho, Nevada, Oregon, Utah, Washington.

Issued this 7th day of April 1954.

[1953 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Rye]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1953-CROP RYE RESEAL LOAN PROGRAM

A reseal loan program has been announced for 1953-crop rye. The 1953 C. C. C. Grain Price Support Bulletin 1 (18 F. R. 1960, 3705 and 19 F. R. 1149), issued by the Commodity Credit Corporation and containing the general requirements with respect to price support operations for grains and related commodities produced in 1953, supplemented by Supplement 1, Rye (18 F. R. 1979, 4787, 5133, 5701, and 6745) containing the specific requirements for the 1953-crop rye price support program, is hereby further supplemented as follows:

Sec.
421.211 Applicable sections of 1953 C. C. C. Grain Price Support Bulletin 1, and Supplement 1, Rye.
421.212 Availability.
421.213 Eligible producer.
421.214 Eligible rye.
421.215 Approved storage.
421.216 Approved forms.
421.217 Quantity eligible for reselaing.
421.218 Additional service charges.
421.219 Interest rate.
421.220 Transfer of producer's equity.
421.221 Storage and track-loading payments.
421.222 Maturity and satisfaction.
421.223 Support rates.
421.224 CSS commodity offices.

AUTHORITY: §§ 421.211 to 421.224 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 301, 401, 63 Stat. 1054; 15 U. S. C. Sup., 714c, 7 U. S. C. Sup., 1421, 1447.

§ 421.211 *Applicable sections of 1953 C. C. C. Grain Price Support Bulletin 1 and Supplement 1, Rye.* The following sections of the 1953 C. C. C. Price Support Bulletin 1, and Supplement 1, Rye, published in 18 F. R. 1960, 1979, 3705, 4787, 5133, 5701, 6745 and 19 F. R. 1149, shall be applicable to the 1953 Rye Reseal Loan Program: § 421.1 *Administration;* § 421.5 *Approved lending agencies;* § 421.8 *Liens;* § 421.10 *Set-offs;* § 421.13 *Safeguarding the commodity;* § 421.14 *Insurance on farm-storage loans;* § 421.15 *Loss or damage to the commodity;* § 421.16 *Personal liability of the producer;* § 421.17 *Release of the commodity under loan;* § 421.19 *Foreclosure;* § 421.20 *Purchase of notes;* § 421.205 *Determination of quantity;* § 421.206 *Determination of quality.* Other sections of the 1953 Rye Price Support Program shall be applicable to the extent indicated in this subpart.

§ 421.212 *Availability*—(a) *Area.* The reseal program will be available in the States of California, Kansas, Michigan, Minnesota, Montana, Nebraska, North Dakota, Oklahoma, Oregon, South Dakota, and Wisconsin. Under this program, 1953-crop farm-storage loans will be extended and farm-storage loans will be made on 1953-crop rye covered by purchase agreements. Neither warehouse-storage loans nor purchase agreements will be available to producers under this program.

(b) *Time.* (1) The producer who desires to participate in the reseal loan program must file an application for a farm-storage reseal loan with the county committee. In the case of a farm-storage loan, the producer will be required to apply for his reseal loan before the final date for delivery specified in the delivery instructions issued to him by the county committee.

(2) The producer who signed a purchase agreement on farm-stored rye is required, under the 1953 Rye Price Support Program to notify the county committee not later than April 30, 1954, if he intends to deliver the rye to CCC. If the producer has notified the county committee, on or before April 30, 1954, of his intention to deliver the rye or to participate in this program, he may obtain a farm-storage loan on the rye. The loan documents must be executed by the producer on or before the final date for delivery specified in the delivery instructions, or on or before June 30, 1954, if the producer has not requested delivery instructions. The loan documents must be presented for disbursement within 15 days after execution.

(c) *Source.* A producer desiring to participate in the reseal loan program should make application to the county committee which approved his loan or purchase agreement. Disbursements of loans completed on rye covered by purchase agreements shall be made to producers by ASC county offices by means of sight drafts drawn on CCC or by approved lending agencies under agreements with CCC.

§ 421.213 *Eligible producer.* An eligible producer shall be any individual, partnership, association, corporation, or other legal entity who produced the rye in 1953 as landowner, landlord, tenant, or sharecropper and who either completed a farm-storage loan or signed a purchase agreement on farm-storage rye of the 1953 crop.

§ 421.214 *Eligible rye.* To be eligible, the rye must have been produced in 1953, must meet the requirements for eligible rye set forth in § 421.203 (c), must be in farm-storage, must never have been commingled with rye produced by others, and must be under loan or covered by a purchase agreement.

(a) *Extended farm-storage loans.* If a producer makes application to extend his farm-storage loan, the commodity loan inspector shall, with the producer, reinspect the rye and the farm-storage structure in which the rye is stored. If recommended by either the commodity loan inspector or the producer, a sample of the rye shall be taken and submitted for grade analysis.

(b) *Farm-storage rye covered by purchase agreement.* If a producer makes application for a farm-storage loan on rye covered by a purchase agreement, the commodity loan inspector shall inspect the rye and storage structure, obtain a sample if the rye and structure appear eligible, and proceed in the regular manner for the inspection of a commodity to be placed under loan.

§ 421.215 *Approved storage.* Rye covered by any loans extended and any new loans completed must be stored in structures which meet the requirements for farm-storage loans as provided in § 421.6 (a). Consent for storage for any loans extended or new loans completed must be obtained by the producer for the period ending June 30, 1955, if the structure is owned or controlled by someone other than the producer, or if the lease expires prior to June 30, 1955.

§ 421.216 *Approved forms.* (a) The approved forms, which together with the provisions of this subpart govern the rights and responsibilities of the producer, shall be a producer's note, Commodity Loan Form A, secured by a chattel mortgage on Commodity Loan Form AA, an application form, and such other forms as may be prescribed by CCC. Notes and chattel mortgages must have State and documentary revenue stamps affixed thereto where required by law.

(b) Where required by State law, a new producer's note and chattel mortgage shall be completed when a farm-storage loan is extended.

§ 421.217 *Quantity eligible for reselling.* (a) The quantity of rye eligible for reseal on an extended farm-storage loan will be the quantity shown on the original note and chattel mortgage, less any quantity delivered or redeemed.

(b) A producer may obtain a loan on not in excess of the quantity of rye specified in the purchase agreement, minus any quantity of the rye under such purchase agreement (1) which has been previously placed under a loan or (2) on which he exercises his option to sell to CCC.

§ 421.218 *Additional service charges.* (a) When a farm-storage loan is extended, the producer will not be required to pay an additional service charge.

(b) At the time a farm-storage loan is made to the producer on rye covered by a purchase agreement, the producer shall pay an additional service charge of ½ cent per bushel on the number of bushels placed under loan, or $1.50, whichever is greater. No refund of service charges will be made.

§ 421.219 *Interest rate.* Beginning May 1, 1954, reseal loans shall bear interest at the rate of 3½ percent per annum, except that where there is a default in satisfaction of the loan the deficiency shall bear interest at the rate of 6 percent per annum from the date of default.

§ 421.220 *Transfer of producer's equity.* The producer shall not transfer either his remaining interest in or his right to redeem the rye mortgaged as security for a loan under this program. A producer who wishes to liquidate all or part of his loan by contracting for the sale of the rye must obtain written prior approval of the county committee on Commodity Loan Form 12 to remove the rye from storage when the proceeds of the sale are needed to repay all or any part of the loan. Any such approval shall be subject to the terms and conditions set out in Commodity Loan Form 12, copies of which may be obtained by producers or prospective purchasers at the office of the county committee.

§ 421.221 *Storage and track-loading payments*—(a) *Storage payment.* A reseal storage payment will be made as follows:

(1) *Storage payment for full reseal period.* A storage payment for the full reseal period will be made to the producer on the quantity involved if he (i) redeems from the loan on or after April 30, 1955, (ii) delivers the rye to CCC on or after April 30, 1955, or (iii) delivers the rye to CCC prior to April 30, 1955, pursuant to demand by CCC for repayment of the loan solely for the convenience of CCC, if the commodity was not damaged, or otherwise impaired due to negligence on the part of the producer. Such storage payment will be computed at the rate of 14 cents per bushel in the States of California and Oregon; 15 cents per bushel in the States of Kansas, Minnesota, Montana, Nebraska, North Dakota, South Dakota, and Wisconsin; and 16 cents per bushel in the States of Michigan and Oklahoma.

(2) *Prorated storage payment.* (i) A storage payment determined by prorating such yearly rate according to the length of time the quantity of rye involved was in store after June 30, 1954, will be made to the producer (*a*) in the case of loss assumed by CCC under the provisions of the loan program, (*b*) in the case of rye redeemed from the loan prior to April 30, 1955, and (*c*) in the case of rye delivered to CCC pursuant to its demand and not solely for the convenience of CCC, or upon request of the producer and with the approval of CCC, prior to April 30, 1955: *Provided, however,* That no storage payment will be made where the delivered commodity is damaged or otherwise impaired due to negligence on the part of the producer. The prorated storage payment will be computed at the rate of 0.00046 per bushel a day (but not to exceed 14 cents per bushel) in the States of California and Oregon; 0.00049 per bushel a day (but not to exceed 15 cents per bushel) in the States of Kansas, Minnesota, Montana, Nebraska, North Dakota, South Dakota, and Wisconsin; and 0.00053 per bushel a day (but not to exceed 16 cents per bushel) in the States of Michigan and Oklahoma. In the case of losses assumed by CCC, the period for computing the storage payment shall end on the date of the loss; and in the case of redemptions, through the date of repayment.

(ii) In no case will any storage payment be made where the producer has made any false representation in the loan documents or in obtaining the loan, or where the commodity has been abandoned, or where there has been conversion on the part of the producer.

(b) *Track-loading payment.* A track-loading payment of 2 cents per bushel will be made to the producer on rye delivered to CCC, in accordance with instructions of the county committee, on track at a country point.

§ 421.222 *Maturity and satisfaction.* (a) Loans will mature on demand but not later than April 30, 1955. The producer must pay off his loan, plus interest, on or before maturity or deliver the mortgaged rye in accordance with the instructions of the county committee. Credit will be given at the applicable settlement value according to grade and/or quality for the total quantity delivered, provided the total quantity delivered was stored in the structure(s) in which the rye under loan was stored. The provisions of § 421.18 (a) (1), (e) and (f) and of § 421.210 (a) (1) and (2) shall be applicable hereto.

(b) If the settlement value of the rye delivered exceeds the amount due on the loan, the amount of the excess shall be paid to the producer by a sight draft drawn on CCC by the ASC county office.

(c) If the settlement value of the rye delivered is less than the amount due on the loan, the amount of the deficiency plus interest thereon shall be paid by the producer to CCC and may be set off against any payment which would otherwise be paid to the producer under any agricultural programs administered by the Secretary of Agriculture, or any other payments which are due or may become due to the producer from CCC or any other agency of the United States.

§ 421.223 *Support rates.* (a) The support rate for an extended farm-storage loan shall remain the same as for the original loan. The support rate for rye covered by a purchase agreement placed under a farm-storage loan shall be the same as the support rate established for the rye in § 421.208 (c).

(b) Any discounts established for variation in quality as shown in the 1953 Rye Price Support Program Bulletin shall apply.

§ 421.224 *CSS commodity offices.* The CSS commodity offices and the areas served by them are shown below:

Chicago 5, Ill., 623 South Wabash Avenue: Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

Dallas 26, Texas, 3306 Main Street: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas.

Kansas City 6, Missouri, 911 Walnut Street: Colorado, Kansas, Missouri, Nebraska, Wyoming.

Minneapolis 8, Minnesota, 1006 West Lake Street: Minnesota, Montana, North Dakota, South Dakota, Wisconsin.

Portland 5, Oregon, 515 Southwest Tenth Avenue: Arizona, California, Idaho, Nevada, Oregon, Utah, Washington.

Issued this 7th day of April 1954

[1953 C. C. C. Grain Price Support Bulletin 1, Supp. 2, Flaxseed]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1953-CROP FLAXSEED RESEAL LOAN PROGRAM

A reseal loan program has been announced for 1953-crop flaxseed. The 1953 C. C. C. Grain Price Support Bulletin 1 (18 F. R. 1960, 3705 and 19 F. R. 1149), issued by the Commodity Credit Corporation and containing the general requirements with respect to price support operations for grains and related commodities produced in 1953, supplemented by Supplement 1, Flaxseed (18 F. R. 2367, 4902, 4990, and 5702), containing the specific requirements for the 1953-crop flaxseed price support program, is hereby further supplemented as follows:

Sec.
421.311 Applicable sections of 1953 C. C. C. Grain Price Support Bulletin 1, and Supplement 1, Flaxseed.
421.312 Availability.
421.313 Eligible producer.
421.314 Eligible flaxseed.
421.315 Approved storage.
421.316 Approved forms.
421.317 Quantity eligible for reselling.
421.318 Additional service charges.
421.319 Interest rate.
421.320 Transfer of producer's equity.
421.321 Storage and track-loading payments.
421.322 Maturity and satisfaction.
421.323 Support rates.
421.324 CSS Commodity offices.

AUTHORITY: §§421.311 to 421.324 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. Sup. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 301, 401, 63 Stat. 1054; 15 U. S. C. Sup. 714c, 7 U. S. C. Sup., 1447, 1421.

§ 421.311 *Applicable sections of 1953 C. C. C. Grain Price Support Bulletin 1, and Supplement 1, Flaxseed.* The following sections of the 1953 C. C. C. Price Support Bulletin 1, and Supplement 1, Flaxseed, published in 18 F. R. 1960, 2367, 3705, 4902, 4990 and 5702 and 19 F. R. 1149, shall be applicable to the 1953 Flaxseed Reseal Loan Program: § 421.1 *Administration;* § 421.5 *Approved lending agencies;* § 421.8 *Liens;* § 421.10 *Set-offs;* § 421.13 *Safeguarding the commodity;* § 421.14 *Insurance on farm-storage loans;* § 421.15 *Loss or damage to the commodity;* § 421.16 *Personal liability of the producer;* § 421.17 *Release of the commodity under loan;* § 421.19 *Foreclosure;* § 421.20 *Purchase of notes;* § 421.305 *Determination of quantity;* § 421.306 *Determination of quality.* Other sections of the 1953 Flaxseed Price Support Program shall be applicable to the extent indicated in this subpart.

§ 421.312 *Availability*—(a) *Area.* The reseal program will be available in the States of Iowa, Minnesota, Montana, North Dakota and South Dakota. Under this program, 1953-crop farm-storage loans will be extended and farm-storage loans will be made on 1953-crop flaxseed covered by purchase agreements. Neither warehouse-storage loans nor purchase agreements will be available to producers under this program.

(b) *Time.* (1) The producer who desires to participate in the reseal loan program must file an application for a farm-storage reseal loan with the county committee. In the case of a farm-storage loan, the producer will be required to apply for his reseal loan before the final date for delivery specified in the delivery instructions issued to him by the county committee.

(2) The producer who signed a purchase agreement on farm-stored flaxseed is required, under the 1953 Flaxseed Price Support Program to notify the county committee not later than April 30, 1954, if he intends to deliver the flaxseed to CCC. If the producer has notified the county committee, on or before April 30, 1954, of his intention to deliver the flaxseed or to participate in this program, he may obtain a farm-storage loan on the flaxseed. The loan documents must be executed by the producer on or before the final date for delivery specified in the delivery instructions, or on or before June 30, 1954, if the producer has not requested delivery instructions. The loan documents must be presented for disbursement within 15 days after execution.

(c) *Source.* A producer desiring to participate in the reseal loan program should make application to the county committee which approved his loan or purchase agreement. Disbursements of loans completed on flaxseed covered by purchase agreements shall be made to producers by ASC county offices by means of sight drafts drawn on CCC or by approved lending agencies under agreements with CCC.

§ 421.313 *Eligible producer.* An eligible producer shall be any individual, partnership, association, corporation, or other legal entity who produced the flaxseed in 1953 as landowner, landlord, tenant, or sharecropper and who either completed a farm-storage loan or signed a purchase agreement on farm-storage flaxseed of the 1953 crop.

§ 421.314 *Eligible flaxseed.* To be eligible, the flaxseed must have been produced in 1953, must be in farm storage, must never have been commingled with flaxseed produced by others, must be under loan or covered by a purchase agreement, and must meet the requirements of eligibility for loans as set forth in § 421.303 (c).

(a) *Extended farm-storage loans.* If a producer makes application to extend his farm-storage loan, the commodity loan inspector shall, with the producer, reinspect the flaxseed and the farm-storage structure in which the flaxseed is stored. If recommended by either the commodity loan inspector or the producer, a sample of the flaxseed shall be taken and submitted for grade analysis.

(b) *Farm-storage flaxseed covered by purchase agreement.* If a producer makes application for a farm-storage loan on flaxseed covered by a purchase agreement, the commodity loan inspector shall inspect the flaxseed and storage structure, obtain a sample if the flaxseed and structure appear eligible, and proceed in the regular manner for the inspection of a commodity to be placed under loan.

§ 421.315 *Approved storage.* Flaxseed covered by any loans extended and any new loans completed must be stored in structures which meet the requirements for farm-storage loans as provided in § 421.6 (a). Consent for storage for any loans extended or new loans completed must be obtained by the producer for the period ending June 30, 1955, if the structure is owned or controlled by someone other than the producer, or if the lease expires prior to June 30, 1955.

§ 421.316 *Approved forms.* (a) The approved forms, which together with the provisions of this subpart govern the rights and responsibilities of the producer, shall be a producer's note, Commodity Loan Form A, secured by a chattel mortgage on Commodity Loan Form AA, an application form, and such other forms as may be prescribed by CCC. Notes and chattel mortgages must have State and documentary revenue stamps affixed thereto where required by law.

(b) Where required by State law, a new producer's note and chattel mortgage shall be completed when a farm-storage loan is extended.

§ 421.317 *Quantity eligible for reselling.* (a) The quantity of flaxseed eligible for reseal on an extended farm-storage loan will be the quantity shown on the original note and chattel mortgage, less any quantity delivered or redeemed.

(b) A producer may obtain a loan on not in excess of the quantity of flaxseed specified in the purchase agreement, minus any quantity of the flaxseed under such purchase agreement (1) which has been previously placed under loan or (2) on which he exercises his option to sell to CCC.

§ 421.318 *Additional service charges.* (a) When a farm-storage loan is extended, the producer will not be required to pay an additional service charge.

(b) At the time a farm-storage loan is made to the producer on flaxseed covered by a purchase agreement, the producer shall pay an additional service charge of ½ cent per bushel on the number of bushels placed under loan, or $1.50, whichever is greater. No refund of service charges will be made.

§ 421.319 *Interest rate.* Beginning May 1, 1954, reseal loans shall bear interest at the rate of 3½ percent per annum, except that where there is a default in satisfaction of the loan, the deficiency shall bear interest at the rate of 6 percent per annum from the date of default.

§ 421.320 *Transfer of producer's equity.* The producer shall not transfer either his remaining interest in or his right to redeem the flaxseed mortgaged as security for a loan under this program. A producer who wishes to liquidate all or part of his loan by contracting for the sale of the flaxseed must obtain written prior approval of the county committee on Commodity Loan Form 12 to remove the flaxseed from storage when the proceeds of the sale are needed to repay all or any part of the loan. Any such approval shall be subject to the terms and conditions set out in Commodity Loan Form 12, copies of which may be obtained by producers or prospective purchasers at the office of the county committee.

§ 421.321 *Storage and track-loading payments*—(a) *Storage payment.* A reseal storage payment will be made as follows:

(1) *Storage payment for full reseal period.* A storage payment computed at the rate of 16 cents per bushel will be made to the producer on the quantity involved if he (i) redeems from the loan on or after April 30, 1955, (ii) delivers the flaxseed to CCC on or after April 30, 1955, or (iii) delivers the flaxseed to CCC prior to April 30, 1955 pursuant to demand by CCC for repayment of the loan solely for the convenience of CCC if the flaxseed was not damaged or otherwise

impaired due to negligence on the part of the producer.

(2) *Prorated storage payment.* A prorated storage payment computed at the rate of .00053 per bushel a day, but not to exceed 16 cents per bushel, according to the length of time the quantity of flaxseed involved was in store after June 30, 1954, will be made to the producer (i) in the case of loss assumed by CCC under the provisions of the loan program, (ii) in the case of flaxseed redeemed from the loan prior to April 30, 1955, and (iii) in the case of flaxseed delivered to CCC pursuant to its demand and not solely for the convenience of CCC, or upon the request of the producr and with the approval of CCC, prior to April 30, 1955: *Provided, however,* That no storage payment will be made where the delivered flaxseed is damaged or otherwise impaired due to negligence on the part of the producer. In the case of losses assumed by CCC, the period for computing the storage payment shall end on the date of the loss; and in the case of redemptions, through the date of repayment. In no case will any storage payment be made where the producer has made any false representation in the loan documents or in obtaining the loan, or where the flaxseed has been abandoned, or where there has been conversion on the part of the producer.

(b) *Track-loading payment.* A track-loading payment of 2 cents per bushel will be made to the producer on flaxseed delivered to CCC, in accordance with instructions of the county committee, on track at a country point.

§ 421.322 *Maturity and satisfaction.* (a) Loans will mature on demand but not later than April 30, 1955. The producer must pay off his loan, plus interest, on or before maturity or deliver the mortgaged flaxseed in accordance with the instructions of the county committee. Credit will be given at the applicable settlement value according to grade and/or quality for the total quantity delivered, provided the total quantity was stored in the structure(s) in which the flaxseed under loan was stored. The provisions of § 421.18 (a) (1), (e) and (f) and of § 421.310 (a) (1) and (2) shall be applicable thereto.

(b) If the settlement value of the flaxseed delivered exceeds the amount due on the loan, the amount of the excess shall be paid to the producer by a sight draft drawn on CCC by the ASC county office.

(c) If the settlement value of the flaxseed delivered is less than the amount due on the loan, the amount of the deficiency plus interest thereon shall be paid by the producer to CCC and may be set off against any payment which would otherwise be paid to the producer under any agricultural programs administered by the Secretary of Agriculture or any other payments which are due or may become due to the producer from CCC or any other agency of the United States.

§ 421.323 *Support rates.* (a) The support rate for an extended farm-storage loan shall remain the same as for the original loan. The support rate for flaxseed covered by a purchase agreement placed under a farm-storage loan shall be the same as the support rate established for the flaxseed in § 421.308 (c).

(b) Any discounts established for variation in quality as shown in the 1953 Flaxseed Price Support Program Bulletin shall apply.

§ 421.324 *CSS commodity offices.* The CSS commodity offices and the areas served by them are shown below:

Chicago 5, Illinois, 623 South Wabash Avenue: Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia.

Dallas 26, Texas, 3306 Main Street: Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, Texas.

Kansas City 6, Missouri, 911 Walnut Street: Colorado, Kansas, Missouri, Nebraska, Wyoming.

Minneapolis 8, Minnesota, 1006 West Lake Street: Minnesota, Montana, North Dakota, South Dakota, Wisconsin.

Portland 5, Oregon, 515 Southwest 10th Avenue: Arizona, California, Idaho, Nevada, Oregon, Utah, Washington.

Issued this 7th day of April 1954.

[SEAL] J. A. McCONNELL,
Executive Vice President,
Commodity Credit Corporation.

[F. R. Doc. 54-2705; Filed, Apr. 9, 1954; 8:52 a. m.]

TITLE 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Navel Orange Reg. 28]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.328 *Navel Orange Regulation 28*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on April 8, 1954, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date of this section.

(b) *Order.* (1) The quantity of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., April 11, 1954, and ending at 12:01 a. m., P. s. t., April 18, 1954, is hereby fixed as follows:

(i) District 1: Unlimited movement;
(ii) District 2: 381,150 boxes;
(iii) District 3: Unlimited movement;
(iv) District 4: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) Navel oranges handled pursuant to the provisions of this section shall be subject to any size restrictions applicable thereto which have heretofore been issued on the handling of such oranges and which are effective during the period specified herein.

(4) As used in this section, "handled," "handler," "boxes," "prorate base," "District 1," "District 2," "District 3," and "District 4" shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 9th day of April 1954.

[SEAL] FLOYD F. HEDLUND,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Grapefruit Reg. 199]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.678 *Grapefruit Regulation 199*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than April 12, 1954. Shipments of grapefruit, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order, and will so continue until April 12, 1954; the recommendation and supporting information for continued regulation subsequent to April 11, 1954, was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on April 6; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time of this section, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of grapefruit; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., April 12, 1954, and ending at 12:01 a. m., e. s. t., April 26, 1954, no handler shall ship:

(i) Any white seeded grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 1 Russet;

(ii) Any white seedless grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 2 Russet;

(iii) Any white seeded grapefruit, grown in the State of Florida, which are of a size smaller than a size that will pack 70 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(iv) Any white seedless grapefruit, grown in Regulation Area I, that grade U. S. No. 2 Russet, U. S. No. 2, or U. S. No. 2 Bright, (a) which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box; or (b) which are of a size larger than a size that will pack 70 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(v) Any white seedless grapefruit, grown in Regulation Area I, that grade U. S. No. 1 Russet, U. S. No. 1, U. S. No. 1 Bronze, U. S. No. 1 Golden, U. S. No. 1 Bright, or U. S. Fancy, which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box;

(vi) Any white seedless grapefruit, grown in Regulation Area II, which are of a size smaller than a size that will pack 96 grapefruit, packed in accordance with the requirements of a standard pack, in a standard nailed box; or

(vii) Any pink grapefruit, grown in the State of Florida, which do not grade at least U. S. No. 2 Russet.

(2) As used in this section, "handler," "ship," "Growers Administrative Committee," "Regulation Area I," and "Regulation Area II" shall have the same meaning as when used in said amended marketing agreement and order; and "U. S. No. 1 Russet," "U. S. No. 1," "U. S. No. 1 Bronze," "U. S. No. 1 Golden," "U. S. No. 1 Bright," "U. S. Fancy," "U. S. No. 2," "U. S. No. 2 Bright," "U. S. No. 2 Russet," "standard pack," and "standard nailed box" shall have the same meaning as when used in the revised United States Standards for Florida Grapefruit (§§ 51.750 to 51.790 of this title).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 7th day of April 1954.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Orange Reg. 255]

PART 933—ORANGES, GRAPEFRUIT, AND TANGERINES GROWN IN FLORIDA

LIMITATION OF SHIPMENTS

§ 933.677 *Orange Regulation 255*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 33, as amended (7 CFR Part 933), regulating the handling of oranges, grapefruit, and tangerines grown in the State of Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendations of the committees established under the aforesaid amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of shipments of all oranges, except Temple oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient; a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective not later than April 12, 1954. Shipments of all oranges, except Temple oranges, grown in the State of Florida, are presently subject to regulation by grades and sizes, pursuant to the amended marketing agreement and order and will so continue until April 12; the recommendation and supporting information for continued regulation subsequent to April 11, 1954, was promptly submitted to the Department after an open meeting of the Growers Administrative Committee on April 6; such meeting was held to consider recommendations for regulation, after giving due notice of such meeting and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including the effective time of this section, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter set forth so as to provide for the continued regulation of the handling of all oranges, except Temple oranges; and compliance with this section will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., e. s. t., April 12, 1954, and ending at 12:01 a. m., e. s. t., April 26, 1954, no handler shall ship:

(i) Any oranges, except Temple oranges, grown in the State of Florida, which do not grade at least U. S. No. 1 Russet; or

(ii) Any oranges, except Temple oranges, grown in the State of Florida, which are of a size smaller than a size that will pack 288 oranges, packed in accordance with the requirements of a standard pack, in a standard nailed box.

(2) As used in this section, the terms "handler," "ship," and "Growers Administrative Committee" shall each have the same meaning as when used in said amended marketing agreement and order; and the terms "U. S. No. 1 Russet," "standard pack," and "standard nailed box," shall have the same meaning as when used in the revised United States Standards for Florida Oranges (§§ 51.1140 to 51.1186 of this title).

Shipments of Temple oranges, grown in the State of Florida, are subject to the provisions of Orange Regulation 244 (§ 933.647; 18 F. R. 7380).

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 7th day of April 1954.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 54-2702; Filed, Apr. 9, 1954; 8:51 a. m.]

[Lemon Reg. 532]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

§ 953.639 *Lemon Regulation 532*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 18 F. R. 6767), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on April 7, 1954, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time of this section.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., April 11, 1954, and ending at 12:01 a. m., P. s. t., April 18, 1954, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 275 carloads;

(iii) District 3: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached to Lemon Regulation 531 (19 F. R. 1879) and made a part of this section by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2," and "District 3," shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Done at Washington, D. C., this 8th day of April 1954.

[SEAL] FLOYD F. HEDLUND,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 54-2737; Filed, Apr. 9, 1954; 8:52 a. m.]

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 29]

PART 600—DESIGNATION OF CIVIL AIRWAYS

ALTERATIONS

The civil airway alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest and therefore is not required.

Part 600 is amended as follows:

1. Section 600.108 *Amber civil airway No. 8 (Los Angeles, Calif., to The Dalles Oreg.)* is amended by changing the first portion to read: "From the Los Angeles, Calif., radio range station via the intersection of the west course of the Los Angeles, Calif., radio range and the southeast course of the Camarillo, Calif., radio range; Camarillo, Calif., radio range station;".

2. Section 600.213 *Red civil airway No. 13 (Wheeling, W. Va., to Boston, Mass.)* is amended by changing the last portion to read: "Providence, R. I., radio range station to the intersection of a direct line between the Providence, R. I., radio range station and the Bedford, Mass., nondirectional radio beacon with the west course of the Boston, Mass., radio range."

3. Section 600.675 is added to read:

§ 600.675 *Blue civil airway No. 75 (Cleveland, Ohio, to United States-Canadian Border).* That airspace over United States territory from the Cleveland, Ohio, radio range station to the London, Ontario, Canada, radio range station.

4. Section 600.6003 *VOR civil airway No. 3 (Key West, Fla., to Bangor, Maine)* is amended by changing all after the Lumberton, N. C., omnirange station to read: "Lumberton, N. C., omnirange station; Raleigh, N. C., omnirange station, including an east alternate; Lawrenceville, Va., omnirange station; intersection of the Lawrenceville, omnirange 035° True and the Flat Rock omnirange 171° True radials; Flat Rock, Va., omnirange station to the point of intersection of the Flat Rock omnirange 023° True and the Gordonsville, Va., omnirange 056° True radials. From the point of intersection of the Herndon, Va., omnirange 089° True and the Washington, D. C. terminal omnirange 351° True radials via the intersection of the Herndon omnirange 045° True and the Martinsburg, W. Va., omnirange 101° True radials; intersection of the Herndon omnirange 045° True and the West Chester omnirange 253° True radials; West Chester, Pa., omnirange station; Wilton, Conn., omnirange station; Hartford, Conn., omnirange station; intersection of the Hartford, omnirange 044° True and the Boston omnirange 257° True radials; Boston, Mass., omnirange station; Kennebunk, Maine, omnirange station; Augusta, Maine, omnirange station to the Bangor, Maine, omnirange station."

5. Section 600.6004 *VOR civil airway No. 4 (Seattle, Wash., to Washington, D. C.)* is amended between the Denver, Colo., omnirange station and the Goodland, Kans., omnirange station to read: "Denver, Colo., omnirange station; Thurman, Colo., omnirange station, including a south alternate; Goodland, Kans., omnirange station, including a north alternate via the intersection of the Thurman omnirange 085° True and the Goodland omnirange 304° True radials;" and between the St. Louis, Mo., omnirange station and the Evansville, Ind., omnirange station to read: "St. Louis, Mo., omnirange station, including a north and south alternate; Centralia, Ill., omnirange station; Evansville, Ind., omnirange station, including a south alternate;".

6. Section 600.6005 *VOR civil airway No. 5 (Jacksonville, Fla., to Cleveland, Ohio)* is amended by deleting the portion which reads: "Louisville, Ky., omnirange station, including an east alternate from Bowling Green omnirange station to Louisville omnirange station;" and substituting the following in lieu thereof: "Louisville, Ky., omnirange station, including an east alternate from the Bowling Green, Kentucky omnirange station to the Louisville, Ky., omnirange station via the intersection of the Bowling Green omnirange 063° True and the Louisville omnirange 168° True radials;".

7. Section 600.6006 *VOR civil airway No. 6 (Oakland, Calif., to New York, N. Y.)* is amended by changing all after the Selinsgrove, Pa., omnirange station to read: "Selinsgrove, Pa., omnirange station; Allentown, Pa., omnirange station to the point of intersection of the Allentown omnirange 088° True and the Wilton, Conn., omnirange 233° True radials."

8. Section 600.6008 *VOR civil airway No. 8 (Long Beach, Calif., to Washington, D. C.)* is amended between the Kremmling, Colo., omnirange station and the Imperial, Nebr., omnirange station to read: "Kremmling, Colo., omnirange station; Denver, Colo., omnirange station, including a north alternate; Akron, Colo., omnirange station, including a north alternate, also a south alternate via the intersection of the Denver omnirange 101° True and the Akron omnirange 242° True radials; Imperial, Nebr., omnirange station, including a south alternate via the intersection of the Akron omnirange 090° True and the Imperial omnirange 237° True radials;".

9. Section 600.6030 *VOR civil airway No. 30 (Milwaukee, Wis. to New York, N. Y.)* is amended by changing all after the Selinsgrove, Pa., omnirange station to read: "Selinsgrove, Pa., omnirange station; Allentown, Pa., omnirange station to the point of intersection of the Allentown omnirange 088° True and the Wilton, Conn., omnirange 233° True radials."

10. Section 600.6051 is amended to read:

§ 600.6051 *VOR civil airway No. 51 (Chattanooga, Tenn., to Indianapolis, Ind.).* From the Chattanooga, Tenn., omnirange station via the Crossville, Tenn., omnirange station; Louisville, Ky., omnirange station; intersection of the Louisville omnirange 356° True and the Indianapolis omnirange 137° True radials to the Indianapolis, Ind., omnirange station.

11. Section 600.6107 is amended to read:

§600.6107 *VOR civil airway No. 107 (Santa Barbara, Calif., to Oakland, Calif.).* From the Santa Barbara, Calif., omnirange station via the Bakersfield, Calif., omnirange station; Coalinga, Calif., omnirange station to the Oakland, Calif., omnirange station.

12. Section 600.6132 is amended to read:

§ 600.6132 *VOR civil airway No. 132 (Akron, Colo., to Hutchinson, Kans.).* From the Akron, Colo., omnirange station via the Goodland, Kans., omnirange station to the Hutchinson, Kans., omnirange station.

13. Section 600.6134 is amended to read:

§ 600.6134 *VOR civil airway No. 134 (Evergreen, Ala., to Atlanta, Ga.)* From the Evergreen, Ala., omnirange station via the Columbus, Ga., omnirange station to the Atlanta, Ga., omnirange station, excluding the portion which

overlaps the Fort Benning danger area (D-129).

14. Section 600.6136 is added to read:

§ 600.6136 *VOR civil airway No. 136 (Pulaski, Va., to Danville, Va.).* From the Pulaski, Va., omnirange station via the intersection of the Pulaski omnirange 094° True and the Danville omnirange 297° True radials to the Danville, Va., omnirange station.

15. Section 600.6140 is added to read:

§ 600.6140 *VOR civil airway No. 140 (Montebello, Va., to New York, N. Y.).* From the Montebello, Va., omnirange station to the Herndon, Va., omnirange station. From the point of intersection of the Philadelphia, Pa., International Airport ILS 256° True localizer course and the West Chester, Pa., omnirange 170° True radial via the Philadelphia, Pa., International Airport ILS localizer to the Colts Neck, N. J., omnirange station, via the Colts Neck omnirange 242° True radial.

16. Section 600.6142 is added to read:

§ 600.6142 *VOR civil airway No. 142 (Buffalo, N. Y., to Rochester, N. Y.).* From the Buffalo, N. Y., omnirange station via the intersection of the Buffalo omnirange 034° True and the Rochester omnirange 289° True radials to the Rochester, N. Y., omnirange station.

17. Section 600.6144 is added to read:

§ 600.6144 *VOR civil airway No. 144 (Morgantown, W. Va., to Front Royal, Va.).* From the Morgantown, W. Va., omnirange station to the Front Royal, Va., omnirange station.

18. Section 600.6146 is added to read:

§ 600.6146 *VOR civil airway No. 146 (Poughkeepsie, N. Y. to Woodstock, Conn.).* From the Poughkeepsie, N. Y., omnirange station to the point of intersection of the Poughkeepsie omnirange 079° True and the Norwich, Conn., omnirange 347° True radials.

19. Section 600.6147 is added to read:

§ 600.6147 *VOR civil airway No. 147 (Allentown, Pa., to Rochester, N. Y.).* From the Allentown, Pa., omnirange station via the intersection of the Allentown omnirange 329° True and the Elmira omnirange 134° True radials; Elmira, N. Y., omnirange station; intersection of the Elmira omnirange 305° True and the Rochester omnirange 183° True radials to the Rochester, N. Y., omnirange station.

20. Section 600.6148 is added to read:

§ 600.6148 *Vor civil airway No. 148 (Thurman, Colo., to Imperial, Nebr.).* From the Thurman, Colo., omnirange station to the Imperial, Nebr., omnirange station.

21. Section 600.6149 is added to read:

§ 600.6149 *VOR civil airway No. 149 (Allentown, Pa., to Binghamton, N. Y.).* From the Allentown, Pa., omnirange station via the intersection of the Allentown omnirange 329° True and the Binghamton omnirange 167° True radials to the Binghamton, N. Y., omnirange station.

22. Section 600.6150 is added to read:

§ 600.6150 *VOR civil airway No. 150 (unassigned).*

23. Section 600.6151 is added to read:

§ 600.6151 *VOR civil airway No. 151 (Woonsocket, R. I., to Gardner, Mass.).* From the point of intersection of the Norwich, Conn., omnirange 043° True and the Gardner omnirange 152° True radials via the Worcester, Mass., airport ILS LOM to the Gardner, Mass., omnirange station.

24. Section 600.6152 is added to read:

§ 600.6152 *VOR civil airway No. 152 (unassigned).*

25. Section 600.6153 is added to read:

§ 600.6153 *VOR civil airway No. 153 (Stroudsburg, Pa., to Wilkes Barre, Pa.).* From the point of intersection of the Allentown, Pa., omnirange 053° True and the Wilkes Barre-Scranton omnirange 146° True radials to the Wilkes Barre-Scranton, Pa., omnirange station.

26. Section 600.6154 is added to read:

§ 600.6154 *VOR civil airway No. 154 (unassigned).*

27. Section 600.6155 is added to read:

§ 600.6155 *VOR civil airway No. 155 (Gordonsville, Va., to Front Royal, Va.).* From the Gordonsville, Va., omnirange station to the Front Royal, Va., omnirange station.

28. Section 600.6156 is added to read:

§ 600.6156 *VOR civil airway No. 156 (unassigned).*

29. Section 600.6157 is added to read:

§ 600.6157 *VOR civil airway No. 157 (Lawrenceville, Va., to Richmond, Va.).* From the Lawrenceville, Va., omnirange station to the Richmond, Va., LF radio range station, excluding the portion which overlaps the Camp Pickett danger area (D-44).

(Sec. 205, 52 Stat. 984, as amended: 49 U. S. C. 425. Interpret or apply sec. 302, 52 Stat. 985, as amended: 49 U. S. C. 452)

This amendment shall become effective 0001 e. s. t. April 13, 1954.

[Amdt. 29]

PART 601—DESIGNATION OF CONTROL AREAS, CONTROL ZONES, AND REPORTING POINTS

ALTERATIONS

The control area, control zone and reporting point alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of Section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest and therefore is not required.

Part 601 is amended as follows:

1. Section 601.675 is added to read:

§ 601.675 *Blue civil airway No. 75 control areas (Cleveland, Ohio, to United States-Canadian Border).* All of Blue civil airway No. 75.

2. Section 601.1127 *Control area extension (Colorado Springs, Colo.)* is revoked.

3. Section 601.2045 is amended to read:

§ 601.2045 *Colorado Springs, Colo., control zone.* Within a 5-mile radius of Peterson Municipal Airport and within 2 miles either side of a line bearing 180° True from the airport extending to a point 15 miles south of the airport.

4. Section 601.4108 *Amber civil airway No. 8 (Los Angeles, Calif., to The Dalles, Oreg.)* is amended before "Camarillo, Calif., radio range station;" by adding the following reporting point: "The intersection of the west course of the Los Angeles, Calif., radio range and the southeast course of the Camarillo, Calif., radio range;".

5. Section 601.4675 is added to read:

§ 601.4675 *Blue civil airway No. 75 (Cleveland, Ohio to United States-Canadian Border).* No reporting point designation.

6. Section 601.6051 is amended to read:

§ 601.6051 *VOR civil airway No. 51 control areas (Chattanooga, Tenn., to Indianapolis, Ind.).* All of VOR civil airway No. 51.

7. Section 601.6107 is amended to read:

§ 601.6107 *VOR civil airway No. 107 control areas (Santa Barbara, Calif., to Oakland, Calif.).* All of VOR civil airway No. 107.

8. Section 601.6132 is amended to read:

§ 601.6132 *VOR civil airway No. 132 control areas (Akron, Colo., to Hutchinson, Kans.).* All of VOR civil airway No. 132.

9. Section 601.6136 is added to read:

§ 601.6136 *VOR civil airway No. 136 control areas (Pulaski, Va., to Danville, Va.).* All of VOR civil airway No. 136.

10. Section 601.6140 is added to read:

§ 601.6140 *VOR civil airway No. 140 control areas (Montebello, Va., to New York, N. Y.).* All of VOR civil airway No. 140.

11. Section 601.6142 is added to read:

§ 601.6142 *VOR civil airway No. 142 control areas (Buffalo, N. Y. to Rochester, N. Y.).* All of VOR civil airway No. 142.

12. Section 601.6144 is added to read:

§ 601.6144 *VOR civil airway No. 144 control areas (Morgantown, W. Va. to Front Royal, Va.).* All of VOR civil airway No. 144.

13. Section 601.6146 is added to read:

§ 601.6146 *VOR civil airway No. 146 control areas (Poughkeepsie, N. Y. to Woodstock, Conn.).* All of VOR civil airway No. 146.

14. Section 601.6147 is added to read:

§ 601.6147 *VOR civil airway No. 147 control areas (Allentown, Pa., to Rochester, N. Y.).* All of VOR civil airway No. 147.

15. Section 601.6148 is added to read:

§ 601.6148 *VOR civil airway No. 148 control areas (Thurman, Colo., to Imperial, Nebr.).* All of VOR civil airway No. 148.

16. Section 601.6149 is added to read:

§ 601.6149 *VOR civil airway No. 149 control areas (Allentown, Pa., to Binghamton, N. Y.).* All of VOR civil airway No. 149.

17. Section 601.6150 is added to read:

§ 601.6150 *VOR civil airway No. 150 control areas (unassingned).*

18. Section 601.6151 is added to read:

§ 601.6151 *VOR civil airway No. 151 control areas (Woonsocket, R. I. to Gardner, Mass.).* All of VOR civil airway No. 151.

19. Section 601.6152 is added to read:

§ 601.6152 *VOR civil airway No. 152 control areas (unassigned).*

20. Section 601.6153 is added to read:

§ 601.6153 *VOR civil airway No. 153 control areas (Stroudsburg, Pa., to Wilkes-Barre, Pa.).* All of VOR civil airway No. 153.

21. Section 601.6154 is added to read:

§ 601.6154 *VOR civil airway No. 154 control areas (unassigned).*

22. Section 601.6155 is added to read:

§ 601.6155 *VOR civil airway No. 155 control areas (Gordonsville, Va., to Front Royal, Va.).* All of VOR civil airway No. 155.

23. Section 601.6156 is added to read:

§ 601.6156 *VOR civil airway No. 156 control areas (unassigned).*

24. Section 601.6157 is added to read:

§ 601.6157 *VOR civil airway No. 157 control areas (Lawrenceville, Va., to Richmond, Va.).* All of VOR civil airway No. 157.

25. Section 601.7001 *Domestic VOR reporting points* is amended by adding the following reporting points:

Highway intersection: The intersection of the Nashville, Tenn., omnirange 059° True and the Crossville, Tenn., omnirange 347° True radials.

Medina intersection: The intersection of the Rochester, N. Y., omnirange 289° True and the Buffalo, N. Y., omnirange 034° True radials.

El Monte intersection: The intersection of the Ontario, Calif., omnirange 292° True and the Long Beach, Calif., omnirange 357° True radials.

Catalina intersection: The intersection of the Los Angeles, Calif., VAR south aural course and the Long Beach, Calif., omnirange 225° True radial.

Bedford intersection: The intersection of the Pullman, Mich., omnirange 094° True and the Litchfield, Mich., omnirange 314° True radials.

Loop intersection: The intersection of the Napersville, Ill., omnirange 064° True and the Chicago Heights, Ill., omnirange 345° True radials.

Mendota intersection: The intersection of the Janesville, Wis., omnirange 331° True and the Lone Rock, Wis., omnirange 104° True radials.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective 0001 e. s. t., April 13, 1954.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

LABELING OF DRUG PREPARATIONS CONTAINING SIGNIFICANT PROPORTIONS OF WINTERGREEN OIL

Pursuant to section 3 of the Administrative Procedure Act (sec. 3, 60 Stat. 237, 238; 5 U. S. C. 1002), the following statement of interpretation is issued:

§ 3.35 *Labeling of drug preparations containing significant proportions of wintergreen oil.* (a) Because methyl salicylate (wintergreen oil) manifests no toxicity in the minute amounts in which it is used as a flavoring, it is mistakenly regarded by the public as harmless even when taken in substantially larger amounts. Actually, it is quite toxic when taken in quantities of a teaspoonful or more. Wintergreen oil and preparations containing it have caused a number of deaths through accidental misuse by both adults and children. Children are particularly attracted by the odor and are likely to swallow these products when left within reach.

(b) To safeguard against fatalities from this cause, the Department of Health, Education, and Welfare will regard as misbranded under the provisions of the Federal Food, Drug, and Cosmetic Act any drug containing more than 5 percent methyl salicylate (wintergreen oil), the labeling of which fails to warn that use otherwise than as directed therein may be dangerous and that the article should be kept out of reach of children to prevent accidental poisoning.

(c) This statement of interpretation in no way exempts methyl salicylate (wintergreen oil) or its preparations from complying in all other respects with the requirements of the Federal Food, Drug, and Cosmetic Act.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interprets or applies sec. 502, 52 Stat. 1051; 21 U. S. C. 352)

Dated: April 6, 1954.

[SEAL] NELSON A. ROCKEFELLER,
Acting Secretary.

TITLE 25—INDIANS

Chapter I—Bureau of Indian Affairs, Department of the Interior

Subchapter Z—Wilderness and Roadless Areas

PART 281—ESTABLISHMENT OF ROADLESS AND WILD AREAS ON INDIAN RESERVATIONS

DEFINITION OF WILD AREAS

Section 281.2 is amended to read as follows:

§ 281.2 *Definition of wild areas.* There are certain areas, not large enough to be designated by the term roadless, from which it is nevertheless desirable to exclude provision for the passage of motorized transportation. Such tracts have been designated as wild areas. The Secretary of the Interior ordered that the following be established as wild areas on Indian reservations:

The boundaries of these areas are indicated in the appendix to this order.[1]

Name of area	Reservation	Approximate acreage
Mount Adams	Yakima	45,000
Fort Charlotte	Grand Portage	19,000
Grand Portage	Grand Portage	11,000

(R. S. 161; 5 U. S. C. 22)

DOUGLAS MCKAY,
Secretary of the Interior.

APRIL 5, 1954.

TITLE 43—PUBLIC LANDS: INTERIOR

Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 952]

FLORIDA

WITHDRAWING PUBLIC LAND FOR USE OF THE DEPARTMENT OF THE NAVY FOR MILITARY PURPOSES

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Subject to valid existing rights, the following-described public land in Florida is hereby withdrawn from all forms of appropriation under the public land laws, including the mining and mineral leasing laws, and reserved for the use of

[1] The appendix to this order is not codified. It appears, however, at 3 F. R. 606-610.

the Department of the Navy for military purposes:

TALLAHASSEE MERIDIAN

T. 4 S., R. 15 W.,
Sec. 4, lot 10.

The area described contains 1.23 acres.

It is intended that the land described shall be returned to the administration of the Department of the Interior when it is no longer needed for the purpose for which it is reserved.

ORME LEWIS,
Assistant Secretary of the Interior.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 927]

[Docket No. AO-71-A-25]

HANDLING OF MILK IN NEW YORK METROPOLITAN MILK MARKETING AREA

DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT, AND TO PROPOSED ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), and in accordance with the notice of hearing issued on October 6, 1953 (18 F. R. 6457), a public hearing was conducted at Utica, New York during the period October 19–November 20, 1953, and at Albany, New York on November 23 and 24, 1953 upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the New York metropolitan milk marketing area (7 CFR Part 927).

All of the material issues considered at the hearing relate to the classification and pricing of milk now in Class III (plus the question of eliminating existing difference between Class II and Class III in the nonfat dry milk solids market quotations and yield factors used). Such issues are concerned with:

1. The level of the Class III price and the pricing of those portions of Class III milk used for butter, cheese and candy products.

2. Whether the Boston weighted average cream price should continue to be used during the months of August through February in the pricing of all or a portion of the Class III milk.

3. Whether different market quotations and yield factors for nonfat dry milk solids should be used in the pricing of Class III milk, and whether such factors should be uniform for both Class II and Class III.

4. Pricing Class III milk on the basis of prices paid at selected Midwest condenseries.

5. Making provision in the order for separate allowances to handlers for Class III milk transferred from receiving plants to manufacturing plants.

6. Adoption of a so-called "flexible pricing plan."

Rulings. Within the period reserved therefor, interested parties filed exceptions to certain of the findings, conclusions and actions recommended by the Deputy Administrator. In arriving at the findings, conclusions, and regulatory provisions of this decision, each of such exceptions was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that findings, conclusions and actions decided upon herein are at variance with any of the exceptions filed to the recommended decision, such exceptions are overruled. Rulings contained in the recommended decision upon proposed findings and conclusions submitted by interested persons are affirmed except as modified by the findings and conclusions set forth herein. To the extent that findings and conclusions proposed by interested persons and not ruled upon in the recommended decision are inconsistent with the findings and conclusions contained herein, the specific or implied requests to make such findings and reach such conclusions are denied on the basis of the facts found and stated in connection with the conclusions herein set forth.

Findings and conclusions. The findings and conclusions hereinafter set forth are based upon the evidence in the record of the hearing and relate only to the above listed issues numbered 1 and 2. Findings and conclusions concerning the remaining issues (3 through 6) are being deferred temporarily in order to expedite final action of issues 1 and 2. In arriving at the findings and conclusions herein official notice is being taken of (1) announcements of the United States Department of Agriculture issued on February 15 and 18, 1954, relating to the dairy price support level and the prices at which dairy products will be purchased by the Commodity Credit Corporation during the period April 1, 1954, through March 31, 1955, (2) monthly announcements for months since September 1953 issued to date by the market administrator showing class prices, product prices used in calculating class prices, the uniform price, receipts of pool milk and utilization, (3) announcement by the market administrator on December 29, 1953 of the estimated monthly production of pool milk and Class I-A and uniform prices for the first half of 1954, and (4) provisions for the pricing of Class II milk under Orders No. 4 and 61 regulating the handling of milk in Boston and Philadelphia.

Issues 1 and 2. It is concluded with respect to these issues that:

(1) The general level of the Class III price should be reduced 10 cents per hundredweight for the months of May and June 1954.

(2) The butter-cheese adjustment should be revised to provide a downward adjustment during the months of March through July in the price of milk for American cheese in the event of an unusually low market price for cheese in relation to the market price for butter and nonfat dry milk solids.

(3) No additional separate adjustment should be made in the price established for milk used for butter or for milk chocolate and other candy products.

(4) Use of the Boston weighted average cream price in the pricing of Class III milk during the months of August through February should be discontinued, but in lieu thereof, an additional 3 cents (total of 5) should be added to the market price of butter used in pricing Class III milk during any of the months of August through February for which the utilization adjustment percentage is 92 or higher.

The prospective volume of Class III milk during the months of seasonally highest production this year is larger than in 1953. For the months of January and February 1954 (the latest months for which data are available) the volume of pool milk was about 5 percent larger than a year earlier. The volume of Class III milk in those months was larger by 23 and 27 million pounds, respectively, than in January and February 1953. The estimate of the market administrator released December 29, 1953, is that the volume of pool milk in each of the months of May and June this year will be approximately 40 to 45 million pounds larger than in the same month in 1953. With no apparent indication of significantly larger volumes being utilized in Class I and II, indications are that the volume of Class III milk during the peak production season this year will be substantially larger than last year.

Numerous cooperative and proprietary handlers reported experiencing considerable difficulty in disposing of Class III milk during the flush season of 1953, at which time the volume to be disposed of was considerably larger than previously, but less than in prospect for this year. Handling charges obtained on milk for fluid use, both in the spot market and for contract sales, appear to have been at unusually low levels during the first half of 1953. Handlers attributed this condition, at least in part, to the inability to arrange for the disposition of Class III milk on more favorable terms. With the additional volume of Class III milk in prospect this year, a lower Class III price during the period of peak production this year appears necessary in order to avoid a considerable degree of disorder in the disposition of all milk in excess of fluid requirements.

The disposition of Class III milk in competition, both with unregulated milk and with milk for which a lower minimum price is established under other orders, was reported to be one of the problems involved. In this connection, recognition is given to recently adopted or recommended amendments to Orders

No. 4 and 61 for Boston and Philadelphia, respectively, under which minimum prices established for milk for manufacturing probably will be somewhat lower during the present flush season than the Class III price as now established. The prices established by State agencies for milk in manufacturing uses and disposed of in competition with Class III milk in most instances are lower than the Class III price under Order No. 27. The price adjustment herein recommended for May and June will bring the price for Class III milk more nearly in line with the minimum prices established under these other orders.

Recognition is also given to the somewhat larger margin for handling and processing contemplated under the 1954–1955 price support program for milk and butterfat than under the 1953–1954 program. The Class III price adjustment herein provided will result in a correspondingly larger margin between the minimum producer price and the market price of manufactured products during the period when the largest volume of Class III milk is utilized in those manufactured products which are purchased under the price support program. This record provides no basis however for concluding that such lower prices should be provided for Class III milk other than for the flush production season this year. Whether or not a similar price adjustment should be applicable during the flush season of 1955 cannot be determined on this record.

It was contended at the hearing that failure to price milk utilized for the manufacture of American cheese more nearly in line with the market price of cheese constituted a handicap to the disposition of milk for use in cheese. It was proposed that milk used in the manufacture of American cheese be priced on the basis of cheese price quotations on the Wisconsin Cheese Exchange. It was contended that cheese made from pool milk customarily is sold on the basis of such quotations. Evidence was not presented to show the actual price at which cheese made from pool milk is sold and it was not established that such price bears any fixed or constant relationship to the price on the Exchange. Consequently, it cannot be concluded that the Exchange price constitutes a true indicator of the value of pool milk for cheese. It it recognized, however, that it is necessary for a portion of the Class III milk to be manufactured into American cheese during months of hightest production.

There appears to be no necessity for establishing a price for milk used for cheese lower than for milk used for butter and nonfat dry milk solids over any extended period of time. Although averaging about the same over long periods of time, there frequently are periods of several months during which there is considerable difference between the unregulated prices paid for milk at creameries and the prices paid at cheese factories in the same general competitive area. This fact was cited at the hearing in support of the proposal to establish a separate classification for milk used for American cheese and for pricing it on the basis of the market price of cheese independent of the price established for milk utilized for butter and nonfat dry milk solids. The order now provides, by means of the butter-cheese adjustment, for pricing milk at the same level when used either for cheese or for butter and for pricing milk for both uses at a moderately higher level whenever the market price of cheese is unusually high in relation to the market price of butter and nonfat dry milk solids.

Producers would not be receiving the full value of the milk, however, if milk for cheese was priced lower than for butter during those periods when all of the milk could be used for butter. On the other hand, during months of highest seasonal production when it is necessary to utilize pool milk in both butter and cheese there appears to be merit in the proposal to relate prices established for milk used for cheese more closely than at present to the market price for cheese. Accordingly, the butter-cheese adjustment provision should be revised to provide a price for milk made into cheese lower than for butter and nonfat dry milk solids during the months of March through July if during such months the market price for cheese is unusually low in relation to the market price for butter and nonfat dry milk solids. The amendment herein set forth provides that for each 0.05 of a point by which the normal ratio of 2.5 is lower than the ratio existing for the current month of the market price for butter and nonfat dry milk solids to the price of cheese there shall be a reduction of 1 cent per pound of butterfat in the price otherwise established for milk utilized for cheese. This will provide a relatively prompt downward adjustment in the price for milk used for cheese whenever the price of cheese becomes relatively low, and such adjustment will be at double the rate at which the price of milk both for butter and cheese is now increased when the market price of cheese is unusually high in relation to butter and nonfat dry milk solids. The market prices of butter and nonfat dry milk solids in relation to the market price of cheese has not deviated from the ratio of 2.5 during any month since November 1952. The ratio was less than 2.5 during the months of September, October, and November 1952 resulting in a slight increase in the price of milk for butter and cheese during those months. The only time during the past three years when the ratio was higher than 2.5 was during the period November 1951 through March 1952. Being applicable only during the months of March through July, the proposed new provision would have operated to reduce the price only during the month of March 1952.

Except for this revision in the butter-cheese adjustment, designed to facilitate the utilization of milk for cheese at times when such utilization is necessary, there should be no change in relationship between the price established for milk for butter and cheese and the price established for other Class III uses. Any further widening of the differential between the price of milk for butter and cheese and the price of other Class III milk, as would result, for example, from adoption of the proposal to discontinue adding 2 cents to the butter price in calculating the price of milk for butter, would have the undesirable effect of making the utilization of milk in butter and cheese more advantageous than at present in relation to other Class III uses. The adjustments herein provided effecting the general level of the Class III price apply, of course, to milk used for butter, and appear to constitute a more appropriate means of adjusting the price of milk for butter than to change the present pricing arrangement in a way which might result in unnecessary shifts of milk to butter from other Class III uses.

A proposal was considered at the hearing that the price for milk used for milk chocolate and other candy products be established at the same level as for butter and cheese. It was contended in support of the proposal that milk solids and butterfat in concentrated form are available from Midwest plants (condenseries) operated by the proponent chocolate manufacturer at a price about 15 cents below the price paid a pool plant handler for fresh bulk whole fluid milk. The reported comparative cost of concentrated supplies from plants of the same company was not shown to have been arrived at in a manner suitable for use as a basis for pricing pool milk. Such comparative cost apparently was calculated from an assigned cost of such milk to the shipping plant of less than the price paid to farmers at the plant. It was characterized by the proponent as extra milk "dumped" on the market for whatever they could get. There would be no apparent stopping point if pool milk was to be priced on that basis. It was not shown that, except for such "dumped" milk, that alternative supplies are available for chocolate manufacture at prices below the full Class III price. If they are, there appears to be no reason why such supplies are available only to chocolate manufacturers, and not to such other users of Class III milk as ice cream manufacturers. The record does not justify a provision pricing milk for milk chocolate and other candy products lower than for other Class III uses particularly in view of the overall reduction in price applicable in May and June.

The rejection, except to the limited extent herein provided, of proposals for the pricing of certain uses of Class III milk independently is largely in recognition of the manner in which milk in excess of fluid requirements has been utilized since the present pricing system was adopted in 1949. The volume of Class III milk in 1953 was 1,719 million pounds larger than the volume of pool milk in equivalent uses in 1948, an increase of about 110 percent. A reduction from 1948 to 1953 of 20 million pounds in the volume of milk used for storage cream means that the volume in other uses was 1,739 million pounds larger in 1953 than in 1948.

Increases in volumes for other uses from 1948 to 1953 were (in millions of pounds): for fluid cream outside the marketing area—from 161 to 715, an increase of 344 percent; for ice cream—from 337 to 770, an increase of 128 per-

cent; cream cheese—from 21 to 111, an increase of 429 percent; for whole milk products other than American cheese—from 387 to 423, an increase of 9 percent; for Cheddar cheese—from 185 to 299, an increase of 62 percent; and for butter—from 131 to 643, an increase of 391 percent.

Nearly two-thirds of the increase in volume has gone into uses to which the full Class III price applies. Nevertheless, there has been a marked increase in the actual volume used for butter and cheese. The proportion of all Class III milk used for butter and cheese increased from about 20 percent in 1948 to about 29 percent in 1953. Actual volume in these uses was about 3 times larger in 1953 than in 1948. Milk for fluid cream has increased about 4½ times and in terms of actual volume is greater than the increase in the volume used for butter. Ice cream constitutes the largest single outlet for Class III milk and the volume so used has more than doubled since 1948. The increase in actual volume, however, has been less than for butter. The volume of pool milk used for ice cream in 1953 in relation to the volume of ice cream produced in the Northeast is much larger than in 1948 and has increased in 1953 after dropping slightly in 1951 and 1952 from the levels of 1949 and 1950. In spite of the rather substantial gains in expanding outlets for Class III milk in uses yielding a higher return to producers than for milk used for butter and cheese, the fact that a larger proportion of the Class III milk was used for butter and cheese in 1953 than in 1948 does not appear to support a pricing program under which economic incentives for utilizing Class III milk for other than butter and cheese would be reduced.

The conclusion to eliminate use of the Boston weighted average cream price in establishing the price of Class III milk during the months of August through February has been reached primarily on evidence indicating that it does not constitute a satisfactory measure of the value of Class III milk under existing conditions.

The Boston weighted average cream price has been used in calculating the Class III price on the belief that it was the best available measure of the value of Class III butterfat during periods when milk in excess of fluid requirements is in relatively short supply. It does not appear, however, that the Boston weighted average cream price serves that purpose satisfactorily with the increase in the volume of Class III milk recently prevailing and in prospect for this year. The volume of Class III milk during the months of August through February has increased materially while at the same time the volume of cream used in computing the Boston weighted average has declined. During the period August through February 1952–1953 and 1953–1954, the volume of Class III milk was 38 and 52 percent, respectively, higher than for the same period 1950–1951. The volume of Class III milk used in butter was about ten times larger during the period August through February 1952–1953 than for the same period 1950–1951. The volume of cream in the Boston weighted average declined nearly 50 percent during the three year period and for the months of August through February 1952–1953 represented a milk equivalent only about one-fourth as large as the volume of pool milk used for butter.

Notwithstanding, this material increase in the volume of Class III milk, however, and the decline in the volume of cream in the Boston weighted average, the price per pound of butterfat based on the Boston weighted average cream price averaged about 4 cents higher that the Class III formula price per pound of butterfat based on butter during the period August 1952 through February 1953. It was during this period particularly that handling margins on milk for fluid purposes were reported to have been depressed. Handlers also reported considerable difficulty in disposing of Class III milk on reasonable terms during this period.

Again during the period August 1953 through February 1954, the volume of Class III milk was at a relatively high level and greatly exceeded the milk equivalent of cream used in computing the Boston weighted average cream price. For three of those months no Boston weighted average was published due to the extremely small volume of cream traded in the Boston market. Instead of being higher than the price of butterfat in butter, as was the case during the last half of 1952, the price of butterfat in Boston cream averaged slightly less during the months August 1953 through February 1954 than the price of butterfat in butter. This change in relationship from 1952 to 1953 makes it appear extremely doubtful that the Boston weighted average cream price continues to reflect the value of Class III milk with a reasonable degree of accuracy under existing conditions. Fluctuations in the margin in the price of butterfat reflected in the Boston weighted average cream price over the price of butterfat in butter do not appear to coincide with changes in the market value of most of the products for which Class III milk is utilized. Uncertainty as to what this relationship will be from one month to the next under a given set of circumstances was reported to have an adverse effect upon efforts to maintain and expand outlets for Class III milk, particularly for use in ice cream.

The disadvantages of retaining the Boston weighted average cream price as a basis for pricing that portion of Class III milk used for fluid cream outside the marketing area, as distinguished from Class III milk for other uses, appear to out-weigh the advantages to be derived. Such modification was suggested at the hearing. It was not established, however, that the Boston weighted average cream price can be relied upon to reflect the value of Class III milk for fluid cream more accurately than for other purposes. Furthermore, it was shown that such a pricing arrangement would tend to jeopardize outlets for Class III milk for reasons associated with the necessity thus created for more complete verification of utilization at nonpool plants utilizing Class III milk. Although difficult to measure with accuracy, it is concluded that this factor could reasonably be expected to virtually offset any minor enhancement in returns to producers which would result from use of the Boston weighted average in establishing the price of milk used for fluid cream.

Even though the Boston weighted average cream price is found to be no longer suitable for the purpose, some provision should be made in the order for reflecting the higher value of Class III milk which appears to be obtainable at times when there is a smaller volume of Class III milk to be disposed of. While other factors may be involved affecting the marketability of Class III milk, the volume to be disposed of appears to be one of the major factors in determining the price obtainable. With the volume of Class III milk which prevailed prior to 1952 the price established for Class III milk during the months of August through February was somewhat higher than would have resulted from the use of New York 92-score butter plus 2 cents, the level at which it was priced during the months of March through July. The average premium over butter plus 2 was equivalent to slightly more than 3 cents per pound of butter for the August through February periods ending in 1951 and 1952.

During those years, however, the outlets for Class III milk continued to expand and the difficulties experienced in disposing of Class III milk were less pronounced than during the past two years when the volume of Class III milk became substantially higher. The larger volume of Class III milk which has prevailed since 1951 appears to be associated with marketing conditions under which it is difficult to obtain as high a price for Class III milk as formerly. Under these circumstances, it appears appropriate to make provision for increasing the price of Class III milk by the addition of an additional premium over the market price of butter whenever the volume of Class III milk approximates the level prevailing during the years 1950 and 1951.

As a means of effectuating that principle, it seems appropriate to relate the price of Class III milk during the months of August through February to the utilization adjustment percentage which is now used in calculating the price of Class I–A milk. This percentage reflects the relative volume of pooled milk in excess of Class I uses, and is announced for each month by not later than the 25th day of the preceding month. Calculation of a separate Class III percentage by omission of the percentage of milk utilized in Class II would make no significant difference in the result obtained. The utilization adjustment percentages for the months of August through February ending in 1951 and 1952 averaged slightly in excess of 92. There has been no month since February 1952 for which the utilization adjustment percentage has been as high as 92. There were nine months during the 2-year period ending in February 1952 for which the utilization adjustment percentage was 92 or higher. Accordingly, it is concluded that an additional 3 cents, or a total of 5 cents, should be added to the New York market price for 92-score butter during any of the months of August through February for which the utilization adjustment percentage is 92 or higher. This should result in a Class III price during the month of August through February averaging about the same as in 1950 and 1951 in relation to the market price of butter, while at the same time eliminating the unpredictable month to month fluctuations in relation to the market price of butter.

It has been determined that revision is required in the language of the amendments included in the recommended decision as the detailed and appropriate means of carrying out the foregoing conclusions. In subparagraph (1) of the proposed new paragraph (f) in § 927.40, provision for multiplying the per pound value of butterfat by 3.5 to obtain the value for milk containing 3.5 percent of butterfat was inadvertently omitted. Also, in the proposed new proviso in § 927.43, no provision was made for calculating to the nearest five hundredths of a point the ratio of the butter-nonfat dry milk solids value to the cheese value in order to effectuate one of the stated purposes of the proviso. The language of the proposed amendments herein set forth have been revised accordingly.

General findings. (a) The tentative marketing agreement and the order as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and in the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(c) The tentative marketing agreement and the order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

Marketing agreement and order. Annexed hereto and made a part hereof are two documents entitled "Marketing Agreement Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area" and "Order Amending the Order, as Amended Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area" which have been decided upon as the appropriate and detailed means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

Order of the Secretary Directing That a Referendum Be Conducted; Determination of a Representative Period; and Designation of an Agent To Conduct Such Referendum

Pursuant to section 8c (19) of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 608 (c) (19)), it is hereby directed that a referendum be conducted among the producers (as defined in the order, as amended, and as hereby proposed to be further amended, regulating the handling of milk in the New York metropolitan milk marketing area) who, during the month of December 1953, were engaged in the production of milk for sale in the marketing area specified in the aforesaid order, as amended, and as hereby proposed to be further amended, to determine whether such producers favor the issuance of the order amending the order, as amended, which is a part of this decision.

The month of December 1953 is hereby determined to be a representative period for the conduct of such referendum.

C. J. Blanford is hereby designated as agent of the Secretary to conduct such referendum, and except as set forth herein, such referendum shall be conducted in accordance with the procedure for the conduct of referenda to determine producer approval of milk marketing orders as published in the FEDERAL REGISTER on August 10, 1950 (15 F. R. 5177), and shall be completed on or before April 23, 1954.

As a means of effectuating certain policies jointly adopted by the Secretary and the Commissioner of Agriculture and Markets of the State of New York in a memorandum of cooperation dated August 26, 1938, the above designated agent of the Secretary shall, at the same time he transmits his report to the Secretary, also transmit a similar report to the Commissioner of Agriculture and Markets of the State of New York.

The above designated agent of the Secretary shall not be required to transmit with his report to the Secretary a copy of each statement concerning the referendum as it appeared in each newspaper, but he shall transmit with his report a copy of the release which he presented to newspapers generally distributed in the area along with a summary of the numbers and types of newspapers to which it was presented.

The time within which the complete detailed report of the above designated agent shall be transmitted to the Secretary is hereby extended to five days after the close of the referendum, but a preliminary report based on the information then available shall be transmitted to the Secretary within two days after the close of the referendum.

It is hereby ordered, That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the attached order amending the order, as amended, which will be published with the decision.

This decision filed at Washington, D. C., this 7th day of April 1954.

[SEAL] JOHN H. DAVIS,
Assistant Secretary of Agriculture.

Order[1] Amending the Order, as Amended, Regulating the Handling of Milk in the New York Metropolitan Milk Marketing Area

§ 927.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the New York metropolitan milk marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic condtions which affect market supply of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof, the handling of milk in the New York metropolitan milk marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended and as hereby further amended; and the aforesaid order, as amended, is hereby further amended as follows:

1. Amend § 927.40 (f) to read as follows:

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

(f) For Class III milk, the price shall be the sum of the amounts computed pursuant to subparagraphs (1) and (2) of this paragraph minus 80 cents: *Provided*, That for the months of May and June 1954 an additional 10 cents shall be subtracted from such sum.

(1) To the simple average of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) reported during such month by the United States Department of Agriculture for Grade A (92-score) bulk creamery butter in the New York City market, add two cents, multiply by 1.22 and then multiply by 3.5: *Provided*, That for any of the months from August through February for which the utilization adjustment percentage announced pursuant to § 927.46 (a) (2) is 92 or larger, there shall be an additional three cents added to such average butter price.

(2) Multiply by 7.8 the weighted average, as computed by the market administrator using a weight of 70 for roller process prices and a weight of 30 for spray process prices, of the prices per pound of roller process and spray process nonfat dry milk solids, for human consumption in carlots f. o. b. manufacturing plants in the Chicago area, as published by the United States Department of Agriculture for the period from the 26th day of the immediately preceding month through the 25th day of the current month.

2. Amend § 927.43 by (1) changing to "(5)" "(7)" and "(8)" the references made therein to subparagraphs "(6)" "(8)" and "(9)" of § 927.46 (b), and (2) by adding after the first proviso therein the following: "*Provided further*, That for milk received from producers during any of the months of March through July which is classified on the basis of one of the types of cheese named in this section, the amount so credited shall be increased one cent per pound of butterfat for each full five hundredths by which the ratio of 2.5 is lower than the ratio computed pursuant to the first proviso of this section, except that, for purposes of this proviso, the ratio computed shall be rounded to the nearest hundredth."

3. Amend paragraph (b) of § 927.46 by deleting subparagraph (5) thereof, and renumbering other subparagraphs accordingly.

[F. R. Doc. 54-2703; Filed, Apr. 9, 1954; 8:52 a. m.]

[7 CFR Part 972]

[Docket No. AO-177-A13]

HANDLING OF MILK IN THE TRI-STATE MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO THE TENTATIVE MARKETING AGREEMENT AND TO THE ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of this recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Tri-State marketing area.

Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business the 7th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. The hearing, on the record of which the proposed amendments to the tentative marketing agreement and to the order, as amended, were formulated, was conducted at Gallipolis, Ohio, on February 18 and 19, 1954, pursuant to notice thereof issued on February 10, 1954 (19 F. R. 864).

The material issues of record relate to:

1. Revision of the definitions of "fluid milk plant," "Gallipolis district plant" and "producer;"

2. Modification of the rules for classifying interhandler transfers of milk;

3. Revision of the method of computing the Class I price, including the "supply-demand adjustment" provisions and the application of Class I prices to the respective districts of the marketing area;

4. Adoption of a "take out" and "pay back" plan for distributing returns to producers;

5. Reduction of the maximum rate of administrative assessment;

6. Revision of the formula for pricing Class III milk, and the addition of a fourth class (Class IV milk) for pricing purposes; and

7. Certain changes for administrative purposes.

Findings and conclusions. The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

(1) The definition of "fluid milk plant," "Gallipolis district plant" and "producer" should be modified.

The term "fluid milk plant" is used in the order to denote those plants at which the handling of milk shall be fully subject to the order. At the present time a fluid milk plant is defined as a plant from which a route (as defined in the order) is operated wholly or partially within the marketing area. Thus, a plant from which no route is operated within the marketing area (called a nonfluid milk plant in the order) but from which milk is supplied in bulk to a plant from which a route is operated is not subject to the pricing and payment provisions of the order, and the milk obtained from such a plant is not priced by the order.

Substantial proportions of the market supply of milk and butterfat have been obtained from these unregulated nonfluid milk plants and in several months of the year such plants have been a regular and substantial source of supply, especially for Huntington district plants. A significant portion of the market supply, therefore, has not been subject to the pricing and payment provisions of the order with the result (1) the effectiveness of the pricing and payment provision of the order in encouraging adequate supplies of pure and wholesome milk has been handicapped, and (2) a portion of the market supply is being procured on a "flat price" basis without regard to use of milk as distinguished from the classified price plan prevailing under the order. These results tend to obstruct effectuation of the purposes of the Agricultural Marketing Agreement Act of 1937, as amended, and create a constant threat to the entire classified price plan.

It is concluded that the definition of a "fluid milk plant" should be changed so that all milk plants which supply milk for the marketing area will be subject to the pricing and payment provisions of the order, except plants which supply relatively small quantities and plants at which the handling of milk is fully subject to the pricing and payment provisions of some order issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended. For this purpose, any plant which supplies a total of 25,000 pounds or more of milk per month to one or more plants from which routes are operated within the marketing area should also be a "fluid milk plant," except as explained below. The minimum volume of 25,000 pounds is selected because it approximates one tank truck load of milk.

A similar provision was adopted in a decision issued in October 1953. It was concluded, however, in connection with the expanded definition adopted at that time, to become effective May 1, 1954, that during each of the months of September through April a plant should not be a fluid milk plant unless it supplies milk to one or more plants presently defined as fluid milk plants on one or more days of each week as well as a minimum quantity of 25,000 pounds during the month. Upon further review it appears that the weekly delivery requirement actually would tend to defeat the purpose for which the definition is revised since a plant might avoid becoming a fluid milk plant for any month in the September–April period merely by failing to ship milk during one week of such month. For this reason such requirement has been omitted from the definition adopted by this decision.

Most of the unregulated supply of milk which has been coming into the market has originated at plants at Marysville and Circleville, Ohio. Both of these plants have two or more quality grades of milk. If these or any other similar plants become subject to the order, only that grade(s) of milk which is approved for fluid use by some marketing area health authority would be priced under the order.

Certain handlers oppose a fluid milk plant definition of expanded scope on the basis that they have always purchased producer milk to the extent it was available and that under a revised definition they would encounter great difficulty in obtaining adequate supplies. Each handler, of course, selects his own sources of supply. It appears that in some instances there has been price advantage to the handler in purchasing other source milk. The changes in the fluid milk plant definition herein concluded to be necessary will only subject all major sources of supply to the same pricing and payment provisions, thus preserving the integrity of the price plan established by the order.

A suggestion was made that the definition of "Gallipolis district plant" be revised to include plants in Meigs County, Ohio, because of its proximity to Mason County which lies directly across the Ohio River. Plants in the latter county are covered by the definition. Handlers at Gallipolis have substantial distribution outlets in Meigs County. At present there are no plants located in Meigs County; however, if a handler began a distributing operation from a location in such county, his plant would be termed an "Athens district plant" under § 972.11 of the present order. The proposed change would automatically place such a plant in the same category as Gallipolis district plants for pricing purposes, whereas the Class I price at Athens district plants is 20 cents less than that at Gallipolis district plants. It appears that this change would provide more equitable pricing among handlers in the eventuality described. It is concluded that the proposal should be adopted.

It was further proposed by certain producer associations that the definition of "producer" be revised to eliminate "producer-handlers." It was pointed out that milk received by a handler from a producer-handler generally is surplus to the producer-handler's own fluid milk distribution outlets and usually is disposed of to other handlers during the season of flush production when the market is long on supply and the milk involved can be utilized in the lowest-priced classes only. The effect is to reduce the blended, or uniform, price to the regular producers delivering to such handler.

Since the value of the producer-handler's milk is a "surplus" value, he should not be entitled to share in the proceeds from the sale of Class I and Class II milk regularly supplied by other producers. It may be noted that since producer-handlers are fully exempt from the price and payment provisions of the order, they receive the full benefit of their own Class I sales and do not share the returns from such sales with other producers. Producer-handler milk should not serve to dilute the price payable to other producers. By eliminating producer-handlers as "producers" their milk would become "other source milk" when it enters a handler's plant and the handler would pay for it whatever amount is agreed upon between him and the seller, without effect upon the minimum uniform price to other producers. It is concluded that the proposal should be adopted.

(2) The rules governing interhandler transfers of milk should not be revised.

A proposal was made to classify transfers of milk, skim milk, and cream in fluid form from one fluid milk plant to another on a pro rata basis according to the utilization of milk received at the transferee plant in the various classes. Thus, the classification of milk so transferred would be equivalent to the classification experience realized by producers delivering directly to the transferee plant. At the present time the order provides for the classification of such transfers on the basis of agreement between the buyer and seller, within certain limitations.

It is contended by proponents that the classification of milk by agreement between buyer and seller works a detriment to the ready transfer of producer milk from one district to another and that it would be unfair to Athens producers, for example, for handlers in the Athens district to transfer milk to Huntington plants as Class III milk when the milk would not have been moved such a distance unless it was needed at least in part for Class I or Class II use. If the milk were transferred as Class III milk the Athens district producers would realize, of course, only the Class III price for it.

Equitable application of the prorata basis of classification of transfers would appear to call for its use uniformly in all transactions involving transfers between fluid milk plants whether qualified under § 972.7 (a) or § 972.7 (b). In this circumstance such a provision might have advantage for some producers under certain conditions, but it might also work to the disadvantage of other producers by forcing the latter to take a lower classification for their milk than would otherwise be necessary considering their bargaining strength and the interest of their handler outlets in maintaining the highest possible uniform prices. On the other hand, if the rule were made to apply only to transactions involving plants described under § 972.7 (a), a prospective purchaser might well choose to purchase elsewhere if forced into a prorata classification when buying from another § 972.7 (a) plant. In such event the provision would be of no avail to producers at the potential transferor plant.

The main factor which has worked against a classification of milk satisfactory to producers who supply milk for transfer in this manner appears to be the fact that in the past there have been substantial quantities of milk unpriced, thus reducing the interest of those handlers purchasing milk from outside plants in buying nearer-by milk from handlers in other districts of the marketing area. However, with all milk supplied to the market, except for minor, sporadic shipments of other source milk, to be priced upon entry to the marketing area under the conditions of § 972.7 (b), the need for such a provision should diminish and any handler with a plant qualified under § 972.7 (a) should be able to bargain for a classification of milk transferred which will enable him to reflect to his producers through his uniform price a reasonable return based on its ultimate use. Under an individual handler plan of pooling such a handler has a direct interest in maintaining a satisfactory relationship between the uniform price he pays to his producers, which would be affected by transfers made to other plants and those required to be paid by competing handlers.

The order, of course, does not attempt to sell the milk of producers. This is a function properly left to producers and their representatives. In the interest of all producers regularly supplying the marketing area, it appears preferable at this time to leave the classification of interplant transfers on the present basis of agreement between buyer and seller. Under such provision all producers and their respective handlers are free to utilize their ability to bargain for the maximum return from the sale of their milk under the framework of prices provided. However, if handlers use this provision as a means of reducing returns to local producers unduly, some modification of the basis of classification where interplant movements are involved may be necessary. It is concluded that the transfer provisions should remain unchanged.

(3) The method of determining Class I and Class II price differentials should be revised.

Proposals relating to (1) the levels of Class I and Class II prices in relation to the basic formula price, (2) the seasonal application of class price differentials, (3) the application of Class I and Class II prices by districts, and (4) the "supply demand price adjuster," were submitted for consideration at the hearing.

One association of producers proposed that the Class I price differential (over the manufacturing milk price level) be established at $2.10 per hundredweight for all districts on an annual basis. This would constitute an increase ranging from 65 to 95 cents per hundredweight over the present annual average level of the Class I price differential depending upon the particular district of the marketing area. Under the proposal similar increases in the Class II price level also would occur.

Such increases, if adopted, would occur at a time when the basic formula, or manufacturing, price level is decreasing and thus would increase very substantially the percentages which the class price differentials bear to the basic formula price. The current class price differentials in relation to the current basic formula price level are providing incentive to the delivery of additional milk by procduers. Throughout the milkshed deliveries by individual producers are expanding. Average monthly deliveries from individual producers for the year 1953 were 17 percent greater than during 1952. During the recent month of January 1954 producer deliveries were 20 percent higher than during the same month a year ago. There has been sizeable increase also in the number of producers shipping to marketing area plants during the past year. It appears that in those segments of the marketing area where milk supplies have been lowest in relation to sales, and the need for supplemental supplies has been greatest, there has been no difficulty in obtaining,

under current health requirements, the necessary additional supplies from sources other than regular producers. In these circumstances, it is concluded that an increase in price differentials would not be warranted.

A second proposal would alter the seasonal application of class price differentials by extending the level of differentials currently in effect during the months of October through January to the additional months of August and September. It is alleged by the producer proponents that this proposal would provide producers with greater incentive to shift their production pattern so as to deliver greater quantities of milk in the fall and early winter months when deliveries are lowest in relation to Class I and Class II milk sales.

Data in the record relative to producer deliveries indicate that no additional incentive to the production of milk during the month of August is needed at this time. However, a marked seasonal decline in deliveries below the August level normally takes place in September. At the present time the additional return resulting from the "winter" schedule of differentials does not reach producers until November 18 since such schedule takes effect in October and payments for October milk customarily are made to producers about November 18. The application of the winter differential rates to September milk would place additional monies in the hands of producers one month earlier in the year than the present schedule. This should assist producers in the greater production of fall and winter supplies, particularly during October and November when additional milk is most needed from a seasonal standpoint. On the other hand, the annual average level of differentials should not be increased for the reasons previously stated. It is concluded that the following differentials per hundredweight for Class I milk should apply for Huntington district plants: April, May, June, and July, $1.10; February, March, and August, $1.35; and September through January, $1.80. Class II price differentials should be maintained at the same amount per hundredweight below the Class I price level on the basis of the present record.

Differences in class prices among districts should remain unchanged on the basis of considerations discussed in a previous decision. The establishment of districts with different prices is designed to reflect variations in hauling cost based upon the location of regulated milk plants with respect to the primary sources of milk supply. This principle should apply whether the milk moves from the main supply sources to the various districts in packaged form on distribution routes, in bulk from one plant to another, or in bulk by direct delivery from farm to plant. If the class prices were the same for all districts, the incentive to move producer milk to the communities where it can be utilized to maximum advantage would be removed. In view of the above, it is concluded that the differences in class prices between districts now in effect should continue to prevail. Thus, the effective Class I and Class II price differentials for the Gallipolis, Scioto, and Athens districts should be 10, 20, and 30 cents per hundredweight, respectively, below the level of those established for the Huntington district.

Proposals to price Class I and Class II milk sold from a fluid milk plant located in one district on wholesale or retail routes within another district at the minimum class price effective for the latter district, also were discussed in the record.

The pricing of Class I and Class II milk according to the district where ultimately sold on wholesale or retail routes when distributed from a fluid milk plant in another district would cause producers delivering their milk to plants in a higher-priced district from which milk is moved to a lower-priced district for sale to pay for the movement to the latter district where milk is available from local producers at a lesser cost. If Class I and Class II milk were moved from a fluid milk plant in lower-priced district for sale on wholesale or retail routes in a higher-priced district and priced at the level of the latter district, the producers of the lower-priced district would gain unduly from the movement since they do not bear the transportation cost between the districts. It is concluded from the foregoing that Class I and Class II milk should be priced at the level established for the location of the fluid milk plant from which such milk is disposed.

Another phase of Class I pricing reviewed was the effect of the "supply-demand adjustor." On November 1, 1953, the supply-demand adjustment provisions were revised in the light of changes in other provisions of the order relating to the definition of fluid milk plant, the scope of the marketing area, and the type of pooling plan adopted at that time. Under the revision a new schedule of "standard utilization percentages" to take effect on May 1, 1954, was adopted. It appears now that the schedule of standard utilization percentages which were to take effect on May 1 should be deleted and that the schedule applicable until May 1 should be revised and made to apply indefinitely in light of the further changes made in the fluid milk plant definition and the current supply situation.

Although a new definition of fluid milk plant is adopted in this decision, any additional plant to be covered pursuant to § 972.7 (b) will be regulated for pricing and producer payment purposes for only those months during which a monthly quantity of milk in excess of 25,000 pounds is delivered from such a plant to a plant from which a route(s) is operated within the marketing area. Any such plant qualifying under § 972.7 (b), including those which have been the primary suppliers of other source milk in the past, may qualify as a fluid milk plant one month and be entirely outside the regulation the next, depending on the respective monthly quantities of milk so delivered. Thus, the inclusion of supply and sales data for § 972.7 (b) plants in the computation of standard utilization percentages for the purposes of a supply-demand adjustment would give a distorted view of the local supply-demand situation and the efforts of regular producers to supply the needs of the market.

It appears that a reasonable reflection of the supply-demand situation will result from percentages based upon the total producer receipts and gross Class I utilization at plants from which routes are operated within the marketing area (§ 972.7 (a)). Experience indicates, however, that the particular schedule of percentages based upon receipts and sales at such plants currently in use does not perform to accurately measure supply changes in relation to demand under the conditions outlined. It was for this reason that the supply-demand adjustment resulting therefrom recently was suspended for the months of February, March, and April 1954. The standard utilization percentages should allow for not less than 5 percent of producer receipts as a minimum reserve quantity of producer milk during each month. At present, for example the standard utilization percentage for February 1954 (based on supply-sales data for December 1953 and January 1954 is predicated upon the utilization of a quantity of milk in Class I equal to 100 percent of local producer milk receipts in such two months which, although experienced at certain times in the past, does not represent an adequately supplied market. It may be noted that even though local production is increasing as rapidly as might be expected, a quantity of milk equal to 100.3 percent of producer receipts was needed for Class I uses in the short production month of November 1953. The revised percentages should result in a reasonable reflection of the supply-demand relationship.

It is concluded in another part of this decision that the butterfat differential applicable to the Class III price should be decreased slightly to bring it directly in line with the price of butterfat reflected in the Class III price formula for 3.5 percent milk. In order to keep an appropriate spread between the butterfat differential applicable to the Class I price and that adopted for Class III pricing, it is concluded that the Class I butterfat differential should be reduced to the same level as the Class II butterfat differential.

(4) A "take out" and "pay back" plan of distributing among producers the proceeds from the sale of milk should not be adopted.

A proposal for a fall production incentive plan whereby a portion of the monies paid by handlers for Class I milk in April, May, and June would be held in a special fund and distributed among producers in October, November, December, January, and February was considered at the hearing. This plan was offered in connection with the proposal to establish the Class I price differential at $2.10 for all districts and for all months.

There is a substantial variation between the Class I differential for April, May, June, and July and that effective during the fall and winter months. It does not appear that this proposal for distributing monies seasonally would result in as wide a difference between the spring and fall price levels as the present plan of seasonally adjusted price differentials and thus would provide somewhat less encouragement to local producers to shift from spring to fall production.

Moreover, complications would arise under the proposal in connection with the distribution of monies to producers delivering to fluid milk plants qualified under § 972.7 (b) at which milk will be priced only a part of the year. Although the market presently relies upon such plants for a substantial proportion of supplies, particularly in the fall months, such plants normally would be qualified as fluid milk plants during the period when payments are made to producers from the set-aside fund but would not be so qualified at the time deductions from the price are made for the benefit of the fund. It appears that proponents intended that the monies paid into the fund would be paid out to the same producers (or to the producers delivering to the particular handler at the time of payment) and did not propose the sharing of such monies with producers at plants shipping under § 972.7 (b) not contributing to the fund. On the other hand, the "take out" and "pay back" plan must be regarded as having market-wide implications and is not a method of distributing returns to producers as individuals delivering to a given handler. If the participation of producers at § 972.7 (b) plants were not provided for under the plan, the result would be different seasonal patterns of prices for different groups of producers. Producers supplying a fluid milk plant qualified under § 972.7 (b), but from which no milk was shipped to the market in April, May, June, and July, would have no fall production incentive fund to share and thus would receive substantially lower prices than other producers even though the value of their milk as a part of the market supply in the fall months would be fully as high in relation to summer production as other producers participating in an incentive fund. In view of the foregoing, it is concluded that it is preferable to establish seasonal variations in returns to producers by means of seasonal variations in the Class I and Class II prices and thus provide the basis for distributing the proceeds from the sale of milk to all producers in accordance with its proper seasonal value.

(5) The maximum rate of administrative assessment should not be changed.

A proposal to change the maximum rate of administrative assessment from 4 to 3 cents per hundredweight was offered. The testimony disclosed increases in both income and necessary expenditures since the order was first instituted in 1945. The order currently provides a means for the reduction of the assessment at any time that funds on hand exceed the amount required for a reasonable operating reserve. It is the intent not to collect administrative funds in amounts greater than the minimum necessary to give effective administration. For several months in 1948 the assessment was eliminated entirely in order to reduce the amount of funds in reserve. Some expansion of the regulation and of the administrative work probably will occur as the result of changes previously discussed. In view of the flexibility of the present provision and the expanded scope of the regulation in prospect, it is concluded that an amendment to change maximum rate should not be adopted.

(6) The Class III price formula should be modified for a temporary period.

From available data in the record it appears that the quantities of milk which will be in seasonal excess of fluid requirements in the flush production months of this year, and which must be converted into manufactured dairy products such as butter, nonfat dry milk solids, and evaporated milk, will be the largest in the history of the market.

There is a lack of manufacturing facilities for processed milk products in Class III other than ice cream and cottage cheese at handlers' fluid milk plants; however, even those handlers who process Class III milk in their own plants into such products as evaporated milk, butter, or nonfat dry milk solids are required to pay for it, under the present formula, substantially more than the prices paid for milk by directly competitive nonhandler manufacturing plants. In the interest of orderly marketing the price level applicable to that portion of the reserve supply of producer milk in the months of seasonally heavy production in 1954 processed into the products referred to or used in the manufacture of other foods should be reduced. When handlers utilize milk for ice cream and cottage cheese, it does not represent a "distress" disposition for producer milk. For this reason the price of milk for ice cream and cottage cheese appears reasonable and should not be reduced. It is concluded that the reduction in price for distress milk disposition should be 25 cents per hundredweight under the present formula level and should apply to the months of May, June, and July 1954, as a reasonable reflection of current marketing conditions for milk in such uses.

As a corollary adjustment the butterfat differential on Class III milk should be reduced slightly. Such reduction should continue throughout each month of the year in order to align the price of butterfat in such class represented by tests other than 3.5 percent with the price of butterfat represented in 3.5 percent milk so used. This has been done by basing the butterfat differential for Class III milk directly on the individual prices of skim milk and butterfat included in the formula which determines the price for 3.5 percent milk in such manufacturing class.

(7) Certain changes should be made for administrative purposes.

The date by which the uniform prices should be announced should be changed from the 10th day to the 12th day following the month for which such prices are computed. This is necessary to permit pool calculations to be made without adding to the force of personnel in the office of the market administrator, and should hold the expense of such computations to the least possible amount. As a conforming change the respective dates by which administrative and marketing service assessments must be paid by handlers should be set back two days also. Certain other changes corollary to the revision of the "fluid milk plant" definition have been made. These include (1) revision of the marketing services provision, (2) inclusion of new provisions specifying payments to be made by handlers for milk purchased from any cooperative association operating a fluid milk plant, and (3) the addition of a definition "cooperative association." These changes in language are necessitated by the fact that the record indicates that a primary supplier of other source milk which may become a handler in light of the revised definition of "fluid milk plant" is a cooperative association with a plant operation. Thus, the order should be made more specific with respect to the obligations of handlers who receive milk from the plant of a cooperative association. The new definition of "cooperative association" includes language presently contained in § 972.76 which has been deleted through revision of the marketing services provision.

General findings. (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Rulings on proposed findings and conclusions. Briefs were filed on behalf of producers and handlers. The briefs contained statements of fact, proposed findings and conclusions, and arguments with respect to the provisions of the proposed amendments. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the findings and conclusions proposed in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this recommended decision.

Recommended marketing agreement and amendments to the order. The following amendments to the order, as amended, are recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing

agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order, as amended, and as hereby proposed to be further amended.

1. Delete § 972.7 and substitute therefor the following:

§ 972.7 *Fluid milk plant.* "Fluid milk plant" means any milk handling plant (hereinafter referred to as a "plant"), except a plant at which the handling of milk is regulated by another milk marketing agreement or order issued pursuant to the act, under the following conditions:

(a) In any delivery period in which a route is operated wholly or partially within the marketing area from such plant; or

(b) In any delivery period in which a total of 25,000 pounds or more of milk, or an amount of skim milk and butterfat from which 25,000 pounds or more of milk can be processed, is delivered in fluid form from such plant to any plant(s) which is a fluid milk plant pursuant to paragraph (a) of this section: *Provided*, That a "fluid milk plant" pursuant to this section shall not mean such portions of a building or facilities used for receiving or processing such milk, or milk product, as is required by the appropriate health authority to be kept physically separate from the receiving or processing of Class I milk for the community(s) served.

2. Delete § 972.9 and substitute therefor the following:

§ 972.9 *Gallipolis district plant.* "Gallipolis district plant" means a fluid milk plant located in Gallia County or Meigs County, Ohio, or in Mason County, West Virginia.

3. Delete § 972.13 and substitute therefor the following:

§ 972.13 *Producer.* "Producer" means a person other than a producer-handler who produces milk received:

(a) At a fluid milk plant, or

(b) At a nonfluid milk plant by diversion within April, May, June, or July from a fluid milk plant: *Provided*, That such person producing milk, holds a dairy farm inspection permit or equivalent certification if required by the appropriate health authority of the community(s) for which his milk is produced.

3a. Delete § 972.16 and substitute therefor the following:

§ 972.16 *Handler.* "Handler" means:

(a) A person, including a cooperative association, who operates a fluid milk plant, or

(b) A cooperative association with respect to milk customarily received as producer milk at a fluid milk plant which is diverted by such association within April, May, June, or July on its account from a fluid milk plant to a nonfluid milk plant.

4. Add the following as § 972.19:

§ 972.19 *Cooperative association.* "Cooperative association" or "association of producers" means any cooperative marketing association of producers, duly organized as such under the laws of any State, which includes members who are producers as defined in § 972.13 and which the Secretary determines, after application by the association:

(a) To be qualified under the standards set forth in the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act";

(b) To have its entire organization and all of its activities under the control of its members; and

(c) To be currently engaged in making collective sales of or marketing milk or its products for its members.

4a. Delete from § 972.22 (j) (2) the word "10th" and substitute therefor the word "12th."

5. Delete § 972.41 (a) and (b) and substitute therefor the following:

(a) Add the following amounts for the delivery periods indicated:

	April, May, June, and July	February, March, and August	September, October, November, December, and January
Huntington district plants	$1.10	$1.35	$1.80
Gallipolis district plants	1.00	1.25	1.70
Scioto district plants	.90	1.15	1.60
Athens district plants	.80	1.05	1.50

(b) Add or subtract a "supply-demand adjustment" computed as follows:

(1) Divide the total gross volume of Class I milk (less interhandler transfers) at all fluid milk plants described under § 972.7 (a) for the first and second preceding delivery periods by the total receipts of milk from producers at such plants during the same delivery periods, multiply the result by 100, and round to the nearest whole number. The result shall be known as the "current utilization percentage."

(2) Compute a "net utilization percentage" by subtracting from the current utilization percentage as computed in subparagraph (1) of this paragraph the "standard utilization percentage shown below:

Delivery period for which price is being computed:	*Standard utilization percentage*
January	95
February	94
March	92
April	85
May	80
June	73
July	62
August	63
September	68
October	81
November	93
December	94

(3) Determine the amount of the supply-demand adjustment as follows:

If the net utilization percentage is—	*Supply-demand adjustment is (cents)—*
+12 or over	+38
+9 or +10	+28
+6 or +7	+20
+3 or +4	+10
+1 or −1	0
−3 or −4	−10
−6 or −7	−20
−9 or −10	−28
−12 or under	−38

When the net utilization percentage does not fall within a tabulated bracket, the supply-demand adjustment shall be determined by the adjacent bracket which is the same or nearest to the bracket used in the previous month. If for the first delivery period the above schedule is in effect the net utilization percentage does not fall within a tabulated bracket, the supply-demand adjustment shall be determined by the nearest bracket thereto which would result in the least change from zero.

6. Replace the period (.) at the end of § 972.43 with a colon (:) and add the following proviso to such section: "*Provided*, That for the months of May, June, and July 1954 the price so determined shall be reduced 25 cents per hundredweight with respect to all Class III milk other than that used to produce ice cream, ice cream mix, and cottage cheese."

7. Delete from § 972.44 (a) the figure "1.0" and substitute therefor the figure "0.5."

8. Delete § 972.44 (c) and substitute therefor the following:

(c) *Class III milk.* Subtract $3.00 from the average price per hundred pounds of butter as described in § 972.40 (c) (1), multiply by 1.2, subtract therefrom the amount per hundredweight computed pursuant to § 972.40 (c) (2), and divide such result by 1000.

9. Delete the word "and" at the end of § 972.65 (a).

10. Delete § 972.65 (b) and substitute therefor the following:

(b) To a cooperative association for milk received from producers from whom such association has received written authorization to collect payment, on or before the 16th day after such delivery period, of a total amount equal to not less than the sum of the individual amounts otherwise payable to other producers under paragraph (a) of this section.

(c) On or before the 16th day after such delivery period each handler shall pay to each cooperative association which operates a fluid milk plant, for skim milk and butterfat received as milk or a milk product from such cooperative association during such delivery period, an amount of money computed by multiplying the total pounds of such skim milk and butterfat in each class by the respective class price pursuant to §§ 972.41, 972.42, and 972.43, adjusted by the appropriate butterfat differential pursuant to § 972.44; and

(d) None of the provisions of this section shall be construed to restrict any cooperative association qualified under section 8c (5) (F) of the act from making payment for milk to its member producers in accordance with such provision of the act.

11. Delete from § 972.71 the word "13th" and substitute therefor the word "15th"; delete from the same section the word "10th" and substitute therefor the word "12th".

12. Delete §§ 972.75 and 972.76 and substitute therefor the following:

§ 972.75 *Marketing services.* (a) (1) Except as set forth in paragraph (b) of this section, each handler, in making payments to producers (other than with respect to milk of such handler's own production) pursuant to § 972.65 (a) shall make a deduction of 6 cents per hundredweight, or such amount not exceeding 6 cents per hundredweight as the Secretary may prescribe, with respect to the following:

(i) All milk received from producers at a plant not operated by a cooperative association;

(ii) All milk received at a plant operated by a cooperative association from producers who are not members of such association; and

(iii) All milk received at a plant operated by a cooperative association(s) from producers who are members thereof but for whom any of the services set forth below in this paragraph is not being performed by such association(s), as determined by the market administrator.

(2) Such deduction shall be paid by the handler to the market administrator on or before the 15th day after the end of the delivery period. Such moneys shall be expended by the market administrator for the verification of weights, sampling, and testing of milk received from producers and in providing for market information to producers; such services to be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of each producer (1) who is a member of, or who has given written authorization for the rendering of marketing services and the taking of deduction therefor to a cooperative association, (2) whose milk is received at a plant not operated by such association, and (3) for whom the market administrator determines that such association is performing the services described in paragraph (a) of this section, each handler shall deduct in lieu of the deduction specified under paragraph (a) of this section, from payments made pursuant to § 972.65 (a) the amount per hundredweight of milk authorized by such producer and shall pay over, on or before the 15th day after the end of the delivery period, such deduction to the association entitled to receive it under this paragraph.

Filed at Washington, D. C., this 8th day of April 1954.

ROY W. LENNARTSON,
Deputy Administrator.

DEPARTMENT OF COMMERCE

Civil Aeronautics Administration

[14 CFR Part 42]

EN ROUTE LIMITATIONS

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that pursuant to the authority contained in § 42.80, the Administrator of Civil Aeronautics contemplates amending § 42.80–6, published on January 10, 1950, in 15 F. R. 93. The amendment would establish en route limitations for Beech AT–11 aircraft. All interested persons who desire to submit written data, views, or arguments for consideration by the Administrator in connection with the proposed rules, shall send them to the Civil Aeronautics Administration, Office of Aviation Safety, Washington 25, D. C., within 30 days after publication of this notice in the FEDERAL REGISTER. The Administrator proposes amending § 42.80–6 to include the following en route limitations data applicable to the Beech AT–11:

TABLE 1—EN ROUTE LIMITATIONS

BEECH AT–11

Weight in pounds	Terrain clearance[1] in feet and climb speed in miles per hour (TIAS)	
	Feet	Miles per hour
7,850	6,200	102.1
7,500	7,800	100.9
7,000	10,170	99.2
6,500	12,500	97.5

[1] Highest altitude of terrain over which airplane may be operated in compliance with CAR 42.82.

NOTE: Inoperative propeller idling in high pitch. Cowl flaps are closed on inoperative engine. De-icers are not operating.

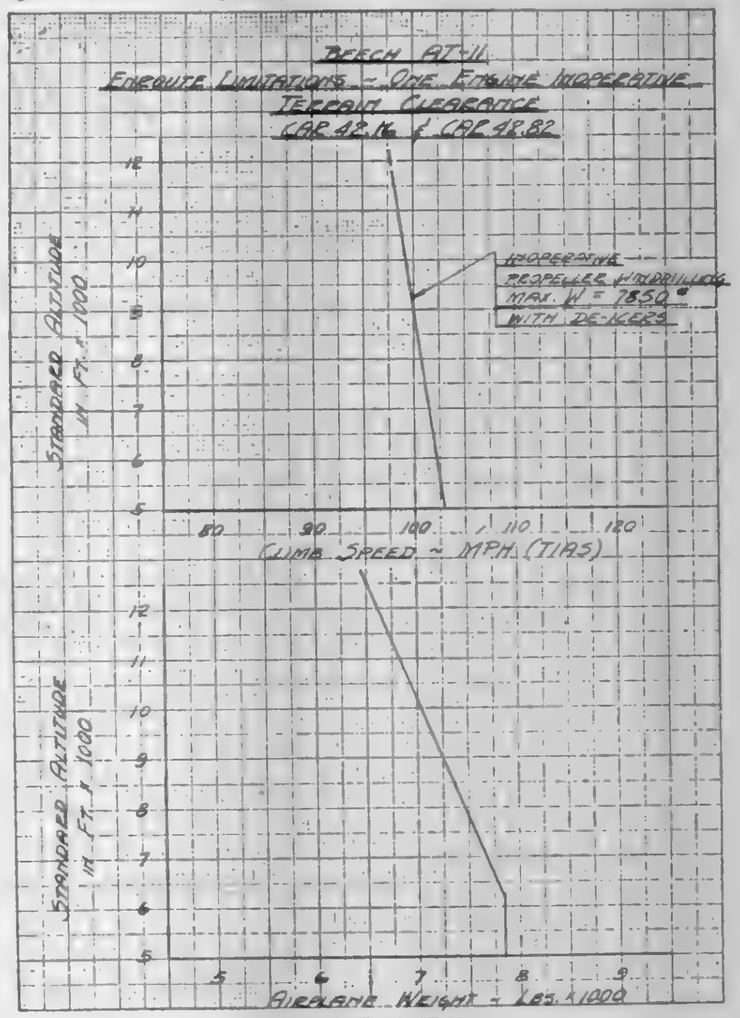

FIGURE 6—Beech AT-11.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 52 Stat. 1007, 1010, as amended; 49 U. S. C. 551, 554)

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

[F. R. Doc. 54-2580; Filed, Apr. 9, 1954; 8:45 a. m.]

CIVIL AERONAUTICS BOARD

[14 CFR Part 60]

[Draft Release No. 54-9]

AIR TRAFFIC RULES

CEILING AND DISTANCE FROM CLOUDS; OVER-THE-TOP FLIGHT

Pursuant to authority delegated by the Civil Aeronautics Board to the Bureau of Safety Regulation, notice is hereby given that the Bureau will propose to the Board an amendment to Part 60 of the Civil Air Regulations which will provide for ceiling and distance from clouds on an over-the-top operation.

Interested persons may participate in the making of proposed rule by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington, D. C. In order to insure their consideration by the Board before taking further action on the proposed rule, communications must be received by May 14, 1954. Copies of such communications will be available after May 18, 1954, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

Section 60.30 of the Civil Air Regulations prescribes that when operating under visual flight rules aircraft shall not be flown less than 500 feet vertically from clouds or less than 2,000 feet horizontally from clouds. The purpose of this rule is to provide clearance between aircraft breaking out from clouds and aircraft operating either above or below clouds. In view of the rapid rate of ascent and the increased speed of modern pressurized aircraft, it is desirable to provide greater clearance between such aircraft breaking out of clouds while climbing and aircraft operating over-the-top. It is proposed, therefore, to amend the visual flight rules of Part 60 to provide that while flying over-the-top aircraft shall not be flown less than 1,000 feet vertically from clouds or less than 2,000 feet horizontally from clouds.

Accordingly, notice is hereby given that it is proposed to amend Part 60 of the Civil Air Regulations as follows:

1. By amending § 60.30 by redesignating paragraphs "(a)" and "(b)" as paragraphs "(b)" and "(c)" respectively.

2. By adding a new paragraph (a) to § 60.30 to read as follows:

§ 60.30 *Ceiling and distance from clouds.* • • •

(a) *Over-the-top flight.* When operating over-the-top, aircraft shall not be flown closer than 1,000 feet vertically and 2,000 feet horizontally from any cloud formation.

3. By adding a new § 60.90 to read as follows:

§ 60.90 *Over-the-top.* Over-the-top shall mean the operation of an aircraft above a layer of clouds or obscuring phenomena that is reported as "broken", "overcast", or "obscuration" and not classified as "thin" or "partial".

This regulation is proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended. The proposal may be changed in the light of comments received in response to this notice of proposed rule making.

Dated: April 6, 1954, at Washington, D. C.

By the Bureau of Safety Regulation.

[SEAL] JOHN M. CHAMBERLAIN, *Director.*

[F. R. Doc. 54-2700; Filed, Apr. 9, 1954; 8:51 a. m.]

INTERSTATE COMMERCE COMMISSION

[49 CFR Parts 141, 145, 147, 186, 187, 311, 312]

REJECTION OF FREIGHT AND PASSENGER TARIFFS AND SCHEDULES AND REJECTION OF NOTICE OF REVOCATION OF CONCURRENCE OR POWERS OF ATTORNEY

NOTICE OF PROPOSED RULE MAKING

APRIL 6, 1954.

1. It appears there is a need for revision of the regulations governing the rejection of (1) passenger tariffs of railroads and water carriers contained in Rule 41 (m) of Tariff Circular No. 18-A (Part 145), (2) tariffs of express companies contained in Rule 14 (e) of Tariff Circular No. 19-A (Part 147), (3) freight tariffs of railroads, pipe lines and water carriers contained in Rule 14 (e) of Tariff Circular No. 20 (Part 141), and (4) freight tariffs of common carriers by motor vehicle contained in the preface to and in Rule 20 (i) of Tariff Circular MF No. 3 (Part 187).

2. There is also an apparent need for amendment of the tariff circulars listed next below to include appropriate rules to govern the rejection of tariffs and schedules:

Tariff Circular MF No. 2 (Part 187), regulations to govern the construction and filing of minimum schedules of contract carriers by motor vehicle, covering the transportation of freight.

Tariff Circular MF No. 3 (Part 186), regulations to govern the construction and filing of tariffs and minimum schedules of common and contract carriers by motor vehicle, covering the transportation of passengers and express matter.

Tariff Circular No. 21 (Part 312), regulations to govern the construction and filing of minimum schedules of contract carriers by water, covering the transportation of freight.

Tariff Circular No. 22 (Part 312), regulations to govern the construction and filing of tariffs of common carriers by water, covering the transportation of freight.

Tariff Circular No. 23 (Part 316), regulations to govern the construction and filing of tariffs of common carriers by water, covering the transportation of passengers.

3. It further appears there is also a need for amendment of each of the tariff circulars identified in the two preceding paragraphs hereof to include an appropriate rule to govern the rejection of a notice of revocation of a concurrence or power of attorney.

4. Accordingly, pursuant to the provisions of section 4 (a) of the Administrative Procedure Act (60 Stat. 237, 5 U. C. C. 1003), notice is hereby given of the proposed,

(a) Amendment of the cited provisions of the tariff circulars identified in the first paragraph hereof, and

(b) Amendment of the tariff circulars identified in the second paragraph hereof,

so as to read as follows:

Any tariff or schedule, tendered for filing, which fails to give lawful notice of changes in rates, charges or other provisions which it proposes to establish, or which fails to meet the requirements of the regulations contained herein, or violates any order of the Commission or of a court, is subject to rejection by the Commission. When a tariff or schedule is rejected, the Commission, acting through a designated administrative officer, will inform the carrier or the agent who tendered it for filing, in writing, of the reasons for rejection, and will return the rejected tariff or schedule to such carrier or agent.

The number assigned to a tariff or schedule which has been rejected may not again be used. The rejected tariff or schedule may not be referred to in any subsequent tariff or schedule as having been canceled, amended or withdrawn, but the tariff or schedule which is published in its stead must bear the following notation: "Issued in lieu of (here identify the rejected schedule or tariff), rejected by the Commission."

5. It is further proposed to amend each of the tariff circulars specified in paragraphs 1 and 2 hereof by the addition of the following rule:

A notice of the revocation, complete or partial, of a concurrence or power of attorney which, if it were to become effective, would require the establishment of rates, fares, or charges in violation of an order of the Commission or of a court, or of these regulations, may be rejected in the same manner as a tariff or schedule, and any such notice of revocation which would require the establishment of rates, fares or charges of doubtful lawfulness may be suspended.

6. Interested parties may file, on or before June 6, 1954, with this Commission, written statements of facts, opinions or arguments concerning the proposed rules. Any written statement so filed shall conform to the specifications provided in Rule 15 of the Commission's general rules of practice. An original signed copy and 5 additional copies shall be furnished for use of the Commission. No formal hearing with respect to the proposed rules is contemplated, but informal conferences with designated officials of this Commission may be had.

Notice to the public will be given by depositing a copy of this notice in the Office of the Secretary of the Commission for inspection, and by filing a copy with the Director of the Federal Register.

[SEAL] GEORGE W. LAIRD, *Secretary.*

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

SMALL TRACT CLASSIFICATION ORDER NO. 80

APRIL 5, 1954.

1. Pursuant to the authority delegated to me under section 2.21 of Order No. 1, Bureau of Land Management, Region VII, approved by the Acting Secretary of the Interior August 20, 1951 (16 F. R. 8625), I hereby classify as hereinafter indicated under the Small Tract Act of June 1, 1938 (52 Stat. 609, 43 U. S. C. Sec. 682a), as amended, the following described public lands in the Fairbanks, Alaska, Land District:

CANTWELL AREA

FOR LEASE AND SALE

For Home Sites

U. S. Survey 3229:
Lot 11; Lots 13-24, inclusive,
Lots 26, 27, and 28.

Containing approximately 67.94 acres.

2. These lands are located approximately two miles east of Cantwell Station along the Paxson-McKinley Park Road, now under construction. Eight of the tracts have road frontage, while the remaining eight are one tier removed from the road. Assorted gravels underlay level terrain which is covered by open stands of spruce, aspen, and birch. The climate features long, cold winters and a cool growing season which averages 63 days in duration. Sewage disposal can be accomplished on individual tracts through septic tanks or cesspools, and domestic water supplies can be obtained from shallow, hand-dug wells. At present, the economic activity in the area is limited to the operations of the Alaska Road Commission and the Alaska Railroad, but a great stimulus is expected from the tourist traffic when the new highway is completed. Limited community facilities are available in Cantwell or in McKinley Park, 28 miles to the north.

3. The following described lands appear from the land records to be subject to prior valid existing settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. As to these lands, preference right will be accorded to the respective occupants thereof, in accordance with the procedure set forth in paragraph 4a (2) below:

CANTWELL AREA

U. S. Survey 3229:
Lots 13, 14 and 18.

Containing approximately 13.93 acres.

4. This classification order shall not otherwise become effective to change the status of any lands described herein or to permit the leasing of any such lands under the Small Tract Act of June 1, 1938, cited above, until 10:00 a. m. on April 28, 1954. At that time the lands described below shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to application, petition, location, and selection, as follows:

(a) *Ninety-one day period for preference right filings.* For a period of 91 days from 10:00 a. m. on April 28, 1954, to close of business on July 27, 1954, inclusive, preference wil be given, as set forth above, to:

(1) Applications under the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682a) an amended, by qualified veterans of World War II and other qualified persons entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279-284), as amended, subject to the requirements of applicable law, and

(2) Applications under any applicable public land law, based on prior existing valid settlement rights and preference rights conferred by existing laws or equitable claims subject to allowance and confirmation. Application by veterans and other qualified persons under subdivision (1) of this paragraph shall be subject to applications and claims of the classes described in subdivision (2) of this paragraph.

(b) *Advance period for simultaneous preference right filings.* All applications filed by such veterans and other qualified persons, or by persons claiming preference rights superior to those of such veterans filed under the preceding paragraph (a) on April 7, 1954, or thereafter, up to and including 10:00 a. m. on April 28, 1954, shall be treated as simultaneously filed. All applications filed under the preceding paragraph (a) after 10:00 a. m. on April 28, 1954, shall be considered in the order of filing.

(c) *Date for non-preference right filings.* Commencing at 10:00 a. m. on July 28, 1954, any lands remaining unappropriated shall become subject to application under the Small Tract Act by the public generally.

(d) *Advance period for simultaneous non-preference right filings.* Applications under the Small Tract Act by the general public filed on July 7, 1954, or thereafter, up to and including 10:00 a. m. on July 28, 1954, shall be treated as simultaneously filed. All applications filed thereafter shall be considered in the order of filing.

5. A veteran shall accompany his application with a complete photostatic, or other copy, (both sides) of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or which constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claim. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

6. All applications for these lands, which shall be filed in the Land Office at Fairbanks, Alaska, shall be made on Form 4-776 and shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations to the extent that such regulations are applicable. Applications under the Small Tract Act of June 1, 1938, shall be governed by the regulations contained in Part 257 of Title 43 of the Code of Federal Regulations.

7. Lessees under the Small Tract Act of June 1, 1938, will be required, within a reasonable time after execution of the lease, to construct upon the leased land, to the satisfaction of the appropriate officer of the Bureau of Land Management authorized to sign the lease, improvements which, under the circumstances, are substantial, and are appropriate for the use for which the lease is issued. Leases will be issued for a period of two years, at an annual rental of $5 for home sites, which is payable in advance for the entire lease period. Applications for extension for an additional period of one year shall be considered in appropriate cases. Every lease for land classified for lease and sale will contain an option to purchase clause and every such lessee may file an application to purchase at the sale price as provided in the lease.

8. All of the land will be leased in tracts varying in size from approximately 2.78 acres to approximately 5 acres, in accordance with the classification maps on file in the Land Office, Fairbanks, Alaska. These tracts are appraised at prices ranging from $60 to $125.

9. Lessees must locate any wells or sewage disposal facilities in accordance with the laws and regulations of the Territory of Alaska.

10. The leases will be made subject to rights-of-way for road purposes and public utilities, as specified in the Classification and Appraisal Report on file in the Land Office, Fairbanks, Alaska. Such rights-of-way may be utilized by the Federal Government, State, Territory, County, or Municipality, or by any agency thereof. In the discretion of the authorized officer of the Bureau of Land Management, these rights-of-way may be definitely located prior to the issuance of the patent. If not so located, they may be subject to location after patent is issued.

FRED J. WEILER, *Chief, Division of Land Planning.*

[F. R. Doc. 54-2674; Filed, Apr. 9, 1954; 8:46 a. m.]

DEPARTMENT OF COMMERCE

Civil Aeronautics Administration

ORGANIZATION AND FUNCTIONS

In accordance with the public information requirements of the Administrative Procedure Act, the description of the organization and functions of the Civil Aeronautics Administration is revised in its entirety to read:

SUBPART A—INTRODUCTION

Sec.
1. Addresses.
2. Inquiries.

SUBPART B—ORGANIZATION AND FUNCTIONS

11. Organization.
12. Delegation of authority.
13. General functions.
14. Functions of the Office of the Administrator.
15. Functions of Staff and Program Offices.
16. Functions of Major Field Organizations.

SUBPART C—FUNCTIONS AND LOCATIONS OF FIELD OFFICES

21. Airport District Offices.
22. Aviation Safety District Offices.
23. Air Route Traffic Control Centers.
24. Airport Traffic Control Towers.
25. Interstate Airway Communications Stations.
26. Overseas Foreign Aeronautical Communications Stations.
27. International District and Field Offices.

SUBPART D—AIR NAVIGATION DEVELOPMENT BOARD

31. Services provided by the Civil Aeronautics Administration.

SUBPART A—INTRODUCTION

SECTION 1. *Addresses.* Headquarters offices of the Civil Aeronautics Administration are located in Tempo Buildings T-4 and T-5, Seventeenth and Constitution Avenue NW., Washington, D. C. The locations of the various field activities of the Civil Aeronautics Administration are listed in Subparts B and C with the functional description of those activities.

SEC. 2. *Inquiries.* Further information regarding the organization and functions of the Civil Aeronautics Administration may be secured from the Aviation Information Office, Civil Aeronautics Administration, Washington 25, D. C.

SEC. 11. *Organization.* (a) The Civil Aeronautics Administration, a primary organizational unit of the Department of Commerce shall be under the authority and supervision of the Under Secretary of Commerce for Transportation and shall be directed by an Administrator who shall report and be responsible to the Under Secretary of Commerce for Transportation.

(b) The Civil Aeronautics Administration shall consist of the following organizational units:

(1) Office of the Administrator, which includes the:

Administrator.
Assistant Administrator for Administration.
Assistant Administrator for Program Coordination.
Executive Assistant.

(2) Staff and Program Offices, including:

General Counsel's Office.
Aviation Information Office.
Budget Office.
Organization and Methods Office.
Personnel Office.
Office of General Services.
Office of Airports.
Office of Aviation Safety.
Office of Federal Airways.

(3) Major Field Organizations, including:

Regional Offices.
Washington National Airport.
Aeronautical Center.
Technical Development and Evaluation Center.

SEC. 12. *Delegation of authority.* (a) Subject to such policies and directives as the Secretary of Commerce may prescribe the Administrator shall carry out the responsibilities and authority of the Secretary with respect to civil aeronautics and air commerce in the United States and abroad more specifically described in, but not limited to, the applicable provisions of the following statutes:

The Air Commerce Act of 1926, as amended (49 U. S. C. 171).
The Civil Aeronautics Act of 1938, as amended (49 U. S. C. 401).
The Federal Airport Act, as amended (49 U. S. C. 1101).
The International Aviation Facilities Act (62 Stat. 450).
Public Law 762, 81st Congress, dated September 7, 1950 (64 Stat. 770) authorizing the construction and operation of a public airport in or in the vicinity of the District of Columbia, except selection of the site which function is reserved to the Secretary of Commerce.
The Alaska Airport Act, as amended (62 Stat. 277).
Public Law 867, 81st Congress, dated September 30, 1950 (64 Stat. 1090) authorizing action to promote the development of improved transport aircraft.
Public Law 674, 76th Congress, dated June 29, 1940 (54 Stat. 686) as amended, to provide for the administration of the Washington National Airport.
Public Law 289, 80th Congress, dated July 30, 1947 (61 Stat. 678) as amended by Public Law 311, 81st Congress, dated October 1, 1949 (63 Stat. 700) to expedite the disposition of government surplus airports, airport facilities, and equipment, and to provide for the transfer of compliance functions with relation to such property.

(b) The Administrator shall also carry out the power and responsibility vested in and delegated to the Secretary of Commerce under the Defense Production Act of 1950, as amended, with respect to those portions of the defense production program relating to civil aviation not otherwise reserved or assigned.

(c) The Administrator may redelegate and authorize the successive redelegation of the authority granted herein to any officer of the Civil Aeronautics Administration and prescribe limitations, restrictions, and conditions in the exercise of such authority.

SEC. 13. *General functions.* The Civil Aeronautics Administration fosters and encourages the development of civil aeronautics and air commerce in the United States and abroad. Principal operations are the establishment of a system of airways, including the operation of air navigation facilities and the control of air traffic; technical development work in the field of aeronautics; collection and dissemination of information relative to civil aeronautics; registration of aircraft nationality and recordation of ownership; promotion of safety in flight through inspection and certification of aircraft, airmen, air agencies, and air carriers in accordance with standards prescribed under Civil Air Regulations; planning and coordinating the establishment of a nationwide system of airports suitable to the needs of civil aviation and national security, including the granting of funds necessary to assist in carrying out such a program; and operation of the Washington National Airport. In the performance of these functions the Civil Aeronautics Administration collaborates with public, military, private, and foreign or international agencies in the development of standards and policies intended to foster and facilitate the use of aircraft in air commerce and civil aviation.

SEC. 14. *Functions of the Office of the Administrator.* The functions of the principal officers of the Office of the Administrator are as follows:

(a) The Administrator, in conformity with the policies and directives of the Secretary of Commerce, determines the policies of the Civil Aeronautics Administration and directs the development and execution of its programs.

(b) The Assistant Administrator for Administration acts as the principal assistant to the Administrator in the planning, coordination, and evaluation of the budgetary management, personnel administration, organization planning, and general administrative services of the Civil Aeronautics Administration.

(c) The Assistant Administrator for Program Coordination acts as the principal assistant to the Administrator in the planning, coordination, and evaluation of Civil Aeronautics Administration program operations, domestic and international; plans, directs, and coordinates the program planning activities of the Office of the Assistant Administrator for Program Coordination, and provides general direction to the work of that Office.

(d) The Executive Assistant assists the Administrator in matters that require his personal attention.

SEC. 15. *Functions of Staff and Program Offices.* The functions of the Staff and Program Offices are as follows:

(a) The General Counsel's Office renders all legal counsel and advice to the Administrator and all other Washington Offices of the Civil Aeronautics Administration in all matters pertaining to the functions of the Civil Aeronautics Administration; develops and establishes the basic policies, programs, standards, and procedures governing the performance of the legal work of the Civil Aeronautics Administration and the legal aspects of the enforcement of laws, rules, and regulations administered by the Civil Aeronautics Administration; and evaluates and controls the execution of legal policies and activities. The General Counsel's Office has an Enforcement and Litigation Division, General Opinions Division, Legislation and Regulations Division, and Airport Division.

(b) The Aviation Information Office advises the Administrator on public information policies and procedures which will assist in achieving Civil Aeronautics Administration objectives, particularly the promotion of maximum flight safety; formulates and establishes the basic policies and methods for Civil Aeronautics Administration's domestic and international programs for the dissemination of information regarding the promotion of safety, world-wide acceptance and understanding of uniform aviation standards, and other Civil Aeronautics Administration objectives; initiates, plans, and directs the execution of such programs; serves as the central clearing house and reviewing agency for Civil Aeronautics Administration on all plans and programs involving the collection and dissemination of information to the public; performs technical and consulting service in connection with an aeronautical library, foreign language translation and editing, visual presentations, and general inquiry correspondence. The Aviation Information Office has a Current Information Division, Publications Division, Flight Information Division, and Library Division.

(c) The Budget Office provides staff assistance to the Office of the Administrator in the development, application, and execution of budgetary policies required to assure financial support of the agency through participation in the presentation and justification of regular and supplemental budget estimates, and allocating funds for authorized activities which are controlled by definitive fiscal work programs. The Budget Office has an Estimates Division and a Fiscal Management Division.

(d) The Organization and Methods Office provides staff assistance to the Office of the Administrator and to all other offices of the Civil Aeronautics Administration on major organization matters; in connection therewith develops plans to cope with new or anticipated requirements, and makes surveys and recommends improvements in organization, administrative techniques, and management practices throughout the Civil Aeronautics Administration; provides direction to the records, correspondence, and forms management programs, and coordinates the management improvement program of the agency; prepares or reviews organization and functional statements, and provides for the official issuance thereof; coordinates and provides for the release of administrative instructions governing all employees through the Civil Aeronautics Administration Administrative Manual.

(e) The Personnel Office provides staff assistance to the Office of the Administrator in the development, application, and execution of personnel policies, and, within policy decisions made by the Administrator, plans, develops, and provides direction to, and evaluates the execution of, the personnel program of the Administration, which includes recruitment and placement of employees, classification of positions, employee training, and employee-management relations. The Personnel Office has a Placement Division, Classification Division, Training Division, Employee Relations Division, and Procedures and Reports Division.

(f) The Office of General Services provides staff assistance to the Office of the Administrator in the discharge of its responsibilities for accounting, financial reporting, procurement, property management, defense production and mobilization, internal security, the control and utilization of Civil Aeronautics Administration aircraft, procurement and distribution of printed and reproduced material, and mail and telegraphic activities, machine tabulation and similar activities; in connection therewith formulates policies and programs, establishes standards, and prepares instructions for both Washington and field offices, and performs general service functions for the Washington Office. The Office of General Services has an Accounting Division, Supply Division, Aircraft Control Division, and Special Services Division.

(g) The Office of Airports plans and coordinates the Civil Aeronautics Administration activities designed to foster the establishment of a national system of airports suitable or adaptable to the future needs of civil aviation and national security; develops and revises the National Airport Plan as required in the Federal Airport Act; maintains liaison within the Civil Aeronautics Administration, with the Department of Defense and other governmental and private agencies concerning agreements for military use of civil airports, and with the General Services Administration in connection with disposal of government property for airport purposes; develops and promulgates administrative policies and technical standards governing airport planning, design, construction, and maintenance; develops for issuance by the Administrator, regulations governing the administration of the Federal-aid Airport Program, transfer of Federally owned land for airport use, and the repair and rehabilitation of public airports damaged by Federal agencies, under the Federal Airport Act; develops and issues standards and instructions for administration of a program to foster airport development; formulates standards, procedures, and definitions for the collection and maintenance of airport facility records and maintains airport facility record data for airports in the United States; and effects compliance with laws and regulations affecting the operation of civil airports constructed with Federal funds. The Office of Airports has an Airport Engineering Division and an Airport Operations Division.

(h) The Office of Aviation Safety plans, directs, and coordinates the Civil Aeronautics Administration's program for promoting safety in flight of civil aircraft by administering and enforcing the Civil Air Regulations dealing with the examination, certification, inspection, and improvement of (a) the design, manufacture, and maintenance of aircraft and aircraft components, (b) the competency and physical fitness of airmen, and (c) the flight operations and technical facilities of air carriers, other aircraft operators, airman schools, and other air agencies; develops and recommends for approval by the Administrator and for promulgation by the Civil Aeronautics Board or the Administration new or modified regulations for the improvement of safety in aviation; operates systems for the central review of, and recordation of encumbrances affecting the title to, aircraft, engines, propellers, and appliances; fosters the use of improved safety techniques and other accident preventive measures; investigates accidents to the extent necessary to determine if such accidents involve the airworthiness of the aircraft, the competency of any airman and/or operator, a violation of the Civil Air Regulations or any certificate issued by the Civil Aeronautics Administration, or Civil Aeronautics Administration air navigational facilities, and takes immediate remedial action to prevent recurrence; analyzes accident data and service difficulty reports for purposes of planning corrective action; provides technical advice and assistance to the Administrator and his staff, to the civil aviation industry, and to governmental agencies in connection with the development, maintenance, and operation of improved aircraft and equipment for use in air commerce; provides for the exchange of information and the furnishing of technical advice and assistance to international agencies, foreign governments, foreign air carriers, agencies, and technical personnel in connection with problems and practices in aviation safety. The Office of Aviation Safety has an Executive Staff Division, Technical Staff Division, Air Carrier Safety Division, Aircraft Engineering Division, General Safety Division, and a Medical Division which includes the Civil Aeronautics Medical Research Laboratory at Ohio State University, Columbus, Ohio.

(i) The Office of Federal Airways plans, directs, coordinates and establishes requirements and standards for Civil Aeronautics Administration activities in connection with surveying, establishment, maintenance, operation, and operational service and flight testing of air navigation facilities and air traffic control in the United States, its territories and possessions, as well as in foreign territories; determines for the Civil Aeronautics Administration the operational necessity and approves operational and procurement specifications for air navigation and air traffic control facilities, and approves modifications thereto in accordance with operational experience; plans, coordinates, directs the formulation of, and establishes requirements and standards for the construction, improvement, maintenance, and operation of, landing areas, and, as assigned, for the construction of airports being built by the Civil Aeronautics Administration; determines adequacy of existing air navigation facilities; estimates cost for implementing routes, including cost estimates involved in applications for new routes submitted to the Civil Aeronautics Board; and plans,

coordinates, and directs the development and execution of Civil Aeronautics Administration programs for the security control of aircraft flights within the United States, its territories, possessions, and areas of land or water administered by the United States under international agreement. The Office of Federal Airways has an Executive Staff Division, Planning Staff Division, Flight Inspection Division, Airways Engineering Division, and Airways Operations Division.

SEC. 16. *Functions of Major Field Organizations.* The functions of the Major Field Organizations of the Civil Aeronautics Administration are as follows:

(a) The Regional Offices of the Civil Aeronautics Administration execute the various operations required to carry out the programs and policies established by the Washington Office. Subparagraph (3) of this section lists the locations of the Regional Offices and the geographical areas over which they have jurisdiction.

(1) The Continental United States Regional Offices and the Territorial Regional Offices establish, maintain, and modify landing areas, facility structures, communication systems, electronic devices, air traffic control systems, and other aids to air navigation comprising the Federal Airways System; operate air traffic control and communications stations involved in the facilitation and control of air traffic; conduct activities relating to participation by public sponsors in the Federal-aid Airport Program and granting of funds for such purposes; advise civic and other public agencies and private enterprises on airport site selection, planning, design, development, maintenance, and approach protection; conduct all aviation safety activities relating to airmen, aircraft, air agencies, fixed base operators, and air carriers, and other operations as are specifically assigned to the Region; conduct accident and regulation violation investigations; and promote the development of all phases of civil aviation.

(2) The International Region executes programs with respect to certification and inspection of United States air carriers engaged in international and overseas operations, and foreign carriers operating to and within United States territory; fosters the adoption and utilization of United States type aeronautical equipment, standards, and procedures by foreign countries; evaluates and assists in solution of operational problems and requirements of United States flag carriers; plans and administers civil aviation activities under United States programs of economic and technical assistance to foreign nations; and provides technical advisory services on civil aviation to United States diplomatic, economic, and military missions abroad.

(3) The locations of the Regional Offices and the geographical areas over which they have jurisdiction are listed below:

Region 1. (i) Federal Office Building, New York International Airport, Jamaica, Long Island, N. Y.

(ii) Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, Delaware, New Jersey, Pennsylvania, Ohio, Maryland, Virginia, West Virginia and Kentucky, and the District of Columbia.

Region 2. (i) CAA Reservation, Haslet Road, Fort Worth, Tex.

(ii) Tennessee, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Arkansas, Oklahoma, Louisiana, and Texas, and *Puerto Rico, Swan Island, the *Virgin Islands, and the *Canal Zone. (*Aviation Safety activities are under the jurisdiction of the International Region.)

Region 3. (i) Federal Office Building, 911 Walnut Street, Kansas City 6, Mo.

(ii) Michigan, Indiana, Wisconsin, Illinois, Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, and Kansas.

Region 4. (i) 5651 West Manchester Avenue, Los Angeles, Calif.

(ii) Montana, Wyoming, Colorado, New Mexico, Arizona, Utah, Idaho, Washington, Oregon, Nevada, and California.

Region 5. (i) Post Office Building, Anchorage, Alaska.

(ii) Alaska, including the Aleutian Islands.

Region 6. (i) Hawaiian Life Insurance Building, Kapiolani Boulevard and Piikoi Street, Honolulu, T. H.

(ii) Honolulu, Wake, and Guam Flight Information Regions established by ICAO. (Major operations are conducted in the Territory of Hawaii and the islands of Canton, Wake and Guam.)

International Region. (i) Tempo Building T-4, Seventeenth and Constitution Avenue NW., Washington, D. C.

(ii) All geographical areas of the world not assigned to other Regional Offices.

(b) *Washington National Airport*—(1) *Functions.* Operates and maintains the Washington National Airport, including the conduct of negotiations with air carriers and others for use of the Airport and its facilities and with concessionaires to provide proper services required by air carriers, governmental agencies, and others using the Airport.

(2) *Address.* Washington National Airport, Gravelly Point, Virginia.

(c) *Aeronautical Center*—(1) *Functions.* Plans and conducts such standardization and training course for Civil Aeronautics Administration employees and other individuals as are required to establish or maintain personnel proficiency for the various programs of the Civil Aeronautics Administration; modifies, assembles, and distributes equipment and materials for installation or erection of Civil Aeronautics Administration facilities or aids to air navigation.

(2) *Address.* CAA Aeronautical Center (west side of Will Rogers Airport), P. O. Box 1082, Oklahoma City 10, Oklahoma.

(d) *Technical Development and Evaluation Center*—(1) *Functions.* Conducts applied research and performs service testing and evaluation directed toward eliminating hazards in and improving the safety and efficiency of the operation of aircraft, systems of aids to air navigation and air traffic control, and landing facilities.

(2) *Address.* CAA Technical Development and Evaluation Center (new section of Municipal Airport), P. O. Box 5767, Indianapolis, Indiana.

SUBPART C—FUNCTIONS AND LOCATIONS OF FIELD OFFICES

SEC. 21. *Airport District Offices*—(a) *Functions.* These offices, each under the supervision of a District Airport Engineer, serve as a contact point with the general public on matters pertaining to the airport programs of the Civil Aeronautics Administration. The offices are responsible for the initial handling of all matters dealing with the establishment and improvement of civil airports by means of Federal aid, and compliance with laws, regulations, and agreements related thereto; application of Federal standards for airport site selection, planning, design, development, maintenance, and approach protection; disposal of surplus airports and airport facilities; and use of Federal lands for airport purposes.

(b) *Locations and areas served.*

Region 1

Boston, Mass., 2200 U. S. Custom House—Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut.

Jamaica, Long Island, N. Y., 321 Federal Office Building, New York International Airport—New York and New Jersey.

New Cumberland, Pa., Harrisburg State Airport—Pennsylvania, Maryland, Delaware, and Virginia.

Columbus, Ohio, 409 Trautman Building—Ohio, Kentucky, and West Virginia.

Region 2

Atlanta, Ga., 50 Seventh Street NE.—Georgia, North Carolina, South Carolina, and Tennessee.

Fort Worth, Tex., Administration Building, Meacham Field—Texas.

Jackson, Miss., Building 334, Jackson Army Air Base—Alabama, Louisiana, and Mississippi.

Miami, Fla., Building 514, Miami International Airport—Florida, Puerto Rico, and Virgin Islands.

Oklahoma City, Okla., 406 Municipal Building—Arkansas and Oklahoma.

Region 3

Chicago, Ill., 185 North Wabash Avenue—Illinois and Wisconsin.

Kansas City, Mo., City Hall—Kansas and Missouri.

Lansing, Mich., 124 West Ottawa Street—Michigan and Indiana.

Lincoln, Nebr., 311 Veterans Administration Building, 12th and O Streets—Nebraska and Iowa.

St. Paul, Minn., 420 Commerce Building—Minnesota, North Dakota, and South Dakota.

Region 4

Carson City, Nev., 319 North Carson Street—Nevada and Utah.

Denver, Colo., Stapleton Field—Colorado and Wyoming.

Helena, Mont., Montana Building—Montana and Idaho.

Phoenix, Ariz., New Terminal Building, Phoenix Sky Harbor Municipal Airport—Arizona and New Mexico.

San Francisco, Calif., 26th Floor, 100 McAllister Street—California.

Seattle, Wash., CAA Building, Boeing Field—Washington and Oregon.

Regions 5 and 6

No airport district offices.

SEC. 22. *Aviation Safety District Offices*—(a) *Functions.* Aviation Safety District Offices, each staffed with a supervisor and agents, and some with engineers, serve as contact points with the general public and the aviation industry. The offices are responsible for the initial handling of all matters dealing with Aeronautical competency of airmen, air agencies, and air carriers; manufacture, repair, alteration, and maintenance of aircraft and components; compliance with rules and standards governing flight operations; investigation of accidents and violations; promotion of safe flying; and maintenance of close liaison with state and local enforcement agencies.

(b) *Locations and specialties.* In the following tables: The specialty column includes all specialties found at a particular office location. Although engineers are assigned to a few district offices for the purpose of having administrative headquarters, the public can make initial engineering contact at any Aviation Safety District Office.

"(G)" indicates that there is assigned to the office an agent who specializes in aviation safety activities relating to: Air agencies; general operators (operators of aircraft other than: Scheduled air carriers, irregular air carriers operating aircraft having a maximum certificated gross take-off weight of more than 12,500 pounds, and commercial operators certificated under Part 45 of the Civil Air Regulations); general aircraft in service (aircraft of general operators); general airmen (all persons who hold or are eligible for airman certificates other than: Airline transport pilot, airport control tower operator, dispatcher, or aircrewman); and other general aviation activities.

"(C)" indicates that there is assigned to the office an agent who specializes in aviation safety activities relating to: Air carrier operations (operations of: Scheduled air carriers, irregular air carriers operating aircraft having a maximum certificated gross take-off weight of more than 12,500 pounds, and commercial operators certificated under Part 45 of the Civil Air Regulations); air carrier aircraft in service (aircraft used in air carrier operations described herein); air carrier airmen (persons who hold or are candidates of such certificates as airline transport pilot, airport control tower operator, dispatcher, or aircrewman); and other air carrier matters.

"(F)" indicates that there is assigned to the office an agent who specializes in manufacturing inspection, including matters pertaining to the type, production, and original airworthiness inspection, and issuance of new or modified aircraft, engines, propellers, and components.

"(E)" indicates that there is assigned to the office an engineer and/or agent who specializes in rendering engineering assistance in the evaluation of aircraft and equipment designs and redesigns, and in the evaluation of aircraft repairs and alterations.

All agents are generally familiar with, and can furnish information and advice on, aviation safety matters outside their area of specialization.

Sec. 23. *Air Route Traffic Control Centers.*—(a) *Functions.* Air Route Traffic Control Centers are responsible for exercising control over air traffic along designated air routes and in designated control zones and control areas within their assigned geographical jurisdiction. All aircraft flying in these designated airspace areas under conditions which require compliance with Instrument Flight Rules are subject to control by these Centers. For a description of these designated airspace areas see 14 CFR Parts 600 and 601.

The geographical jurisdiction of a particular Center coincides with the Flight Advisory Area and Oceanic Control Area boundaries shown on the Civil Airways and Mileage Chart published by the U. S. Coast and Geodetic Survey. Changes in these geographical areas between chart editions are carried in the Airman's Guide and Notices to Airmen published by the Civil Aeronautics Administration.

These centers are manned by Airways Operations Specialists (Air Route). These Specialists are responsible for the safe and orderly flow of air traffic being navigated under instrument flight conditions on the air routes within the control areas assigned to the center. Their principal functions are:

To issue instructions to pilots regarding altitudes to be flown, routes to be followed, speeds to be maintained, and holding procedures over specified locations.

To advise pilots of hazardous conditions and other factors which may affect the safety of the flight, and to suggest a change of flight plan.

To maintain a progressive check of aircraft and initiate search and rescue action to locate overdue aircraft.

Salt Lake City Air Traffic Control Center, Municipal No. 1 Airport, Salt Lake City 3, Utah.

Seattle Air Route Traffic Control Center, Seattle-Tacoma Airport, Seattle Wash.

Region 5

Anchorage Air Route Traffic Control Center, Merrill Field, Anchorage, Alaska.

Fairbanks Air Route Traffic Control Center, Fairbanks, Alaska.

Region 6

Honolulu Air Route Traffic Control Center, Honolulu Airport, Honolulu 12, T. H.

Wake Island, Air Route Traffic Control Center, Wake Airport, Wake Island.

SEC. 24. *Airport Traffic Control Towers.*—(a) *Functions.* Airport traffic control towers are operated by the Civil Aeronautics Administration at certain designated airports listed below. They are responsible for safe, orderly, and expeditious flow of air traffic in the vicinity of an airport, and movement of aircraft and vehicles on the airport.

The functions of a majority of these towers have been expanded to include the responsibility for controlling and providing separation between aircraft in the terminal area which are holding or arriving and departing under instrument flight rules. This is termed "Approach Control Service". At such locations, the responsibility for controlling instrument flight rule traffic has been delegated to the tower by an Air Route Traffic Control Center. The purpose of this delegation is to expedite arrivals and departures by means of direct voice communications between the pilot and the approach controller, and by use of special holding approach, and departure procedures.

These towers are manned by Airways Operations Specialists (Airport), who are responsible for the safe and orderly flow of air traffic in the vicinity of the airport. Their principal functions are:

To issue instructions to pilots for taxiing, take-off, approach for landing, and landing of aircraft.

To inform pilots regarding field and weather conditions, air navigational facilities, emergency landing areas, restrictions to flight, regulations, and other matters which may be of assistance to the pilot.

To relay messages between pilots, airline operations offices, Air Route Traffic Control Centers, Weather Bureau offices, Communications Stations and other appropriate agencies concerning the operation, dispatch, and control of aircraft.

To invoke emergency procedures when any emergency occurs or appears likely to occur to aircraft under tower control.

When equipped with airport surveillance and precision approach radar, to monitor aircraft arriving and departing from an airport on instruments, and, in an emergency or upon request, issuing ground-controlled approach instructions (GCA) for a let-down.

At a number of locations, the operation of an Interstate Airway Communications Station as a separate unit is discontinued. Several of its functions are transferred to the control tower and the facility is established as a combined Tower/Station. These facilities provide the same service as described above and, in addition, the following functions are performed:

Maintains continuous multiple listening watches on designated aeronautical radio frequencies for the purpose of conducting communications with en route aircraft. Furnishes flight advisory and emergency services generally within a radius of 100 to 150 miles of the facility. Furnishes emergency navigation assistance to pilots unable to establish their position. Accepts and transmits flight plans and associated progress and arrival reports and alerts appropriate Search and Rescue organizations when flights are not successfully concluded. Broadcasts pertinent information relative to condition of landing areas, air navigation facilities, and aeronautical weather on scheduled and unscheduled basis as required. Monitors federally operated electronic and visual air navigation aids, receives reports of irregularities of non-federal aids, and publicizes operating irregularities when safety is impaired.

(b) *Locations.*

SEC. 25. *Interstate Airway Communications Stations*—(a) *Functions.* The primary purpose of an Interstate Airway Communications Station (INSAC) is to provide aeronautical communications services required to maintain control over, and facilitate, the flight of aircraft in the United States and Territories. These stations are usually located at airports along the civil airways and are associated with electronic air navigation aids. Communications, flight advisory, and emergency services are generally available within a radius of 100 to 150 miles of the station location. These stations are staffed by Airways Operations Specialists whose principal functions are as follows:

Maintains continuous multiple listening watches on designated aeronautical radio frequencies for the purpose of maintaining communications with en route aircraft. Acts as a communications link between aircraft in flight and federal air traffic control facilities during instrument flight rule (IFR) operation. Accepts and transmits flight plans and associated progress and arrival reports, and alerts appropriate Search and Rescue organizations when flights are not successfully concluded.

Observes, reports, and disseminates aeronautical weather data, such as surface weather reports, forecasts, upper air soundings and pilots' weather reports, in cooperation with the U. S. Weather Bureau. Broadcasts pertinent information relative to condition of landing areas, air navigation facilities, and aeronautical weather on scheduled and unscheduled basis as required.

Advises pilots, prior to takeoff, regarding the weather and other hazards along proposed route of flight. Furnishes advisory assistance to pilots landing and taking off from airports not served by an airport traffic control tower. Furnishes emergency navigation assistance to pilots unable to establish their position because of restricted visibility or malfunctioning of airborne electronic equipment.

Monitors federally operated electronic and visual air navigation aids, receives reports of irregularities of non-federal aids, and publicizes operating irregularities when, in his opinion, safety is impaired.

SEC. 26. *Overseas Foreign Aeronautical Communication Stations*—(a) *Functions.* Overseas Foreign Aeronautical Communications Stations (OFACS) provide air-ground communication services required to maintain control over and facilitate the long-range flight of aircraft overseas and in foreign countries. Essentially, these communication services are similar to those which are provided by INSACS though greater in scope due to the larger areas of activity. They also provide fixed communications services for the large scale exchange of meteorological and airway information with foreign countries.

(b) *Locations.*

Region 1

New York, N. Y., LaGuardia Field.

Region 2

Balboa, C. Z., Albrook Field.
San Juan, P. R., Isla Grande Airport.
Miami, Fla., International Airport.
New Orleans, La., Municipal Airport.
Swan Island, West Indies.

Region 4

San Francisco, Calif., San Francisco Municipal Airport.
Seattle, Wash., Seattle-Tacoma Airport.

Region 5

Anchorage, Alaska.
Annette Island, Alaska.

Region 6

Canton Island, Pacific Ocean.
Guam Island, Pacific Ocean.
Honolulu, Oahu, Territory of Hawaii.
Wake Island, Pacific Ocean.

SEC. 27. *International District and Field Offices*—(a) *Functions.* Field activities of the International Region are carried out primarily by CAA International District Offices located within the continental United States and CAA International Field Offices located outside the continental United States.

These offices inspect operations and equipment of U. S. flag air carriers engaged in international air transportation to determine compliance with, and the enforcement of, the applicable safety rules, regulations, and orders issued pursuant to the Civil Aeronautics Act of 1938, as amended;

Direct the investigation of alleged violations of such safety requirements, including accidents when such violations or accidents involve civil aircraft of the United States;

Review requests for, and issue amendments to, operating certificates of such carriers;

Issue airworthiness and other aircraft certificates;

Issue certificates and examine applicants for pilot, mechanic, parachute rigger, dispatcher, and other airman certificates;

Assist United States flag international carriers and foreign governments in steps to acquire and provide adequate aeronautical communications facilities and aids to air navigation based on international standards and the requirements of such U. S. carriers;

Promotes United States civil aviation interests through familiarization of foreign officials with United States standards, procedures, and techniques as set forth in the International Civil Aviation Convention or other international agreements to which the United States is a party.

(b) *Locations of CAA International District Offices.*

Fort Worth CAA International District Office, CAA Reservation, Haslet Road, Fort Worth, Tex. (P. O. Box 1689).

SUBPART D—AIR NAVIGATION DEVELOPMENT BOARD

SEC. 31. *Services provided by the Civil Aeronautics Administration.* The Department of Commerce, through the Civil Aeronautics Administration, provides all housekeeping services required by the Air Navigation Development Board. The Board may utilize the contractual and other facilities of the Administrator of Civil Aeronautics, and the Board Staff is subject to all administrative policies and procedures of the Administration, except where specifically exempted therefrom in writing by the Administrator.

NOTE: A description of the organization, and the powers and duties of the Air Navigation Development Board is contained in 19 F. R. 1521 and 1522.

This notice supersedes the description of the organization and functions of the Civil Aeronautics Administration as published on April 5, 1951, in 16 F. R. 2975, and amended on August 9, 1952, in 17 F. R. 7304; September 10, 1952, in 17 F. R. 8163; October 18, 1952, in 17 F. R. 9270; November 19, 1952, in 17 F. R. 10574; May 14, 1953, in 18 F. R. 2798; July 16, 1953, in 18 F. R. 4187; July 23, 1953, in 18 F. R. 4344 and 4345; July 31, 1953, in 18 F. R. 4505; October 15, 1953, in 18 F. R. 6571; November 5, 1953, in 18 F. R. 7000; November 6, 1953, in 18 F. R. 7016; and on November 14, 1953, in 18 F. R. 7260.

This notice shall become effective upon publication in the FEDERAL REGISTER.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

Approved:

SINCLAIR WEEKS,
Secretary of Commerce.

[F. R. Doc. 54-2633; Filed, Apr. 9, 1954; 8:45 a. m.]

DEPARTMENT OF LABOR

Office of the Secretary

DIRECTOR AND ASSISTANT DIRECTOR OF BUREAU OF EMPLOYMENT SECURITY

DELEGATION OF AUTHORITY TO PERFORM CERTAIN DUTIES OF THE SECRETARY

Pursuant to section 3 of the Administrative Procedure Act (60 Stat. 287; 5 U. S. C. 1001 et seq.), the Statement of Organization of the Department of Labor heretofore published in the FEDERAL REGISTER is amended to indicate certain additional assignments of functions.

On October 16, 1953, by virtue of authority contained in R. S. 161 (5 U. S. C. 22), in regulations issued by the Attorney General (17 F. R. 11481, 11494, 18 F. R. 4925) in accordance with the Immigration and Nationality Act (66 Stat. 163), and in Reorganization Plan 6 of 1950 (15 F. R. 3174, 64 Stat. 1263), the Secretary of Labor issued General Order No. 69 which authorized the Assistant Secretary of Labor for Employment and Manpower, or such other person as he chose to designate, to certify (1) as to the non-availability of qualified persons in the United States to perform the work, labor or services which are to be performed by immigrants admitted pursuant to section 204 (b) of the Immigration and Nationality Act; (2) whether (a) qualified workers are available within the United States, and (b) Employment Service policies have been observed with respect to immigrants admitted pursuant to section 214 of said act; (3) with respect to applications for extensions of temporary admission under said section 214 that the facts which justified such admission continue to exist; and (4) in connection with the exclusion of immigrants under section 212 (a) of said act that (a) sufficient qualified workers are available at the time (of the application for a visa and for admission to the United States) and place (to which alien is destined) to perform work or (b) that the employment of such aliens would adversely affect the wages and working conditions of workers in the United States similarly employed.

This order superseded all prior orders, instructions, regulations or memoranda of the Secretary of Labor to the extent they are inconsistent therewith.

On November 12, 1953, the Assistant Secretary of Labor for Employment and Manpower authorized, subject to his general direction and control, the Director of the Bureau of Employment Security to perform part of the functions designated in General Order No. 69 and described above in paragraphs (1), (2) and (3). Under authority contained in the latter order, the Director of the Bureau of Employment Security, on November 12, 1953, authorized the Assistant Director for Employment Security to perform the functions delegated to him and subject to his general direction and control.

Signed at Washington, D. C., this 5th day of April 1954.

STUART ROTHMAN,
Solicitor of Labor.

FEDERAL CIVIL DEFENSE ADMINISTRATION

ORGANIZATIONAL STATEMENT

GENERAL FUNCTIONS; CENTRAL AND FIELD ORGANIZATIONS

1. Section 2 of the statement on organization and functions of the Federal Civil Defense Administration (16 F. R. 1909) is amended to include the following new paragraph:

SEC. 2. *General functions.* • • •

(h) On behalf of the President, pursuant to Public Law 875, 81st Congress, as amended and Executive Order 10427, the Administrator is authorized to provide an orderly and continuing means of assistance by the Federal Government to States and local governments in carrying out their responsibilities to alleviate suffering and damage resulting from major disasters, to make emergency repairs to and temporary replacements of essential public facilities in major disasters, to foster the development of such State and local organizations and plans to cope with major disasters as may be necessary, and to coordinate the activities of Federal agencies in providing disaster assistance.

2. Section 4, as amended (17 F. R. 10672), is revised to read as follows:

SEC. 4. *Central and field organizations.* (a) The chief executive officers of the Administration are the Administrator and Deputy Administrator both appointed from civilian life by the President. The principal offices of the Administration are located at 1930 Columbia Road, Washington 25, D. C.

(b) The functions of the Administrator are performed through the following organizational segments:

Office of Executive Assistant Administrator.
Office of General Counsel.
Planning Staff.
General Administration Staff:
  Administrative Management Office.
  Administrative Operations Office.
  Budget Administration Office.
  Personnel Office.
  Security Office.
Education Services:
  Public Affairs Office.
  Publications Office.
  Training and Education Office.
Operations Control Services:
  Federal Emergency Control Office.
  Supply Office.
  Tactical Operations Office.
  Transportation Office.
  Warning and Communications Office.
Technical Advisory Services:
  Engineering Office.
  Health Office
  Industry Office.
  Safety Office.
  Welfare Office.

(c) Seven Regional Offices advise and assist the State civil defense organizations in their areas in carrying out civil defense activities. The Regional Offices and the areas served by each are as follows:

Region 1: FCDA Regional Office, 383 Langley Road, Newton Center 59, Mass.—Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey.

Region 2: FCDA Regional Office, Farmers and Mechanics Building, High and Market Streets, West Chester, Pa.—District of Columbia, Pennsylvania, Maryland, Delaware, Virginia, West Virginia, Kentucky, Ohio.

Region 3: FCDA Regional Office, Buildings 23 and 25, Veterans Domiciliary, Pine Tree Boulevard, South, Thomasville, Ga.—Tennessee, Mississippi, Alabama, Georgia, South Carolina, Florida, North Carolina.

Region 4: FCDA Regional Office, 108 N. Ottawa Street, Joliet, Ill.—Indiana, Illinois, Iowa, Wisconsin, Minnesota, North Dakota, South Dakota, Michigan.

Region 5: FCDA Regional Office, Brackenridge Hall, Texas State College for Women, Denton, Tex.—Texas, Louisiana, Arkansas, Oklahoma, New Mexico.

Region 6: FCDA Regional Office, 2040 East Evans Avenue, P. O. Box 3878, University Park Station, Denver 10, Colo.—Colorado, Missouri, Wyoming, Nebraska, Kansas.

Region 7: FCDA Regional Office, 2223 Fulton Street, Berkeley 4, Calif.—California, Nevada, Utah, Arizona, Montana, Idaho, Washington, Oregon.

(d) The FCDA Staff College and the Rescue School located at Olney, Maryland conduct training programs in Civil Defense Administration and Civil Defense Operations and Rescue Instructor Training.

(e) The public may obtain information or make submittals or requests to the Regional Administrator whose office serves the area involved.

KATHERINE G. HOWARD,
Deputy Administrator.

[Docket No. E-6553]

COMPANIA DE LUZ Y FUERZA DE CD. CAMARGO, TAMPS., S. A. AND CENTRAL POWER AND LIGHT CO.

NOTICE OF APPLICATION FOR AUTHORIZATION TO EXPORT ELECTRIC ENERGY

APRIL 6, 1954.

Notice is hereby given that Compania de Luz y Fuerza de Cd. Camargo, Tamps., S. A. (Applicant), on March 30, 1954, filed an application joined in by Central Power and Light Company (Central), requesting authorization pursuant to the provisions of section 202 (e) of the Federal Power Act, U. S. C. 824 (a), to export electric energy from the United States to the Republic of Mexico in the maximum annual amount of 2,500,000 kilowatt-hours at a rate of supply not to exceed 500 kw. The application states that Central will be the source of supply of the energy to be exported and that Applicant upon purchase of said energy from Central will transmit the same from a point adjacent to the international bridge across the Rio Grande near the town of Rio Grande City in Starr County, Texas, by means of a 12,000 volt, three phase, four wire, overhead line to a point on the bank of the Rio Grande in the State of Tamaulipas, Republic of Mexico opposite the aforementioned point in the State of Texas; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard or to make any protest with respect to said application should, on or before April 26, 1954, file a petition or protest in accordance with the Commission's rules of practice and procedure. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3220]

CITIES SERVICE CO. ET AL.

ORDER REGARDING SALE BY PARENT OF SUBSIDIARY'S COMMON STOCK AT COMPETITIVE BIDDING AND REQUEST FOR RECITALS REQUIRED BY SUPPLEMENT R AND SECTION 1808 (f) OF INTERNAL REVENUE CODE

APRIL 6, 1954.

In the matter of Cities Service Company, The Gas Service Company, Gas Advisers, Inc., File No. 70-3220.

Cities Service Company ("Cities"), a registered holding company, The Gas Service Company ("Gas Service"), a gas utility subsidiary of Cities, and Gas Advisers, Inc. ("Gas Advisers"), a mutual service company owned by various subsidiaries in the Cities system which are served by said service company, having filed a joint application-declaration, as amended, pursuant to sections 11 and 12 of the Public Utility Holding Company Act of 1935 ("act") and Rules U-42, U-43, U-44, U-45 (a) and U-50 promulgated thereunder, regarding the following transactions:

Cities has withdrawn its prior application-declaration (File No. 70-3167) which, as amended, proposed the sale of the common stock of Gas Service owned by Cities to Missouri Public Service Company, a non-affiliated company.

Now Cities proposes to sell, pursuant to the competitive bidding requirements of Rule U-50, 1,500,000 shares of $10 par value common stock of Gas Service, being all the capital stock of such company outstanding.

The proposed sale by Cities of its interest in Gas Service is stated to be in compliance with the Commission's order of May 5, 1944, as modified and clarified by supplemental order dated October 12, 1944, pursuant to section 11 (b) (1) of the act, directing, among other things, that Cities dispose of its interest in Gas Service.

Gas Service has accrued its Federal income and excess profits taxes for the year 1953 on a separate return basis. Immediately following the sale of the Gas Service stock by Cities, the two companies propose to enter into a Tax Agreement which will provide in substance (a) that Cities may include Gas Service in its consolidated returns for either or both of the years 1953 and 1954, (b) that, in the event Gas Service is so included for the year 1953, Gas Service will pay to Cities an amount equal to the amount accrued on the books of Gas Service on account of Federal income and excess profits taxes on a separate return basis for the calendar year 1953 and, in the event Gas Service is so included for the calendar year 1954, an amount equal to the lesser of (i) the amount accrued on the books of Gas Service on a separate return basis for the period from January 1, 1954, to the date of said Tax Agreement or (ii) the amount which Gas Service shall have accrued on its books on a separate return basis for the calendar year 1954 and (c) that the payment of such amount shall be made to Cities on the same installment basis that would apply if separate returns were being filed by Gas Service. The Agreement also provides for the assignment by Gas Service to Cities of all of its rights to refunds or credits which may result from the inclusion of Gas Service in said consolidated returns for said periods and for appropriate indemnification of Gas Service by Cities against any liability for income or excess profits taxes arising by reason of such inclusion of Gas Service in consolidated returns for said periods.

Gas Service presently owns 270 shares of the capital stock, par value $100 per share, of Gas Advisers. Subject to, and on the consummation of, Cities' proposed sale of its interest in Gas Service, the latter proposes to sell, and Gas Advisers proposes to purchase for retirement, said 270 shares for a consideration of $27,000; and concurrently therewith the service contract dated January 1, 1938, between Gas Service and Gas Advisers will be terminated.

The application-declaration states that Cities will use the proceeds from the sale of its holdings of common stock of Gas Service to purchase additional common stock of its wholly owned subsidiary, Empire Gas and Fuel Company.

It is stated that no State or Federal Commission, other than this Commission, has jurisdiction over the proposed transactions.

It is requested that the Commission's order herein make the necessary findings and contain the recitals required by Supplement R and section 1808 (f) of the Internal Revenue Code, as amended, with respect to certain of the proposed transactions, and that the order become effective upon its issuance.

Due notice of the filing of the application-declaration having been given in the manner prescribed by Rule U-23 and no hearing having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and rules thereunder are satisfied and that the application-declaration, as amended, should be granted and permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act that said application-declaration, as amended, be, and the same is hereby, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rules U-24 and U-50 and to the following additional terms and conditions:

That jurisdiction be, and the same hereby is reserved over all fees and expenses incurred or to be incurred in connection with the proposed transactions and the consummation thereof.

It is further ordered, recited and found, That the sale and transfer by Cities of the 1,500,000 shares of common stock of the par value of $10 per share of Gas Service to the purchasers, and the application of the proceeds (or an amount equal thereto) to be received from said sale by Cities to the purchase by Cities from Empire Gas and Fuel Company, a wholly owned subsidiary, at $100 per share, of additional shares of common stock without nominal or par value of Empire Gas and Fuel Company, all as in the order authorized, approved and directed, are necessary or appropriate to the integration or simplification of the holding company system of which Cities and Gas Service are members, and are necessary or appropriate to effectuate the provisions of section 11 (b) of the Public Utility Holding Company Act of 1935 within the meaning of sections 371, 373 (a) and 1808 (f) of the Internal Revenue Code, as amended, and that jurisdiction is reserved to amend, supplement or modify, upon the petition or application of Cities, the recitals, itemizations and specifications required by Supplement R of the Internal Revenue Code, as amended, with respect to the above-described transactions.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File No. 70-3228]

COLUMBIA GAS SYSTEM, INC., AND UNITED FUEL GAS CO.

NOTICE OF FILING OF APPLICATION-DECLARATION REGARDING CAPITAL CONTRIBUTION TO SUBSIDIARY BY PARENT, AND ISSUANCE AND SALE OF INSTALLMENT NOTES BY SUBSIDIARY AND ACQUISITION THEREOF BY PARENT

APRIL 6, 1954.

Notice is hereby given that The Columbia Gas System, Inc. ("Columbia"), a registered holding company, and one of its subsidiary companies, United Fuel Gas Company ("United Fuel"), have filed a joint application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("act"), designating sections 6 (b), 9, 10 and 12 (b) of the act and Rules U-45 and U-50 (a) (3) promulgated thereunder as applicable to the proposed transactions which are summarized as follows:

Columbia, which owns all of the outstanding securities of United Fuel except 1½ shares of common stock, proposes to make cash capital contributions to United Fuel in the amount of $11,500,000. Columbia will increase its investment in the common stock of United Fuel by $11,499,954.74 and will charge $45.26 (the amount of the contribution which is applicable to the minority interest) to operating expense. United Fuel proposes to credit $11,500,000 to its capital surplus.

United Fuel proposes to issue and sell at par to Columbia $12,800,000 principal amount of __ Percent Installment Promissory notes.

The notes in registered form, will be payable in equal annual installments on February 15 of each of the years 1956 to 1980, inclusive. Interest on the unpaid principal thereof will be payable semi-annually on February 15 and August 15 at the rate of 4 percent per annum or such lower rate, being a multiple of ⅛ of 1 percent as shall be not less than the "cost of money" to Columbia in respect of its next sale of Senior Debentures. It is Columbia's present intention to sell Senior Debentures later this year and during the interim period the proposed notes will carry interest at the rate of 4 percent per annum subject, however, to an adjustment in the rate following the sale of Senior Debentures.

It is anticipated that Columbia will first make capital contributions when and as funds are required by United Fuel up to a maximum amount of $11,500,000 and thereafter Columbia will purchase the proposed notes up to a maximum amount of $12,800,000. However, none of the capital contributions will be made or the purchase of notes consummated subsequent to March 31, 1955.

According to the filing, the financing is for the purpose of supplying United Fuel with funds required to finance the major portion of its 1954 construction program involving estimated expenditures of $29,080,000 for underground gas storage and production facilities, transmission and distribution lines, compressor stations, and other facilities.

The estimated fees and expenses aggregate $14,480 of which $14,080 is attributable to the Federal Original Issue Tax.

United Fuel has applied to the Public Service Commission of West Virginia for authority to issue and sell the notes and to receive the cash capital contributions from Columbia.

Notice is further given that any interested person may, not later than April 21, 1954, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said filing which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, said joint application-declaration, as filed or as amended, may be granted and permitted to become effective, as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

By the Commission.

[File No. 70-3229]

WISCONSIN ELECTRIC POWER CO.

NOTICE OF FILING IN RESPECT OF PROPOSED ISSUANCE AND SALE PURSUANT TO RIGHTS OFFERING OF ADDITIONAL SHARES OF COMMON STOCK AND ISSUANCE AND SALE AT COMPETITIVE BIDDING OF BONDS

APRIL 6, 1954.

Notice is hereby given that Wisconsin Electric Power Company ("WEPCO"), a registered holding company and a public-utility company, has filed an application-declaration, pursuant to the Public Utility Holding Company Act of 1935 ("act"), and has designated sections 6, 7, 9 and 10 of the act and Rules U-42 and U-50 promulgated thereunder as applicable to the proposed transactions, which are summarized as follows:

WEPCO proposes to issue and sell, without underwriting, not to exceed 421,492 additional shares of its authorized but unissued $10 par value common stock, pursuant to (a) a rights offering to its stockholders on the basis of one share of additional common stock for each ten shares held of record at the close of business on a record date to be fixed by the company, (b) the non-transferable privilege to the regular employees and officers of WEPCO and its subsidiaries, to subscribe, subject to allotment, for such of the additional shares of common stock, not to exceed 100 such shares by any one employee or officer, as are not subscribed for by the stockholders pursuant to the rights offering, and (c) the additional privilege to the stockholders to subscribe, subject to allotment, for such number of shares of additional common stock as are not subscribed for by the stockholders and the employees and officers under (a) and (b). The subscription price, not less than par, is to be fixed by the company prior to the offering. The employees are to be permitted to pay for the stock subscribed for by them in installments over a period not exceeding one year; no employee is to be permitted to subscribe for more than that number of shares the aggregate subscription price of which most nearly equals approximately 15 percent of the employee's annual wages for the year 1953, and, until the subscription price for such shares is fully paid, such shares will not be issued nor will the employee be entitled to receive any dividends. The stockholders' subscription rights and the additional subscription privilege will be evidenced by transferable warrants. The subscription offer is to extend over a period of approximately 20 days. No fractional shares will be issued. The company has appointed the Hanover Bank, New York, New York, and First Wisconsin Trust Company, Milwaukee, Wisconsin, as Warrant Agents. Such Warrant Agents will transfer subscription Warrants, arrange for splitups and combinations, sell subscription rights, purchase subscription rights (not exceeding 9) to enable subscriptions for full shares to be made, and administer the allotments under the stockholders' additional subscription privilege. The Company reserves the right to issue and sell any shares of the additional common stock not subscribed for by the stockholders or employees and officers without first again offering such shares to the stockholders.

WEPCO also proposes to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, $20,000,000 principal amount of First Mortgage Bonds, __ percent Series due 1984. The bonds will be issued under and secured by the existing Mortgage and Deed of Trust, dated October 28, 1938, as previously supplemented and amended, and as to be further supplemented and amended by a Supplemental Indenture to be dated as of May 1, 1954. The price to be received by the Company (which shall not be less than 100 percent nor more than 102¾ percent of the principal amount) for said bonds, and the rate of interest thereon (which shall be a multiple of ⅛ of 1 percent) will be determined by the competitive bidding.

It is stated that the proceeds to be received from the proposed issue and sale of common stock and bonds will be used to finance the cost of property additions, approximately $38,000,000 being required for such purpose during 1954.

WEPCO has filed an application with the Public Service Commission of Wisconsin for authority to issue and sell the proposed securities.

Notice is further given that any interested person may, not later than April 23, 1954, at 5:30 p. m., request the Commission in writing that a hearing be held on such matters, stating the nature of his interest, the reasons for such request, the issues of fact or law raised by said application-declaration which he desires to controvert, or may request that he be notified if the Commission orders a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after that date said application-declaration, as filed or as amended, may be granted and permitted to become effective, as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

COLUMBIA GAS SYSTEM, INC., AND MANUFACTURERS LIGHT AND HEAT CO.

NOTICE OF FILING OF APPLICATION-DECLARATION REGARDING ISSUANCE AND SALE OF COMMON STOCK AND INSTALLMENT NOTES BY SUBSIDIARY AND ACQUISITION THEREOF BY PARENT

APRIL 6, 1954.

Notice is hereby given that The Columbia Gas System, Inc. ("Columbia"), a registered holding company, and one of its wholly owned subsidiary companies, The Manufacturers Light and Heat Company ("Manufacturers"), have filed a joint application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("act"), designating sections 6 (b), 9 and 10 of the act and Rule U-50 (a) (3) thereunder as applicable to the proposed transactions which are summarized as follows:

Manufacturers proposes to issue and sell to Columbia 149,784 shares of common stock, $50 par value, and $14,160,800 principal amount of __ Percent Installment Promissory Notes at the par value or principal amount thereof.

The notes in registered form, will be payable in equal annual installments on February 15 of each of the years 1956 to 1980, inclusive. Interest on the unpaid principal thereof will be payable semi-annually on February 15 and August 15 at the rate of 4 percent per annum or such lower rate, being a multiple of ⅛ of 1 percent, as shall be not less than the "cost of money" to Columbia in respect of its next sale of Senior Debentures. It is Columbia's present intention to sell Senior Debentures later this year and during the interim period the proposed notes will carry interest at the rate of 4 percent per annum subject, however, to an adjustment in the rate following the sale of Senior Debentures.

It is anticipated that Manufacturers will first issue and sell its common stock when and as funds are required up to a maximum amount of 149,784 shares ($7,489,200) and thereafter Manufacturers will sell its notes to Columbia up to a maximum amount of $14,160,800. However, none of such common stock or notes will be sold or purchased subsequent to March 31, 1955.

According to the filing, the financing is for the purpose of supplying Manufacturers with funds required to finance the major portion of its 1954 construction program involving estimated expenditures of $26,513,000 for underground gas storage and production facilities, transmission and distribution lines and other facilities.

The estimated fees and expenses aggregate $24,265 of which $23,815 is attributable to the Federal Original Issue Tax.

Manufacturers has applied to the Pennsylvania Public Utility Commission for approval of the proposed issuance and sale of common stock and notes.

Notice is further given that any interested person may, not later than April 21, 1954, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said filing which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, said joint application-declaration, as filed or as amended, may be granted and permitted to become effective, as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

COLUMBIA GAS SYSTEM, INC., AND OHIO FUEL GAS CO.

NOTICE OF FILING OF APPLICATION-DECLARATION REGARDING ISSUANCE AND SALE OF COMMON STOCK AND INSTALLMENT NOTES BY SUBSIDIARY AND ACQUISITION THEREOF BY PARENT

APRIL 6, 1954.

Notice is hereby given that The Columbia Gas System, Inc. ("Columbia"), a registered holding company, and one of its wholly owned subsidiary companies, The Ohio Fuel Gas Company ("Ohio Fuel"), have filed a joint application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("act"), designating sections 6 (b), 9 and 10 of the act and Rule U-50 (a) (3) thereunder as applicable to the proposed transactions which are summarized as follows:

Ohio Fuel proposes to issue and sell to Columbia up to 130,000 shares of Ohio Fuel's common stock, $45 par value, and $12,650,000 principal amount of its __ Percent Installment Promissory Notes at the par value or principal amount thereof.

The notes in registered form, will be payable in equal annual installments on February 15 of each of the years 1956 to 1980, inclusive. Interest on the unpaid principal thereof will be payable semi-annually on February 15 and August 15 at the rate of 4 percent per annum or such lower rate, being a multiple of ⅛ of 1 percent, as shall be not less than the "cost of money" to Columbia in respect of its next sale of Senior Debentures. It is Columbia's present intention to sell Senior Debentures later this year and during the interim period the proposed notes will carry interest at the rate of 4 percent per annum subject, however, to an adjustment in the rate following the sale of Senior Debentures.

It is anticipated that Ohio Fuel will first issue and sell its common stock when and as funds are required up to a maximum amount of 130,000 shares ($5,850,000) and thereafter Ohio Fuel will sell its proposed notes to Columbia up to a maximum amount of $12,650,000. However, none of such common stock or notes will be sold or purchased subsequent to March 31, 1955.

According to the filing, the financing is for the purpose of supplying Ohio Fuel with funds required to finance the major portion of its 1954 construction program involving estimated expenditures of $22,517,000 for underground gas storage and production facilities, transmission and distribution lines, and other facilities.

The estimated fees and expenses aggregate $22,000 of which $20,350 is attributable to Federal Original Issue Tax.

Ohio Fuel has applied to the Public Utilities Commission of Ohio for approval of the proposed issuance and sale of common stock and notes.

Notice is further given that any interested person may, not later than April 21, 1954, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law revised by said filing which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, said joint application-declaration, as filed or as amended, may be granted and permitted to become effective, as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

[File No. 811-313]

PENNSYLVANIA INDUSTRIES, INC.

NOTICE OF APPLICATION FOR ORDER DECLARING COMPANY HAS CEASED TO BE AN INVESTMENT COMPANY

APRIL 5, 1954.

Notice is hereby given that Pennsylvania Industries, Inc. ("Industries"), a

registered closed-end non-diversified investment company, has filed an application pursuant to section 8 (f) of the act for an order declaring that Industries has ceased to be an investment company under the act.

The application makes the following representation:

Industries has outstanding capital stock consisting of 36,387 shares of $6 Preferred Stock, par value $25 per share, and 23,182.52 shares of Common Stock, par value $25 per share.

All of the outstanding shares of $6 Preferred Stock of Industries and 22,943 (98.9 percent) of the 23,182.52 outstanding shares of Common Stock of Industries are owned by J. H. Hillman, Jr., and two of his children, Hillman Land Company, J. H. Hillman & Sons Company and The Hillman Foundation, Inc. The outstanding capital stock of J. H. Hillman & Sons Company consists of 10,369 shares of common stock, $100 par value per share, all of which (with the exception of 10 shares) are owned by Hillman Land Company. All of the outstanding shares of stock of Hillman Land Company are owned by J. H. Hillman, Jr., and five of his children. The Hillman Foundation is a charitable foundation founded by Hillman and his family.

Of the 239.52 outstanding shares of Common Stock of Industries not owned as above set forth, 217 are owned by 18 stockholders and the remaining 22.52 shares are held for issuance to holders of $1 par value Common Stock of Industries which (pursuant to amendment to the Certificate of Incorporation of Industries on December 28, 1949) was converted into $25 par value Common Stock of Industries at the rate of one share of $25 par value Common Stock for each twenty-five shares of $1 par value Common Stock. Said 22.52 issuable shares are held by 16 stockholders.

The application, therefore, shows that the outstanding securities of Industries are owned by not more than one hundred persons and the application asserts that Industries is not making and does not presently propose to make any public offering of any of its securities.

Section 3 (c) (1) of the act exempts from the definition of "investment company" any issuer whose outstanding securities (other than short-term paper) are beneficially owned by not more than one hundred persons and which is not making and does not presently propose to make a public offering of its securities. For the purpose of this exemption, beneficial ownership by a company is deemed to be beneficial ownership by one person; except that, if such company owns 10 per centum or more of the outstanding voting securities of the issuer, the beneficial ownership shall be deemed to be that of the holders of such company's outstanding securities (other than short-term paper).

For a more detailed statement of the matters of fact and law asserted, all interested persons are referred to said application which is on file in the office of the Commission in Washington, D. C.

Notice is further given that any interested person may, not later than April 23, 1954, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

By the Commission.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 29103]

ETHYLENE OXIDE FROM TEXAS CITY, TEX., TO WEST VIRGINIA, OHIO, AND KENTUCKY

APPLICATION FOR RELIEF

APRIL 7, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Ethylene oxide, in tank-cars, carloads.

From: Texas City, Texas.

To: Specified destinations in West Virginia, Ohio, and Kentucky.

Grounds for relief: Competition with rail carriers, circuitous routes, and additional routes.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3967, supp. 324.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 29104]

FERTILIZER SOLUTIONS FROM VICKSBURG AND YAZOO CITY, MISS., TO MISSOURI, OHIO, AND IOWA

APPLICATION FOR RELIEF

APRIL 7, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Fertilizer ammoniating solution, and fertilizer nitrogen solution, in tank-car loads.

From: Vicksburg and Yazoo City, Miss.

To: St. Louis, Mo., Parma, Ohio and Clinton, Iowa.

Grounds for relief: Rail competition, circuity, to apply rates constructed on the basis of the short line distance formula, and additional destinations.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1366, supp. 22.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[Rev. S. O. 562, Taylor's I. C. C. Order 34]

CHICAGO & ILLINOIS MIDLAND RAILWAY CO.

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Charles W. Taylor, Agent, the Chicago & Illinois Midland Railway Company, account work stoppage, is unable to transport traffic routed over its line: *It is ordered*, That:

(a) Rerouting traffic: The Chicago & Illinois Midland Railway Company being unable to transport traffic routed over its line, because of work stoppage, and its connections, are hereby authorized to divert or reroute such traffic over any available route to expedite the movement, regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroads desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deeded to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective 10:00 a. m., April 6, 1954.

(g) Expiration date: This order shall expire at 11:59 p. m., April 20, 1954, unless otherwise modified, changed, suspended or annulled.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., April 6, 1954.

INTERSTATE COMMERCE COMMISSION, CHARLES W. TAYLOR, *Agent.*

PART 311—BASIC REGULATIONS

SUBPART B—LOAN LIMITATIONS

AVERAGE VALUES OF FARMS IN CERTAIN STATES

For the purposes of title I of the Bankhead-Jones Farm Tenant Act, as amended, average values of efficient family-type farm-management units for the counties identified below are determined to be as herein set forth. The average values heretofore established for said counties, which appear in the tabulations of average values under § 311.29, Chapter III, Title 6 of the Code of Federal Regulations, are hereby superseded by the average values set forth below for said counties.

CALIFORNIA

County	Average value
Lassen	$27,500
San Luis Obispo	27,500

DELAWARE

Kent	$20,500
New Castle	25,500
Sussex	15,000

FLORIDA

County	Average value	County	Average value
Calhoun	$15,000	Marion	$15,000
Dixie	12,000	Okaloosa	15,000
Escambia	15,000	Palm Beach	15,000
Gilchrist	12,000	Santa Rosa	15,000
Holmes	15,000	Walton	15,000
Lafayette	12,000	Washington	15,000

[illegible]

Minidoka	$20,000

[illegible]

County	Average value	County	Average value
Dickinson	$20,000	Mitchell	$20,000
Ellis	20,000	Ness	20,000
Ellsworth	18,000	Osborne	18,000
Gove	20,000	Rooks	18,000
Graham	18,000	Rush	20,000

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

CFR SUPPLEMENTS

(For use during 1954)

The following Supplements are now available:

Titles 30–31 ($1.00)

Title 33 ($1.25)

Titles 44–45 ($0.75)

Previously announced: Title 3, 1953 Supp. ($1.50); Title 8 ($0.35); Titles 10–13 ($0.50); Title 16 ($1.00); Title 18 ($0.45); Titles 22–23 ($1.00); Title 24 ($0.75); Title 25 ($0.45); Titles 40–42 ($0.50); Title 49: Parts 1 to 70 ($0.60); Parts 71 to 90 ($0.65); Parts 91 to 164 ($0.45); Parts 165 to end ($0.60)

Order from Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

Subchapter B—Loans, Purchases, and Other Operations

[1954 C. C. C. Grain Price Support Bulletin 1, Supp. 1, Grain Sorghums]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1954-CROP GRAIN SORGHUMS PRICE SUPPORT PROGRAM

A price support program has been announced for the 1954 crop of grain sorghums. The 1954 C. C. C. Grain Price Support Bulletin 1 (19 F. R. 967), issued by the Commodity Credit Corporation and containing the regulations of a general nature with respect to price support operations for grains and certain other commodities produced in 1954 is supplemented as follows:

Sec.
421.426 Purpose.
421.427 Availability of price support.
421.428 Eligible grain sorghums.
421.429 Warehouse receipts.
421.430 Determination of quantity.
421.431 Determination of quality.
421.432 Maturity of loans.
421.433 Support rates.
421.434 Warehouse charges.
421.435 Settlement.

AUTHORITY: §§ 421.426 to 421.435 issued under sec. 4, 62 Stat. 1070, as amended; 15 U. S. C. 714b. Interpret or apply sec. 5, 62 Stat. 1072; secs. 301, 401, 63 Stat. 1053; 15 U. S. C. 714; 7 U. S. C. 1447, 1421.

§ 421.426 *Purpose.* Sections 421.426 to 421.435 state additional specific regulations which, together with the general regulations contained in the 1954 C. C. C. Grain Price Support Bulletin 1, apply to loans and purchase agreements under the 1954 Crop Grain Sorghums Price Support Program.

§ 421.427 *Availability of price support*—(a) *Method of support.* Price support will be made available through farm-storage and warehouse-storage loans and through purchase agreements.

(b) *Area.* Farm-storage and warehouse-storage loans and purchase agreements will be available wherever grain sorghums are grown in the continental United States, except that farm-storage loans will not be available in areas where the ASC State committee determines that grain sorghums cannot be safely stored on the farm.

(c) *Where to apply.* Application for price support should be made at the office of the ASC county committee which keeps the farm-program record for the farm.

(d) *When to apply.* Loans and purchase agreements will be available from the time of harvest through January 31, 1955 and the applicable documents must be signed by the producer and delivered to the county committee not later than such date.

(e) *Eligible producer.* An eligible producer shall be an individual, partnership, association, corporation, or other legal entity producing grain sorghums in 1954 as landowner, landlord, tenant or sharecropper.

§ 421.428 *Eligible grain sorghums.* At the time the grain sorghums are placed under loan or delivered under a purchase agreement, they must meet the following requirements:

(a) The grain sorghums must have been produced in the continental United States in 1954 by an eligible producer.

(b) The beneficial interest in the grain sorghums must be in the eligible producer tendering the grain sorghums for loan or for delivery under a purchase agreement, and must always have been in him, or must have been in him and a former producer whom he succeeded before the grain sorghums were harvested.

(c) Grain sorghums of any class grading No. 4 or better, or No. 4 "Smutty" or better, and containing not in excess of 13 percent moisture shall be eligible, except that grain sorghums represented by warehouse receipts which indicate that the grain sorghums are ineligible because of moisture content only, will be eligible if the warehouseman certifies on the supplemental certificate or on a statement attached to the warehouse receipt that "the grain sorghums have been processed at the request of the eligible producer, and delivery will be made of eligible grain sorghums containing not in excess of 13 percent moisture content and no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of said warehouse receipt."

(d) The grain sorghums must not grade discolored, or weevily.

(e) If offered as security for a farm-storage loan, the grain sorghums must have been stored in the bin or granary at least 30 days prior to inspection for measurement, sampling, and sealing unless otherwise approved by the ASC State committee.

§ 421.429 *Warehouse receipts.* Warehouse receipts, representing grain sorghums in approved warehouse storage to be placed under loan or delivered under a purchase agreement, must meet the following requirements:

(a) Warehouse receipts must be issued in the name of the producer, must be properly endorsed in blank so as to vest title in the holder and must be receipts issued on a warehouse approved by CCC under the uniform Grain Storage Agreement which indicate that the grain sorghums are insured, or must be receipts issued on warehouses operated by Eastern common carriers under tariffs approved by the Interstate Commerce Commission for which custodian agreements are in effect.

(b) (1) Each warehouse receipt or the warehouseman's supplemental certificate (in duplicate) properly identified with the warehouse receipt must show (i) gross weight, (ii) class, (iii) grade (including special grades), (iv) test weight, (v) moisture, (vi) dockage, and (vii) any other grading factor(s) when such factor(s) and not test weight, determine the grade.

(2) The warehouse receipt or the warehouseman's supplemental certificate also must show whether the grain sorghums arrived by rail, truck or barge. In the case of warehouse receipts issued for grain sorghums delivered by rail or barge, the grading factors on the warehouse receipt must agree with the inbound inspection certificate for the car or barge when such certificate is issued.

(c) A separate warehouse receipt must be submitted for each grade, class, and subclass of grain sorghums.

(d) The warehouse receipt may be subject to liens for warehouse charges only to the extent indicated in § 421.434.

(e) Warehouse receipts representing grain sorghums which have been shipped by rail or water from a country shipping point to a designated terminal point, or shipped by rail or water from a country shipping point and stored in transit to a designated terminal point must be accompanied by registered freight bills, or by a certificate containing similar information in a form prescribed by the CSS Commodity office which shall be signed by the warehousemen and which may be a part of the supplemental certificate.

(f) If the warehouseman has processed the grain sorghums as provided in § 421.428 (c), the supplemental certificate must show the numerical grade and grading factors changed because of the grain sorghums being processed. When the grade and grading factors shown on

the supplemental certificate do not agree with the warehouse receipt, the factors shown on the supplemental certificate shall take precedence.

§ 421.430 *Determination of quantity.* (a) The quantity of grain sorghums placed under farm-storage loan may be determined either by weight or by measurement. The quantity of grain sorghums placed under a warehouse-storage loan or delivered under a farm-storage loan or under a purchase agreement shall be determined by weight.

(b) When a quantity is determined by weight, a unit of 100 pounds shall be determined to be 100 pounds of grain sorghums free of dockage. In determining the quantity of sacked grain sorghums by weight, a deduction of three-fourths of a pound for each sack shall be made.

(c) When the quantity of grain sorghums is determined by measurement, 100 pounds shall be 2.25 cubic feet of grain sorghums testing 56 pounds per bushel. The quantity determined by measurement of grain sorghums having a test weight of less than 56 pounds per bushel shall be adjusted by applying the applicable percentage as shown in the following table:

For grain sorghums testing:	Percent
56 pounds or over	100
55 pounds or over, but less than 56 pounds	98
54 pounds or over, but less than 55 pounds	96
53 pounds or over, but less than 54 pounds	95
52 pounds or over, but less than 53 pounds	93
51 pounds or over, but less than 52 pounds	91
50 pounds or over, but less than 51 pounds	89
49 pounds or over, but less than 50 pounds	87

(d) The percentage of dockage shall be determined and the weight of such dockage shall be deducted from the gross weight of the grain sorghums in determinng the net quantity available for loan or purchase.

§ 421.431 *Determination of quality.* The class, subclass, grade, grading factors, and all other quality factors shall be determined in accordance with the methods set forth in the Official Grain Standards of the United States for Grain Sorghums, whether or not such determinations are made on the basis of an official inspection.

§ 421.432 *Maturity of loans.* Loans mature on demand but not later than March 31, 1955.

§ 421.433 *Support rates.* Basic support rates for grain sorghums placed under loan or delivered under a purchase agreement will be as set forth in this section.

(a) *Basic support rates at designated terminal markets.* (1) Basic support rates per 100 pounds for grain sorghums of the Classes I to IV inclusive, grading No. 2 or better, and containing not in excess of 13 percent moisture, stored in approved warehouses at the terminal markets listed below are as follows:

Terminal market:	Rate per 100 pounds
Omaha, Nebr.	$2.68
Sioux City, Iowa	2.68
Kansas City, Mo.	2.75
Galveston, Tex.	2.88
Houston, Tex.	2.88
New Orleans, La.	2.88
Memphis, Tenn.	2.98
Los Angeles, Calif.	3.14
San Francisco, Calif.	3.14
St. Louis, Mo.	2.93
Corpus Christi, Tex.	2.88

(2) Grain sorghums eligible for loan or purchase at the support rates shown in the above schedule must have been shipped on a domestic interstate freight rate basis. On any grain sorghums shipped at other than the domestic interstate freight rate, the support rate at the designated terminal market shall be reduced by the difference between the rate of the freight paid (plus tax) and the domestic interstate freight rate (plus tax).

(3) The support rates established for designated terminal markets apply to grain sorghums which have been shipped by rail or water from a country shipping point to one of the designated terminal markets, as evidenced by paid freight bills duly registered for transit privileges: *Provided*, That in the event the amount of paid in freight is insufficient to guarantee the minimum proportional domestic interstate freight rate from the terminal market, there shall be deducted from the applicable terminal support rate the difference between the amount of freight actually paid in and the amount required to be paid in to guarantee outbound movement at the minimum proportional domestic interstate freight rate.

(4) When shipped by rail or water and stored at any designated terminal market, grain sorghums for which neither registered freight bills nor registered freight certificates are presented to guarantee outbound movement at the minimum proportional domestic interstate freight rate, shall have a support rate equal to the terminal rate minus 14 cents per 100 pounds.

(5) For grain sorghums received by truck and stored at any designated terminal market, the support rate shall be determined by making a deduction from the terminal rate as follows:

Terminal market:	Amount of deduction (cents per 100 pounds)
Los Angeles, Calif., San Francisco, Calif.	22
Omaha, Nebr., Sioux City, Iowa, Kansas City, Mo., St. Louis, Mo.	23
Corpus Christi, Tex., Galveston, Tex., Houston, Tex., New Orleans, La., Memphis, Tenn.	25

(b) *Support rates for grain sorghums in approved warehouse storage at other than designated terminal markets.* (1) The support rates for grain sorghums stored in approved warehouses (other than those situated in the designated terminal markets) which are shipped by rail or water, shall be determined by deducting from the appropriate designated terminal market rate an amount equal to the transit balance, if any (plus tax) of the through-freight rate from point of origin for such grain sorghums to such terminal market: *Provided*, That on any grain sorghums shipped at other than the domestic interstate freight rate, the support rate shall be further reduced by the difference between the rate of freight paid (plus tax) and the domestic interstate freight rate (plus tax) from the point of origin of such grain sorghums to the point of storage: *And provided further*, That in the case of grain sorghums stored at any railroad transit point taking a penalty by reason of out-of-line movement, or for any other reason to the appropriate designated market, there shall be added to such transit balance an amount equal to any out-of-line costs or other costs incurred in storing grain sorghums in such position.

(2) The warehouse receipts must be accompanied by the original paid freight bills or certificates of the warehouseman and other required documents as set forth in § 421.429.

(c) *Basic county support rates.* (1) The following basic county support rates are established per 100 pounds of grain sorghums of the Classes I to IV, inclusive, grading No. 2 or better and containing not in excess of 13 percent moisture. Both farm-storage and country warehouse-storage loans will be based on the support rate established for the county in which the grain sorghums are stored. If two or more warehouses are located in the same or adjoining towns, villages, or cities having the same domestic interstate freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point, and the same support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved. Support rates per 100 pounds for grain sorghums are set forth below:

ALABAMA

County	Rate per cwt.
All counties	$2.40

ARIZONA

County	Rate per cwt.	County	Rate per cwt.

WYOMING

All counties	$2.20

(2) Where the State committee determines that State or district weed control laws affect the grain sorghums crop the support rate will be 15 cents per cwt. below the applicable county support rate set forth in the schedule in subparagraph (1) of this paragraph. If upon delivery of the grain sorphums to CCC, the producer supplies a certificate indicating that the grain sorghums comply with the weed control laws, the producer will be credited with the amount of the differential in determining the settlement value.

(d) *Discounts.* (1) The discount for grain sorghums which grade No. 3 and contain not in excess of 13 percent moisture shall be 8 cents per 100 pounds; and for grain sorghums which grade No. 4 and contain not in excess of 13 percent moisture, 16 cents per 100 pounds.

(2) Grain sorghums which grade "smutty" shall be discounted 5 cents per 100 pounds.

(3) The support rates for mixed grain sorghums (Class V) shall be 3 cents per 100 pounds less than the support rates for grain sorghums of the classes I to IV inclusive.

(4) The discounts in this paragraph shall be cumulative.

§ 421.434 *Warehouse charges.* (a) Warehouse receipts and the grain sorghums represented thereby stored in approved warehouses operating under the Uniform Grain Storage Agreement may be subject to liens for warehouse handling and storage charges at not to exceed the Uniform Grain Storage Agreement rates from the date the grain is deposited in the warehouse for storage. Where the date of deposit (the date of the warehouse receipt if the date of deposit is not shown) on warehouse receipts representing grain sorghum stored in warehouses operating under the Uniform Grain Storage Agreement is on or before March 31, 1955, there shall be deducted in computing the amount of the loan or purchase price the storage charges as determined in accordance with the table of deductions for warehouse charges to be issued at a later date, unless written evidence is submitted with the warehouse receipt that all warehouse charges, except receiving and loading out charges have been prepaid through March 31, 1955.

(b) Warehouse receipts and the grain sorghums represented thereby stored in approved warehouses operated by Eastern common carriers may be subject to liens for warehouse elevation (receiving and delivering) and storage charges from the date of deposit at rates approved by the Interstate Commerce Commission. There shall be deducted in computing the loan or purchase price the amount of the approved tariff rate for storage (not including elevation), which will accumulate from the date of deposit through March 31, 1955 unless written evidence is submitted with the warehouse receipt that the storage charges have been prepaid. The county committee shall request the CSS commodity office to determine the amount of such charges.

§ 421.435 *Settlement.*—(a) *Settlement value.* (1) (i) In the case of eligible grain sorghums delivered to CCC from farm-storage under the loan program, settlement shall be made at the applicable support rate determined in accordance with §§ 421.433 and 421.418 (e). The support rate shall be for the grade and quality of the total quantity of grain sorghums eligible for delivery.

(ii) If, upon delivery, the grain sorghums under farm-storage loan are of a grade and/or quality for which no support rate has been established, the settlement value shall be computed at the support rate established for the grade and/or quality of the grain sorghums placed under loan, less the difference, if any, at the time of delivery, between the market price for the grade and/or quality placed under loan and the market price of the grain sorghums delivered, as determined by CCC: *Provided, however,* That if such grain sorghums are sold by CCC in order to determine their market price the settlement value shall not be less than such sales price.

(2) In the case of eligible grain sorghums delivered to CCC under purchase agreement, settlement shall be made at the applicable support rate determined in accordance with §§ 421.433 and 421.418 (e).

(b) *Storage deduction for early delivery.* Whenever farm-stored grain sorghums under loan or purchase agreement are delivered to CCC prior to March 31, 1955, a deduction for storage shall be made in accordance with the schedule of deductions for warehouse charges (§ 421.434), except that no such deduction shall be made if such early delivery is made because the loan is called solely for the convenience of CCC, or if it is determined by CCC at the time of delivery that the grain sorghums will be sold rather than stored, or if CCC requires early delivery on an area basis.

(c) *Refund of prepaid handling charge.* In case a warehouseman charges the producer for the receiving or the receiving and loading out charges on grain sorghums under loan or purchase agreement (or charges for elevation in the case of warehouses operated by Eastern common carriers), the producer shall, upon delivery of the grain sorghums to CCC, be reimbursed or given credit by the county office for such prepaid charges in an amount not to exceed the charges authorized under the Uniform Grain Storage Agreement (or approved tariff in the case of warehouses operated by Eastern common carriers) provided, the producer furnishes to the county committee written evidence signed by the warehouseman that such charges have been paid.

(d) *Track-loading.* A track-loading payment of 6 cents per 100 pounds will be made to the producer on grain sorghums delivered to CCC on track at a country point.

Issued this 7th day of April 1954.

[SEAL] J. A. McCONNELL,
Executive Vice President,
Commodity Credit Corporation.

[F. R. Doc. 54-2740; Filed, Apr. 12, 1954; 8:52 a. m.]

PART 464—TOBACCO

SUBPART—1953 TOBACCO LOAN PROGRAM

Set forth below are schedules of advance rates, by grades, for the 1953 crop of types 32 and 32b, Maryland tobacco, under the 1953 Tobacco Loan Program published May 14, 1953 (18 F. R. 2779).

§ 464.535 *1953 crop; Maryland Tobacco, Type 32, advance schedule.*[1]

TITLE 29—LABOR

Chapter X—National Mediation Board

PART 1206—HANDLING OF REPRESENTATION DISPUTES UNDER RAILWAY LABOR ACT

TIME LIMITS ON APPLICATIONS

Due notice having been given and hearing having been held, the National Mediation Board, by virtue of the authority vested in it by section 2, Ninth, of the Railway Labor Act (44 Stat. 577, 48 Stat. 1185 U. S. C. paragraph 151 et seq.) hereby issues the following rule which it finds necessary to carry out the provisions of said act in place of and instead of Rule 4 (§ 1206.4) of the existing rules and regulations issued May 1, 1947:

§ 1206.4 *Time limit on applications.* (a) The National Mediation Board will not commence the investigation of a representation dispute for a period of two (2) years from the date of a certification hereafter issued covering the same craft or class of employees on the same carrier in which a representative was certified, except in unusual or extraordinary circumstances.

(b) Except in unusual or extraordinary circumstances, the National Mediation Board will not accept for investigation under section 2, Ninth, of the Railway Labor Act an application for its services covering a craft or class of employees on a carrier for a period of one (1) year after the date on which:

(1) An election among the same craft or class on the same carrier has been conducted and no certification was issued account less than a majority of eligible voters participated in the election; or

(2) A docketed representation dispute among the same craft or class on the same carrier has been dismissed by the Board account no dispute existed as defined in § 1206.2 (Rule 2); or

(3) The applicant has withdrawn an application covering the same craft or class on the same carrier which has been formally docketed for investigation.

(44 Stat. 577, as amended; 49 U. S. C. 151–163)

Rule 4 (B) (§ 1206.4 (b)) will not apply to employees of a craft or class who are not represented for purposes of collective bargaining.

Said rules and regulations shall become effective from the date hereof and upon publication thereof in the FEDERAL REGISTER.

By order of the National Mediation Board at Washington, D. C., this 13th day of April 1954.

E. C. THOMPSON,
Secretary.

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 77]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

PROCEDURE ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The low frequency range procedures prescribed in § 609.9 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility, class and identification; procedure No.; effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound), altitudes; limiting distances	Minimum altitude over facility on final approach course (ft.)	Course and distance, facility to airport	Ceiling and visibility minimums: Condition	Type aircraft: 75 m. p. h. or less	Type aircraft: More than 75 m. p. h.	If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished
1	2	3	4	5	6	7	8	9	10	11
KANSAS CITY, KANS. Fairfax, 746' SBRAZ-VDTX-MKC Procedure No. 1 April 5, 1954	Kansas City VOR	184—8.0	2,400	E side NW course: 328° outbound. 148° inbound. 2,400' within 10 miles. 5. The ground controlled approach procedures prescribed in § 609.13 are amended to read in part:

GCA STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
If a GCA instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below. Positive identification must be established with the ground controller. From initial contact with GCA to final authorized landing minimums, the instructions of the GCA controller are mandatory except when (A) visual reference with ground is established on final approach at or before descent to the authorized landing minimums, or (B) at pilot's discretion if it appears desirable to discontinue the approach.

City and State; airport name, elevation; effective date	Radar terminal area: maneuvering altitudes by sectors and limiting distances	Ceiling and visibility minimums: Runway No.	Condition	Precision approach (PAR): 75 m. p. h. or less	Precision approach (PAR): More than 75 m. p. h.	Surveillance approach (ASR): 75 m. p. h. or less	Surveillance approach (ASR): More than 75 m. p. h.	Except when the ground controller may direct otherwise prior to final approach, a missed approach procedure shall be executed as provided below when (a) communication on final approach is lost for more than 5 seconds; (b) directed by ground controller; (c) visual reference is not established upon descent to the authorized landing minimums; or (d) landing is not accomplished

TITLE 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 962—FRESH PEACHES GROWN IN GEORGIA

ORDER AMENDING ORDER, AS AMENDED, REGULATING HANDLING

§ 962.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations made in connection with the issuance of this order and each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure effective thereunder (7 CFR Part 900), a public hearing was held on December 17, 1953, at Macon, Georgia, upon a proposed amendment to Marketing Agreement No. 99, as amended, and Order No. 62, as amended (7 CFR 962), regulating the handling of fresh peaches grown in Georgia. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The said order, as amended, and as hereby further amended, regulates the handling of fresh peaches grown in Georgia in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity, specified in the marketing agreement upon which hearings have been held;

(3) The said order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area that is practicable, consistently with carrying out the declared policy of the act; and the issuance of

several orders applicable to subdivisions of such production area would not effectively carry out the declared policy of the act; and

(4) The said order, as amended, and as hereby further amended, prescribes such different terms applicable to different marketing areas, as are necessary to give due recognition to such differences in the marketing of such peaches.

(b) *Determinations.* It is hereby determined that:

(1) The agreement amending the marketing agreement, as amended, regulating the handling of fresh peaches grown in Georgia, upon which the aforesaid public hearing was held, has been signed by handlers (excluding cooperative associations of producers who were not engaged in processing, distributing, or shipping the peaches covered by this order) who, during the calendar year 1953, handled not less than 50 percent of the volume of peaches covered by said order as hereby amended;

(2) The aforesaid agreement, amending the said marketing agreement, as amended, has been executed by handlers who were signatory parties to said marketing agreement and who during the determined representative period (the calendar year 1953) shipped not less than 50 percent of the peaches grown in Georgia, shipped by all signatory handlers to said marketing agreement during such representative period;

(3) The issuance of this order, amending the aforesaid order, as amended, is favored or approved by at least two-thirds of the producers who participated in a referendum on the question of its approval and who, during the aforesaid representative period have been engaged, within the State of Georgia, in the production of peaches for market; and

(4) The issuance of this order, amending the aforesaid order, as amended, is favored or approved by producers who, during said representative period, have produced for market at least two-thirds of the volume of such peaches produced for market within the State of Georgia.

It is therefore ordered, That, on and after the effective date hereof, the handling of fresh peaches grown in Georgia shall be in conformity to, and in compliance with, the terms and conditions of the aforesaid order, as amended, and as hereby further amended as follows:

1. Delete the proviso in the first sentence of § 962.41 and insert in lieu thereof the following: "*Provided*, That no assessment shall be levied against peaches that are exempt from regulation pursuant to § 962.71 or against peaches that are exempt from inspection pursuant to § 962.64."

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. [illegible])

Issued at Washington, D. C., this 8th day of April 1954, to become effective 30 days after publication in the FEDERAL REGISTER.

[SEAL] JOHN H. DAVIS,
Assistant Secretary.

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

Subchapter C—Carriers by Water

PART 301—REPORTS

ANNUAL REPORT FORM PRESCRIBED FOR MARITIME CARRIERS

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 2d day of April A. D. 1954.

The matter of Annual Reports from Carriers by Water being under consideration, and it appearing that the changes in existing regulations to be effectuated by this order are only minor changes with respect to the data to be furnished and that public rule-making procedures are unnecessary;

It is ordered, That the order dated February 13, 1953 (17 F. R. 1475), in the matter of Annual Reports from Carriers by Water (49 CFR 301.20) be, and it is hereby modified with respect to annual reports for the year ended December 31, 1953, and subsequent years, as follows:

§ 301.20 *Annual report form prescribed for Maritime Carriers.* Each Maritime Carrier subject to the provisions of section 313, Part III of the Interstate Commerce Act, is hereby required to file annual reports for the year ended December 31, 1953, and for each succeeding year until further order, in accordance with Annual Report Form M, which is hereby approved and made a part of this section.[1] The annual report shall be filed, in duplicate, in the Bureau of Transport Economics and Statistics, Interstate Commerce Commission, Washington, D. C., on or before May 31 of the year following the one to which it relates.

(54 Stat. 933; 49 U. S. C. 904. Interprets or applies 54 Stat. 944; 49 U. S. C. 913)

NOTE: Budget Bureau No. 41-R1414.2.

By the Commission, Division 1.

[SEAL] GEORGE W. LAIRD,
Secretary.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 51]

UNITED STATES STANDARDS FOR RADISHES[1]

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the United States Department of Agriculture is considering the revision of United States Standards for Bunched Radishes pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953).

All persons who desire to submit written data, views or arguments for consideration in connection with the proposed standards should file the same with the Chief, Fresh Products Standardization and Inspection Branch, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, South Building, Washington 25, D. C., not later than 30 days after publication hereof in the FEDERAL REGISTER.

The proposed standards are as follows:

TITLE

51.2399 Unclassified.

APPLICATION OF TOLERANCES

51.2400 Application of tolerances.

STANDARD BUNCHING

Sec.
51.2401 Standard bunching.

SIZE TERMS

51.2402 Size terms.

DEFINITIONS

51.2403 Similar varietal characteristics.
51.2404 Clean.
51.2405 Well formed.
51.2406 Smooth.
51.2407 Firm.
51.2408 Tender.
51.2409 Damage.
51.2410 Fresh.
51.2411 Diameter.

AUTHORITY: §§ 51.2395 to 51.2411 issued under sec. 205, 60 Stat. 1090, 7 U. S. C. 1624; Pub. Law 156, 83d Cong.

TITLE

§ 51.2395 *Bunched radishes.* "Bunched radishes" means radishes with full length tops which are tied in bunches.

[1] Filed as part of the original document.

[1] Packing of the product in conformity with the requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

§ 51.2396 *Topped radishes.* "Topped radishes" means radishes with the tops clipped back to not more than three-eighths inch in length.

GRADES

§ 51.2397 *U. S. No. 1.* U. S. No. 1 consists of radishes of similar varietal characteristics the roots of which are clean, well formed, smooth, firm, tender, and free from decay and which are free from damage caused by freezing, growth cracks or air cracks, cuts, pithiness, disease, insects, or mechanical or other means. Bunched radishes shall have tops which are fresh and free from decay and free from damage caused by freezing, seedstems, yellowing or other discoloration, disease, insects, or mechanical or other means.

(a) Unless otherwise specified, the diameter of each radish root shall be not less than five-eighths inch.

(b) In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) *For defects of roots.* 10 percent, by count, for radish roots in any lot which fail to meet the requirements of the grade, including therein not more than 1 percent for decay;

(2) *For defects of tops of bunched radishes.* 10 percent, by count, for bunches in any lot which fail to meet the requirements of the grade, including therein not more than 5 percent for decay;

(3) *For off-size roots.* 10 percent, by count, for radish roots in any lot which fail to meet the specified minimum diameter: *Provided*, That when the minimum and maximum diameters are both stated, and additional tolerance of 10 percent shall be allowed for radish roots which are larger than the maximum diameter specified; and,

(4) *For excess length of tops of topped radishes.* 5 percent, by count, for radishes in any lot with tops which are in excess of the maximum length specified under "Styles".

§ 51.2398 *U. S. Commercial.* U. S. Commercial consists of radishes which meet the requirements of U. S. No. 1 grade except for the increased tolerances specified in this section.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) *For defects of roots.* 20 percent, by count, for radish roots in any lot which fail to meet the requirements of the grade, including therein not more than 1 percent for decay;

(2) *For defects of tops of bunched radishes.* 10 percent, by count, for bunches in any lot which fail to meet the requirements of the grade, including therein not more than 5 percent for decay;

(3) *For off-size roots.* 10 percent, by count, for radish roots in any lot which fail to meet the specified minimum diameter: *Provided*, That when the minimum and maximum diameters are both stated, an additional tolerance of 10 percent shall be allowed for radish roots which are larger than the maximum diameter specified; and,

(4) *For excess length of tops of topped radishes.* 10 percent, by count, for radishes in any lot with tops which are in excess of the maximum length specified under "Styles".

UNCLASSIFIED

§ 51.2399 *Unclassified.* Unclassified consists of radishes which have not been classified in accordance with any of the forgoing grades. The term "unclassified" is not a grade within the meaning of these standards, but is provided as a designation to show that no grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.2400 *Application of tolerances.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade:

(1) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that when the package contains one pound or less, individual packages may contain not more than double the tolerance specified; and,

(2) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any package.

STANDARD BUNCHING

§ 51.2401 *Standard bunching.* (a) Standard bunches of radishes shall be fairly uniform in size and radishes in the individual bunches shall not vary more than one-half inch in diameter.

(b) Not more than 10 percent of the bunches in any lot may fail to meet the requirements for "Standard Bunching".

SIZE TERMS

§ 51.2402 *Size terms.* (a) The following terms are provided for describing the diameters of any lot of radishes:

(1) "Small" means less than three-fourths inch in diameter;

(2) "Medium" means three-fourths to 1 inch in diameter;

(3) "Large" means over 1 to 1¼ inches in diameter; and,

(4) "Very large" means over 1¼ inches in diameter.

DEFINITIONS

§ 51.2403 *Similar varietal characteristics.* "Similar varietal characteristics" means that the radishes in any container are similar in color and shape: for example, red varieties shall not be mixed with white varieties and globe-shaped varieties shall not be mixed with long-shaped varieties.

§ 51.2404 *Clean.* "Clean" means that the radishes are practically free from dirt or other foreign material.

§ 51.2405 *Well formed.* "Well formed" means that the radishes have the shape characteristic of the variety.

§ 51.2406 *Smooth.* "Smooth" means that the radish is not rough, or ridged to the extent that the appearance is materially affected.

§ 51.2407 *Firm.* "Firm" means that the radishes are crisp and not soft, flabby, or wilted.

§ 51.2408 *Tender.* "Tender" means that the radishes are not stringy or woody.

§ 51.2409 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the individual radish root or the general appearance of the radish roots in the container, or which materially affects the appearance or shipping quality of the tops of bunches in the container. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Growth cracks or air cracks when discolored or deep, or when more than three-eighths inch in length or the appearance is materially affected;

(b) Cuts when discolored, rough, or deep, or when the aggregate area exceeds the area of a circle three-eighths inch in diameter;

(c) Pithiness when the edible quality is materially affected by pith. Slight pithiness which does not materially affect the edible quality shall not be considered as damage;

(d) Insects or insect injury when the appearance of the root is materially affected, or when the injury penetrates into the flesh of the radish; or when the tops are affected to the extent that the appearance of the bunch is materially affected; and,

(e) Yellowing or other discoloration of the tops when the appearance of the bunch is materially affected. The appearance of bunches with tops having slight discoloration such as yellowing, browning, or other abnormal color affecting a few leaves shall not be considered materially affected if the tops as a whole show a predominantly normal green color.

§ 51.2410 *Fresh.* "Fresh" means that the radish tops have normal green color and are not badly wilted.

§ 51.2411 *Diameter.* "Diameter" means the greatest dimension of the root measured at right angles to a line running from the crown to the base of the root.

Dated: April 7, 1954.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator, Marketing Services.

[F. R. Doc. 54-2738; Filed, Apr. 12, 1954; 8:51 a. m.]

CIVIL AERONAUTICS BOARD

[14 CFR Part 41]

[Draft Release No. 54-10]

PILOT FLIGHT TIME LIMITATIONS

PAN AMERICAN-GRACE AIRWAYS, INC.

Pursuant to authority delegated by the Civil Aeronautics Board to the Bureau of Safety Regulation, notice is

hereby given that the Bureau will propose to the Board a special regulation which would continue the waiver of the requirements of § 41.54 of Part 41 of the Civil Air Regulations as applied to Pan American-Grace Airways Inc. (Panagra) flights from Santa Cruz, Bolivia, to Puerto Suarez, Bolivia, and return.

Interested persons may participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their consideration by the Board before taking further action on the proposed rule, communications must be received by May 10, 1954. Copies of such communications will be available after May 12, 1954 for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

Section 41.54 (a) of Part 41 of the Civil Air Regulations currently provides that in aircraft having a crew of one or two pilots a pilot may be scheduled to fly 8 hours or less during any 24 consecutive hours without a rest period; that if he is scheduled to fly in excess of 8 hours during any 24 consecutive hours, he must be given an intervening rest period at or before the termination of 8 scheduled hours of flight duty; and that this rest period must equal at least twice the number of hours flown since the last preceding rest period, and in no case will such rest period be less than 8 hours. Section 41.54 (b) currently provides that when a pilot has flown in excess of 8 hours during any 24 consecutive hours he must receive at least 18 hours of rest before being assigned any duty with the air carrier.

Panagra schedules a one-day flight from Santa Cruz to Puerto Suarez and return, which is the last leg of scheduled operations connecting, among others, the cities of La Paz, Bolivia, and Lima, Peru. These flights are made under the flight time limitations of § 41.54.

It appears desirable to overnight crew members at Santa Cruz, Bolivia, because of the more satisfactory accommodations at that location. Other points along the route which would be available are at unusually high elevations at which proper accommodations, including wholesome food and water, and facilities for recreation are generally unavailable. However, if crew members remain overnight at Santa Cruz, Bolivia, the present regulation requires rest periods which interfere with advantageous scheduling of flights departing from Santa Cruz. If the departure time of the Santa Cruz—Puerto Suarez—Santa Cruz flight is changed to a later time to allow the rest period required by the regulation, it would bring the flight back to Santa Cruz only 40 minutes before sunset in the short season. Since airports along this route are not regularly lighted for night operation this is considered an inadequate margin for safety. To advance the departure time of the flight from Lima is considered undesirable for it would in effect deprive the public en route to Bolivia of the one-day connecting service from the United States. It further appears that the trips on the route segment to and from Lima, Santa Cruz, and Puerto Suarez are generally conducted under VFR conditions and light airway traffic so that there is less strain on the pilots than usually occurs under IFR conditions and the attendant holding procedures. In addition, the facilities for the housing of crew members at Santa Cruz are located at the airport so that a pilot need not spend appreciable time in travel between the airport and the rest facilities.

Because of this, Special Civil Air Regulation No. SR–394 was adopted on May 25, 1953, permitting a waiver of § 41.54 as applied to these flights for one year. Since the conditions leading to the promulgation of SR–394 still exist and since there have been no complaints of abuse under this regulation, it is proposed that the provisions of SR–394 be extended for three years. At that time, this matter will be reviewed.

In view of the foregoing, it is proposed to promulgate a Special Civil Air Regulation to read as follows:

Contrary provision of § 41.54 of Part 41 of the Civil Air Regulations notwithstanding, Pan American-Grace Airways, Inc., is authorized to utilize pilots to fly on the overall flight from Lima, Peru-Santa Cruz, Bolivia-Puerto Suarez, Bolivia, and return with a minimum of 12 hours actual rest at Santa Cruz after the Lima-Santa Cruz leg of the flight and with a minimum of 12 hours actual rest at Santa Cruz after the Puerto Suarez-Santa Cruz leg of the flight.

It is proposed that this regulation shall be effective for a period of three years providing that there is no major change in the conditions under which the regulation is adopted.

This regulation is proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended. The proposal may be changed in the light of comments received in response to this notice of proposed rule making.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601–610, 52 Stat. 1007–1012, as amended; 49 U. S. C. 551–560)

Dated: April 6, 1954, at Washington, D. C.

By the Bureau of Safety Regulation.

[SEAL] JOHN M. CHAMBERLAIN, *Director.*

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

An application, serial number Fairbanks 010134, for the withdrawal from all forms of appropriation under the public land laws, including the mining laws, but not the mineral-leasing law, the Alaska Grazing Act of March 4, 1927, or the Materials Act of July 31, 1947 of the lands described below was filed on March 20, 1953, by Bureau of Land Management.

The purposes of the proposed withdrawal: Forest management purposes.

For a period of 60 days from the date of publication of this notice, persons having cause to object to the proposed withdrawal may present their objections in writing to the Regional Administrator, Region VII, Bureau of Land Management, Department of the Interior at Box 480, Anchorage, Alaska. In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where proponents of the order can explain its purpose.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER either in the form of a public land order or in the form of a notice of determination if the application is rejected. In either case, a separate notice will be sent to each interested party of record.

The lands involved in the application are:

FAIRBANKS MERIDIAN, ALASKA

T. 1 S., R. 3 W.,
Section 32, S½, unsurveyed.
Sections 33 to 36, inclusive, unsurveyed.
T. 2 S., R. 3 W.,
Sections 1 to 11, inclusive, unsurveyed.
Sections 17 to 19, inclusive, unsurveyed.
Sections 12 to 16, inclusive, 20, 21, 29, 30, 31, surveyed (those portions north of right limit of Tanana River).
T. 2 S., R. 4 W.,
Sections 1 to 4, inclusive, unsurveyed.
Sections 9 to 16, inclusive, unsurveyed.
Sections 21 to 28, inclusive, unsurveyed.
Sections 33 to 35, inclusive, unsurveyed.
Section 36, unsurveyed (that portion north of right limit of Tanana River).
T. 3 S., R. 4 W.,
Section 4, surveyed.
Section 9, all (partially surveyed).
Sections 2, 3, 10, 16, unsurveyed (those portions lying north of right limit of Tanana River).

The area described aggregates approximately 31,870 acres.

The northeast corner of unsurveyed Section 1, T. 2 S., R. 3 W., lies at Latitude 64°46'36" North, Longitude 148°03'00" West.

ALASKA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

APRIL 5, 1954.

An application, serial number Anchorage 026117, for the withdrawal from all forms of appropriation under the public land laws, of the lands described below was filed on February 1, 1954, by Civil Aeronautics Administration, Department of Commerce.

The purposes of the proposed withdrawal: Enlarging A. N. S. withdrawal No. 156 for maintenance of a SBRA–Z radio range facility.

For a period of 30 days from the date of publication of this notice, persons having cause to object to the proposed withdrawal may present their objections in writing to the Regional Administrator, Region VII, Bureau of Land Management, Department of the Interior at Box 480, Anchorage, Alaska. In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where proponents of the order can explain its purpose.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER, either in the form of a public land order or in the form of a notice of determination if the application is rejected. In either case, a separate notice will be sent to each interested party of record.

The lands involved in the application are:

S½, NE¼, Sec. 21, T. 6 N., R. 11 W., S. M., near Kenai, Alaska.

LOWELL M. PUCKETT, *Regional Administrator.*

DEPARTMENT OF LABOR

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214) and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners, and learning period for certificates issued under the general learner regulations (§§ 522.1 to 522.14) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Single Pants, Shirts and Allied Garments, Women's Apparel, Sportswear and Other Odd Outerwear, Rainwear, Robes and Leather and Sheep-Lined Garments Divisions of the Apparel Industry Learner Regulations (29 CFR 522.160 to 522.168, as amended June 2, 1952, 17 F. R. 3818).

Ashland Crafts, Inc., Eighteenth Street and Carter Avenue, Ashland, Ky., effective 4–1–54 to 9–30–54; 10 learners for expansion purposes (children's dresses).

Bastian Sportswear, Inc., Bastian, Va., effective 3–31–54 to 3–30–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (children's and infants' sportswear).

Elder Manufacturing Co., McLeansboro, Ill., effective 4–16–54 to 4–15–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' dress shirts).

Greenway Manufacturing Co., Waynesburg, Pa., effective 4–4–54 to 4–3–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (boys' and infants' polo shirts).

The Hercules Trouser Co., Wellston, Ohio, effective 4–1–54 to 3–31–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' single pants).

The Hercules Trouser Co., Hillsboro, Ohio, effective 4–1–54 to 3–31–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' single pants).

The Hercules Trouser Co., Jackson, Ohio, effective 4–10–54 to 4–9–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' single pants).

Hurlock Garment Co., Inc., Hurlock, Md., effective 3–30–54 to 3–29–55; 10 learners for normal labor turnover purposes (blouses).

Irwin Manufacturing Co., New Albany, Miss., effective 4–10–54 to 4–9–55; 10 percent of the total number of production workers for normal labor turnover purposes (men's and boys' sport shirts).

Joan-Claire Fashions, Benton, Ill., effective 3–29–54 to 9–28–54; 50 learners for plant expansion purposes (dresses).

Katz Underwear Co., Sixth Street and Sunrise Avenue Plants, Honesdale, Pa., effective 4–1–54 to 3–31–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (women's and misses' nightgowns, pajamas, and slips).

Kordeen Manufacturing Co., Inc., 420 East German Street, Herkimer, N. Y., effective 4–2–54 to 4–1–55; 10 percent of the total number of factory production workers for normal labor turnover purposes. Learners are not authorized to be employed at subminimum wage rates in the production of women's and children's skirts and jumpers (women's and children's blouses, shorts, etc.).

Lee Champion Garment Co., Inc., 902 Lagarde Avenue, Anniston, Ala., effective 4–1–54 to 3–31–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (trousers).

Linwood Mills, Inc., LaFayette, Ga., effective 4–2–54 to 4–1–55; 10 percent of the total numbers of factory production workers for normal labor turnover purposes (sport shirts).

Mantachie Manufacturing Co., Inc., Mantachie, Miss., effective 4–5–54 to 4–4–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (sport shirts).

Pittston Frocks, 135 South Main Street, Pittston, Pa., effective 4–2–54 to 4–1–55; 5 learners for normal labor turnover purposes (dresses).

Primo Pants Co., Versailles, Mo., effective 4–5–54 to 4–4–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' pants).

Puritan Foundations, Portage, Pa., effective 3–30–54 to 3–29–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (brassieres).

Renovo Shirt Co., Inc., Mena, Ark., effective 3–30–54 to 7–18–54; 100 additional learners for expansion purposes (men's and boys' sport shirts).

Seiro Manufacturing Co., Rear 115 Race Street, Cambridge, Md., effective 3–29–54 to 3–28–55; 10 learners for normal labor turnover purposes (blouses).

Shriner Manufacturing Co., Woodsboro, Md., effective 4–5–54 to 4–4–55; 10 learners for normal labor turnover purposes (men's pants).

Southern Manufacturing Co., Plant No. 2, 1202 Broadway, Nashville, Tenn., effective 4–11–54 to 4–10–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' sport shirts).

K. W. Pollock, d. b. a., Tompkinsville Garment Co., Tompkinsville, Ky., effective 4–13–54 to 4–12–55; 10 learners for normal labor turnover purposes (dungarees).

Tru-fit Trousers, Traverse City, Mich., effective 4–5–54 to 4–4–55; 10 learners for normal labor turnover purposes (single pants).

Vernon Manufacturing Co., Inc., Vernon, Tex., effective 4–10–54 to 4–9–55; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' trousers).

The Watson Shirt Co., The Watson Laundry Co., 334 Barclay Street, Salisbury, Md.,

effective 4-17-54 to 4-1655; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' dress shirts).

Hosiery Industry Learner Regulations (29 CFR 522.40 to 522.51, as amended November 19, 1951, 16 F. R. 10733).

Rockwood Mills, Rockwood, Tenn., effective 4-12-54 to 4-11-55; 5 percent of the total number of factory production workers for normal labor turnover purposes.

Knitted Wear Industry Learner Regulations (29 CFR 522.68 to 522.79, as amended January 21, 1952, 16 F. R. 12866).

Holeproof Hosiery Co., Luxite Division, Milwaukee, Wis., effective 4-7-54 to 4-6-55; 5 percent of the total number of factory production workers for normal labor turnover purposes (women's underwear and sleepwear).

Wonderknit Corp., 120 West Grayson Street, Galax, Va., effective 12-28-53 to 6-27-54; 50 learners for expansion purposes (knit sport and polo shirts) (replacement certificate).

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.14).

Texans, Inc., Bangs, Tex., effective 4-1-54 to 9-30-54; 5 learners for normal labor turnover purposes; finisher, decorator; each 240 hours at 65 cents per hour. (ceramic lamp bases and novelties).

The following special learner certificate was issued in Puerto Rico to the company hereinafter named. The effective and expiration dates, the number of learners, the learner occupations, the length of the learning period and the learner wage rates are indicated, respectively.

Fonda Gage (Puerto Rico), Inc., Ponce, P. R., effective 4-1-54 to 9-30-54; 41 learners, grinding, beveling and sanding, heat treating, rough lapping, finish lapping, etching, inspecting, millers, universal grinders; each 320 hours at 40 cents an hour, 320 hours at 45 cents an hour, 320 hours at 50 cents an hour; drill press operators, 320 hours at 45 cents an hour (steel and carbide gage blocks industry).

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be cancelled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER, pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 5th day of April 1954.

MILTON BROOKE,
Authorized Representative of the Administrator.

[Public Notice PN7]

ADMINISTRATOR OF CIVIL AERONAUTICS

DELEGATION OF CERTAIN ACCIDENT INVESTIGATION FUNCTIONS

Acting pursuant to the authority vested in it by section 601 (c) of the Civil Aeronautics Act of 1938, as amended (52 Stat. 1007; 49 U. S. C. 551), the Civil Aeronautics Board hereby amends the delegation made to the Administrator of Civil Aeronautics (18 F. R. 7499) in connection with its accident investigation functions under section 702 of the Civil Aeronautics Act of 1938, as amended (52 Stat. 1013; 49 U. S. C. 582) to read as follows:

1. Subject to the terms, conditions, and limitations set forth below, the Board hereby delegates to the Administrator the authority contained in section 702 (a) (2) and section 702 (a) (4) of the Civil Aeronautics Act of 1938, as amended, with respect to all accidents involving fixed wing aircraft to which Part 62 of the Civil Air Regulations is applicable and which do not involve an aircraft in excess of a certificated maximum take-off weight of 12,500 pounds: *Provided, however*, That the delegation of authority herein shall not apply to any accident involving an aircraft operated by any air carrier authorized by certificate of public convenience and necessity to engage in air transportation in Alaska.

2. The Board hereby further delegates to the Administrator the authority contained in section 702 (c) of the act for all purposes directly connected with the investigation of aircraft accidents by the Administrator pursuant to paragraph 1 hereof: *Provided, however*, That nothing herein contained shall be construed as authorizing the Administrator to hold public hearings in connection with the performance of the function of investigation of aircraft accidents herein delegated to the Administrator.

3. If at any time the Board shall determine either upon request of the Administrator, request of any person having any substantial interest therein, or upon its own initiative that the circumstances of a particular accident being investigated by the Administrator pursuant to the delegation of authority herein are such as to indicate that a public hearing thereon may be desirable in the public interest, the Board will so notify the Administrator. Upon such notification the delegation of authority to the Administrator herein shall terminate as to that particular accident and such accident shall thereafter be investigated and the probable causes thereof be determined in the same manner as accidents not covered by this delegation of authority.

4. Reports on the accidents investigated by the Administrator pursuant to the delegation herein, including reports on the probable causes thereof, may be prepared in such form and manner and made public by such means as the Administrator may determine to be necessary to carry out the purposes and objectives of Title VII of the Civil Aeronautics Act of 1938, as amended. A copy of each such report, if any, whether or not made public by the Administrator, shall be transmitted to the Board.

5. For each such accident, or class of accident, investigated by the Administrator pursuant to the delegation herein as may be agreed upon from time to time, the Administrator shall transmit to the Board for its use an analysis thereof, including a determination of the probable cause, in a form acceptable to the Board.

6. The delegation of authority set forth herein shall become effective with respect to accidents occurring after midnight December 31, 1953, local time, and shall remain effective until otherwise ordered by the Board.

By the Civil Aeronautics Board.[1]

[SEAL] M. C. MULLIGAN,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3202]

CAPE & VINEYARD ELECTRIC CO. ET AL.

ORDER AUTHORIZING PROPOSED BANK BORROWINGS

APRIL 7, 1954.

In the matter of Cape & Vineyard Electric Company, New Bedford Gas and Edison Light Company, New Hampshire Electric Company, Plymouth County Electric Company; File No. 70-3202.

Cape & Vineyard Electric Company ("Cape"), New Bedford Gas and Edison Light Company ("New Bedford"), New Hampshire Electric Company ("New Hampshire"), and Plymouth County Electric Company ("Plymouth"), public-utility subsidiaries of New England Gas and Electric Association, a registered holding company, having filed a joint application pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935 ("act") with respect to the following proposed transactions:

Applicants propose to borrow, on notes payable to The First National Bank of Boston, funds not exceeding the aggregate amounts set forth below:

Cape	$2,700,000
New Bedford	2,500,000
Plymouth	1,200,000
New Hampshire	500,000

Cape, New Bedford and Plymouth propose to borrow funds from time to time prior to December 31, 1955, evidenced by notes maturing more than one year after date thereof but not later than December 31, 1957, bearing interest at the prime Boston rate for commercial paper plus ½ of 1 percent, with a maximum of 3¾ percent and a minimum of 3¼ percent, such interest rate to be adjusted every 90 days for any change in the existing prime rate within said maximum and minimum limits. The proceeds of the borrowings are to be used: (1) To repay notes of the several companies, in the aggregate principal amount of $1,850,000, payable to said bank on December 31, 1954, and executed for the purpose of temporarily financing additions to property, plant and equipment; and (2) to apply the balance ($1,950,000 for Cape, $1,650,000 for New Bedford, $950,000 for Plymouth) to reimburse in whole or in part, the plant replacement funds of the several companies for expenditures made therefrom to finance extensions, additions and improvements for property, plant and equipment, and (as respects Cape and Plymouth) to finance temporarily their respective construction programs.

The Department of Public Utilities of Massachusetts, the regulatory commission of the State in which Cape, New Bedford and Plymouth are organized and doing business, has expressly authorized their respective borrowings as aforesaid.

New Hampshire proposes to borrow funds from time to time prior to December 31, 1954, evidenced by notes maturing more than one year after date thereof but not later than December 31, 1956, bearing interest at the prime Boston rate for commercial paper plus ¼ of 1 percent, with a maximum of 3½ percent and a minimum of 3 percent, such interest rate to be adjusted every 90 days for any change in the existing prime rate within said maximum and minimum limits. The proceeds of the borrowing are to be used to reimburse, in part, the company's treasury for costs already incurred for capital expenditures.

The Public Utilities Commission of the State of New Hampshire, the regulatory commission of the State in which New Hampshire is organized and doing business, has expressly authorized the company's borrowing as aforesaid.

Applicants estimate that their expenses to be incurred in connection with said borrowings will not exceed $800 each for Cape, New Bedford and Plymouth, and $900 for New Hampshire.

Applicants request that the Commission's order herein be made effective upon issuance.

Due notice having been given of the filing of said application, and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the Act and Rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and in the interest of investors and consumers that said application should be granted, effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that said application be, and it hereby is, granted, effective forthwith, subject to

[1] Member Adams dissents from this action.

the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3219]

OHIO POWER CO. AND AMERICAN GAS AND ELECTRIC CO.

ORDER REGARDING APPLICATION-DECLARATION TO SELL FIRST MORTGAGE BONDS AND PREFERRED STOCK AT COMPETITIVE BIDDING AND COMMON STOCK TO BE ACQUIRED BY [illegible]

APRIL 6, 1954.

An application-declaration having been filed with this Commission by American Gas and Electric Company ("American Gas"), a registered holding company, and its public-utility subsidiary The Ohio Power Company ("Ohio") pursuant to sections 6 (b), 10 and 12 (c) of the Public Utility Holding Company Act of 1935 ("act") and Rules U-42 and U-50 of the Commission's general rules and regulations promulgated thereunder regarding proposed transactions, which are summarized as follows:

Ohio proposes to issue and sell $20,000,000 aggregate principal amount of its First Mortgage Bonds, __ Percent Series due 1984. Such Bonds will be sold under competitive bidding pursuant to Rule U-50. The coupon rate (which shall be expressed in a multiple of ⅛ of 1 percent) and the price to be paid to Ohio, which shall be not less than 100 percent or more than 102¾ percent of the principal amount of the bonds proposed to be sold, will be determined by competitive bidding.

Ohio proposes to issue and sell 50,000 shares of a new series of its cumulative preferred stock, par value $100 per share (such class being hereinafter referred to as the "Preferred Stock" and such series being hereinafter referred to as the "__ Percent Preferred Stock"). Such shares of the __ Percent Preferred Stock will be sold under competitive bidding pursuant to Rule U-50. The dividend rate (which shall be expressed in a multiple of .04 of 1 percent) and the price to be paid to Ohio, which shall be not less than $100 per share or more than $102.75 per share, will be determined by competitive bidding.

Ohio proposes to issue and sell, prior to or concurrently with the sale of the Bonds and the __ Percent Preferred Stock, 50,000 shares of its Common Stock, no par value, to American Gas for $1,000,000 cash.

The proceeds of the sales of the First Mortgage Bonds, the __ Percent Preferred Stock and Common Stock described above are to be applied to the prepayment, without premium, of Notes Payable to Banks aggregating $23,000,000. The remaining proceeds will be added to Ohio's treasury funds and will be applied to extensions, additions and improvements to its properties.

The application-declaration, as amended, states that the issue and sale of the Bonds, the __ Percent Preferred Stock and Common Stock are solely for the purpose of financing the business of Ohio, and have been expressly authorized by the Public Utilities Commission of Ohio, the State in which Ohio is organized and doing business.

Fees and expenses relating to the proposed issuance and sale are estimated as follows:

	New bonds	New preferred stock
Filing fee for registration statement	$2,085	$525
Federal issuance stamp taxes	22,000	5,500
State filing and recordation fees and expenses	3,500	----------
Printing registration statement, prospectus, supplemental indenture, charter amendment, bidding papers, etc.	16,800	4,200
Printing and engraving temporary and definitive new Bond and new preferred stock certificates	13,000	600
Charges of trustee (including counsel fees)	15,750	----------
Charges of transfer agent and registrar	----------	800
Certified public accountants charges	2,400	600
Legal fees of counsel to the Company:		
Simpson, Thacher & Bartlett	10,500	2,500
Pomerene, Burns & Milligan	5,000	2,000
Handlan, Garden, Matthews & Hess	2,000	----------
Miscellaneous expenses including traveling, blue sky, postage, telegraph and incidental expenses	3,500	1,500
Total	96,515	18,225

It is estimated that expenses to be incurred by Ohio in connection with the issuance of the Common Stock will not exceed $2,000, including $1,500 Federal stamp tax.

Ohio has agreed to reimburse the successful bidder or bidders for reasonable filing fees and expenses in connection with the qualification of the Bonds and the __ Percent Preferred Stock under state securities laws in an amount not exceeding $4,000 in the aggregate.

The fee of Winthrop, Stimson, Putnam and Roberts, counsel for the successful bidder or bidders, estimated at $6,300 in respect of the Bonds and $1,500 in respect of the __ Percent Preferred Stock, is to be paid by such bidder or bidders.

Notice of the filing of the application-declaration, as amended, having been given in the form and manner prescribed by Rule U-23 promulgated pursuant to the act, and the Commission not having received a request for a hearing and not having ordered a hearing thereon; and

The Commission finding with respect to the application-declaration, as amended, that the applicable statutory standards are satisfied, that no adverse findings are required and that it is not necessary to impose any terms or conditions other than those set forth below, and the Commission deeming it appropriate that said application-declaration, as amended, be granted and permitted to become effective, forthwith, subject to the reservation of jurisdiction hereinafter provided:

It is ordered, Pursuant to said Rule U-23 and the applicable provisions of the act that the application-declaration, as amended, be, and the same hereby is, granted and permitted to become effective, forthwith, subject to the terms and conditions prescribed in Rules U-24 and U-50 and subject to the following additional terms and conditions:

That in the event Ohio issues 50,000 shares of __ Percent Preferred Stock, so long as any shares of the __ Percent Preferred Stock are outstanding Ohio shall not:

(A) Without the consent (given by vote at a meeting called for that purpose) of the holders of a majority of the total number of shares of the Preferred Stock then outstanding, sell or otherwise dispose of all or substantially all of its properties unless such sale or disposition shall have been ordered, approved, or permitted under the Public Utility Holding Company Act of 1935; and

(B) Redeem, purchase or otherwise acquire any shares of the Preferred Stock during any period when dividends payable on Preferred Stock shall be in default unless all shares of the Preferred Stock shall be so redeemed, purchased or otherwise acquired, or unless such redemption, purchase or acquisition shall have been ordered, approved or permitted under the Public Utility Holding Company Act of 1935.

By the Commission.

FEDERAL POWER COMMISSION

[Docket No. G-2400]

TOWN OF OBION, TENNESSEE

NOTICE OF APPLICATION

APRIL 7, 1954.

Take notice that the Town of Obion (Applicant), a body of politic and corporate and an existing municipality of the State of Tennessee, on March 31, 1954, filed an application pursuant to section 7 (a) of the Natural Gas Act for an order directing Trunkline Gas Company (Trunkline) to extend and improve its transportation facilities, to establish physical connection of its transportation facilities with the facilities of Applicant's proposed natural gas distribution system, and to sell natural gas to Applicant for local distribution to the public in Obion and to the public adjacent to Applicant's proposed high pressure tap line between the facilities of Trunkline and the corporate limits of Obion.

Applicant proposes to interconnect its facilities with those of Trunkline at a place approximately 1.5 miles to the East of Obion.

The estimated maximum daily demand stated by Applicant is 424.9 Mcf for the first year, 610.7 Mcf for the fifth year, and 691.6 Mcf for the ninth year.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 28th day of April 1954. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY, *Secretary.*

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 29105]

FUEL OIL FROM BATON ROUGE-NEW ORLEANS, LA., DISTRICT TO COOSA PINES, ALA.

APPLICATION FOR RELIEF

APRIL 8, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Petroleum residual fuel oil, in tank-car loads.

From: Points in New Orleans-Baton Rouge, La., district.

To: Coosa Pines, Ala.

Grounds for relief: Rail competition, circuity, and competition with motor-water carriers.

Schedules filed containing proposed rates; C. A. Spaninger, Agent, I. C. C. No. 1253, supp. 142.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[F. R. Doc. 54-2716; Filed, Apr. 12, 1954; 8:46 a. m.]

[4th Sec. Application 29106]

NAPHTHA FROM BATON ROUGE AND NORTH BATON ROUGE, LA., TO GUNTERSVILLE, ALA.

APPLICATION FOR RELIEF

APRIL 8, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Naphtha or naphtha distillate, in tank-car loads.

From: Baton Rouge and North Baton Rouge, La.

To: Guntersville, Ala.

Grounds for relief: Competition with rail carriers, circuitous routes, and analogous commodities.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1253, supp. 142.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 29107]

LIME FROM MCNEIL, TEX., TO NATCHEZ, MISS.

APPLICATION FOR RELIEF

APRIL 8, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Lime, carloads.

From: McNeil, Texas.

To: Natchez, Miss.

Grounds for relief: Adidtional routes.

Schedules filed containing proposed rates; F. C. Kratzmeir, Agent, I. C. C. No. 3986, supp. 20.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 29108]

IRON AND STEEL ARTICLES FROM BROOKLYN, N. Y. TO LAKE CHARLES, LA.

APPLICATION FOR RELIEF

APRIL 8, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: P. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Iron and steel articles, carloads.

From: Stations in Brooklyn, N. Y., on South Brooklyn Railway.

To: Lake Charles, La.

Grounds for relief: Competition with rail carriers, circuitous routes, and additional origins.

Schedules filed containing proposed rates: P. C. Kratzmeir, Agent, I. C. C. No. 4049, supp. 34.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

ment for backache, contraction of the muscles, weariness or fatigue, spinal tuberculosis, spinal irritation, spinal weakness, inflamed spine, injury to or deformity of the spine, arthritis of the spine, lordosis or spinal curvature, unless such representation is limited to cases where: (1) The particular condition or symptom has been diagnosed by a competent physician as one requiring the wearing of a support; (2) the type of support sold by respondent is recommended by the physician; (3) the proper measurements have been made by respondent, the physician, or other properly qualified person, and (4) the support is used in conjunction with other necessary treatment measures, as prescribed by the physician; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interprets or applies sec. 5, 38 Stat. 719; 15 U. S. C. 45) [Cease and desist order, Philo Burt Manufacturing Company, Jamestown, N. Y., Docket 6079, Mar. 30, 1954]

This proceeding was heard by John Lewis, Hearing Examiner, upon the complaint of the Commission, charging respondent with the use of unfair and deceptive acts and practices in commerce in violation of the provisions of the Federal Trade Commission Act, respondent's answer and supplemental answer, and a hearing at which testimony and other evidence in support of the allegations of the complaint were introduced before said examiner, theretofore duly designated by the Commission, and were duly recorded and filed in the office of the Commission. Respondent having failed to appear at the time and place fixed for hearing, and having been advised that a further hearing could be held to enable it to offer testimony and other evidence in opposition to the allegations of the complaint, first requested such a hearing, which was duly scheduled, but which was later cancelled following respondent's request that this be done, and no testimony or other evidence in opposition to the allegations of the complaint was offered by respondent, excepting an affidavit as to the discontinuance of certain practices, which was made a part of the record of the proceeding by agreement of counsel in support of the complaint.

Thereafter the proceeding regularly came on for final consideration by said examiner on the complaint, the answer and supplemental answer thereto, testimony and other evidence, and the aforesaid affidavit of respondent, no proposed findings as to the facts and conclusions having been submitted by the attorney in support of the complaint or respondent, and oral argument not having been requested, and said examiner, having duly considered the record in the matter, and having found that the proceeding was in the interest of the public, made his initial decision comprising certain findings as to the facts,[1] conclusion drawn therefrom,[1] and order to cease and desist.

Thereafter, following respondent's appeal from said initial decision, the matter was disposed of by the "Decision of the Commission", dated March 30, 1954, which, after considering respondent's general exception to said initial decision and respondent's specific exceptions to certain findings, a paragraph of the order and the findings on which based, and certain other matters, and being of the opinion that respondent's appeal from the hearing examiner's said initial decision was of no merit and that said initial decision was appropriate in all respects to dispose of the proceeding, issued the following order, to wit:

It is ordered, That the appeal of respondent from the initial decision of the hearing examiner be, and it hereby is, denied.

It is further ordered, That the initial decision of the hearing examiner shall on the 30th day of March 1954 become the decision of the Commission.

It is further ordered, That the respondent shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist contained in said initial decision, a copy of which is attached hereto.

The order to cease and desist in said initial decision, thus made the decision of the Commission, is as follows:

It is ordered, That the respondent, Philo Burt Manufacturing Company, a corporation, and its officers, agents, representatives and employees, directly or through any corporate or other device, in connection with the offering for sale, sale or distribution of its devices designated as Philo Burt Appliances, or designated by any other name, or any other product of substantially similar design or construction, do forthwith cease and desist from:

1. Disseminating or causing to be disseminated any advertisement by means of the United States mails or by any means in commerce, as "commerce" is defined in the Federal Trade Commission Act, which advertisement represents, directly or by implication:

(a) That the use of respondent's said devices will cure or will be of any significant value in the treatment of extreme sensitiveness of the skin, sensations of uneasiness, tingling, girdle pains, itching, headache, sleeplessness or loss of sleep, melancholy, spine sensitive to pressure, feeling of irritation, muscular weakness, fidgets, sudden starts, cramps in the legs or abdomen, sensations of heat and cold, skin flushed and hot, clammy sweats, worry, indigestion, loss of appetite, outbursts of temper, forgetfulness, or distaste for either work or society;

(b) That the use of respondent's devices will cure backache, contraction of the muscles, weariness or fatigue, spinal tuberculosis, spinal irritation, spinal weakness, inflamed spine, injury to or deformity of the spine, arthritis of the spine, lordosis or spinal curvature;

(c) That the use of respondent's devices is a competent or effective treatment for backache, contraction of the muscles, weariness or fatigue, spinal tuberculosis, spinal irritation, spinal weakness, inflamed spine, injury to or deformity of the spine, arthritis of the spine, lordosis or spinal curvature, unless such representation is limited to cases where:

(1) The particular condition or symptom has been diagnosed by a competent physician as one requiring the wearing of a support;

(2) The type of support sold by respondent is recommended by the physician;

(3) The proper measurements have been made by respondent, the physician, or other properly qualified person; and

(4) The support is used in conjunction with other necessary treatment measures, as prescribed by the physician.

2. Disseminating or causing to be disseminated any advertisement by any means for the purpose of inducing or which is likely to induce, directly or indirectly, the purchase in commerce, as "commerce" is defined in the Federal Trade Commision Act, of respondent's said devices, which advertisement contains any of the representations prohibited in paragraph 1 hereof.

Issued: March 30, 1954.

By the Commission.

[SEAL] ROBERT M. PARRISH, *Secretary*.

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 141a—PENICILLIN AND PENICILLIN-CONTAINING DRUGS; TESTS AND METHODS OF ASSAY

PART 146a—CERTIFICATION OF PENICILLIN AND PENICILLIN-CONTAINING DRUGS

CHANGE OF NAME OF DIBENZYLETHYLENEDIAMINE DIPENICILLIN G

By virtue of the authority vested in the Secretary by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371; 67 Stat. 18), the regulations for tests and methods of assay for antibiotic and antibiotic-containing drugs (21 CFR Part 141a; 18 F. R. 1587, 2786, 5590, 5631, 6319, 6589) and certification of batches of antibiotic and antibiotic-containing drugs (21 CFR Part 146a; 18 F. R. 951, 1587, 2786, 5590, 5651, 6320; 19 F. R. 1141) are amended as indicated below:

1. The following sections in Part 141a are amended by changing the words "dibenzylethylenediamine dipenicillin G" to read "benzathine penicillin G" as specified hereinafter:

a. In § 141a.9 *Penicillin tablets*, in the headnotes of paragraph (a) (1) and (2), in paragraph (b), first sentence.

b. In § 141a.47 *Dibenzylethylenediamine dipenicillin G*, in the section headnote.

c. In § 141a.48 *Dibenzylethylenediamine dipenicillin G oral suspension*, in the section headnote.

d. In § 141a.54 *Dibenzylethylenediamine dipenicillin G for aqueous injection*, in the section headnote.

e. In § 141a.55 *Dibenzylethylenediamine dipenicillin G and buffered crystalline penicillin* • • •, in the section headnote; in paragraph (a), first sentence; in paragraph (c), headnote and first and second sentences.

f. In § 141a.60 *Penicillin and dihydrostreptomycin-streptomycin sulfates* • • •, in paragraph (a) (1) (iii), (v), (vi), and (vii); in paragraphs (b), (c), (d), and (e).

g. In § 141a.61 *Dibenzylethylenediamine-procaine-buffered crystalline penicillins for aqueous injection*, in the section headnote (change the word "dibenzylethylenediamine" to "benzathine"); in paragraph (a) (1), first sentence; in paragraph (a) (4), headnote, first and second sentences (change the words "dibenzylethylenediamine dipenicillin" to "benzathine penicillin G").

h. In § 141a.62 *Dibenzylethylenediamine dipenicillin G and procaine penicillin for aqueous injection*, in the section headnote; in paragraph (a), headnote.

i. In § 141a.67 *Procaine penicillin and dibenzylethylenediamine dipenicillin G in streptomycin sulfate solution* • • •, in the section headnote (3 places); in paragraph (a) (2), headnote and two places in the context of the subparagraph (change the words "dibenzylethylenediamine dipenicillin" to "benzathine penicillin G").

j. In § 141a.68 *Dibenzylethylenediamine dipenicillin G and streptomycin* • • •, in the section headnote (two places); in paragraph (a) (1), headnote and second sentence.

k. In § 141a.70 *Tablets dibenzylethylenediamine dipenicillin G and crystalline penicillin*, in section headnote; in paragraph (a) (3), headnote and first and second sentences.

2. The following sections in Part 146a are amended by changing the words "dibenzylethylenediamine dipenicillin G" to read "benzathine penicillin G" as specified below:

a. In § 146a.27 *Penicillin tablets*, in paragraph (a), first, third, and sixth sentences; in paragraph (c) (1) (vi) (two places); in paragraph (d) (2) (ii) (two places) and (d) (3) (ii) (two places).

b. In § 146a.68 *Dibenzylethylenediamine dipenicillin G* • • •, in the section headnote (two places); in the introduction to paragraph (a) (one place); in paragraph (d) (3), first sentence.

c. In § 146.69 *Dibenzylethylenediamine dipenicillin G oral suspension*, in section headnote (two places); in paragraph (a), first sentence (four places) and fifth sentence (one place); in paragraph (c) (3) (two places); in paragraph (d) (1), (2), (ii), and (3) (ii).

d. In § 146a.77 *Dibenzylethylenediamine dipenicillin G for aqueous injection*, in section headnote; in paragraph (a), introduction and concluding sentence (four places); in paragraph (d) (1), first sentence (two places); in paragraph (d) (2) (ii) and (3), (ii) and (iv).

e. In § 146a.78 *Dibenzylethylenediamine dipenicillin G and buffered crystalline penicillin for aqueous injection*, in section headnote; in the introductory sentence to paragraph (a) (three places); in paragraph (a) (1), first sentence; in paragraph (a) (2), first sentence (two places); in paragraph (a) (3) (two places).

f. In § 146a.84 *Penicillin and dihydrostreptomycin-streptomycin sulfates* • • •, in paragraph (a) (1) (two places); in paragraph (a) (3); in paragraph (d) (2) (iv), (3) (i) (*a*), (3) (iv), and (4) (i).

g. In § 146a.85 *Dibenzylethylenediamine-procaine-buffered crystalline penicillins for aqueous injection*, in the section headnote and introduction to the section (change the word "dibenzylethylenediamine" to "benzathine"); in paragraph (a), first and second sentences; in paragraph (c); in paragraph (d), first sentence (three places) and second sentence; in paragraph (e).

h. In § 146a.86 *Dibenzylethylenediamine dipenicillin G and procaine penicillin for aqueous injection*, in the section headnote; in the introduction to the section (two places); in paragraph (a), first sentence; in paragraph (c) (two places); in paragraph (d), first sentence.

i. In § 146a.90 *Procaine penicillin and dibenzylethylenediamine dipenicillin G in streptomycin sulfate solution* • • •, in the section headnote (three places); in the introduction to the section (two places); in paragraph (a), first sentence (two places) and second sentence; in paragraph (b); in paragraph (c), first sentence (two places) and second sentence; in paragraph (d).

j. In § 146a.91 *Dibenzylethylenediamine dipenicillin G and streptomycin* • • •, in the section headnote (two places); in the introduction to the section (four places); in paragraphs (a) and (c).

k. In § 146a.92 *Tablets dibenzylethylenediamine dipenicillin G and crystalline penicillin*, in the section headnote; in the introduction to the section; in paragraph (a).

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371)

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

This order shall become effective 120 days after publication in the FEDERAL REGISTER.

Dated: April 8, 1954.

NELSON A. ROCKEFELLER,
Acting Secretary.

[F. R. Doc. 54-2755; Filed, Apr. 13, 1954; 8:49 a. m.]

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter I—Coast Guard, Department of the Treasury

Subchapter J—Procurement

[CGFR 54-15]

PART 116—PROCEDURES FOR PURCHASING

MISCELLANEOUS AMENDMENTS

The amendment to § 116.01-90 clarifies procedures for the exchange or sale of Coast Guard personal property and application of the proceeds derived therefrom to the purchase of similar items pursuant to 40 U. S. C. 481c (63 Stat. 384). Sections 116.01-91 and 116.01-92 are revoked; the procedures previously prescribed in those sections are now contained in § 116.01-90.

The amendments to §§ 116.01-155, 116.01-156, 116.01-157, 116.01-158, and 116.01-160 are editorial in nature to clarify requirements of procedures and to revise the dates of applicable Federal Specifications to correspond with the latest editions prescribed by Title, 1, Regulations of the General Services Administration.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Order No. 120, dated July 31, 1950 (15 F. R. 6521), the following amendments are prescribed:

1. Section 116.01-90 is amended to read as follows:

§ 116.01-90 *Exchange or sale of personal property and application of proceeds to purchase of similar items*—(a) *Authority.* The Federal Property and Administrative Services Act of 1949, section 201 (c), 40 U. S. C. 481c (63 Stat. 384), authorizes the exchange or sale of personal property and the application of the exchange allowances or proceeds of sale in whole or in part toward the purchase of personal property of the same general character, under regulations prescribed by the Administrator, General Services Administration. This section sets forth the procedures to be followed by Coast Guard units in exercising the authority granted under section 201 (c) of the above act.

(b) *Definitions.* As used in this section, the following definitions apply:

(1) *Personal property.* Property of any kind except Coast Guard records, real property, and vessels.

(2) *Similar personal property.* Items shall be deemed "similar" when:

(i) They are substantially alike in material aspects and characteristics, excluding, however, condition, year, model, size or capacity, and manufacturer; or

(ii) The Commandant (FS), the district commander, or the commanding officer of a Headquarters unit or their designee finds, in writing, that they resemble each other in most material aspects and characteristics and are adaptable to the same or comparable uses, which finding shall support each purchase document covering property acquired pursuant thereto; or

(iii) They constitute parts of or for assembled items, or containers for items, which items are similar within the meaning of subdivisions (i) and (ii) of this subparagraph.

(c) *Restrictions and limitations*—(1) *General.* The application of exchange allowances or proceeds of sale in whole or part payment for personal property acquired is authorized only when:

(i) The items sold or exchanged are similar to the items acquired;

(ii) The items acquired are to be used (whether or not intended for additional uses) in the performance of all or substantially all of the tasks or operations in which the items exchanged or sold would otherwise be used, but the items acquired need not be the same as the items sold or exchange;

(iii) There has been at the time of transfer or sale an administrative determination to apply the exchange allowance or proceeds of sale in acquiring property in accordance with this section; and

(iv) The transaction will foster the economical and efficient accomplishment of an approved official program.

(2) *Availability of proceeds of sale.* The proceeds from the sale of personal property may be used in acquiring similar property, as authorized in this section, provided the replacement purchase is made, or an obligation for the purchase of the replacement property is incurred, by the end of the fiscal year following the fiscal year in which the sale was made.

(3) *Dangerous property.* No property which is dangerous to public health or safety shall be exchanged or sold pursuant to the authority granted in this section without first rendering such property harmless or providing adequate safeguards therefor.

(d) *Solicitation of bids*—(1) *General.* Responsible officers shall at all times consider the interest of the Government in obtaining the maximum return from items exchanged or sold. In disposing of personal property, both cash and trade-in bids shall be solicited except that:

(i) Items may be exchanged or transferred between the Coast Guard and other Federal agencies, when the exchange or transfer has been approved by the Commandant (FS), without solicitation of bids;

(ii) Items may be exchanged without solicitation of bids when the personal property sought to be acquired may be procured without solicitation of bids under applicable laws and regulations;

(iii) Cash bids need not be solicited when the items sought to be sold or exchanged may be disposed of without solicitation of bids under applicable laws and regulations;

(iv) Both types of bids need not be solicited when recent solicitation for identical items has produced only one type of offer under circumstances indicating the futility of further advertising for any other type of offer;

(v) Both types of bids need not be solicited when such solicitation for the items to be sold or exchanged would clearly be ineffective in reducing the cost of the acquisition, e. g., by reason of the existing commercial practice with respect to exchange or sale of such items.

(2) *Sales contracts.* As personal property sold under the authority stated herein is for the purpose of replacement, the property is not excess to the Coast Guard and will not be identified in any way as surplus property. Any printed statements appearing on sales contract forms referring to surplus property will be deleted. The following statement shall be inserted in all sales invitations: "The property listed herein is being offered for sale in accordance with section 201 (c), Public Law 152, 81st Congress, act of June 30, 1949 (63 Stat. 384)."

(3) *Exchange.* All agreements providing for the acceptance of personal property in exchange ("trade-in") for the purchase of similar items authorized by the act shown in paragraph (a) of this section shall be referenced in the purchase document. The appropriation paying for the new item(s) will be charged the net amount after deduction of the exchange allowance.

(e) *Records.* Each transaction carried out under the authority granted in this section shall be evidenced in writing (i. e., purchase order, sales contract, quotation, etc.), which shall indicate the amount of "trade-in" allowance or proceeds of sale, if any, involved, and shall show full compliance with the provisions of this section.

2. Section 116.01-91 *Applying proceeds of sale to purchase of replacement* is hereby revoked.

3. Section 116.01-92 *Availability of funds* is hereby revoked.

4. Section 116.01-155 is amended to read as follows:

§ 116.01-155 *Procurement of office labor-saving devices*—(a) *Procurement procedure*—(1) *General.* District commanders and commanding officers of Headquarters units may procure office labor-saving devices within authorized allowances from allotted funds except replacement machines of the categories indicated in subparagraph (2) of this paragraph. In exercising this authority, responsible officers shall effect trade-in or sale of devices replaced and apply the trade-in allowance or proceeds of sale toward the purchase of the replacements.

(2) *Replacement typewriters, adding machines, and calculators.* The Commandant (FS) will effect normal replacement of typewriters, adding machines, and calculators on the basis of an annual report submitted by district commanders and commanding officers of Headquarters units, without charge to field allotments. Typewriters will not be purchased for replacement purposes unless it is determined that the estimated cost of necessary repairs or reconditioning of each typewriter will equal or exceed, at lowest available rates, the current percentage of replacement cost prescribed by the General Services Administration.

(3) *Requests for purchase by Commandant (FS).* When funds are not available in field allotments for the purchase of office labor-saving devices (other than those included in the annual replacement program referred to in subparagraph (2) of this paragraph), district commanders and comanding officers of Headquarters units will submit requisition for the devices required to the Commandant (FS) on Form CG-2556 (Requisition/Invoice), justifying the need for the equipment. In the case of requests for replacement equipment, the letter shall also contain a detailed description of the item(s) to be replaced.

(4) *Purchase of typewriters, adding machines, and calculators*—(i) *Manually-operated typewriters.* The Commandant (FS) will submit requests for purchase of manually-operated typewriters on Form CG-2557 (Purchase Order) to the appropriate regional office of the General Services Administration, via the Director of Administrative Services, Treasury Department. The General Services Administration will furnish suitable typewriters from excess stocks, when available, priced in accordance with the current "Excess Typewriter Fair Value List" issued by the Administration. When the Administration does not furnish machines from its stock of excess typewriters, the purchase order(s) will be returned with a "Certificate of Unavailability," whereupon procurement will be made by the Commandant (FS) from the Federal Supply Schedule. The following notification shall be placed on each purchase order submitted to a contractor for typewriters covered by the Administration clearance: "This order is covered by General Services Administration Certificate of Unavailability No. TC-_____"

(ii) *Electrically-operated typewriters.* The Commandant (FS) will effect procurement of electrically-operated typewriters (except those for use in authorized printing plants) from Federal Supply Schedule contracts. Purchase orders (Form CG-2557) for electrically-operated typewriters (including varitypers, flexowriters, and justowriters) for use in an authorized printing plant will be submitted by the Commandant (FS) to the Director of Administrative Services, Treasury Department, for clearance by the Joint Committee on Printing.

(iii) *Adding machines and calculators.* The Commandant (FS) will effect the procurement of adding machines and calculators from the Federal Supply Schedule on Form CG-2557 (Purchase Order) based upon requests from district commanders and commanding officers of Headquarters units.

(5) *Purchase of other office labor-saving devices.* Procurement of office labor-saving devices shall be made from the Federal Supply Schedule by the Commandant (FS), district commanders, and commanding officers of Headquarters units when (i) the items required are unavailable from other Government sources of supply, and (ii) the items required are covered by the Federal Supply Schedule.

(b) *Exchange or sale of devices replaced*—(1) *General.* It shall be the policy of the Coast Guard to effect exchange ("trade-in") or sale of office labor-saving devices and apply the proceeds to the cost of replacement. District commanders and commanding officers of Headquarters units procuring office labor-saving devices in accordance with paragraph (a) (1) of this section will effect trade-in or sale of the replaced devices. When replacements are purchased by the Commandant (FS) for field units, the trade-in or sale will be accomplished in accordance with the following subparagraphs.

(2) *Typewriters purchased from G. S. A.* When replacement typewriters are furnished from excess stocks of the General Services Administration, the typewriters replaced will be disposed of by sale. The sales contracts in such cases will be executed by the district commander or commanding officer of the Headquarters unit having jurisdiction over the replaced typewriters, upon receipt of the replacements, unless earlier disposal is directed by the Commandant (FS).

(3) *Devices purchased from other sources.* Upon receipt of notification from the Commandant (FS) of procurement action taken to replace office labor-saving devices, district commanders and commanding officers of Headquarters units shall issue invitations for the sale of the replaced items. Bids received will be compared with the trade-in allowances offered by the contractors supplying the replacement devices to determine the maximum return to the Government and a report of the results forwarded to the Commandant (FS) for review. If the cash bids exceed the trade-in allowances, the execution of sales contracts will be authorized; otherwise, the devices will be traded in on the replacement items by change orders issued by the Commandant (FS), and the holding unit notified accordingly. Cash bids will not be accepted nor shall the devices be disposed of without prior authority of the Commandant (FS).

(i) *Surrender of exchanged items.* Payment for the new devices will be withheld until the trade-in machines have been picked up by the contractor. Accordingly, trade-in devices shall be released as rapidly as possible by notifying the contractor's local representative when they are available for pick-up. The Commandant (FS) shall be informed of the reason for non-delivery and the anticipated delivery date of any device traded in which has not been picked up by the contractor's representative within 30 days after receipt of the replacement machine.

(ii) *Joint inspection of exchanged items.* All devices traded in shall be inspected jointly by the contractor's representative and a responsible Coast Guard representative at the time of pick-up. This inspection should primarily verify the serial number and the condition of the devices. The contractor's representative shall be requested to certify the receipt as to the condition of the machines. A copy of the receipt, countersigned by the Coast Guard representative, shall be forwarded to the Commandant (FS).

5. Section 116.01–156 is amended to read as follows:

§ 116.01–156 *Purchase of new electric fans*—(a) *Authority.* District commanders and commanding officers of Headquarters units may procure new electric fans within authorized allowances from allotted funds.

(b) *Sources of supply.* New electric fans shall be obtained from (1) Federal Supply Schedule contractors or (2) General Services Administration stores stock when the types required can be furnished by those sources. New fans which cannot be obtained from Government sources of supply may be purchased in the open market by advertising or negotiation in accordance with established procedure.

6. Section 116.01–157 is amended to read as follows:

§ 116.01–157 *Purchase of new refrigerators*—(a) *Authority.* District commanders and commanding officers of Headquarters units may procure new refrigerators within authorized allowances from allotted funds.

(b) *Consolidated G. S. A. purchase program.* The General Services Administration will purchase all Coast Guard requirements of new refrigerators of the following types in the continental United States (including Alaska). "In the continental United States" shall be construed to include deliveries to shipping points in the United States for transshipment to destinations outside the continental limits.

(1) *Types of refrigerators.* All portable (i) commercial refrigerators, (ii) household refrigerators, and (iii) low temperature storage cabinets, with self-contained electric or gas units, in conformity with the specifications indicated in subparagraph (2) of this paragraph.

(2) *Specifications.* (i) The latest issue in effect of Federal Specification AA–R–211; or (ii) later Federal Specifications which might be issued for the above items; or (iii) specifications developed and/or approved for Coast Guard use by the Commandant.

(c) *Purchase procedure*—(1) *General Services Administration.* Purchase orders (Form CG–2557) shall be submitted to the General Services Administration, Federal Supply Service, 219 South Clark St., U. S. Custom House, Room 575, Chicago 4, Ill. Orders shall be complete as to the specification requirements referenced in paragraph (b) (2) of this section, time or times when deliveries are required, consignment and shipment instructions, and other pertinent information.

(2) *Other sources.* New refrigerators not included in the consolidated purchase program of the General Services Administration will be procured from other Government sources where practicable. Refrigerators not available from Government sources of supply may be purchased in the open market by advertising or negotiation in accordance with established procedure.

7. Section 116.01–158 is amended to read as follows:

§ 116.01–158 *Purchase of new water coolers*—(a) *Authority.* District commanders and commanding officers of Headquarters units may procure new electric water coolers within authorized allowances from allotted funds.

(b) *Consolidated G. S. A. purchase program.* The General Services Administration will procure all Coast Guard requirements of new electric water coolers of the following types in the continental United States (including Alaska) for shore use. ("In the continental United States" shall be construed to include deliveries to shipping points in the United States for transhipment to destinations outside the continental limits.) Standard models of coolers manufactured and sold with satisfactory results to the public generally, which meet the provisions of Interim Federal Specification 00–C–0056b, dated July 24, 1952, will be procured under the consolidated G. S. A. purchase program. Coolers requiring manufacture from particular materials specified by an ordering office will be furnished only when the need for such coolers is adequately justified. Justifications in such cases shall be approved by the Commandant (FS) prior to submission to the General Services Administration.

1. Bubbler style (type I, air-cooled condenser; type II, water-cooled condenser), sizes 5, 10, and 20;
2. Cafeteria style (type III, air-cooled condenser; type IV, water-cooled condenser), sizes 20 and 30;
3. Remote style (type V, water-cooled condenser), sizes 10 and 20;
4. Bottle style (type VI, air-cooled condenser), size 3.

(c) *Purchase procedure*—(1) *General Services Administration.* Purchase orders (Form CG–2557) shall be submitted to the General Services Administration regional office serving the ordering office. Orders shall be complete as to type, size, description, and current characteristics (AC or DC current, phase, voltage, and cycles), time or times when deliveries are required, consignment and shipping instructions, and other pertinent information.

(2) *Other sources.* New electric water coolers not included in the consolidated purchase program of the General Services Administration will be procured from other Government sources where practicable. Refrigerators not available from Government sources of supply may be purchased in the open market by advertising or negotiation in accordance with established procedure.

8. Section 116.01–160 is amended to read as follows:

§ 116.01–160 *Purchase of gasoline and lubricating oil by credit cards*—(a) *General.* District commanders and commanding officers of Headquarters units may authorize the purchase of gasoline and lubricating oil for service station delivery to Coast Guard motor vehicles. Such purchases may be accomplished through the use of credit cards in accordance with the General Provision for Service Station Deliveries, Classes 7 and 14, Federal Supply Schedule, applicable to the General Services Administration region in which the district or Headquarters unit is located. Service station deliveries may be obtained on Form CG–2974 (Purchase-Invoice) when credit cards are not available.

(b) *Issue of credit cards.* District commanders and commanding officers of Headquarters units will procure and issue credit cards required by their respective commands. Requests for credit cards originated by district units shall be submitted to the District Commander (f).

(1) *Units where refueling facilities are unavailable.* These units are (i) those which have no refueling facilities for vehicles and lack ready access to other Coast Guard units which do have such facilities, and (ii) those with vehicles which operate away from the unit in areas where Coast Guard refueling facilities are not available.

(2) *Group commanders requiring cards for emergency use.* Group commanders who do not require credit cards for normal operations may hold reserve credit cards for disaster relief or other emergency operations requiring the use of vehicles away from the Group area.

(c) *Tax exemption certificates.* Tax exemption certificates (SF–1094) will be issued by the paying office when contractors' invoices are processed for payment.

TITLE 46—SHIPPING

Chapter II—Federal Maritime Board, Maritime Administration, Department of Commerce

Subchapter A—Practice and Procedure

[Gen. Order 41, 2d. Rev., Amdt. 2]

PART 201—RULES OF PRACTICE AND PROCEDURE BEFORE THE FEDERAL MARITIME BOARD AND THE MARITIME ADMINISTRATION

PUBLIC COUNSEL

It is ordered, That effective on April 1, 1954, § 201.42 *Counsel for the Board* (General Order 41, 2d. Rev.) published in the FEDERAL REGISTER (18 F. R. 3716, 3718) is hereby superseded and deleted in its entirety and a new § 201.42 is substituted in lieu thereof to read as follows:

§ 201.42 *Public Counsel.* The Assistant General Counsel for Litigation shall be a party to all proceedings governed by the rules in this part, except that in complaint proceedings under § 201.62 he may become a party only upon leave to intervene granted pursuant to § 201.74. The Assistant General Counsel or his representative shall be designated as "Public Counsel" and shall be served with copies of all papers, pleadings, and documents in every proceeding governed by the rules in this part, whether a party of record or not. Public Counsel shall actively participate in any proceeding to which he is a party, to the extent required in the public interest, subject to the separation of functions required by section 5 (c) of the Administrative Procedure Act. (See § 201.225.)

(Sec. 204, 49 Stat. 1987, as amended; 46 U. S. C. 1114)

By order of the Federal Maritime Board.

[SEAL] GEO. A. VIEHMANN,
Assistant Secretary.

By order of the Maritime Administration.

Dated: April 1, 1954.

GEO. A. VIEHMANN,
Assistant Secretary.

TITLE 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 10937]

PART 3—RADIO BROADCAST SERVICES

TABLE OF ASSIGNMENTS; TELEVISION BROADCAST STATIONS

In the matter of amendment of § 3.606 *Table of assignments,* rules governing television broadcast stations; Docket No. 10937.

1. The Commission has under consideration its notice of proposed rule making issued on February 25, 1954 (FCC 54–261) and published in the FEDERAL REGISTER of March 3, 1954 (19 F. R. 1186) proposing to assign Channel 68 to Petaluma, California in lieu of Channel 56 in response to a petition filed by the Delta-Sierra Educational Television Corporation, Stockton, California.

2. The last day for filing comments expired on March 24, 1954. No comments opposing the change were filed. In support of its requested amendment petitioner urged that it is composed of representatives from the four counties of San Joaquin, Stanislaus, Calaveras, and Tuolumne, California; that it hopes to serve these counties by establishing an educational television station on Channel 42 assigned to Stockton, California and reserved for educational use; that a site at Mt. Diablo would assure the best possible coverage for the area; that the use of such a site is precluded by the assignment of Channel 56 at Petaluma, California; and that the substitution of Channel 68 for 56 at Petaluma would be technically feasible and would permit the use of Mt. Diablo as a site for the proposed station on Channel 42. The Commission finds that the amendment of the table as proposed meets the requirements of the rules and would be in the public interest.

3. Authority for the adoption of the amendment is contained in sections 4 (i), 301, 303 (c), (d), (f), and (r) and 307 (b) of the Communications Act of 1934, as amended.

4. In view of the foregoing: *It is ordered,* That effective 30 days from publication in the FEDERAL REGISTER, the table of assignments contained in § 3.606 of the Commission's rules and regulations is amended as follows:

City:	Channel No.
Petaluma, Calif.	68

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 50 Stat. 191; 47 U. S. C. 301, 303, 307)

Adopted: April 7, 1954.

Released: April 8, 1954.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 54–2773; Filed, Apr. 13, 1954; 8:52 a. m.]

PART 8—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

OPERATING CONTROLS

In the matter of amendment of Part 8 of the Commission's rules extending effective date of § 8.104 (e) (2) (ii).

At a session of the Federal Communications Commission, held at its offices in Washington, D. C., on the 7th day of April 1954;

The Commission having under consideration an amendment to change from June 3, 1954, to a later date the applica-

tion of the requirements of § 8.104 (e) (2) (ii) concerning the rapidity of changing from one operating channel to another during transmission or reception by ship stations using telegraphy on certain frequencies;

It appearing that since the inauguration of the use of the new Atlantic City cargo ship working frequencies will not occur until after June 3, 1954, failure to postpone the requirements of § 8.104 (e) (2) (ii) will require the installation by ship owners of crystals which will have to be replaced when the use of the new frequencies is initiated at a relatively early date thereafter; and

It further appearing that it is desirable that the effective date of the requirements of § 8.104 (e) (2) (ii) be made to coincide with the date when it is expected that the Atlantic City frequency tolerances will be made applicable; and

It further appearing that the imminence of the present effective date of June 3, 1954, and the urgency of the situation make compliance with the public rule making procedure prescribed by section 4 (a) of the Administrative Procedure Act impracticable; and

It further appearing that in view of the urgent situation and because the amendment herein ordered relaxes existing requirements, it may be made effective immediately; and

It further appearing that the authority for this amendment is contained in sections 303 (e), (f) and (r) of the Communications Act of 1934, as amended:

It is ordered, That effective immediately § 8.104 (e) (2) (ii) is amended by substituting the date January 1, 1955, for the date June 3, 1954, presently contained therein.

(Sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Released: April 8, 1954.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 54-2772; Filed, Apr. 13, 1954; 8:51 a. m.]

[Docket No. 10501]

PART 12—AMATEUR RADIO SERVICE

REQUIREMENTS FOR PORTABLE AND MOBILE [illegible]

In the matter of amendment of § 12.91 (b) of Part 12, Amateur Radio Service; Docket No. 10501.

The present proceedings were initiated as the result of a petition of the Maritime Mobile Amateur Radio Club of Pittsburgh, Pennsylvania, requesting an amendment of § 12.91 (b) of the Commission's rules, which authorizes marine mobile operation only in the 28.0 to 29.7 Mc frequency band, to include such operation in the 21 to 21.45 Mc frequency band. On May 15, 1953, the Commission issued a notice of proposed rule making setting forth the above-mentioned proposed amendment to § 12.91 (b) of its rules, and affording interested parties an opportunity to file comments in support thereof or in opposition thereto, within a specified period. Within the time provided therefor numerous favorable comments were received by the Commission. The only objection to the proposed amendment was filed by the American Radio Relay League.

In its comment the League urged (1) that "* * * the current international radio situation is such as to make such action highly inadvisable," (2) that the proposed amendment be dismissed, (3) that the Commission accept an alternate amendment to permit marine mobile radio operation aboard United States vessels on coastwise voyages on all of the frequencies allocated to the Amateur Radio Service, and (4) requested an oral argument in connection with the proposed rule making.

In compliance with the request of the American Radio Relay League an oral argument was held on February 8, 1954, before the Commission. The League and the Maritime Mobile Amateur Radio Club participated in the argument. At the conclusion of the argument, both parties were afforded the opportunity to file additional written comments within the next ten days. Comments were filed by both parties.

After review and careful consideration of all of the comments submitted in connection with this proposed rule making and of all of the available information pertinent thereto, the Commission has concluded (1) that the League's contention that "the current international radio situation is such as to make such action highly inadvisable." is unsupported by official testimony and records and does not constitute justifiable grounds upon which to dismiss the proposed amendment of § 12.91 (b) of the Commission's rules (2) that the adoption of the proposed amendment should not have any adverse effect upon the present or future status of the Amateur Radio Service, (3) that this proceeding has developed no reason to warrant a limitation of marine mobile operation, either in the 28 to 29.7 Mc frequency band or in the 21 to 21.45 Mc frequency band to United States coastwise operation, and (4) that the League's proposal to amend the rules to authorize the use of all amateur radio frequencies for marine mobile radio operation aboard United States vessels on coastwise voyages, extends beyond the scope of the proposed rule amendment in this matter, and is herewith denied.

In view of the foregoing statements, and under authority contained in sections 4 (i), 301 and 303 (c) and (r) of the Communications Act of 1934, as amended: *It is ordered*, That, effective May 21, 1954, § 12.91 (b) of the Commission's rules be amended to read as follows:

§ 12.91 *Requirements for portable and mobile operation.* * * *

(b) When outside the continental limits of the United States, its territories, or possessions, an amateur radio station may be operated as portable or mobile only under the following conditions:

(1) Operation may not be conducted within the jurisdiction of a foreign government except pursuant to, and in accordance with, expressed authority granted to the licensee by such foreign government.

(2) Operation may be conducted only in the amateur frequency bands 21.0 to 21.45 Mc and 28.0 to 29.7 Mc: *Provided*, That this limitation shall not be construed to prevent the use of other amateur frequency bands where operation is within the jurisdiction of a foreign government which permits United States amateurs to operate within such foreign territory. (See Appendix 4 of this part for the text of treaties or agreements between the United States and foreign governments relative to reciprocal amateur radio operation.)

(3) Whenever portable or mobile operation is, or is likely to be, away from the territorial limits of the United States for a period in excess of 48 hours, the licensee shall give prior written notice thereof to the Engineer in Charge of the radio inspection district having jurisdiction of the authorized fixed transmitter site of the station: *Provided*, That only one such notice shall be required during any one continued absence.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies secs. 301, 303, 48 Stat. 1081, 1082, as amended; 47 U. S. C. 301, 303)

Adopted: April 7, 1954.

Released: April 8, 1954.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

PART 1—GENERAL RULES OF PRACTICE

PETITIONS FOR SUSPENSION OF TARIFFS OR SCHEDULES; WHEN FILED

At a general session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 5th day of April A. D. 1954.

There being under consideration Rule 42 (b) of the general rules of practice (§ 1.42 (b)):

It is ordered, That effective May 9, 1954, the general rules of practice be amended as follows:

1. Substitute "12 days" in place of "10 days" appearing in paragraph (b) of § 1.42. As amended this paragraph will read:

§ 1.42 *Petitions for suspension of tariffs or schedules.* * * *

(b) *When filed.* A protest against, and a prayer for suspension of, any tariff or schedule filed under the act ordinarily will not be considered unless made in writing, and filed with the Commission at least 12 days before the effective date of the tariff or schedule. In an emergency satisfactorily shown by protestant, and within the time limits herein provided, a telegraphic protest may be sent to the Commission and to the publishing carrier, freight forwarder, or agent, stating the grounds relied upon, but such telegraphic protest must immediately be confirmed by protest filed and served in accordance with this section.

Notice of this order shall be given to the general public by depositing a copy thereof in the office of the Secretary of the Commission, Washington, D. C., and by filing a copy with the Director, Division of the Federal Register.

(Secs. 12, 17, 24 Stat. 383, as amended, 385, as amended, 49 Stat. 546, as amended, 548, as amended, sec. 201, 54 Stat. 933, sec. 1, 56 Stat. 285; 49 U. S. C. 12, 17, 304, 305, 904, 1003)

By the Commission.

[SEAL] GEORGE W. LAIRD,
Secretary.

[F. R. Doc. 54-2767; Filed, Apr. 13, 1954; 8:50 a. m.]

PROPOSED RULE MAKING

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2, 3]

CLASS B FM BROADCAST STATIONS

REVISED TENTATIVE ALLOCATION PLAN

In the matter of amendment of the Revised Tentative Allocation Plan for Class B FM Broadcast Stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 7th day of April 1954;

The Commission having under consideration a proposal to amend its Revised Tentative Allocation Plan for Class B FM Broadcast Stations as follows:

General area	Channels	
	Delete	Add
Goldsboro, N. C.	227	245
Kinston, N. C.	245	260
Jacksonville, N. C.	260	271

It appearing, that the Eastern Carolina Broadcasting Company, Inc., license of Station WEQR, Goldsboro, North Carolina, proposes to change the frequency assignment of Station WEQR from Channel No. 227 to Channel No. 245 to eliminate the present condition of interference caused in the Goldsboro area to reception of Station WNCT (TV) operating on television Channel No. 9 in Greenville, North Carolina; and

It further appearing that the interference to the reception of television Station WNCT, Greenville, North Carolina, in the Goldsboro area is primarily internal to the television receivers; that the problem can and should be resolved by remedial measures at the source of the problem—improved designs of television receivers—rather than by manipulation of outstanding frequency assignments or changes in the television and FM allocation plans; that the Commission has taken the position before and is still of the opinion that receiver manufacturers are under an obligation to the consumers purchasing their goods to employ the corrective measures in the manufacture of receiving sets necessary to insure against this and related interference problems and that it is improper to place further restrictions on the use of the very limited spectrum space because of the interference problems that can be entirely avoided by proper receiver design; and that in general, it will not be possible to correct this type of interference by modification of the FM allocation plan that the present limited use of FM broadcasting assignments makes possible in this case; and

It further appearing that the subject proposal to reallocate channels in the area is engineeringly feasible and will not affect the rights of other parties; and

It further appearing that authority for the adoption of the proposed amendment is contained in sections 4 (i), 361, 303 (c), (d), (f), and (r) and 307 (b) of the Communications Act of 1934, as amended; and

It further appearing that because the proposed change merely represents a reallocation of channels in the area without any appreciable affect on existing FM licensees or applicants, current or prospective, the notice and public procedure provisions of section 4 (a) of the Administrative Procedure Act is unnecessary and that the change should be made effective immediately so that the existing Greenville-Goldsboro conflict described above can be eliminated without delay;

It is ordered, That effective immediately, the Revised Tentative Allocation Plan for Class B FM Broadcast Stations is amended as follows:

General area	Channels	
	Delete	Add
Goldsboro, N. C.	227	245
Kinston, N. C.	245	260
Jacksonville, N. C.	260	271

Released: April 8, 1954.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

NOTICES

DEPARTMENT OF THE TREASURY

Bureau of Customs

[445.2]

ASPHALT SHEETS AND EBON PUTTY (ASPHALT MASTIC)

PROSPECTIVE TARIFF CLASSIFICATION

APRIL 8, 1954.

It appears that asphalt sheets composed of a mixture of asphalt and earthy or mineral substances are properly classifiable as earthy or mineral substances wholly or partly manufactured under paragraph 214, Tariff Act of 1930, as modified, and that Ebon putty or asphalt mastic, consisting of petrol pitch in combination with, and in chief value of certain animal and mineral waxes, is classifiable under the provision for manufactures in chief value of wax in paragraph 1536 of the act, as modified, at rates of duty higher than those heretofore assessed under a uniform practice.

Pursuant to § 16.10a (d), Customs Regulations (19 CFR 16.10a (d)), notice is hereby given that the existing uniform practice of classifying such merchandise under paragraph 1710 as asphaltum, bitumen, or limestone-rock asphalt is under review in the Bureau of Customs.

Consideration will be given to any relevant data, views, or arguments pertaining to the correct tariff classification of this merchandise which are submitted in writing to the Bureau of Customs, Washington 25, D. C. To assure consideration such communications must be received in the Bureau not later than 30 days from the publication of this notice. No hearings will be held.

[SEAL] D. B. STRUBINGER,
Acting Commissioner of Customs.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[Order No. 2753]

BONNEVILLE POWER ADMINISTRATION

MARKETING OF ELECTRIC POWER AND ENERGY

APRIL 7, 1954.

SECTION 1. *Designation as marketing agency.* The Bonneville Power Administration is designated as the agency to market available surplus electric power and energy generated at the sources specified in this section pursuant to the specific statutory authority as to each project:

(a) Bonneville Project, pursuant to the act of August 20, 1937 (50 Stat. 731), as amended;

(b) McNary Dam, pursuant to the act of March 2, 1945 (59 Stat. 10);

(c) Hungry Horse Dam, pursuant to the act of June 5, 1944 (58 Stat. 270);

(d) The following sources, pursuant to the acts of December 22, 1944 (58 Stat. 887):

Albeni Falls Dam.
Big Cliff Dam.
Chief Joseph Dam.
Detroit Dam.
Dexter Dam.
Lookout Point Dam.
The Dalles Dam.

(e) The following sources, pursuant to the Federal Reclamation laws (act of June 17, 1902, 32 Stat. 388, and acts amendatory thereof or supplementary thereto):

Grand Coulee Dam.
Chandler Power Plant, Kennewick Division, Yakima Project.

SEC. 2. *Contracts.* The Bonneville Power Administrator may, subject to the applicable statutes, enter into contracts for the sale or interchange of electric power and energy in the performance of the functions assigned by section 1 of this order. The Bonneville Power Administrator may, in writing, redelegate to officers and employees of the Administration the authority granted in this section, and he may authorize written redelegations of such authority.

SEC. 3. *Revocation.* Orders Nos. 1994 (9 F. R. 11966) and 2115 as amended (10 F. R. 14211; 11 F. R. 8830; 17 F. R. 5197; 18 F. R. 2831) are revoked.

DOUGLAS MCKAY,
Secretary of the Interior.

[F. R. Doc. 54-2743; Filed, Apr. 13, 1954; 8:45 a. m.]

[Order No. 2754]

BUREAU OF RECLAMATON

DELEGATION OF AUTHORITY WITH RESPECT TO HUNGRY HORSE DAM PROJECT

APRIL 7, 1954.

The Bureau of Reclamation is designated as the agency, under the direction and supervision of the Secretary of the Interior, to carry out the functions and duties of the Secretary under the act of June 5, 1944 (58 Stat. 270), with respect to the design, construction, operation and maintenance of the Hungry Horse Dam Project in accordance with the terms of the above act. The Bureau, in the design of the power generating facilities to be installed at the Dam, shall cooperate and consult with the Bonneville Power Administration.

DOUGLAS MCKAY,
Secretary of the Interior.

[F. R. Doc. 54-2744; Filed, Apr. 13, 1954; 8:46 a. m.]

DEPARTMENT OF COMMERCE

Federal Maritime Board

FAMILY EXPORT & SHIPPING CO.

NOTICE OF CANCELLATION OF FREIGHT FORWARDER CERTIFICATE OF REGISTRATION

On April 8, 1954, the Board entered the following order:

Whereas, Federal Maritime Board General Order 72, which became effective June 1, 1950, requires all freight forwarders as defined therein to register with the Board, and

Whereas, Family Export & Shipping Co. registered with the Board and was issued Certificate of Registration No. 242 on June 29, 1950, and

Whereas, investigation shows that Family Export & Shipping Co. is no longer operating as a freight forwarder as defined by Rule 244.1 of General Order 72 at the address shown on its application form on file with the Board, that no change of address has been furnished by the registrant in accordance with the requirements of General Order 72, and that there is no evidence that the registrant is operating as a freight forwarder elsewhere; now, therefore, by virtue of authority vested in the Board,

It is ordered, That Certificate of Registration 242 be, and the same is hereby, cancelled, effective as of this date.

By the Board.

[SEAL] GEO. A. VIEHMANN,
Assistant Secretary.

Notice is hereby given to all interested or affected persons that Family Export & Shipping Company is no longer authorized to operate as a registered freight forwarder pursuant to General Order 72.

Dated: April 9, 1954.

By order of the Federal Maritime Board.

[SEAL] GEO. A. VIEHMANN,
Assistant Secretary.

[F. R. Doc. 54-2780; Filed, Apr. 13, 1954; 8:53 a. m.]

ALCOA STEAMSHIP CO., INC., ET AL.

NOTICE OF AGREEMENTS FILED WITH THE BOARD FOR APPROVAL

Notice is hereby given that the following described agreements have been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916, as amended; 39 Stat. 733, 46 U. S. C. section 814.

(1) Agreement No. 7966 between Alcoa Steamship Company, Inc., and Osaka Shosen Kaisha, Ltd., covers the transportation of cargo under through bills of lading from the Philippine Islands, Hong Kong and Japan to the Virgin Islands, with transshipment at New York, Baltimore, or Norfolk.

(2) Agreement No. 7974 between N. V. Nederlandsch-Amerikaansche Stoomvaart-Maatschappij (Holland America Line) and Alcoa Steamship Company, Inc., covers the transportation of general cargo under through bills of lading from Holland and Belgium to Puerto Rico, with transshipment at New York, Baltimore, or Norfolk. Agreement No. 7974 supersedes and cancels Agreement No. 7929.

(3) Agreement No. 7968, between Hamburg-Amerika Linie, Hamburg, Norddeutscher Lloyd, Bremen, and Ahrenkiel & Bene, Hamburg, provides for the establishment and maintenance of a joint cargo service under the trade name "Great Lakes Service" in the trade between Great Lakes ports of the United States and Canada on one hand and Continental ports of Europe within the Bordeaux-Hamburg range and U. S. ports on the other hand, and in the trades between any two of said ports which are in the Western Hemisphere (not including transportation within the purview of the coastwise laws of the United States).

(4) Agreement No. 7972 between Shinnihon Steamship Co., Ltd., and Alcoa Steamship Company, Inc., covers the transportation of cargo under through bills of lading from Japan and the Philippine Islands to Puerto Rico with transshipment at New York, Baltimore, and Norfolk.

(5) Agreement No. 7973 between Shinnihon Steamship Co., Ltd., and Alcoa Steamship Company, Inc., covers the transportation of cargo under through bills of lading from Japan and the Philippine Islands to the Virgin Islands with transshipment at New York, Baltimore and Norfolk.

(6) Agreement No. 7927 (revised), between Alcoa Steamship Company, Inc., and Moore-McCormack Lines, Inc., covers transportation of general cargo under through bills of lading from Brazil, Argentina and Uruguay to Puerto Rico, with transshipment at New York, Baltimore or Norfolk.

(7) Agreement No. 8210-1, between the Member Lines of the Continental North Atlantic Westbound Freight Conference, modifies the basic agreement of that conference (No. 8210) to provide that new conference members will automatically become a party to, and members withdrawing from the conference will automatically cease to be a party to any agreement entered into between the members and any other carrier or other person subject to the Shipping Act, 1916, as amended.

Interested parties may inspect these agreements and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to any of the agreements and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: April 9, 1954.

By order of the Federal Maritime Board.

[SEAL] GEO. A. VIEHMANN,
Assistant Secretary.

[F. R. Doc. 54-2781; Filed, Apr. 13, 1954; 8:53 a. m.]

Office of the Secretary

FEDERAL MARITIME BOARD AND MARITIME ADMINISTRATION

ORGANIZATION AND FUNCTIONS

The organization and functions statement of the Federal Maritime Board and the Maritime Administration (Department Order No. 117 (Amended)) of September 3, 1953, (18 F. R. 5518), is hereby amended as follows:

1. Section 4 (c) is amended by redesignating the organizational component Office of Ship Construction as the Office of Ship Construction and Repair;

2. Section 5 (b) is amended by transferring the Division of Ship Repair and Maintenance, along with its functions, personnel, and records, from the Office of National Shipping Authority and Government Aid to the Office of Ship Construction and Repair. Accordingly, Sections 5 (b) (11) and (13) are changed to read as follows:

(11) The Office of Ship Construction and Repair is responsible for the conduct of activities relating to ship design and construction; ship repair, reconversion, reconditioning, and betterment, and collecting, analyzing, and evaluating United States and foreign ship construction costs. The Office of Ship Construction and Repair has the following divisions: Division of Preliminary Design, Division of Estimates, Division of Technical Development, and Division of Ship Repair and Maintenance; and contains the Trial and Guarantee Survey Boards;

(13) The Office of National Shipping Authority and Government Aid is responsible for the conduct of activities relating to requirements for and allocation of oceangoing merchant shipping; charter and operation of Maritime Administration-owned or acquired merchant ships; maintenance of reserve fleets; recommendations for purchase, charter in, or requisition of merchant ships for government use; processing applications for subsidy or other government aid; and administering government aid contracts after their execution; and coordinating the work of other organizational components in connection therewith. The Office of National Shipping Authority and Government Aid has, under a Deputy Director for Ship Operations, the following divisions: Division of Operations and Division of Ship Custody; and, under a Deputy Director for Government Aid, the following divisions: Division of Operating Costs and Contracts, Division of Trade Routes, and Division of Charters and Traffic; and

Effective date: March 23, 1954.

[SEAL] SINCLAIR WEEKS,
Secretary of Commerce.

DEPARTMENT OF LABOR

Wage and Hour and Public Contracts Divisions

EMPLOYMENT OF HANDICAPPED CLIENTS BY SHELTERED WORKSHOPS

ISSUANCE OF SPECIAL CERTIFICATES

Notice is hereby given that special certificates authorizing the employment of handicapped clients at hourly wage rates lower than the minimum wage rates applicable under section 6 of the Fair Labor Standards Act of 1938, as amended, and section 1 (b) of the Walsh-Healey Public Contracts Act, as amended, have been issued to the sheltered workshops hereinafter mentioned, under section 14 of the Fair Labor Standards Act of 1938, as amended (sec. 14, 52 Stat. 1068; 29 U. S. C. 214, as amended, 63 Stat. 910), and Part 525 of the regulations issued thereunder, as amended (29 CFR Part 525), and under sections 4 and 6 of the Walsh-Healey Public Contracts Act (secs. 4, 6, 49 Stat. 2038; 41 U. S. C. 38, 40) and Article 1102 of the regulations issued pursuant thereto (41 CFR 201.1102).

The names and addresses of the sheltered workshops, wage rates and the effective and expiration dates of the certificates are set forth below. In each case, the wage rates are established at rates not less than the piece rate paid non-handicapped employees engaged in the same occupation in regular commercial industry maintaining approved labor standards, or at wage rates stipulated in the certificate, whichever is higher.

Portland Goodwill Industries, Inc., 80–82 Union Street, Portland, Maine; at a rate of not less than 50 cents per hour for a training period of 40 hours and 60 cents per hour thereafter. Certificate is effective April 1, 1954, and expires March 31, 1955.

Boston Aid to the Blind, Inc., 295 Huntington Avenue, Boston 15, Massachusetts; at a rate of not less than 30 cents per hour for a training period of 80 hours and 45 cents thereafter on the Wallet-Lacing Project. Certificate is effective April 1, 1954 and expires March 31, 1955.

Opportunity Workshop of the Jewish Vocational Service of Essex County, 652 High Street, Newark 2, New Jersey; at a rate of not less than 25 cents per hour. Certificate is effective March 1, 1954, and expires February 28, 1955.

Syracuse Association of Workers for the Blind, Inc., 425 James Street, Syracuse, New York; at a rate of not less than 30 cents per hour. Certificate is effective March 1, 1954 and expires February 28, 1955.

Brooklyn Association for Improving the Condition of the Poor, 401 State Street, Brooklyn 17, New York; at a rate of not less than 50 cents per hour for a training period of 160 hours and 60 cents thereafter. Certificate is effective April 1, 1954, and expires on March 31, 1955.

Pittsburgh Branch, Pennsylvania Association for the Blind, 308 South Craig Street, Pittsburgh, Pennsylvania; at a rate of not less than 20 cents per hour for a training period of 200 hours and 50 cents per hour thereafter in the Broom, Mop, Brush and Shipping Departments, 40 cents per hour in the Sewing Department. Certificate is effective March 10, 1954, and expires on February 28, 1955.

Alabama Institute for Deaf and Blind, P. O. Box 268, Talladega, Alabama; at a rate of not less than 60 cents per hour. Certificate is effective April 1, 1954, and expires March 31, 1955.

Volunteers of America, 8–16 South St. Clair Street, Toledo 4, Ohio; at a rate of not less than 50 cents an hour for a training period of 40 hours and 70 cents thereafter. Certificate is effective March 1, 1954, and expires February 28, 1955.

Michigan Employment Institution for the Blind, 924 Houghton Street, Saginaw, Michigan; at a rate of not less than 15 cents per hour for a training period of 160 hours and 20 cents thereafter. Certificate is effective March 1, 1954, and expires February 28, 1955.

Volunteers of America, 1411 First Street, Detroit 26, Michigan; at a rate of not less than 20 cents per hour for a training period of 40 hours and 45 cents thereafter. Certificate is effective March 1, 1954, and expires on February 28, 1955.

United Cerebral Palsy of Greater Minneapolis, Inc., 1001 East 24th Street, Minneapolis 4, Minnesota; at a rate of not less than 30 cents per hour. Certificate is effective March 3, 1954, and expires August 31, 1954.

Evansville Association for the Blind, 500 North Second Avenue, Evansville 10, Indiana; at a rate of not less than 45 cents per hour for a training period of 160 hours and 50 cents thereafter. Certificate is effective April 1, 1954, and expires March 31, 1955.

Milwaukee Goodwill Industries, 2102 West Pierce Street, Milwaukee 4, Wisconsin; at a rate of not less than 45 cents per hour. Certificate is effective March 1, 1954, and expires February 28, 1955.

The Lighthouse for the Blind, 2315–21 Locust Street, St. Louis 3, Missouri; at a rate of not less than 25 cents per hour for a training period of 200 hours and 32 cents thereafter. Certificate is effective February 12, 1954, and expires January 31, 1955.

Missouri Goodwill Industries, 4140 Forest Park Boulevard, St. Louis 8, Missouri; at a rate of not less than 50 cents per hour. Certificate is effective February 5, 1954, and expires January 31, 1955.

Dallas County Association for the Blind, 4306 Capitol Avenue, Dallas 4, Texas; at a rate of not less than 25 cents per hour for a training period of 160 hours and 50 cents thereafter. Certificate is effective March 1, 1954, and expires February 28, 1955.

Crippled Children's Society of Los Angeles County, 325 West Adams Boulevard, Los Angeles 7, California; at a rate of not less than 5 cents per hour for a training period of 160 hours and 15 cents thereafter. Certificate is effective April 1, 1954, and expires March 31, 1955.

United Cerebral Palsy Association of Los Angeles, 5201 Beverly Boulevard, Los Angeles 4, California; at a rate of not less than 25 cents per hour. Certificate is effective April 2, 1954, and expires March 31, 1955.

Virginia Commission for the Blind, 508 St. James Street, Richmond 19, Virginia; at a rate of not less than 50 cents per hour for a training period of 320 hours and 65 cents thereafter. Certificate is effective March 1, 1954, and expires February 28, 1955.

The employment of handicapped clients in the above-mentioned sheltered workshops under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 525 of the regulations, as amended. These certificates have been issued on the applicants' representations that they are sheltered workshops as defined in the regulations and that special services are provided their handicapped clients. A sheltered workshop is defined as, "A charitable organization or institution conducted not for profit, but for the purpose of carrying out a recognized program of rehabilitation for individuals whose earning capacity is impaired by age or physical or mental deficiency or injury, and to provide such individuals with remunerative employ-

ment or other occupational rehabilitating activity of an educational or therapeutic nature."

These certificates may be cancelled in the manner provided by the regulations, as amended. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER.

Signed at Washington, D. C., this 5th day of April 1954.

JACOB I. BELLOW,
Assistant Chief of Field Operations.

FEDERAL CIVIL DEFENSE ADMINISTRATION

SECRETARY OF AGRICULTURE OR HIS DESIGNEE

AMENDING DELEGATION OF AUTHORITY OF JULY 31, 1953

1. Pursuant to the authority vested in me by Public Law 875, 81st Congress, 2d Session, as amended, and section 5 of Executive Order 10427 dated January 16, 1953, the Delegation of Authority of July 31, 1953, to the Secretary of Agriculture, appearing in 18 F. R. 4609, August 5, 1953, is amended as follows:

(a) After "Public Law 115" at the end of the title, insert a comma and add "and for other purposes."

(b) At the end of paragraph 1, strike the period, insert a comma and add "and for the purpose of rendering assistance pursuant to the allocation of funds of October 7, 1953."

2. This amendment is effective April 1, 1954.

[SEAL] KATHERINE G. HOWARD,
Acting Administrator,
Federal Civil Defense Administration.

Consented to:

FRED. D. MORSE,
Acting Secretary of Agriculture.

[F. R. Doc. 54-2746; Filed, Apr. 13, 1954; 8:46 a. m.]

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 8837, 10846, 10847]

RADIO STATION WSOC, INC., ET AL.

MEMORANDUM OPINION AND ORDER CONTINUING HEARING

In re applications of Radio Station WSOC, Incorporated, Charlotte, North Carolina, Docket No. 8837, File No. BPCT-304; Piedmont Electronics and Fixture Corporation, Charlotte, North Carolina, Docket No. 10846, File No. BPCT-1621; Carolinas' Television Corporation, Charlotte, North Carolina, Docket No. 10847, File No. BPCT-1817; for construction permits for new television stations.

1. On March 23, 1954, there was issued a Statement and Order to govern the course of this proceeding pursuant to § 1.841 of the rules. On April 2, 1954, the Chief of the Broadcast Bureau filed an appeal from this order as it related to the points of reliance which were accepted from the several applicants. At the same time the Bureau filed a motion with the Examiner to request a stay of the proceedings which are now scheduled to commence on April 7, 1954. An informal conference was held on April 2, 1954, with counsel for all of the parties in attendance.

2. Radio Station WSOC, Incorporated, and Carolinas' Television Corporation consented to the continuance on the ground that they did not wish to incur a possible rehearing in the event that the Commission should sustain the appeal and order the drafting of new points of reliance. Piedmont Electronics and Fixture Corporation objected to the continuance, stating that hotel reservations had been made for witnesses during a particularly crowded season in Washington and the applicant had been to some trouble in making arrangements for the preparation of the hearing as it is presently scheduled. It also appears that any continuance of the hearing will seriously affect commitments of counsel for subsequent hearings.

3. The issue raised on appeal by the Broadcast Bureau is one of critical importance in the development of the new procedures. Essentially it seeks an answer from the commission as to which interpretation of the word "specificity" would best conserve time and promote expedition, the Examiner's or the Bureau's. Assuming that the hearing should proceed it is possible that a decision on this question would not require any retrial of the case. On the other hand, since the matter is one of primary importance a retrial could conceivably be necessary. It is true that the parties are all prepared to go forward and would, except for the Bureau's action, prefer to do so. However, in view of all the circumstances and considering the risks which would be entailed in going forward at this time, two of the applicants have been persuaded to urge acquiescence in the Bureau's request for a continuance. Reluctant as I am to continue a hearing pending the resolution of an interlocutory question, I am nonetheless convinced that the peculiar circumstances of this case warrant doing so.

4. Incidental to the commencement of the hearing is the submission of all exhibits relating to the direct cases of the three applicants. These exhibits, as provided in the Statement and Order of March 23, 1954, are to be brought to the office of the Hearing Examiner on April 5, 1954. Since the exhibits are ready for presentation, the continuance contained herein will not affect submission of these exhibits. However, no exhibits will be exchanged among counsel until a definite date is set for taking testimony.

5. *Therefore, it is ordered,* This 5th day of April 1954, that the hearing now scheduled to commence on April 7, 1954, is continued indefinitely.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 54-2775; Filed, Apr. 13, 1954; 8:52 a. m.]

[Docket Nos. 10719, 10720, 10993]

WHITE RADIO CO. ET AL.

ORDER DESIGNATING APPLICATION FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of W. Erle White, trading as White Radio Company, Wichita Falls, Texas, Docket No. 10719, File No. BP-8615; Lawton Broadcasting Company, Lawton, Oklahoma, Docket No. 10720, File No. BP-8689; Progressive Broadcasting Company, Lawton, Oklahoma, Docket No. 10993 File No. BP-9122; for construction permits.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 7th day of April 1954;

The Commission having under consideration the above-entitled application of the Progressive Broadcasting Company for a construction permit for a new standard broadcast station to operate on 1050 kilocycles with a power of 250 watts, using a directional antenna, daytime only, at Lawton, Oklahoma; and

It appearing that the applicant is legally, technically, financially and otherwise qualified to operate the proposed station, but that the operation would result in mutually prohibitive interference with the operations proposed by the above-entitled applications of the Lawton Broadcasting Company and the White Radio Company and otherwise not comply with the Standards of Good Engineering Practice; particularly with reference to providing the recommended minimum of interference-free service within the proposed station's normally protected daytime (0.5 mv/m) contour; and

It further appearing, that the Commission on October 14, 1953 designated the above-entitled applications of the Lawton Broadcasting Company and the White Radio Company for hearing in a consolidated proceeding which hearing is now scheduled to commence on May 4, 1954; and

It further appearing that in a section 309 (b) letter dated February 18, 1954 the Progressive Broadcasting Company was notified of the aforementioned matters and of its being entitled to be heard in the said consolidated proceeding because its application was timely filed; and

It further appearing that in a reply filed on March 17, 1954 the applicant stated that it would appear and present evidence at a hearing on its application; and

It further appearing that the Commission, after consideration of the foregoing, is of the opinion that a hearing is necessary;

It is ordered, That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled application of the Progressive Broadcasting Company is designated for hearing in a consolidated proceeding with the applications of the Lawton Broadcasting Company (Docket No. 10720, File No. BP-8689) and the White Radio Company (Docket No. 10719, File No. BP-8615) in Washington, D. C., on May 4, 1954, at 10:00 a. m. upon the following issues:

1. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed station, and the availability of other primary service to such areas and populations.

2. To determine whether the installation and operation of the proposed station would be in compliance with the Commission's rules and Standards of Good Engineering Practice concerning Standard Broadcast Stations with particular reference to providing the recommended minimum of interference-free service within the proposed station's normally protected daytime (0.5 mv/m) contour.

3. To determine in the light of section 307 (b) of the Communications Act of 1934, as amended, which, if any, of the above-named applicants would provide the most fair, efficient and equitable distribution of radio service.

4. To determine, on a comparative basis, whether the operation proposed in the above-entitled application of the Progressive Broadcasting Company, the Lawton Broadcasting Company or the White Radio Company would best serve the public interest, convenience or necessity in light of the evidence adduced under the foregoing issues and the record made with respect to the significant differences between the applicants as to:

(a) The background and experience of each of the above-named applicants to own and operate the proposed stations.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed stations.

(c) The programming service proposed in each of the above-mentioned applications.

It is further ordered, That issues 3 and 4 as set forth above are made issues in the hearing designated by the Commission in its Order of October 14, 1953 concerning the applications of Lawton Broadcasting Company (Docket No. 10720; File No. BP-8689) and the White Radio Company (Docket No. 10719; File No. BP-8615).

Released: April 9, 1954.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[F. R. Doc. 54-2776; Filed, Apr. 13, 1954; 8:52 a. m.]

[Docket Nos. 10991, 10992]

WOOF TELEVISION CORP. AND ALA-FLA-GA TELEVISION, INC.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of WOOF Television Corporation, Dothan, Alabama, Docket No. 10991, File No. BPTC-1830; ALA-FLA-GA Television, Inc., Dothan, Alabama, Docket No. 10992, File No. BPTC-1839; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 7th day of April 1954;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 9 in Dothan, Alabama; and

It appearing that the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters of the fact that their applications were mutually exclusive, of the necessity for a hearing and of all objections to their applications; and were given an opportunity to reply; and

It further appearing that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory; and that WOOF Television Corporation is legally, financially and technically qualified to construct, own and operate a television broadcast station; and that ALA-FLA-GA Television, Inc. is legally and financially qualified to construct, own and operate a television broadcast station and is technically so qualified except as to issue "1" below, and is otherwise qualified except as to issue "2" below;

It is ordered, That pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on the 7th day of May 1954 in Washington, D. C. upon the following issues:

1. To determine whether the installation and operation of the station proposed by ALA-FLA-GA Television, Inc. in the above-entitled application would constitute a hazard to air navigation.

2. To determine, in the light of the main studio location proposed by ALA-FLA-GA Television, Inc. whether a waiver of § 3.613 (a) of the Commission's rules should be granted.

3. To determine on a comparative basis which of the operations proposed in the above-entitled applications would better serve the public interest, convenience and necessity in the light of the record made with respect to the significant differences between the applications as to:

(a) The background and experience of each of the above-named applicants having a bearing on its ability to own and operate the proposed television station.

(b) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(c) The programming service proposed in each of the above-entitled applications.

It is further ordered, That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue: To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: April 8, 1954.

FEDERAL POWER COMMISSION

[Docket No. E 6558]

IOWA PUBLIC SERVICE CO.

NOTICE OF APPLICATION

APRIL 7, 1954.

Take notice that on April 5, 1954, an application was filed with the Federal Power Commission, pursuant to section 204 of the Federal Power Act, by Iowa Public Service Company, a corporation organized under the laws of the State of Iowa and qualified to do business as a foreign corporation in the States of South Dakota and Nebraska, with its principal business office at Sioux City, Iowa, seeking an order authorizing the issuance of $7,500,000 aggregate principal amount of First Mortgage Bonds, —— Percent Series due 1984. The New Bonds will constitute an additional series of First Mortgage Bonds to be issued under the Company's Mortgage and Deed of Trust. The New Bonds will be issued under competitive bidding and will be dated as of May 1, 1954, will be issued on or about May 17, 1954, and will mature on May 1, 1984. The net proceeds from the sale of the New Bonds will be used, together with cash derived from operations, to provide the funds required for the redemption of $7,500,000 aggregate principal amount of the Company's First Mortgage Bonds, 4 percent Series due 1983, at 102.42 percent of the principal amount thereof, plus accrued interest to the date fixed for redemption; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard or to make any protest with reference to said application should, on or before the 26th day of April 1954, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's rules of practice and procedure. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
Secretary.

[Docket No. G-2371]

EL PASO NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure. Applicant having requested that its application filed February 17 and supplemented February 19, 1954, pursuant to section 7 of the Natural Gas Act, for authorization to construct and operate certain facilities as described in said application, be heard under the shortened procedure provided by the aforesaid rule for non-contested proceedings, and no request to be heard, protest or petition having been filed subsequent to the giving of due notice of the filing of the application including publication in the FEDERAL REGISTER on March 11, 1954 (19 F. R. 1374).

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on April 21, 1954 at 9:30 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by the application: *Provided, however*, That the Commission may, after a noncontested hearing, forthwith dispose of the proceedings pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: April 7, 1954.

Issued: April 8, 1954.

By the Commission.

[Docket No. G-2404]

KANSAS-NEBRASKA NATURAL GAS CO., INC.

ORDER SUSPENDING PROPOSED TARIFF AND PROVIDING FOR HEARING

On March 8, 1954, Kansas-Nebraska Natural Gas Company, Inc. (Kansas-Nebraska) tendered for filing its FPC Gas Tariff, Original Volume No. 1, proposing, among other things, an annual rate increase of $694,000, or 31 percent, to its five wholesale customers, based on sales for the 12-month period ended November 30, 1953.

In support of its increased rates and charges, Kansas-Nebraska has utilized inter alia rate of return of 6¾ percent and allocation methods which depart from the principles and procedures heretofore adopted by the Commission. Thus, the increased rates and charges provided in the proposed tariff have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential or otherwise unlawful. Several purchasers have requested suspension of the proposed increased rates and charges.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing, pursuant to the authority contained in section 4 of such act, concerning the lawfulness of Kansas-Nebraska's FPC Gas Tariff, Original Volume No. 1 and that said tariff be suspended as hereinafter provided and the use thereof be deferred pending hearing and decision thereon.

The Commission orders:

(A) Pursuant to the authority contained in section 4 and 15 of the Natural Gas Act, a public hearing be held upon a date to be fixed by further order of the Commission concerning the lawfulness of rates, charges, services, and classifications contained in Kansas-Nebraska's FPC Gas Tariff, Original Volume No. 1, and the service agreements thereunder.

(B) Pending such hearing and decision thereon, Kansas-Nebraska's FPC Gas Tariff, Original Volume No. 1, be and the same is hereby suspended and the use thereof deferred until September 8, 1954, and until such further time as it may be made effective in the manner prescribed by the Natural Gas Act, unless otherwise ordered by the Commission.

(C) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: April 7, 1954.

Issued: April 8, 1954.

By the Commission.

[F. R. Doc. 54-2751; Filed, Apr. 13, 1954; 8:47 a. m.]

SECURITIES AND EXCHANGE COMMISSION

VALLEY ROYALTIES

ORDER FOR PROCEEDINGS AND NOTICE OF HEARING

In the matter of Valley Royalties, 626 Fourth Street, Alamosa, Colorado.

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 7th day of April 1954.

I. The Commission's public official files disclose that Valley Royalties, a partnership, hereinafter referred to as registrant, is registered as a broker-dealer pursuant to section 15 (b) of the Securities Exchange Act of 1934.

II. The Records Officer of the Commission has filed with the Commission a statement, a copy of which is attached hereto and made a part hereof,[1] stating that registrant did not file with the Commission reports of his financial condition during the calendar years 1952 and 1953, as required by section 17 (a) of the Securities Exchange Act of 1934 and Rule X-17A-5 adopted thereunder.

III. The information reported to the Commission by its Records Officer as set forth in Paragraph II hereof tends, if true, to show that registrant violated section 17 (a) of the Securities Exchange Act of 1934 and Rule X-17A-5 adopted under said section.

IV. The Commission, having considered the aforesaid information, deems it necessary and appropriate in the public interest and for the protection of investors that proceedings be instituted to determine:

(a) Whether the statement referred to in Paragraph II hereof is true;

(b) Whether registrant has wilfully violated section 17 (a) of the Securities Exchange Act of 1934 and Rule X-17A-5 adopted under said section;

(c) Whether, pursuant to section 15 (b) of the Securities Exchange Act of 1934, it is in the public interest to revoke registration of registrant; and

(d) Whether, pursuant to section 15 (b) of the Securities Exchange Act of 1934, pending final determination, it is necessary or appropriate in the public interest or for the protection of investors to suspend the registration of registrant.

V. *It is ordered*, That registrant be given an opportunity for hearing as set forth in Paragraph IV hereof on the 27th day of April 1954, at the main office of the Securities and Exchange Commission, located at 425 Second Street NW., Washington 25, D. C., before a Hearing Examiner to be designated by the Commission. On such date the Hearing Room Clerk in Room 193, North Building, will advise the parties and the Hearing Examiner as to the room in which such hearing will be held. The Commission will consider any motion with respect to a change of place of said hearing if said motion is filed with the Secretary of the Commission on or before April 21, 1954. Upon completion of any such hearing in this matter the Hearing Examiner shall prepare a recommended decision pursuant to Rule IX of the rules of practice unless such decision is waived.

It is further ordered, That in the event registrant does not appear personally or through a representative at the time and place herein set or as otherwise ordered, the Hearing Room Clerk shall file with the Records Officer of the Commission a written statement to that effect and thereupon the Commission will take the record under advisement for decision.

This order and notice shall be served on registrant personally or by registered mail forthwith, and published in the FEDERAL REGISTER not later than fifteen (15) days prior to April 27, 1954.

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision upon the matter except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of section 4 (c) of the Administrative Procedure Act, it is not deemed to be subject to the provisions of the section delaying the effective date of any final Commission action.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

WILBERT LEE HABERTHIER

ORDER FOR PROCEEDINGS AND NOTICE OF HEARING

In the matter of Wilbert Lee Haberthier, Box 503, Limon, Colorado.

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 7th day of April 1954.

I. The Commission's public official files disclose that Wilbert Lee Haberthier, a sole proprietor, hereinafter referred to as registrant, is registered as a broker-dealer pursuant to section 15 (b) of the Securities Exchange Act of 1934.

II. The Records Officer of the Commission has filed with the Commission a statement, a copy of which is attached hereto and made a part hereof,[1] stating that registrant did not file with the Commission reports of his financial condition during the calendar years 1952 and 1953, as required by section 17 (a) of the Securities Exchange Act of 1934 and Rule X-17A-5 adopted thereunder.

III. The information reported to the Commission by its Records Officer as set forth in Paragraph II hereof tends, if true, to show that registrant violated section 17 (a) of the Securities Exchange Act of 1934 and Rule X-17A-5 adopted under said section.

IV. The Commission, having considered the aforesaid information, deems it necessary and appropriate in the public interest and for the protection of investors that proceedings be instituted to determine:

(a) Whether the statement referred to in Paragraph II hereof is true;

(b) Whether registrant has wilfully violated section 17 (a) of the Securities Exchange Act of 1934 and Rule X-17A-5 adopted under said section;

(c) Whether, pursuant to section 15 (b) of the Securities Exchange Act of 1934, it is in the public interest to revoke registration of registrant; and

(d) Whether, pursuant to section 15 (b) of the Securities Exchange Act of 1934, pending final determination, it is necessary or appropriate in the public interest or for the protection of investors to suspend the registration of registrant.

V. *It is ordered*, That registrant be given an opportunity for hearing as set forth in paragraph IV hereof on the 27th day of April 1954, at the main office of the Securities and Exchange Commission, located at 425 Second Street NW., Washington 25, D. C., before a Hearing Examiner to be designated by the Commission. On such date the Hearing Room Clerk in Room 193, North Building, will advise the parties and the Hearing Examiner as to the room in which such hearing will be held. The Commission will consider any motion with respect to a change of place of said hearing if said motion is filed with the Secretary of the Commission on or before Aoril 21, 1954. Upon completion of any such hearing in this matter the Hearing Examiner shall prepare a recommended decision pursuant to Rule IX of the rules of practice unless such decision is waived.

It is further ordered, That in the event registrant does not appear personally or through a representative at the time and place herein set or as otherwise ordered, the Hearing Room Clerk shall file with the Records Officer of the Commission a written statement to that effect and thereupon the Commission will take the record under advisement for decision.

This order and notice shall be served on registrant personally or by registered mail forthwith, and published in the FEDERAL REGISTER not later than fifteen (15) days prior to April 27, 1954.

In the absence of an appropriate waiver, no officer or employee of the Commission engaged in the performance of investigative or prosecuting functions in this or any factually related proceeding will be permitted to participate or advise in the decision upon the matter except as witness or counsel in proceedings held pursuant to notice. Since this proceeding is not "rule making" within the meaning of section 4 (c) of the Administrative Procedure Act, it is not deemed to be subject to the provisions of

the section delaying the effective date of any final Commission action.

By the Commission.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 29109]

VARIOUS COMMODITIES BETWEEN POINTS IN TEXAS

APPLICATION FOR RELIEF

APRIL 9, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: Lee Douglass, Agent, for carriers parties to schedule listed below.

Commodities involved: Various commodities.

Between: Points in Texas.

Grounds for relief: Rail competition, to meet intrastate rates, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: Lee Douglass, Agent, I. C. C. No. 807, supp. 42.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 29110]

SODA ASH FROM BATON ROUGE AND NORTH BATON ROUGE, LA., TO GEORGETOWN, S. C.

APPLICATION FOR RELIEF

APRIL 9, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Soda ash, in bulk, carloads.

From: Baton Rouge and North Baton Rouge, La.

To: Georgetown, S. C.

Grounds for relief: Competition with rail carriers, circuity, and additional route.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1400, supp. 19.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 29111]

MOTOR-RAIL RATES BETWEEN CERTAIN POINTS IN THE EAST

APPLICATION FOR RELIEF

APRIL 9, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: The New York, New Haven and Hartford Railroad Company and the Adley Express Company.

Commodities involved: Semi-trailers, loaded or empty, on flat cars.

Between: Boston, Mass., Hartford, Conn., New Haven, Conn., Providence, R. I., Springfield, Mass., and Worcester, Mass., on the one hand, Harlem River, N. Y., Elizabeth and Edgewater, N. J., on the other, also between New Haven and named New England points.

Grounds for relief: Competition with motor carriers.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[No. 31494]

KENTUCKY INTRASTATE RATES AND CHARGES ON COAL

NOTICE OF INVESTIGATION AND HEARING

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 30th day of March A. D. 1954.

It appearing that a petition dated March 1, 1954, has been filed on behalf of the Artemus-Jellico Railroad Company and other common carriers by railroad operating to, from and between points in the State of Kentucky, in interstate and intrastate commerce, averring that in Ex Parte No. 175, Increased Freight Rates, 1951, 280 I. C. C. 179; 281 I. C. C. 557; 284 I. C. C. 589, and 289 I. C. C. 395, the Commission authorized carriers subject to the Interstate Commerce Act parties thereto to make certain increases in their freight rates, including rates on coal, for interstate application throughout the United States; and that increases under such authorizations have been made;

It further appearing that the petitioners allege that the Railroad Commission of Kentucky, by various orders, has refused to authorize or permit them to apply to the transportation of coal, moving intrastate by railroad in the State of Kentucky, increases in freight rates and charges corresponding to those approved for interstate application in the proceeding above cited;

It further appearing that the petitioners allege that such refusal causes and results in undue and unreasonable advantage, preference, and prejudice as between persons and localities in intrastate commerce, on the one hand, and interstate commerce, on the other hand, and in undue, unreasonable and unjust discrimination against interstate commerce in violation of section 13 of the Interstate Commerce Act;

And it further appearing that there have been brought in issue by the said petition rates and charges made or imposed by authority of the State of Kentucky:

It is ordered, That in response to the said petition, an investigation be, and it is hereby, instituted, and that a hearing be held therein for the purpose of receiving evidence from the respondents hereinafter designated and any other persons interested to determine whether the rates and charges of the common carriers by railroad, or any of them, operating in the State of Kentucky, for the intrastate transportation of coal, made or imposed by authority of the State of Kentucky, cause or will cause, by reason of the failure of such rates and charges to includes increases corresponding to those permitted by this Commission for interstate traffic in said Ex Parte No. 175, Increased Freight Rates, 1951, supra, any undue or unreasonable advantage, preference or prejudice, as between persons or localities in intrastate commerce, on the one hand, and interstate or foreign commerce, on the other hand, or any undue, unreasonable or unjust discrimination against interstate or foreign commerce; and to determine what rates and charges, if any, or what maximum or minimum, or maximum and minimum rates and charges shall be prescribed to remove the unlawful advantage, preference, prejudice, or discrimination, if any, that may be found to exist;

It is further ordered, That all common carriers by railroad operating within the State of Kentucky which are subject to the jurisdiction of this Commission be, and they are hereby, made respondents to this proceeding; that a copy of

this order be served upon each of the said respondents; and that the State of Kentucky be notified by sending copies of this order and of said petition by registered mail to the Governor of the said State and to the Railroad Commission of the State of Kentucky, at Frankfort, Ky.

It is further ordered, That notice of this proceeding be given to the public by depositing a copy of this order in the office of the Secretary of the Commission, at Washington, D. C., for public inspection, and by filing a copy with the Director, Division of the Federal Register, Washington, D. C.;

And it is further ordered, That this proceeding be assigned for hearing at such time and place as the Commission may hereafter designate.

By the Commission, Division 1.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[Notice No. 2]

APPLICATIONS OF MOTOR CARRIERS OF PROPERTY

APRIL 9, 1954.

Protests to the granting of an application must be filed with the Commission within 30 days from the date of publication of this notice in the FEDERAL REGISTER (49 CFR 1.240). Failure to seasonably file a protest will be construed as a waiver of opposition and participation in the proceeding unless an oral hearing is held. In addition to other requirements of Rule 40 of the general rules of practice of the Commission (49 CFR 1.40), protests shall include a request for a public hearing, if one is desired, and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests containing general allegations may be rejected. Requests for an oral hearing must be supported by an explanation as to why the evidence cannot be submitted in the form of affidavits. Any interested person, not a protestant, desiring to receive notice of the time and place of any hearing, prehearing conference, taking of depositions, or other proceedings shall notify the Commission by letter or telegram within 30 days from the date of publication of this notice in the FEDERAL REGISTER.

APPLICATIONS FOR OPERATING AUTHORITY

Sherman, 514 Equitable Building, Denver, Colo. For authority to operate as a *common carrier*, over irregular routes, transporting: *Coach trailers, house trailers, commercial trailers, laboratory trailers, cabin trailers, bungalow trailers*, and *special purpose trailers*, in both initial and secondary movements, by truckaway and towaway service, from points in Colorado to points in California and Nevada.

No. MC 114641, S. B. PLATT, III, DOING BUSINESS AS COLUMBUS WAREHOUSE & STORAGE CO., 1504 Main Street, Columbus, Miss. For authority to operate as a *contract carrier*, over irregular routes, transporting: *Commodities classified* as (1) *meats, meat products* and *meat byproducts*, (2) *dairy products*, and (3) *articles distributed by meat-packing houses*, as defined by the Commission, from Columbus, Miss., to points in Mississippi and Alabama within 100 miles of Columbus, Miss., and *empty containers or other such incidental facilities* (not specified) used in transporting the commodities specified in this application, on return movement.

APPLICATIONS UNDER SECTIONS 5 AND 210A (B)

Except when circumstances require immediate action, an application for approval, under section 210a (b) of the act, of the temporary operation of motor carrier properties sought to be acquired in an application under section 5 (2) will not be disposed of sooner than 10 days from the date of publication of this notice in the FEDERAL REGISTER. If a protest is received prior to action being taken, it will be considered.

No. MC-F-5651. Authority sought for purchase by Crane and Truck Service, Incorporated, Fifty-first Street & A. V. R. R., Pittsburgh, Pa., of a portion of the operating rights of A. J. Metler, 117 Chicamauga Avenue, NE., Knoxville, Tenn., and for acquisition by M. C. Harrison, E. J. Harrison and W. T. Wells, Pittsburgh, Pa., and Harrison Construction Co., Pittsburgh, Pa., of control of the operating rights through the purchase. Applicants' attorney: Robert S. Young, Jr., 1003 Burwell Bldg., Knoxville, Tenn. Operating rights sought to be transferred: *Sulphur*, in bulk, in dump vehicles, as a *common carrier*, over irregular routes, from Knoxville to Lowland, Tenn. Vendee is authorized to operate in Ohio and Pennsylvania. Application has not been filed for temporary authority under section 210a (b).

No. MC-F-5671. Authority sought for purchase by Indianhead Truck Line, Inc., 1670 Roblyn Avenue, St. Paul, Minn., of a portion of the operating rights of Arnt Wedul, doing business as Wedul Truck Line, Thief River Falls, Minn., and for acquisition by Lester A. Wilsey, St. Paul, Minn., of control of the operating rights through the purchase. Applicants' attorney: Glenn W. Stephens, 121 West Doty Street, Madison, Wis. Operating rights sought to be transferred: *Petroleum products*, as a *common carrier*, over irregular routes, between Viking, Minn., and points within 20 miles of Viking, on the one hand, and, on the other, Fargo, West Fargo, and Grand Forks, N. Dak. Vendee is authorized to operate in Wisconsin, Minnesota, Illinois, Michigan, Iowa, South Dakota, and North Dakota. Application has not been filed for temporary authority under section 210a (b).

No. MC-F-5676. Authority sought for purchase by C. C. White, Thomas L. White and Jack C. White, doing business as White's Transportation, Route 2, Box 36, Manteca, Calif., of the operating rights of L. W. Koerner, doing business as Trans-California Motor Lines, 760 Ferry St., Oakland, Calif. Applicants' attorney: J. Richard Townsend, 1700 Mills Tower, San Francisco, Calif. Operating rights sought to be transferred: *Canned goods*, as a *common carrier*, over irregular routes, from points in San Joaquin County, Calif., to Stockton, Calif.; *Grain, beans* and *fruits*, from points in San Joaquin and Sacramento Counties, Calif., to Stockton, Calif.; *Fertilizer*, from Stockton to points in San Joaquin and Sacramento Counties, Calif. Vendee is authorized to operate in California. Application has not been filed for temporary authority under section 210a (b).

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

FEDERAL REGISTER

VOLUME 19 NUMBER 73

Washington, Thursday, April 15, 1954

TITLE 7—AGRICULTURE

Chapter I—Agricultural Marketing Service (Standards, Inspections, Marketing Practices), Department of Agriculture

PART 52—PROCESSED FRUITS AND VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

SUBPART—UNITED STATES STANDARDS FOR GRADES OF FROZEN APPLES[1]

On February 2, 1954, a notice of proposed rule making was published in the FEDERAL REGISTER (19 F. R. 559) regarding a proposed revision of United States Standards for Grades of Frozen Apples.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, the following United States Standards for Grades of Frozen Apples are hereby promulgated pursuant to the authority contained in the Agricultural Marketing Act of 1946 (60 Stat. 1087 et seq., 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953).

The standards are as follows:

PRODUCT DESCRIPTION, STYLES, AND GRADES

Sec.

52.361 Product description.
52.362 Styles of frozen apples.
52.363 Grades of frozen apples.

FACTORS OF QUALITY

52.364 Ascertaining the grade.
52.365 Ascertaining the rating for the factors which are scored.
52.366 Color.
52.367 Size.
52.368 Defects.
52.369 Character.

LOT CERTIFICATION TOLERANCES

52.370 Tolerances for certification of officially drawn samples.

SCORE SHEET

52.371 Score sheet for frozen apples.

[1] The requirements of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

AUTHORITY: §§ 52.361 to 52.371 issued under sec. 205, 60 Stat. 1090, 67 Stat. 205; 7 U. S. C. 1624.

PRODUCT DESCRIPTION, STYLES, AND GRADES

§ 52.361 *Product description.* Frozen apples are prepared from sound, properly ripened fruit of Malus sylvestris (Pyrus malus); are peeled, cored, trimmed, sliced, sorted, and washed; are properly drained before filling into containers; may be packed with or without the addition of a nutritive sweetening ingredient and any other ingredient permissible under the provisions of the Federal Food, Drug, and Cosmetic Act; and are frozen in accordance with good commercial practice and maintained at temperatures necessary for the preservation of the product.

§ 52.362 *Styles of frozen apples.* (a) "Slices" means frozen apples consisting of slices of apples cut longitudinally and radially from the core axis.

§ 52.363 *Grades of frozen apples.* (a) "U. S. Grade A" or "U. S. Fancy" is the quality of frozen apples that possess similar varietal characteristics; that possess a good flavor; that possess a good color; that are practically uniform in size; that are practically free from defects; that possess a good character; and that score not less than 85 points when scored in accordance with the scoring system outlined in this subpart: *Provided*, That the frozen apples may be only fairly uniform in size, if the total score is not less than 85 points.

(b) "U. S. Grade C" or "U. S. Standard" is the quality of frozen apples that possess similar varietal characteristics; that possess a fairly good flavor; that possess a fairly good color; that are fairly uniform in size; that are fairly free from defects; that possess a fairly good character; and that score not less than 70 points when scored in accordance with the scoring system outlined in this subpart.

(c) "Substandard" is the quality of frozen apples that fail to meet the requirements of U. S. Grade C or U. S. Standard.

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

CFR SUPPLEMENTS

(For use during 1954)

The following Supplements are now available:

Titles 30–31 ($1.00)

Title 33 ($1.25)

Titles 44–45 ($0.75)

Previously announced: Title 3, 1953 Supp. ($1.50); Title 8 ($0.35); Titles 10–13 ($0.50); Title 16 ($1.00); Title 18 ($0.45); Titles 22–23 ($1.00); Title 24 ($0.75); Title 25 ($0.45); Titles 40–42 ($0.50); Title 49: Parts 1 to 70 ($0.60); Parts 71 to 90 ($0.65); Parts 91 to 164 ($0.45); Parts 165 to end ($0.60)

Order from Superintendent of Documents, Government Printing Office, Washington 25, D. C.

FACTORS OF QUALITY

§ 52.364 *Ascertaining the grade.* (a) The grade of frozen apples is ascertained by considering the requirements with respect to varietal characteristics, which are not scored, and the factors of color, size, defects, and character, which are scored.

(b) The relative importance of each factor which is scored is expressed numerically on the scale of 100. The maximum number of points that may be given such factors is:

Factors:	Points
Color	20
Size	20
Defects	20
Character	40
Total score	100

(c) The scores for the factors of color, size, defects, and character are determined immediately after thawing to the extent that the product is substantially free from ice crystals and can be handled as individual units.

(d) "Good flavor" means that the product has a good, characteristic normal flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

(e) "Fairly good flavor" means that the product may be lacking in good flavor and odor and is free from objectionable flavors and objectionable odors of any kind.

§ 52.365 *Ascertaining the rating for the factors which are scored.* The essential variations within each factor which is scored are so described that the value may be ascertained for such factors and expressed numerically. The numerical range within each factor which is scored is inclusive (for example, "17 to 20 points" means 17, 18, 19, or 20 points).

§ 52.366 *Color*—(a) *(A) classification.* Frozen apples that possess a good color may be given a score of 17 to 20 points. "Good color" means that the frozen apples, internally and externally, possess a reasonably uniform bright color, characteristic of apples of similar varieties.

(b) *(C) classification.* Frozen apples that possess a fairly good color may be given a score of 14 to 16 points. Frozen apples that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good color" means that the frozen apples possess a color that is typical of apples of similar varietal characteristics, that may be variable, and that the product may possess a slight but not markedly brown or gray cast and shall be practically free from internal discoloration.

(c) *(SStd.) classification.* Frozen apples that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.367 *Size*—(a) *General.* The factor of size refers to the degree of wholeness and to the uniformity of thickness of the units.

(1) "Practically whole slice" means that the slice may be cut or broken but at least ¾ of the original slice remains.

(b) *(A) classification.* Frozen apples that are practically uniform in size may be given a score of 17 to 20 points. "Practically uniform in size" means that: At least 90 percent, by weight, of the product consists of whole or practically whole slices of 1¼ inches in length or longer, and that of the 90 percent, by weight, of the product consisting of units of the most uniform thickness, the thickness of the slices does not vary more than ¼ inch.

(c) *(C) classification.* Frozen apples that are fairly uniform in size may be given a score of 14 to 16 points. "Fairly uniform in size" means that at least 75 percent, by weight, of the product consists of whole or practically whole slices of 1¼ inches in length or longer.

(d) *(SStd.) classification.* Frozen apples that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.368 *Defects*—(a) *General.* The factor of defects refers to the degree of freedom from harmless extraneous matter, from damaged or seriously damaged units, and from carpel tissue.

(1) "Harmless extraneous matter" means any vegetable substance (including, but not being limited to, a leaf, stem, or portions thereof, cores and portions of cores, and seeds), that is harmless.

(2) "Damaged unit" means any unit possessing green peel that exceeds in the aggregate an area of a circle ½ inch in diameter, or red peel that exceeds in the aggregate an area of a circle ¼ inch in diameter, light brown bruise that exceeds the area of a circle ½ inch in diameter or which is more than ⅛ inch deep, and any unit in which the appearance or eating quality is materially affected by blossom and material, dark brown bruise, or other internal or external discoloration, or by any other means.

(3) "Seriously damaged unit" means any unit damaged to such an extent that the appearance or eating quality is seriously affected.

(4) "Practically free from carpel tissue" means that for each 16 ounces of the product, the carpel tissue present does not exceed in the aggregate an area equal to ¾ square inch.

(5) "Fairly free from carpel tissue" means that for each 16 ounces of the product the carpel tissue present does not exceed an area equal to 1½ square inches.

(b) *(A) classification.* Frozen apples that are practically free from defects may be given a score of 17 to 20 points. "Practically free from defects" means that extraneous matter may be present that does not materially affect the appearance or eating quality of the product; that the product is practically free from carpel tissue; and that not more than a total of 5 percent, by weight, of the units may be damaged, of which not more than 1 percent, by weight, of all the units may be seriously damaged: *Provided*, That extraneous matter, damaged and seriously damaged units, singly or in combination, do not materially affect the appearance or eating quality of the product.

(c) *(C) classification.* Frozen apples that are fairly free from defects may be given a score of 14 to 16 points. Frozen apples that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly free from defects" means that extraneous matter may be present that does not seriously affect the appearance or eating quality of the product; that the product is fairly free from carpel tissue; and that not more than a total of 15 percent, by weight, of the units may be damaged, of which not more than 3 percent, by weight, of all the units may be seriously damaged: *Provided*, That extraneous matter, damaged and seriously damaged units, singly or in combination, do not seriously affect the appearance or eating quality of the product.

(d) *(SStd.) classification.* Frozen apples that fail to meet the requirements of paragraph (c) of this section may be given a score of 0 to 13 points and shall not be graded above Substandard, regardless of the total score for the product (this is a limiting rule).

§ 52.369 *Character*—(a) *General.* The factor of character refers to the texture of the units and to the tendency to retain their conformation without material softening or disintegration.

(1) "Mushy apples" means slices or units or portions thereof that are a pulpy mass and of a consistency approximating applesauce.

(b) *(A) classification.* Frozen apples that possess a good character may be given a score of 34 to 40 points. "Good character" means that the units possess a reasonably uniform texture, are firm but not hard, with not more than 3 percent of the weight of the product consisting of mushy apples.

(c) *(C) classification.* Frozen apples that possess a fairly good character may be given a score of 28 to 33 points. Frozen apples that fall into this classification shall not be graded above U. S. Grade C or U. S. Standard, regardless of the total score for the product (this is a limiting rule). "Fairly good character" means that the slices may be variable in texture, with not more than 12 percent of the weight of the product consisting of units that are markedly hard, markedly soft, or mushy.

(d) *(SStd.) classification.* Frozen apples that fail to meet the requirements of paragraph (b) of this section may be given a score of 0 to 27 points and shall not be graded above substandard, regardless of the total score for the product (this is a limiting rule).

LOT CERTIFICATION TOLERANCES

§ 52.370 *Tolerances for certification of officially drawn samples.* (a) When certifying samples that have been officially drawn and which represent a specific lot of frozen apples, the grade for such lot will be determined by averaging the total scores of the containers comprising the sample, if, with respect to the containers comprising the sample:

(1) Not more than one-sixth of the containers fails to meet the grade indicated by the average of such total scores;

(2) None of the containers falls more than 4 points below the minimum score for the grade indicated by the average of such total scores;

(3) None of the containers falls more than one grade below the grade indicated by the average of such total scores;

(4) The average score of all containers for any factor subject to a limiting rule is within the score range of that factor for the grade indicated by the average of such total scores; and

(5) All containers meet all applicable standards of quality promulgated under the Federal Food, Drug, and Cosmetic Act and in effect at the time of the aforesaid certification.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

PART 984—HANDLING OF WALNUTS GROWN IN CALIFORNIA, OREGON AND WASHINGTON

INCREASE IN RATE OF ASSESSMENT FOR MARKETING YEAR BEGINNING AUGUST 1, 1953

Pursuant to Marketing Agreement No. 105 and Order No. 84 (7 CFR, 1952 Rev., Part 984) regulating the handling of walnuts grown in California, Oregon, and Washington, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of information submitted by the Walnut Control Board, the administrative agency established under the order, and other available information, it is hereby found that to increase the rate of assessment herein provided for the marketing year which began August 1, 1953, will tend to effectuate the declared policy of the act.

The Department on October 8, 1953, approved a budget of expenses of $86,450 and an assessment rate of 0.13 cent for each pound of merchantable walnuts handled or certified for handling during the marketing year beginning August 1, 1953. At that time, it was estimated that approximately 69.4 million pounds of walnuts would be certified for interstate handling during such marketing year.

On the basis of this estimate, the rate of assessment fixed would have resulted in sufficient collections to cover the budget of expenses and to provide a reasonable excess which, pursuant to § 984.7 (b) (2) of the order, may be used to defray expenses during the first four months of the succeeding marketing year. It now appears evident that certifications will fall considerably short of the earlier estimate and that an increase in the assessment rate to 0.14 cent for each pound of merchantable walnuts handled or certified for handling will be necessary to assure sufficient collections to meet the expected expenses for the aforesaid marketing year and to provide for such reasonable excess. It is expected that actual expenses for such year will approximate $77,500.

The actual quantity of assessable walnuts for the 1953–54 marketing year is not expected to exceed 60.8 million pounds (interstate), or about 12 percent below the estimate upon which the present assessment rate is based. Authority to increase the assessment rate is contained in § 984.7 (b) (1) of the order.

Section 984.305 (b) of the administrative rule published in the FEDERAL REGISTER of October 14, 1953 (18 F. R. 6526) is amended to read as follows:

§ 984.305 *Budget of expenses of the Walnut Control Board and rate of assessment for the marketing year beginning August 1, 1953.* * * *

(b) *Rate of assessment.* Each handler shall pay to the Control Board on demand by the Control Board, from time to time, 0.14 cent for each pound of merchantable walnuts handled or certified for handling by him during the marketing year beginning August 1, 1953.

It is hereby found and determined that it is unnecessary and contrary to the public interest to give preliminary notice, engage in public rule making procedure, or postpone the effective date of this order later than the date of its publication in the FEDERAL REGISTER, for the reasons that (1) The Control Board is in need of the funds which this order authorizes it to collect; (2) The Control Board, which represents all segments of the industry, has unanimously recommended the increase in the rate of assessment provided herein, and (3) no advance, or special, preparation for operations hereunder will be needed.

(Sec. 5, 48 Stat. 31, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 12th day of April 1954, to become effective upon publication of this document in the FEDERAL REGISTER.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

[F. R. Doc. 54-2824; Filed, Apr. 14, 1954; 8:53 a. m.]

TITLE 20—EMPLOYEES' BENEFITS

Chapter II—Railroad Retirement Board

PART 208—ELIGIBILITY FOR AN ANNUITY

MISCELLANEOUS AMENDMENTS

Pursuant to the general authority contained in section 10 of the act of June 24, 1937 (sec. 10, 50 Stat. 314; 45 U. S. C. 228j) §§ 208.25, 208.27 and the first paragraph of § 208.29 (a) of the regulations under such act (12 F. R. 859) are amended by Board Order 54-76, dated March 31, 1954, to read as follows:

§ 208.25 *Proof of continuance of disability.* An individual who has been awarded an annuity upon the basis of his having become totally and permanently disabled for regular employment for hire, or upon the basis of his having become permanently disabled for work in his regular occupation, shall, as and whenever notified by the Board, submit any information which the Board may require relating to his employment, including self-employment, and earnings therefrom, while in the receipt of such an annuity, and shall submit to an examination to be made by a physician, or physicians, or a board of physicians, designated by the Board. The Board may at any time or times require additional proof of the continuance of the disability which served as the basis for awarding such annuity. The provisions of this section shall not apply to an individual after he has attained age 65.

§ 208.27 *Disability annuitant to notify of recovery from disability, and of performance of service for hire or of self-employment.* It shall be the duty of an individual awarded an annuity upon the basis of total and permanent disability for regular employment for hire, or upon the basis of permanent disability for work in his regular occupation, to notify the Board before he attains age 65 of his recovery from such disability and of any service for hire or self-employment in a period and to the extent described in § 208.29 (a) (2).

§ 208.29 *When disability annuities cease.* (a) An annuity awarded to an individual upon the basis of his having become totally and permanently disabled for regular employment for hire, or upon the basis of his having become permanently disabled for work in his regular occupation, shall cease before the individual attains age 65 as of the last day of:

* * * * * *

(Sec. 10, 49 Stat. 973, as amended; 45 U. S. C. 228j)

Dated: April 8, 1954.

By authority of the Board.

MARY B. LINKINS,
Secretary of the Board.

[F. R. Doc. 54-2800; Filed, Apr. 14, 1954; 8:49 a. m.]

TITLE 15—COMMERCE AND FOREIGN TRADE

Chapter III—Bureau of Foreign Commerce, Department of Commerce

Subchapter B—Export Regulations

[6th Gen. Rev. of Export Regs., Amdt. 71 [1]]

PART 399—POSITIVE LIST OF COMMODITIES AND RELATED MATTERS

MISCELLANEOUS AMENDMENTS

Section 399.1 *Appendix A—Positive List of Commodities* is amended in the following particulars:

1. General Notes to Appendix A, paragraph (h) *Explanation of symbols in column headed "Commodity Lists"* is amended by the addition of the following entry:

Symbol	Special requirement referred to—	Section
C	Commodities excepted from the provisions of General License GIT.	371.9

2. Symbol "C" as set forth in the column headed "Commodity Lists" opposite the commodities excepted from the provisions of General License GIT is substituted on the Positive List for the symbol ★ and the footnote related thereto which presently identify such excepted commodities. This amendment makes no substantive change.

3. The revised entries set forth below are substituted for entries presently on the Positive List. Where the Positive List contains more than one entry under a Schedule B number, the entry to be superseded is identified by a numerical reference enclosed in parentheses following the commodity description in the revised entry.

[1] This amendment was published in Current Export Bulletin No. 726, dated March 31, 1954.

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar-value limits	Validated license required
	Synthetic rubbers (report synthetic liquid latex in terms of total dry latex solids (TDLS) (report compounded or semiprocessed in 208800):				
200998	Polyisobutylene. (2) [17]	Lb.	RUBR 2	100	R
	Tires, tire casings and inner tubes (report scrap tires and tire casings with both beads cut through or at least one bead removed from the casings or the casings made discontinuous by being completely cut through or the carcass broken completely through for a length equal to at least the cross-sectional width, and inner tubes completely lacerated or cut cross-sectionally into two separate pieces, under 201200):				
206000	Pneumatic tires and casings, new and used:				
206430	Other truck and bus casings. (2) [17]	No.	RUBR 9	250	R
	Other off-the-road casings (except farm tractor and implement). (2) [17]	No.	RUBR 9	250	R
206440	Farm tractor casings [17]	No.	RUBR 9	250	R
206470	Farm implement casings [17]	No.	RUBR 9	250	R
206490	Other industrial casings. (2) [17]	No.	RUBR 9	250	R
209800	Compounded or semiprocessed natural and/or synthetic rubbers (dry or liquid latex), and allied gums, for further manufacture (specify type):				
	Liquid rubber compounds; latex compounds; and liquid rubber, drum compounded. (2) [17]	Lb.	RUBR	100	R
220904	Cinchona bark [17]	Lb.	DRUG	100	■
320515	Vegetable fibers, unmanufactured:				
320519	Manila or abaca (including tow) [17]	L. ton	TEXT 1	25	R
	Sisal or henequen (including tow) [17]	L. ton	TEXT 1	25	R
341100	Cordage, except of cotton or jute (report cotton in 301800 and jute in 321000):				
341400	Binder twine (hard and soft fiber) (report baler twine in 341400, 341909, and 349909) [17]	Lb.	TEXT 1	1,000	R
341909	Manila cordage, cord, and twine (including manila baler twine) (report binder twine in 341100) [17]	Lb.	TEXT 1	25	R
349909	Hard-fiber cordage, cord, and twine (including sisal and henequen) (report binder twine in 341100) [17]	Lb.	TEXT 1	25	R
	Hard-fiber yarns (including sisal, henequen, and manila yarns) [17]	Lb.	TEXT 1	100	R
384022	Filament yarn (except thrown yarn) of man-made (synthetic) fibers on cones, beams, bobbins, or other winding cores:				
384023	Viscose high-tenacity rayon yarn and cord:				
	Singles (including tire yarn) [17]	Lb.	TEXT 3	100	R
	Plied (including tire cord), untreated, treated or dipped but not woven (report woven rayon tire fabric in 384994) [17]	Lb.	TEXT 3	100	R
520300	Glass tubing for acid-resisting tanks, vats, kettles, piping, and fixtures [17]	----------	CDGS	25	R
541210	Abrasive products:				
	Manufactured grinding wheels, of silicon carbide or aluminum oxide composition, including corundum (specify grit sizes of silicon carbide). [18]	No. & Lb.	TOOL	250	R
545110	Asbestos:				
	Unmanufactured:				
	Crude asbestos and spinning fibers (specify by grade). [9] [17]	L. ton	MINL	100	R
545940	Manufactures:				
	Brake lining in sets, molded, semimolded, and woven, except brake blocks. [18]	Lb.	TRAN 6	500	R
571410	Sulfur, crude (containing 85 percent or more sulfur) (report sulfur ores or crude sulfur of less than 85 percent sulfur content in 596096). [9]	L. ton	SALT 36	25	RO
571500	Sulfur, crushed, ground, refined, sublimed and flowers. [9]	Lb.	SALT 36	25	RO
596098	Crude sulfur, of less than 85 percent sulfur content; and sulfur ores. (3) [9]	L. ton	SALT 36	25	RO
605430	Rails, trackwork and track accessories:				
605530	Rail joints and splice bars				
	Alloy steel, including stainless [17]	Lb.	STEE 14	100	R
	Switches, frogs, and crossings:				
	Alloy steel, including stainless [17]	Lb.	STEE	100	R
606010	Pipe, tubes, and tubing, n. e. c., new and used (except scrap) (report pipe assemblies specially fabricated for particular machines or equipment as parts of such machines or equipment):				
606030	Pressure tubes and tubing (including boiler tubes and tubing):				
	Carbon steel, seamless [17]	Lb.	STEE 12	100	R
	Carbon steel, welded [17]	Lb.	STEE 12	100	R
608120	Steel wire, n. e. c. (all round, shaped, and flat wire regardless of use) (report electrical insulated wire and cable in 709810-709885):				
608210	Uncoated wire, carbon steel, except strapping wire (report bag and bale ties in 619067). [9]	Lb.	STEE	100	R
	Coated wire, except galvanized (all steel grades):				
	Carbon steel. (1) [17]	Lb.	STEE	1,000	R
617600	Tools (all metals), n. e. c.:				
	Drills and bits, hard-surfaced steel and tungsten-carbide types (report types for power-driven tools in 744881). [17]	----------	CDOS	10	R
617898	Jacks, hand-operated, and parts, with lifting capacity of 10 tons or more (including hand-operated hydraulic jacks) (report jacks for construction and maintenance in 722045; jacks for garage use in 783185). [17]	----------	CDOS	25	R
	Shipping containers for oil, gas, and other liquids and solids (all metals) (report storage tanks in 618967 and 619071):				
619022	Unfilled:				
	Unfilled aluminum shipping containers, except milk cans. (2) [17]	Lb.	NONF	300	R
619022	Unfilled shipping containers of metal other than steel and aluminum, except milk cans. (3) [9] [17]	Lb.	NONF	300	R
619034	Welding rods and wires, including brazing rods:				
619040	Brazing solder (spelter type). (1) [9]	Lb.	NONF	100	RO
	Nickel and nickel alloy (specify by name and metal content). (6) [1]	Lb.	NONF	100	RO

See footnotes at end of table.

Dept. of Commerce Schedule B No.	Commodity	Unit	Processing code and related commodity group	GLV dollar-value limits	Validated license required
	Solders, except precious:				
619043	Lead solder (report solder of less than 50 percent lead by weight under 619045) [17]	Lb.	NONF 6	500	R
619045	Zinc [2] [17]	Lb.	NONF	100	R
	Wire products, n. e. c. (report wire nails, staples, and spikes in 048267-048274):				
	Wire rope, cord, and cable, except guard rail and insulated (report guard rail in 693; and insulated rope and strand in 709810-709875):				
619061	Picture cord [1] [17]	Lb.	STEE	500	R
	Wire strand, including guard rail cable (report strand wire in 608300):				
619065	Picture cord [1] [17]	Lb.	STEE	500	R
619069	Woven wire belts or belting [17]	Lb.	STEE	500	R
	Metal powders:				
619157	Tungsten [17]	Lb.	MINL	None	R
619158	Zinc dust (includes all zinc powder) (specify zinc content [17]	Lb.	NONF 2	500	R
619159	Chromium. (1) [4]	Lb.	NONF	25	RO
619159	Cobalt. (2) [7 [8]	Lb.	NONF	25	RO
619159	Lead (3) [7]	Lb.	NONF 3	500	R
619159	Nickel-chrome-boron powder. (4) [7]	Lb.	NONF	25	RO
619159	Nickel powder. (5) [7]	Lb.	NONF	None	RO
619159	Selenium (specify selenium content and grade). (7) [9]	Lb.	MINL	25	RO
	Foil and leaf (less than 0.006 inch in thickness) (report paper-backed foil in 480100):				
619250	Lead foil and leaf (3) [7]	Lb.	NONF	500	R
	Metal manufactures, n. e. c., and parts, n. e. c.:				
	Other metals, except precious (specify by name and type of metal):				
619950	Lead burning bars. (2) [17]	Lb.	NONF 3	500	R
619950	Nickel catalysts. (6) [7]	Lb.	NONF	100	RO
622095	Ferrotitanium and ferro-carbon-titanium (specify titanium content [7]	Lb.	MINL	None	R
622096	Ferrotungsten (specify tungsten content) [17]	Lb.	MINL	None	R
622098	Ferrocolumbium (specify columbium content). (1) [10]	Lb.	MINL	None	RO
622098	Ferrocolumbium-tantalum (specify alloy content). (2) [10]	Lb.	MINL	None	RO
	Aluminum ores and concentrates:				
630010	Bauxite concentrates, alumina included, except calcined bauxite [7]	S. ton	NONF	500	R
630406	Lead ores, concentrates, matte, and base bullion (lead content) [17]	C. lb.	NONF	500	R
630500	Antifriction metal dross and scrap, lead base; and Babbitt metal dross and scrap, lead base. (1) [17]	Lb.	NONF	500	R
630500	Other lead scrap (new and old). (2) [17]	Lb.	NONF	500	R
630750	Lead slugs. (1) [17]	Lb.	NONF	100	R
630750	Lead pigs, bars and anodes (include blocks and ingots). (2) [17]	Lb.	NONF 5	500	R
630800	Lead sheets, strips, and pipe (include bends) [17]	Lb.	NONF 6	500	R
630810	Lead plate, including battery plate, not assembled as complete battery units [17]	Lb.	NONF 6	500	R
631510	Type metal [17]	Lb.	NONF 5	500	R
631515	Antimonial lead [17]	Lb.	NONF 5	500	R
631516	Lead base Babbitt metal (except scrap and dross) 50 percent or more of lead by weight (report scrap and dross in 630500; tin-base Babbitt metal in 630517; and Babbitt metal bearings in 708000-709699) [17]	Lb.	NONF 5	500	R
631519	Lead and lead-base alloy semifabricated forms, n. e. c. (specify by name) [17]	Lb.	NONF 3	500	R
634501	Nickel ore, concentrates, and matte [7] [8]	Lb.	NONF	None	RO
634502	Nickel slugs. (1) [7]	Lb.	NONF	100	RO
634502	Spent nickel catalysts. (2) [7] [8]	Lb.	NONF	None	RO
634502	Other nickel metal in ingots, bars, rods, and other crude forms, and scrap. (2) [7]	Lb.	NONF	None	RO
634502	Nickel alloy metals in ingots, bars, rods, and other crude forms, and scrap (report nickel silver in 644000-645000). (3) [7]	Lb.	NONF	100	RO
634504	Nickel metal sheets, plates, and strips. (1) [7]	Lb.	NONF	None	RO
634504	Nickel alloy metal sheets, plates, and strips (report nickel silver in 644000-645000) [2] [7]	Lb.	NONF	500	RO
634508	Nickel-chrome electric resistance wire, except insulated (report insulated wire in 709810-709875) [7]	Lb.	NONF	None	RO
634519	Nickel and nickel alloy semifabricated forms, n. e. c. (specify by name and nickel content; report cupro-nickel wire in 644000) [7]	Lb.	NONF	25	RO
637050	Zinc scrap and zinc dust (report zinc dust in 619158) [17]	C. lb.	NONF 2	500	R
	Zinc cast in slabs, pigs, or blocks:				
657101	Special high grade, containing not over 0.007 percent lead, not over 0.005 percent iron, not over 0.005 percent cadmium, no aluminum, and at least 99.99 percent zinc [17]	Lb.	NONF 9	500	R
657103	High grade, containing not over 0.07 percent lead, not over 0.02 percent iron, not over 0.07 percent cadmium, no aluminum, and at least 99.90 percent zinc [17]	Lb.	NONF 9	500	R
657125	Prime western, containing not over 1.60 percent lead and not over 0.08 percent iron [17]	Lb.	NONF 9	500	R
657198	Other zinc cast in slabs, pigs, or blocks [17]	Lb.	NONF 9	500	R
657208	Zinc rolled in sheets, plates, and strips [17]	Lb.	NONF 10	500	R
657305	Zinc alloys, except brass and bronze [7]	Lb.	NONF 10	500	R
657307	Zinc die castings (specify whether finished or unfinished)	Lb.	NONF 10	500	R
658004	Battery shells, and parts, unassembled [17]	Lb.	NONF 10	500	R
658905	Zinc and zinc-alloy semifabricated forms, n. e. c. (excluding zinc-coated iron and steel products) (specify by name) [17]	Lb.	NONF 10	500	R
	Antimony:				
664501	Ores and concentrates (including antimony matter containing lead) [7]	Lb.	MINL	50	R
664502	Metal and alloys in crude form (including regulus, needle or liquated antimony), and antimony-bearing scrap metal [7]	Lb.	MINL	25	R
664503	Semifabricated forms, n. e. c. (specify by name) [17]	Lb.	MINL	15	R
	Chromium or chromite:				
664522	Metal and chromium-bearing alloys in crude form, and scrap, containing 99 percent and over chromium content [4] [6]	Lb.	MINL	25	RO
664522	Metal and chromium-bearing alloys in crude form, and scrap, containing less than 99 percent chromium content [17]	Lb.	MINL	None	RO
664529	Cobalt: Semifabricated forms, n. e. c. (specify by name) [17]	Lb.	MINL	None	RO
664530	Columbium or niobium: Ores and concentrates [17]	Lb.	MINL	None	RO
664560	Tantalum: Ores and concentrates (report slag in 664908) [17]	Lb.	MINL	None	RO
664571	Titanium: Metal and alloys in crude form, and scrap [7]	Lb.	MINL	None	RO
664573	Semifabricated forms, n. e. c. (specify by name) [7]	Lb.	MINL	None	RO
707550	X-ray apparatus and parts, n. e. c.: Tungsten X-ray targets. (4) [17]		MINL	None	R
707590	Short wave diathermy units. (1) [17]	No.	SATE	None	R
707590	Parts, n. e. c., specially fabricated for short wave diathermy units. (2) [17]		SATE	25	R
	Internal-combustion engines, n. e. c., and parts, n. e. c.: Gasoline:				
714310	Other, including tractor engines, over 10, up to and including 50 brake horsepower (specify brake horsepower) [7]	No.	TRAN 7	1,000	R
714360	Other, including tractor engines, over 50 brake horsepower (specify brake horsepower) [7]	No.	TRAN 7	500	RO
	Power excavators and dredging machines and parts:				
	Excavator-type power cranes and shovels, new (report used in 720060):				
720112	Crawler mounted, full revolving, convertible, 2- and 2½-cubic-yard dipper capacity, new. (1) [16]	No.	CONS 1	None	R
720112	Crawler mounted, full revolving, convertible, less than 2-cubic-yard dipper capacity, new. (2) [16]	No.	CONS 1	None	R
720117	Crawler or walker mounted, full revolving, convertible, over 2½-cubic-yard dipper capacity, new [16]	No.	CONS 1	None	R
720122	Other rubber tired mounted, including truck or wagon mounted, full revolving, convertible, 2-cubic-yard dipper capacity and over, new. (2) [3]	No.	CONS 1	None	R R
720123	Other rubber tired mounted, including truck or wagon mounted, full revolving, convertible, less than 2-cubic-yard dipper capacity, new. (3) [16]	No.	CONS 1	None	R
720127	Full revolving, unmounted, 2-cubic-yard dipper capacity and over, new. (1) [3]	No.	CONS 1	None	R
720127	Full revolving, unmounted, less than 2 cubic yard dipper capacity, new. (2) [16]	No.	CONS 1	None	R
720132	Not full revolving, mounted and unmounted, new [16]	No.	CONS 1	None	R
720137	Trenchers and ditchers, new (report used in 720160) [16]	No.	CONS 1	None	R
720142	Loaders (power machines, excavating, new (report used in 720... nonexcavating in 720240) [1]	No.	CONS 1	None	R

See footnotes at end of table.

722040	Jacks, with lifting capacity of 10 tons and over, and specially fabricated parts [17]	.....	CONS 1	100	R
	Construction and maintenance equipment, n. e. c., and specially fabricated parts, n. e. c., (specify by name):				
722045	Pile hammers (Diesel-powered), and parts. (1) [16] ...	.....	CONS 1	250	R
722045	Jacks, with lifting capacity of 10 tons and over, and specially fabricated parts. (2) [16]	.....	CONS 1	100	R
722045	Subgraders and finegraders. (3) [16]				
722045	Logging arches and sulkies for tracklaying tractors and contractors' wheel-type tractors, and rotary snowplows. (4) [16]	No.	CONS 1	1,000	R
722045	Parts, accessories, and attachments, n. e. c., specially fabricated for scrapers and graders. (13) [16]	.....	CONS 1	800	R
	Cranes (except excavator-type) and derricks, n. e. c. and parts, n. e. c.:				
723010	Railway cranes, 30 tons maximum rated crane lifting capacity and over (including industrial yard, locomotive and wrecking types). (1) [16]	No.	CONS 1	None	R
723010	Railway cranes, under 30 tons maximum rated crane lifting capacity (including industrial yard, locomotive and wrecking types). (2) [17]	No.	CONS 1	None	R
723020	Cranes, overhead, electric traveling (elevated track, gantry, and semi-gantry types) [17]	No.	CONS 1	None	R
723040	Full circle revolving cranes, 30 net tons and over maximum rated capacity. (1) [16]	No.	CONS 1	None	R
723040	Full circle revolving cranes, 10 tons and under 30 tons maximum rated capacity. (2) [16]	No.	CONS 1	None	R
723070	Pillar cranes, 30 net tons and over maximum rated capacity. (1) [16]	No.	CONS 1	None	R
723070	Pillar cranes, 10 tons and under 30 tons maximum rated capacity. (2) [16]	No.	CONS 1	None	R
724910	Parts, n. e. c., specially fabricated for underground mine type chain, belt and shaking conveyors (specify by name) [16]	.....	MINE 1	250	R
	Industrial type trucks, tractors, trailers, and stackers (specially designed for materials handling in and around industrial plants, depots, docks, terminals and similar installations), and parts:				
	Industrial type trucks, fully powered (operator-riding or walking):				
725003	Straddle carriers [16]	No.	CONS 1	800	R
725005	Internal combustion engine powered trucks, except straddle carriers [16]	No.	CONS 1	800	R
725015	Electric-powered trucks [16]	No.	CONS 1	800	R
725017	Other industrial type trucks, partially powered [16]	No.	CONS 1	800	R
725020	Industrial type tractors (whether for towing or provided with crane booms or winches) (report standard tractors in 787710-787890) [17]	No.	CONS 1	800	R
	Specialized mining machines and equipment, n. e. c., and parts, n. e. c.:				
730810	Jacks, with lifting capacity of 10 tons and over, and specially fabricated parts, n. e. c. (1) [16]	.....	CONS 8	100	R
733080	Petroleum field production equipment, n. e. c., and specially fabricated parts, n. e. c. (specify by name) (report oil country tubular products in 606210-606260) [16]	.....	MINE 4	800	R
	Earth and rock drilling machines, n. e. c., and parts, n. e. c.:				
730590	Parts and accessories, n. e. c., specially fabricated for the earth and rock drilling machines included on the Positive List under Schedule B Nos. 730840 through 730850 (report tool bit blanks and inserts in 617900 or 617905) [17]	.....	MINE 3	800	R
	Power-driven metalworking machine tools (nonportable), and parts:				
742000	Drilling machines, upright type, multiple spindle [17]	No.	TOOL	800	RO
742300	Radial drilling machines, plain and traversing type, 15-inch column or over [17]	No.	TOOL	800	RO
742300	Drilling machines, n. e. c., except bench type (specify type; report rifle drilling machines in 744316) [17]	No.	TOOL	800	RO
743200	Surface grinding machines, reciprocating. (1) [17]	No.	TOOL	800	RO
743300	Automatic single spindle and multiple spindle surface grinders and nonautomatic multiple spindle surface grinders (specify type) [2] [17]	No.	TOOL	800	RO
743900	External cylindrical universal grinding machines (report universal tool and cutter grinders in 744203) [17]	No.	TOOL	800	RO
744000	External cylindrical grinding machines, except universal (report universal in 743900) [17]	No.	TOOL	800	RO

See footnotes at end of table.

[1] The GLV dollar-value limit is increased.
[2] The processing code is changed or related commodity group number is changed (see § 372.2 (b) and (c) of this subchapter).
[3] The letter "A" is deleted in the column headed "Commodity Lists," indicating that the commodity is no longer subject to the IC/DV procedure (see § 373.2 of this subchapter).
[4] The letter "B" is added in the column headed "Commodity Lists," indicating that the commodity is subject to DL restrictions (see § 374.2 of this subchapter), and is excepted from the Time Limit licensing procedure (see Part 377 of this subchapter), effective April 30, 1954.
[5] The letter "B" is deleted in the column headed "Commodity Lists," indicating that the commodity is no longer subject to DL restrictions (see § 374.2 of this subchapter), and is no longer excepted from the Time Limit licensing procedure (see Part 377 of this subchapter).
[6] The letter "D" is deleted in the column headed "Commodity Lists," indicating that the commodity is no longer subject to evidence of availability requirements (see § 373.3 of this subchapter).
[7] The letter "E" is added in the column headed "Commodity Lists," indicating that the commodity may be exported under the Periodic Requirements licensing procedure (see Part 376 of this subchapter).
[8] The letter "G" is added in the column headed "Commodity Lists," indicating that the commodity may be exported under general license GLV to K and O destinations, only within the dollar-value limit specified on the Positive List (see § 371.10 (c) of this subchapter), effective April 30, 1954.
[9] The letter "G" is deleted in the column headed "Commodity Lists," indicating that the commodity may be exported to Group O destinations under general license GLV within the $500 dollar-value limit (see § 371.10 (c) of this subchapter).
[10] The destination control is changed from KO to R.
[11] The commodity description is revised without substantive change.
[12] The unit of quantity is changed.
[13] The letter "C" is deleted in the column headed "Commodity Lists," indicating that the commodity may now be exported under General In-Transit License GIT (see § 371.9 (c) of this subchapter).
[14] This commodity is presently included in the second entry on the Positive List under Schedule B No. 654502. The effect of this revision is to delete the letters "B" and "G" in the column headed "Commodity Lists," indicating that the commodity is no longer subject to DL restrictions (see § 374.2 of this subchapter), is no longer excepted from the Time Limit licensing procedure, and that the commodity may be exported to Group O destinations under general license GLV within the $500 dollar-value limit (see § 371.10 (c) of this subchapter).

Parts 1 and 2 of this amendment shall become effective as of March 31, 1954. Part 3 shall become effective as of March 31, 1954, unless otherwise indicated in the footnotes.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 67 Stat. 62; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR, 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR, 1948 Supp.)

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Supp. 24]

PART 42—IRREGULAR AIR CARRIER AND OFF-ROUTE RULES

OPERATING LIMITATIONS FOR TRANSPORT CATEGORY AIRCRAFT

The purpose of this supplement is to set forth rules and policies regarding performance operating limitations for aircraft in the transport category. The rules contained in this supplement are minor rules which do not impose additional burdens upon interested persons. Therefore, compliance with the notice, procedures and effective date provisions of section 4 of the Administrative Procedure Act is unnecessary and not required. The following rules and policies are hereby adopted:

§ 42.70–1 *Deviations (CAA rules which apply to § 42.70 (a)).* An application for any deviation shall include all supporting data and shall be forwarded to the CAA Aviation Safety District Office charged with the over-all inspection of the air carrier's operations.

§ 42.70–2 *Accuracy of data (CAA policies which apply to § 42.70 (b)).* The charts and data prepared by the air carrier for use of flight and operations personnel should be prepared with sufficient accuracy and clarity that the gross weight and runway length values for specific operating conditions can be reproduced within a tolerance of one-half of one percent by an independent recheck.

§ 42.70–3 *Temperature accountability (CAA policies which apply to § 42.70 (c)).* The maximum permissible weight for a given take-off should be equal to the lowest of three values determined separately by consideration of (a) accelerate-stop, (b) take-off and climb out to a 50-foot height and (c) the obstacle clearance condition. The established temperature accountability correction factors appearing in the Airplane Flight Manuals are applied to the take-off weights determined by the accelerate-stop and climb out to a 50-foot height These values may be used individually or in combination, i. e., if a runway is considerably longer than is required to meet the accelerate-stop and climb out to 50 foot requirements at standard temperature, then at temperatures higher than standard, take-off weight need not be reduced as long as additional runway length is available. When the temperature reaches a value at which no additional runway length remains, then a reduction in weight would be necessary. These factors do not apply to weights determined by obstacle clearance considerations. If the take-off weight at standard temperature is limited by obstruction clearance rather than by the climb out to 50 feet or by the accelerate-stop distance, a weight reduction need not be made for temperatures higher than standard until the temperatures reach a high enough value to use up the existing runway between that used for standard temperature (limited to less than the full runway because of obstacles) and the actual length.

§ 42.71–1 *Weight limitations (CAA policies which apply to § 42.71).* The limitations imposed by § 42.71 take into account only one operating variable, i. e., the elevation of the airport to be used as it affects the weight of the aircraft during take-off or landing. Other operating variables, such as runway length, gradient, wind and temperature, are considered in other sections of this part. Compliance with this section does not present a particular problem since the Airplane Flight Manual provides performance data for airports over a wide range of elevations. However, most manuals do not provide data for operations at airports below sea level. Section 42.71 should not be construed as prohibiting operations from airports below sea level, since sea level data in the Airplane Flight Manual, being conservative, may be applied to such airports.

§ 42.72–1 *Take-off limitations to provide for engine failure (CAA policies which apply to § 42.72).*—(a) *Take-off flight path.* Diagram 1 [1] is a pictorial representation of the relationship required between the dimensions of an airport and its surroundings, and the performance of the airplane. It illustrates the take-off flight path defined by the airworthiness requirements.

(b) *Airport data.* Complete data concerning the airport dimensions and characteristics, such as runway lengths, runway gradients, obstruction heights and location, airport elevation, and the nature and condition of airport areas other than paved runways from which take-offs might be made, are necessary for the determination of permissible take-off weights. The most nearly complete and satisfactory source of such data is the series of Airport Obstruction Plans prepared by the U. S. Department of Commerce Coast and Geodetic Survey. However, their Airport Obstruction Plan series does not yet completely cover the airports used by air carrier operators of Transport Category airplanes, and in addition, the Obstruction Plans do not present any data showing the nature or condition of runway surfaces or other airport areas suitable for use in take-off and landing. Furthermore, the Obstruction Plans necessarily contain data which may be several months old and which may not completely conform to the existing obstructions. Therefore, it may be necessary, for the air carrier operator, to supplement its data with information obtained from other sources. However, gross weight data calculated on the basis of such data should be rechecked or recalculated as soon as appropriate data from the Coast and Geodetic Survey becomes available.

(c) *Runways.* (1) Normally, only paved runways will be approved for use in take-off. However, in some cases there may be a defined rectangular area hereinafter designated as a stopway at the end of a runway in the direction of take-off, selected and approved as a suitable area, in which the aircraft can be stopped after an interrupted take-off. The stopway should have the same width as the runway it augments. The stopway should be so prepared or constructed as to enable the aircraft to come to a stop on it without hazard at the operating speeds that might be expected in this area after an interrupted take-off. If it is desired to use a stopway to meet the "climb to a 50-foot height" requirement, the stopway should be suitable for the aircraft to traverse it at take-off speeds without hazard.

(2) In all cases the take-off should be assumed to begin on the paved runway and not on an unpaved area. No allowance need be made for the length of the airplane in determining what should be considered to be the proper point for beginning the take-off. Limitations established by the airport operator may make it necessary to stipulate that the beginning of the take-off area be at some point down the runway from the actual end of the paving.

[1] Not filed with the Federal Register Division.

(d) *Turns to avoid obstructions.* (1) Section 42.72 provides that after reaching a height of 50 feet, the aircraft may be turned with a bank not exceeding 15° to comply with the obstruction clearance criteria. Only one turn to a definite heading should be considered in detailing the take-off path.

(2) The radius of turn resulting from a banked turn of 15° may be determined from the following formula:

Radius of turn $= V^2 \times 0.25$ feet
where V = climb speed in mph, TAS.

For example: at a climb speed of 120 mph, the radius of turn for a 15° banked turn would be,

$$120 \times 120 \times 0.25 = 3,600 \text{ feet}$$

The effects of wind in altering a flight path need not be considered unless they are large (¼ climb speed) and the angle of turn is more than 45° from the runway heading.

(e) *Effects of runway gradient.* (1) The gradient effect on the ground run may be calculated from the following formula:

$$S_G = S\left[\frac{1}{1-\left(\frac{2Sg\sin\alpha}{V_2^2}\right)}\right]$$

where:
S_G = length of ground run with gradient.
S = length of ground run without gradient.
g = acceleration of gravity = 32.2 (ft/sec²).
V_2 = climb out speed, feet per second, True Air Speed.
α = angle of grade with horizontal, uphill +, downhill −.

(2) The above formula is based on several simplifying assumptions, i. e., that a uniform grade exists, that the airplane is accelerated uniformly throughout the ground run, and that the speed V_2 may be used where the difference between V_1 and V_2 is not large. None of these assumptions may be exactly correct, but the errors introduced by making such assumptions are small provided the airplane acceleration and the actual point-to-point grade do not depart from the average values of those quantities by any great amount.

(3) The effect of gradient during the climb-out should be determined by comparing the airplane rate of climb with the change in runway elevation, to determine first the weight or wind condition at which the airplane clears the end of the runway and all obstacles by an actual 50 feet and second, that the airplane clears all points on the runway after take-off.

(4) For purposes of simplification in calculating the effect of runway gradient on the take-off flight path, an average gradient consisting of the difference in elevation of the two ends of the runway divided by the runway length may be used, provided that no intervening point on the runway lies more than 5 feet above or below a straight line joining the two ends of the runway. In this case, the gradient effects on the acceleration portion of the take-off flight path and for the accelerate-stop portion may be presented together in simple chart form without introducing excessive errors. However, the actual gradient should be used for the climb-out segments of the flight path and in no case should the gradient be greater than the first segment climb.

(5) In those cases in which intermediate points on the runway depart more than five feet from the mean line, the gradient effects on the acceleration portions, the deceleration portion, and the climb portion of the flight path should be computed separately. An average gradient may be assumed for the ground run portion of the problem because the error resulting therefrom is so small that a more rigorous treatment is not justified, provided a truly representative gradient is chosen. Where there are no reversals or significant changes in the runway slope during the ground run, the average may be taken to be the difference in elevation between the starting point and the point of attaining take-off climb speed, V_2, divided by the distance between the two points. However, if the gradient is not essentially constant, an average gradient should be assumed that more nearly parallels the high-speed portion of the acceleration run, since the gradient has a greater effect on the distance traversed at high speed. The average gradient selected in this way will usually serve for determining gradient effects on the acceleration distance in either the take-off flight path or the accelerate-stop distance. An average gradient should be determined in the same way in determining the gradient effects on the stopping distance, while the actual gradient should be determined in checking the climb segment to the 50-foot point.

(6) The operator may take advantage of the favorable effect of a downhill gradient on the take-off flight path, if he wishes, but the unfavorable effect of such a gradient on the stopping distance should be accounted for in all cases.

(f) *Effects of wind.* (1) Section 42.72 permits the use of 50 percent of the headwind component and requires consideration of 150 percent of any tailwind component.

The effect of wind on runway requirements can be determined by use of the following equation:

(i) For all headwind components, and tailwind components of 10 mph or less.

$$S_W = S\left(\frac{V_2 - V_W}{V_2}\right)^{1.35}$$

where:
S_W = runway required with wind
S = runway required, zero wind
V_2 = take-off safety speed (mph)
V_W = + (0.5 × headwind component) or, − (1.5 × tailwind component)

(ii) If tailwind components in excess of 10 mph are approved, the equation will be:

$$S_W = S\left(\frac{V_2 - V_W}{V_2}\right)^2$$

Alternately, the exponent can be that which is determined to be appropriate to the separation of deceleration characteristics of the airplane type, as applicable.

(2) For steady wind conditions, the wind velocity and direction will be used in computing the effective headwind and tailwind components, and the maximum gust velocity and most unfavorable di-

rection will be used in computing the crosswind component.

§ 42.76–1 *En route limitations; where special air navigational facilities exist (CAA policies which apply to § 42.76).* No attempt is made to classify specific types of navigational facilities as acceptable or unacceptable for the purposes of § 42.76, but each case will be examined on its own merits. In general, however, the facility should be of a type that gives the pilot a continuous fix of his position with an error of not more than two miles, or a continuous on-course indication with an error of not more than two miles, or a continuous indication of the bearing and distance of the obstacle from the airplane, with an accuracy adequate to allow the pilot to turn away from the obstacle with ample clearance. Any mechanical or electrical facilities that are to be acceptable should be thoroughly reliable regardless of weather or other operating conditions. Such considerations apply only for IFR operations.

§ 42.77–1 *Landing distance limitations; airport of destination (CAA policies which apply to § 42.77).* (a) Section 42.77 establishes two major consideration in determining the permissible landing weight at the airport of destination. The first is that the aircraft weight will be such on arrival that it can be landed within 60 percent of the effective landing length of the most favorable (normally the longest) runway in still air. This maximum weight for an airport/aircraft configuration, once established, remains constant and cannot be exceeded, regardless of wind conditions.

(b) The second is that consideration be given to the maximum weight that will be permitted due to the necessity of using another runway because of the probable wind condition, ground handling characteristics of the aircraft, landing aids, etc. This consideration may result in a lower gross weight than permitted in paragraph (a) of this section, in which case, dispatch must be based on this lesser weight.

(c) The probable wind referred to in paragraph (b) of this section, is the wind forecasted to exist at the time of arrival.

(d) If the forecast conditions are such that consideration of the requirements in § 42.77 (b) would preclude a landing at the intended destination, the aircraft may be dispatched if an alternate airport is designated which permits compliance with § 42.78.

(e) (1) If a flight has been properly dispatched, but arrives at the destination with a weight higher than anticipated due to unexpected wind conditions or fuel consumption, § 42.77 (b) should not be construed as prohibiting a landing at the overweight condition, provided the crosswind and/or tailwind operating limitations are not exceeded.

(2) If conditions are such that the crosswind and/or tailwind limitations will be exceeded, the flight must proceed to its alternate, if one has been named to meet the requirements of § 42.77 (b). However, if an alternate was not provided, and upon arrival the wind conditions were such that the crosswind and/or tailwind limitations would be exceeded, the pilot should exercise the authority granted him in § 42.51 (d).

(f) For application of the wind components as allowed in § 42.77 (b), refer to § 42.72–1 (f).

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 52 Stat. 1007, 1010, 49 U. S. C. 551, 554)

This supplement shall become effective April 25, 1954.

TITLE 26—INTERNAL REVENUE

Chapter I—Internal Revenue Service, Department of the Treasury

Subchapter C—Miscellaneous Excise Taxes

[Regs. 131]

PART 315—LICENSING OF MANUFACTURERS OF, AND DEALERS IN, FIREARMS OR AMMUNITION

Preamble. 1. These regulations, "Regulations 131, Licensing of Manufacturers of, and Dealers in, Firearms or Ammunition" (26 CFR Part 315), are a republication of Treasury Decision 5646, (26 CFR Part 315, 13 F. R. 4383; 14 F. R. 5200) as amended by Treasury Decision 5763 (14 F. R. 7390) and Treasury Decision 5802 (15 F. R. 5615).

2. These regulations consist only of previously approved material, except definitions, but the text has been rearranged and renumbered to conform to the Federal Register Regulations (13 F. R. 5929).

3. This republication of these regulations shall not affect or limit any act done or any liability previously incurred, or any suit, action, or proceeding had or commenced in any civil, administrative, or criminal cause and proceeding prior to the date of republication, nor shall this republication release, acquit, affect, or limit any offense committed in violation of these regulations prior to republication, or any penalty, liability or forfeiture incurred prior to such date.

4. It is found that compliance with notice and public rule-making procedure of section 4 (a) and the effective date limitations of section 4 (c) of the Administrative Procedure Act (5 U. S. C. 1001, et seq.) is unnecessary in connection with the republication of the regulations in this part for the reason that the changes made relate merely to form and not substance.

SUBPART A—STATUTORY PROVISIONS

Sec.
315.1 General.
315.2 Definitions.
315.3 Transportation, shipping, or receiving firearms or ammunition in interstate or foreign commerce; act prohibited.
315.4 License to transport, ship, or receive firearms or ammunition.

SUBPART G—PENALTIES, SEIZURES AND FORFEITURES

315.90 Penalties.
315.91 Seizure and forfeiture.
315.92 Disposition after forfeiture.

AUTHORITY: §§ 315.1 to 315.92 issued under 52 Stat. 1250, 1252, 53 Stat. 1222, 61 Stat. 11; 15 U. S. C. 901–909. Statutory provisions interpreted or applied are cited to text in parentheses.

SUBPART A—STATUTORY PROVISIONS

§ 315.1 *General.* Sections 315.2 through 315.11 set forth the text of laws relating to the licensing under the Federal Firearms Act of manufacturers of, and dealers in, firearms or ammunition.

§ 315.2 *Definitions.*

15 U. S. C. 901 Definitions. As used in this chapter: (1) The term "person" includes an individual, partnership, association, or corporation.

(2) The term "interstate or foreign commerce" means commerce between any State, Territory or possession (not including the Canal Zone), or the District of Columbia, and any place outside thereof; or between points within the same State, Territory, or possession (not including the Canal Zone), or the District of Columbia, but through any place outside thereof; or within any Territory or possession or the District of Columbia.

(3) The term "firearm" means any weapon, by whatever name known, which is designed to expel a projectile or projectiles by the action of an explosive and a firearm muffler or firearm silencer, or any part or parts of such weapon.

(4) The term "manufacturer" means any person engaged in the manufacture or importation of firearms, or ammunition or cartridge cases, primers, bullets, or propellent powder for purposes of sale or distribution; and the term "licensed manufacturer" means any such person licensed under the provisions of this chapter.

(5) The term "dealer" means any person engaged in the business of selling firearms or ammunition or cartridge cases, primers, bullets or propellent powder, at wholesale or retail, or any person engaged in the business of repairing such firearms or of manufacturing or fitting special barrels, stocks, trigger mechanisms, or breach[1] mechanisms to firearms, and the term "licensed dealer" means any such person licensed under the provisions of this chapter.

(6) The term "crime of violence" means murder, manslaughter, rape, mayhem, kidnaping, robbery, burglary, housebreaking; assault with intent to kill, commit rape, or rob; assault with a dangerous weapon, or assault with intent to commit any offense punishable by imprisonment for more than one year.

(7) The term "fugitive from justice" means any person who has fled from any State, Territory, the District of Columbia, or possession of the United States to avoid prosecution for a crime of violence or to avoid giving testimony in any criminal proceeding.

(8) The term "ammunition" shall include only pistol or revolver ammunition. It shall not include shotgun shells, metallic ammunition suitable for use only in rifles, or any .22 caliber rimfire ammunition.

§ 315.3 *Transporting, shipping, or receiving firearms or ammunition in interstate or foreign commerce; acts prohibited.*

15 U. S. C. 902 Transporting, shipping, or receiving firearms or ammunition in interstate or foreign commerce; acts prohibited. (a) It shall be unlawful for any manufacturer or dealer, except a manufacturer or dealer having a license issued under the provisions of this chapter, to transport, ship, or receive any firearm or ammunition in interstate or foreign commerce.

(b) It shall be unlawful for any person to receive any firearm or ammunition transported or shipped in interstate or foreign commerce in violation of subdivision (a) of this section, knowing or having reasonable cause to believe such firearms or ammunition to have been transported or shipped in violation of subdivision (a) of this section.

(c) It shall be unlawful for any licensed manufacturer or dealer to transport or ship any firearm in interstate or foreign commerce to any person other than a licensed manufacturer or dealer in any State the laws of which require that a license be obtained for the purchase of such firearm, unless such license is exhibited to such manufacturer or dealer by the prospective purchaser.

(d) It shall be unlawful for any person to ship, transport, or cause to be shipped or transported in interstate or foreign commerce any firearm or ammunition to any person knowing or having reasonable cause to believe that such person is under indictment or has been convicted in any court of the United States, the several States, Territories, possessions, or the District of Columbia of a crime of violence or is a fugutive[1] from justice.

(e) It shall be unlawful for any person who is under indictment or who has been convicted of a crime of violence or who is a fugutive[1] from justice to ship, transport, or cause to be shipped or transported in interstate or foreign commerce any firearm or ammunition.

(f) It shall be unlawful for any person who has been convicted of a crime of violence or is a fugutive[1] from justice to receive any firearm or ammunition which has been shipped or transported in interstate or foreign commerce, and the possession of a firearm or ammunition by any such person shall be presumptive evidence that such firearm or ammunition was shipped or transported or received, as the case may be, by such person in violation of this chapter.

(g) It shall be unlawful for any person to transport or ship or cause to be transported or shipped in interstate or foreign commerce any stolen firearm or ammunition, knowing, or having reasonable cause to believe, same to have been stolen.

(h) It shall be unlawful for any person to receive, conceal, store, barter, sell, or dispose of any firearm or ammunition or to pledge or accept as security for a loan any firearm or ammunition moving in or which is a part of interstate or foreign commerce, and which while so moving or constituting such part has been stolen, knowing, or having reasonable cause to believe the same to have been stolen.

(i) It shall be unlawful for any person to transport, ship, or knowingly receive in interstate or foreign commerce any firearm from which the manufacturer's serial number has been removed, obliterated, or altered, and the possession of any such firearm shall be presumptive evidence that such firearm was transported, shipped, or received, as the case may be, by the possessor in violation of this chapter.

§ 315.4 *License to transport, ship, or receive firearms or ammunition.*

15 U. S. C. 903 License to transport, ship, or receive firearms or ammunition. (a) Any manufacturer or dealer desiring a license to transport, ship, or receive firearms or ammunition in interstate or foreign commerce shall make application to the Secretary of the Treasury, who shall prescribe by rules and regulations the information to be contained in such application. The applicant shall, if a manufacturer, pay a fee of $25 per annum and, if a dealer, shall pay a fee of $1 per annum.

(b) Upon payment of the prescribed fee, the Secretary of the Treasury shall issue to such applicant a license which shall entitle the licensee to transport, ship, and receive firearms and ammunition in interstate and foreign commerce unless and until the license is suspended or revoked in accordance with the provisions of this chapter: *Provided*, That no license shall be issued to any applicant within two years after the revocation of a previous license.

(c) Whenever any licensee is convicted of a violation of any of the provisions of this chapter, it shall be the duty of the clerk of the court to notify the Secretary of the Treasury within forty-eight hours after such conviction and said Secretary shall revoke such license: *Provided*, That in the case of appeal from such conviction the licensee may furnish a bond in the amount of $1,000, and upon receipt of such bond acceptable to the Secretary of the Treasury he may permit the licensee to continue business during the period of the appeal, or should the licensee refuse or neglect to furnish such bond, the Secretary of the Treasury shall suspend such license until he is notified by the clerk of the court of last appeal as to the final disposition of the case.

(d) Licensed dealers shall maintain such permanent records of importation, shipment, and other disposal of firearms and ammunition as the Secretary of the Treasury shall prescribe.

§ 315.5 *Excepted persons.*

15 U. S. C. 904 Excepted persons. The provisions of this chapter shall not apply with respect to the transportation, shipment, receipt, or importation of any firearm, or ammunition, sold or shipped to, or issued for the use of, (1) the United States or any department, independent establishment, or agency thereof; (2) any State, Territory, or possession, or the District of Columbia, or any department, independent establishment, agency, or any political subdivision thereof; (3) any duly commissioned officer or agent of the United States, a State, Territory, or possession, or the District of Columbia, or any political subdivision thereof; (4) or to any bank, public carrier, express, or armored-truck company organized and operating in

[1] So in original.

good faith for the transportation of money and valuables; (5) or to any research laboratory designated by the Secretary of the Treasury: *Provided*, That such bank, public carriers, express, and armored-truck companies are granted exemption by the Secretary of the Treasury; nor to the transportation, shipment, or receipt of any antique or unserviceable firearms, or ammunition, possessed and held as curios or museum pieces: *Provided*, That nothing contained in this section shall be construed to prevent shipments of firearms and ammunition to institutions, organizations, or persons to whom such firearms and ammunition may be lawfully delivered by the Secretary of War, nor to prevent the transportation of such firearms and ammunition so delivered by their lawful possessors while they are engaged in military training or in competitions.

§ 315.6 *Penalties.*

15 U. S. C. 905 Penalties. (a) Any person violating any of the provisions of this chapter or any rules and regulations promulgated hereunder, or who makes any statement in applying for the license or exemption provided for in this chapter, knowing such statement to be false, shall, upon conviction thereof, be fined not more than $2,000, or imprisoned for not more than five years, or both.

(b) Any firearm or ammunition involved in any violation of the provisions of this chapter or any rules or regulations promulgated thereunder shall be subject to seizure and forfeiture, and all provisions of Title 26 relating to the seizure, forfeiture, and disposition of firearms as defined in section 2733 of Title 26 shall, so far as applicable, extend to seizures and forfeitures incurred under the provisions of this chapter.

§ 315.7 *Effective date of chapter.*

15 U. S. C. 906 Effective date of chapter. This chapter shall take effect thirty days after June 30, 1938.

§ 315.8 *Rules and regulations.*

15 U. S. C. 907 Rules and regulations. The Secretary of the Treasury may prescribe such rules and regulations as he deems necessary to carry out the provisions of this chapter.

§ 315.9 *Separability clause.*

15 U. S. C. 908 Separability clause. Should any section or subsection of this chapter be declared unconstitutional, the remaining portion of the chapter shall remain in full force and effect.

§ 315.10 *Short title.*

15 U. S. C. 909 Short title. This chapter may be cited as the Federal Firearms Act.

§ 315.11 *Forfeitures.*[1]

26 U. S. C. 2730 Forfeitures—(a) Laws applicable. Any firearm which has at any time been transferred or made in violation of the provisions of this subchapter and Part VIII of subchapter A of chapter 27 shall be subject to seizure and forfeiture, and (except as provided in subsection (b)) all the provisions of internal-revenue laws relating to searches, seizures, and forfeiture of unstamped articles are extended to and made to apply to the articles taxed under this subchapter, and the persons to whom this subchapter and Part VIII of subchapter A of chapter 27 applies.

(b) *Disposal.* In the case of the forfeiture of any firearm by reason of a violation of this subchapter and Part VIII of subchapter A of chapter 27: No notice of public sale shall be required; no such firearm shall be sold at public sale; if such firearm is in the possession of any officer of the United States except the Secretary, such officer shall deliver the firearm to the Secretary; and the Secretary may order such firearm destroyed or may sell such firearm to any State, Territory, or possession,[1] or political subdivision thereof, or the District of Columbia, or retain it for the use of the Treasury Department or transfer it without charge to any Executive department or independent establishment of the Government for use by it.

SUBPART B—SCOPE OF REGULATIONS

§ 315.15 *Licensing of manufacturers and dealers in firearms or ammunition.* This part (Regulations 131), contain the procedural and substantive requirements relative to the licensing of manufacturers of, and dealers in, firearms or ammunition; to the records to be maintained by licensed manufacturers and dealers; and to transactions and dealings in firearms or ammunition specifically exempted from the provisions of the Federal Firearms Act (15 U. S. C. 901–909).

§ 315.16 *Relation to other provisions of law.* The provisions of this part are in addition to, and not in lieu of, any other provision of law, or regulations, respecting the manufacture or importation of, or dealing in, firearms or ammunition.

SUBPART C—DEFINITIONS

§ 315.20 *Meaning of terms.* As used in this part, unless the context otherwise requires, terms shall have the meanings ascribed in this subpart.

§ 315.21 *Act.* The term "act" shall mean the Federal Firearms Act.

§ 315.22 *Ammunition.* The term "ammunition" shall mean only pistol or revolver ammunition. It shall not include shotgun shells, metallic ammunition suitable for use only in rifles, or any .22 caliber rimfire ammunition.

§ 315.23 *Commissioner.* The term "Commissioner" shall mean the Commissioner of Internal Revenue.

§ 315.24 *Dealer.* The term "dealer" shall mean any person engaged in the business of selling firearms or ammunition or cartridge cases, primers, bullets or propellent powder, at wholesale or retail, or any person engaged in the business of repairing such firearms or of manufacturing or fitting special barrels, stocks, trigger mechanisms, or breech mechanisms to firearms.

§ 315.25 *District.* The term "district" shall mean the Internal Revenue district under the jurisdiction of a District Director of Internal Revenue.

§ 315.26 *District Director.* The term "District Director" shall mean the District Director of Internal Revenue.

§ 315.27 *Firearm.* The term "firearm" shall mean (a) any weapon, by whatever name known, which is designed to expel a projectile or projectiles by action of an explosive, (b) any part or parts of such weapon, and (c) a firearm muffler or firearm silencer.

§ 315.28 *Importation.* The term "importation" shall mean the bringing of firearms, or ammunition or cartridge cases, primers, bullets, or propellent powder, within the limits of the United States or any territory under its control or jurisdiction, from a place outside thereof (whether such place be a foreign country or territory subject to the jurisdiction of the United States), for purposes of sale or distribution.

§ 315.29 *Importer.* The term "importer" shall mean any person who engages in the importation of firearms, or ammunition or cartridge cases, primers, bullets, or propellent powder, for purposes of sale or distribution.

§ 315.30 *Includes and including.* The terms "includes" and "including" when used in a definition or statement in this part shall not be deemed to exclude other things otherwise within the scope thereof.

§ 315.31 *Interstate or foreign commerce.* The term "interstate or foreign commerce" shall mean (a) commerce between any State, Territory, or possession of the United States (not including the Canal Zone), or the District of Columbia, and any place outside thereof; (b) commerce between points within the same State, Territory, or possession of the United States (not including the Canal Zone), or the District of Columbia, but through any place outside thereof; or (c) commerce within any Territory or possession of the United States, or the District of Columbia.

§ 315.32 *License.* The term "license" shall mean a license issued under authority of section 3 (b) of the act (15 U. S. C. 903 (b)).

§ 315.33 *License fee.* The term "license fee" shall mean the annual fee payable by a manufacturer of, or dealer in, firearms or ammunition.

§ 315.34 *Licensed dealer.* The term "licensed dealer" shall mean a dealer licensed under section 3 of the act (15 U. S. C. 903).

§ 315.35 *Licensed manufacturer.* The term "licensed manufacturer" shall mean a manufacturer licensed under section 3 of the act (15 U. S. C. 903).

§ 315.36 *Manufacturer.* The term "manufacturer" shall mean any person engaged in the manufacture or importation of firearms, or ammunition, for purposes of sale or distribution.

§ 315.37 *Person.* The term "person" includes an individual, partnership, association, or corporation.

§ 315.38 *Secretary.* The term "Secretary" shall mean the Secretary of the Treasury.

SUBPART D—LICENSES

PERSONS REQUIRED TO PROCURE LICENSES

§ 315.40 *General.* Under section 2 (a) of the act (15 U. S. C. 902 (a)), it is unlawful for any manufacturer or dealer, except a manufacturer or dealer having a license issued under the provisions of the act, to transport, ship, or receive any firearms or ammunition in interstate or foreign commerce. Therefore, every manufacturer or dealer within the meaning of the act and this part (see §§ 315.36 and 315.24) must first procure a license under section 3 of the act (15 U. S. C. 903) before he may lawfully transport, ship, or receive any firearms or ammunition in interstate or foreign commerce.

§ 315.41 *Manufacturer and dealer.* It is not necessary in any case for a person licensed as a manufacturer also to procure a license as a dealer. The license as manufacturer entitles the licensee, within the limitations of the act, to transport, ship, or receive, in interstate or foreign commerce, firearms or ammunition, whether of his own production or produced by another. However, a person required to be licensed as a manufacturer does not comply with the provisions of the act by procuring a license as dealer.

§ 315.42 *Importer.* A person engaged in the importation of firearms or ammunition for sale or distribution is required to be licensed as a manufacturer even though he may not perform any manufacturing operations.

§ 315.43 *Gunsmith.* A person engaged in the business of repairing firearms, or of manufacturing or fitting special barrels, stocks, trigger mechanisms, or breech mechanisms to firearms, if not otherwise required to be licensed as a manufacturer, must be licensed as a dealer before he may lawfully transport, ship, or receive any firearm, including any part of a weapon (see § 315.27), or ammunition in interstate or foreign commerce.

ISSUANCE OF LICENSE

§ 315.44 *Application for a license.* The application for a license shall be made on Form 7 (Firearms), copies of which may be procured from District Directors. The application shall be filed with the District Director for the district within which the principal place of business of the applicant is located. The application must contain all the information required by the form.

§ 315.45 *Renewal of license.* When a license has expired, or is about to expire, a new license, if desired, may be obtained by filing with the District Director an application on Form 7 (Firearms), accompanied by the required license fee, provided the applicant is otherwise entitled to a license (see § 315.48).

§ 315.46 *License fees.* In the case of a manufacturer the license fee is $25 per annum, and in the case of a dealer the license fee is $1 per annum.

§ 315.47 *District Director to issue license.* If an application on Form 7 (Firearms) has been filed with the District Director, properly executed by a person lawfully entitled to a license and accompanied by the required license fee, there shall be issued to the applicant a license on Form 8 (Firearms).

§ 315.48 *Persons not entitled to a license.* A license shall not be issued to any person who is under indictment for, or has been convicted of, a "crime of violence" as defined in section 1 (6) of the act (15 U. S. C. 901 (6)), or who is a "fugitive from justice" as defined in section 1 (7) of the act (15 U. S. C. 901 (7)). Nor shall a license be issued to any applicant within two years after the revocation of a previous license.

SCOPE AND DURATION OF LICENSE

§ 315.49 *General.* The license shall entitle the person to whom issued to transport, ship, or receive firearms or ammunition in interstate or foreign commerce for a period of one year from the date of issuance, subject, however, to suspension or revocation of the license at any time if the licensee is convicted of violation of any of the provisions of the act (see §§ 315.55 to 315.62). A license shall not be issued in any case for a period of less than one year.

§ 315.50 *License cannot be assigned or transferred.* The license under section 3 of the act (15 U. S. C. 903) is not assignable or transferable under any circumstances and is valid only with respect to the operations of the person to whom issued.

§ 315.51 *Locations covered by license.* The license applies to the operations of the licensee and not to any particular place at which business is carried on. Accordingly, only one license is required, regardless of the number of places at which the licensee operates. If the business is carried on at more than one location, the license shall be held available for inspection at the principal place of business and an appropriate record maintained at all other locations showing where the license is so held.

§ 315.52 *Removal of licensee.* A licensee may remove his business to a new location without procuring a new license. However, in every case, whether or not the removal is from one district to another, prompt notification of the new location of the business must be given to:

(a) The District Director for the district where the license was issued;

(b) The District Director for the district from which or within which the removal is made; and

(c) The District Director for the district to which the removal is made.

§ 315.53 *State or other law.* The license confers no right or privilege to conduct business contrary to State law or other law. The holder of a license is not, by reason of such license, immune from punishment for dealing in firearms or ammunition in violation of the provisions of any State law or other law. Similarly, compliance with the provisions of any other law affords no immunity under the act (see § 315.16).

§ 315.54 *License fee not refundable.* No refund of any part of the amount paid as a license fee shall be made where, for any reason, a licensee discontinues operations prior to the expiration of the period covered by the license. Nor shall any refund be made if the license is suspended or revoked because of violation by the licensee of any provision of the act.

SUSPENSION AND REVOCATION OF LICENSE

§ 315.55 *General.* The license of any person convicted of violation of any provision of the act shall be suspended until final disposition of the case, at which time, if the conviction has not been set aside, the license shall be revoked. A licensee convicted of violation of any provision of the act may be permitted to continue in business during the pendency of an appeal from such conviction upon furnishing a bond of $1,000 acceptable to the Secretary.

§ 315.56 *Notice of suspension.* Upon receipt by the Secretary of notice of the conviction of a licensee of violation of any provision of the act, the license of such person shall be immediately suspended in accordance with the provisions of section 3 (c) of the act (15 U. S. C. 903 (c)), and the Commissioner shall immediately notify such person thereof by registered letter addressed to his last known address.

§ 315.57 *Continuing business during pendency of appeal from conviction*—(a) *Application.* A person whose license is suspended on account of a conviction of violation of any provision of the act and who desires permission to continue in business during the pendency of an appeal from such conviction shall file an application with the Commissioner for such permission. The application shall be submitted under oath or be verified by a written declaration that it is made under penalties of perjury and fully set forth the grounds on which the application is based. The application shall be accompanied by a bond, running to the United States, in the penal sum of $1,000. The condition of the bond shall be that, until final disposition of the appeal, the licensee will comply in every respect with all the provisions of the act. As soon as possible after the receipt of the application and bond, the Commissioner shall notify the applicant that, by direction of the Secretary, his application has been granted or denied, as the case may be.

(b) *Denial of application.* An application for permission to continue in business during the pendency of an appeal from a conviction of violation of any provision of the act shall not be granted if on the facts of the case the applicant would not then be entitled to a license were he applying for a license (see § 315.48).

§ 315.58 *Duration of suspension.* In every case, the suspension of a license shall remain in effect until final action is taken upon the application, if made, for permission to continue in business during the pendency of an appeal from the conviction. If such application is granted, the suspension is set aside until final action upon the appeal from the conviction, at which time the case will be disposed of according to the outcome of the appeal. If the application for permission to continue in business is denied, or if no such application is made, the suspension of the license remains in effect throughout the pendency of the appeal and final action will then be taken in the case as may be required by the outcome of the appeal.

§ 315.59 *Renewal of license during pendency of appeal.* The granting of an application to continue in business during the pendency of an appeal from a

[1] Omitted matter, relating to the Philippine Islands, no longer applicable.

conviction of violation of any provision of the act does not extend the term of the license. If a license expires by lapse of time before the appeal is decided, the licensee must procure a new license if he desires to continue to transport, ship, or receive firearms or ammunition in interstate or foreign commerce. The new license shall stand in place of, and be subject to the same conditions as, the old license, that is, the new license shall be subject to revocation if the conviction is not set aside.

§ 315.60 *Revocation of license.* If upon appeal the conviction of a licensee of violation of any provisions of the act is not set aside, or if no appeal is filed, his license shall be immediately revoked pursuant to the provisions of section 3 (c) of the act (15 U. S. C. 903 (c)), and the Commissioner shall immediately notify such person thereof by registered letter addressed to his last known address.

§ 315.61 *Forfeiture of license.* The forfeiture of a license for violation of any provision of the act is a separate and distinct penalty in addition to any other penalties which may apply in the case, whether imposed under section 5 of the act (15 U. S. C. 905), or under any other provision of law.

§ 315.62 *New license after revocation.* A person whose license has been revoked for violation of any provision of the act may, if otherwise entitled to a license (see § 315.48), again be licensed to transport, ship, or receive firearms or ammunition in interstate or foreign commerce, but not until the expiration of two years from the date of the revocation of the previous license. In such case, the application for the new license shall be filed with the District Director in accordance with the provisions of § 315.44.

SUBPART E—RECORDS

§ 315.70 *General.* The records prescribed by this subpart shall be in permanent form and shall be retained for a period of not less than six years from the date of the transactions to which the records relate. Such records must be held available for inspection during business hours by any authorized officer or agent of the United States engaged in the performance of his duties under the act.

§ 315.71 *Manufacturers' records.* Each licensed manufacturer shall maintain complete and adequate records of all firearms and ammunition disposed of in the course of his business, whether manufactured by himself or acquired from other manufacturers or dealers, including firearms in an unassembled condition, but not including parts of firearms. The records shall show and include:

(a) The number of the firearms of each type, together with a full and adequate description thereof, including the serial numbers if such weapons are numbered;

(b) The types, and quantity of each type, of ammunition;

(c) The name and address of each person from whom the firearms or ammunition, if not the manufacturer's own product, was acquired, and the date of acquisition; and

(d) The disposition made of the firearms or ammunition, including the name and principal address of each transferee, the address to which delivered, and the date of disposition.

§ 315.72 *Dealers' records.* Each licensed dealer shall maintain, at each store or place where firearms are sold or kept, a complete and adequate record of all firearms (not including parts of firearms but including firearms in an unassembled condition) acquired or disposed of in the course of his business at such store or place. If desired, duplicate or additional records of transactions at branch establishments may also be maintained at the home or central establishment. The records shall show and include:

(a) The number of the firearms of each type, together with a full and adequate description thereof, including the serial numbers if such weapons are numbered;

(b) The name and address of each person from whom firearms are acquired, and the date of acquisition; and

(c) The disposition made of the firearms, including the name and principal address of each transferee, the address to which delivered, and the date of disposition.

SUBPART F—EXEMPTIONS

§ 315.80 *General.* (a) The provisions of the act do not apply with respect to the transportation, shipment, receipt, or importation of any firearm, or ammunition, sold or shipped to, or issued for the use of:

(1) The United States or any department, independent establishment, or agency thereof;

(2) Any State, Territory, or possession, or the District of Columbia, or any department, independent establishment, agency, or any political subdivision thereof;

(3) Any duly commissioned officer or agent of the United States, a State, Territory, or possession, or the District of Columbia, or any political subdivision thereof;

(4) Any bank, public carrier, express, or armored-truck company organized and operating in good faith for the transportation of money and valuables, provided exemption is granted as prescribed in § 315.81; and

(5) Any research laboratory designated under § 315.82 and granted exemption thereunder; or

(b) With respect to:

(1) The transportation, shipment, or receipt of any antique or unserviceable firearms, or ammunition, possessed and held as curios or museum pieces; and

(2) Shipment of firearms and ammunition to institutions, organizations, or persons to whom such firearms and ammunition may be lawfully delivered by the Secretary of the Army, or the Secretary of the Air Force, and the transportation of such firearms and ammunition by their lawful possessors while they are engaged in military training or in competitions.

§ 315.81 *Bank, public carrier, express, or armored-truck company.* Any bank, public carrier, express, or armored-truck company organized and operating in good faith for the transportation of money and valuables, may procure an exemption upon application to the District Director for the district within which the principal place of business is located. Such application shall be submitted under oath or be verified by a written declaration that it is made under penalties of perjury and show the character of the business of the applicant and the purposes for which the exemption is requested. If the application and the purposes stated are bona fide, the exemption shall be granted. In all cases, as soon as possible after the receipt of the application, the District Director shall notify the applicant by letter that, by direction of the Secretary, the exemption is granted or denied, as the case may be.

§ 315.82 *Research laboratory.* A research laboratory desiring to procure an exemption under this subpart shall file an application with the Commissioner. The application shall be submitted under oath or be verified by a written declaration that it is made under penalties of perjury and shall show (a) by whom and the purpose for which the laboratory was organized, (b) the source of the funds expended for the maintenance and operations of the laboratory, (c) the services performed by, and the operations of, the laboratory, and (d) the purposes for which the exemption is requested. The Commissioner shall notify the applicant that, by direction of the Secretary, the application is granted, or denied, as the case may be.

SUBPART G—PENALTIES, SEIZURES AND FORFEITURES

§ 315.90 *Penalties.* Section 5 (a) of the act (15 U. S. C. 905 (a)), provides certain penalties for violation of the provisions of the act or the regulations in this part, and for knowingly making any false statement in applying for a license or exemption. With respect to transactions and dealings declared unlawful and in violation of the act, see section 2 of the act (15 U. S. C. 902).

§ 315.91 *Seizure and forfeiture.* Pursuant to section 5 (b) of the act (15 U. S. C. 905 (b)), any firearm or ammunition involved in any violation of the act or of the regulations in this part is subject to seizure and forfeiture, and all provisions of the Internal Revenue Code relating to the seizure, forfeiture, and disposition of firearms as defined in section 2733 of such Code, so far as applicable, extend to seizures and forfeitures incurred under the provisions of the act.

§ 315.92 *Disposition after forfeiture.* Any firearm or ammunition forfeited by reason of a violation of the Federal Firearms Act or any rules or regulations promulgated thereunder, the forfeiture of which firearm or ammunition has not been remitted or mitigated, shall be delivered to the Administrator of General Services, General Services Administration, for use or disposition as provided by law (63 Stat. 377).

Effective date: These regulations shall be effective as of May 1, 1954.

M. B. FOLSOM,
Acting Secretary of the Treasury.

[F. R. Doc. 54-2812; Filed, Apr. 14, 1954; 8:52 a. m.]

TITLE 32—NATIONAL DEFENSE

Chapter VII—Department of the Air Force

Subchapter A—Aid of Civil Authorities and Public Relations

PART 807—MANUFACTURE OF DECORATIONS

Subchapter G—Personnel

PART 878—DECORATIONS AND AWARDS

1. The reference made to Part 507, Chapter V, Department of the Army, in F. R. Document 48-11395 (13 F. R. 8751; 32 CFR Part 807) as being applicable to the Department of the Air Force is hereby revoked.

2. Sections 878.1 to 878.36 (15 F. R. 8564; 32 CFR and 1952 Supp., 878.1-878.36) are superseded by the following:

INDIVIDUAL DECORATIONS

Sec.
878.1 Purpose.
878.2 Policy.
878.3 Eligibility.
878.4 Repetitive awards.
878.5 Posthumous, missing in action, prisoners of war awards.
878.6 Decorations carrying additional pay.
878.7 Recommendations.
878.8 Time limitations.
878.9 Foreign decorations.
878.10 Authority to make awards.
878.11 Awards to foreign persons.
878.12 Military decorations.
878.13 Medal of Honor.
878.14 Distinguished Service Cross.
878.15 Distinguished Service Medal.
878.16 Silver Star.
878.17 Legion of Merit.
878.18 Distinguished Flying Cross.
878.19 Soldier's Medal.
878.20 Bronze Star Medal.
878.21 Air Medal.
878.22 Commendation Ribbon.
878.23 Purple Heart.
878.24 Civilian decorations.
878.25 Medal for Merit.
878.26 President's Certificate of Merit.
878.27 Medal of Freedom.
878.28 Exceptional Service Award.
878.29 Air Force Scroll of Appreciation.
878.30 Presentations.
878.31 Wearing of decorations.
878.32 Replacements.
878.33 Exhibitions.
878.34 Manufacture, sale, and possession.
878.35 Miscellaneous.

AUTHORITY: §§ 878.1 to 878.35 issued under R. S. 161, sec. 202, 61 Stat. 500, as amended; 5 U. S. C. 22, 171a. Statutory provisions interpreted or applied are cited to text in parentheses.

DERIVATION: AFR 30-14; 30-14A.

§ 878.1 *Purpose.* Sections 878.1 to 878.35 describe the military decorations awarded by the Department of the Air Force with the requirements therefor, and administrative procedures for processing recommendations. These sections also describe certain decorations awarded to civilians by or upon recommendation of the Department of the Air Force.

§ 878.2 *Policy.* The decorations described in §§ 878.1 to 878.35 recognize outstanding deeds of heroism, meritorious achievements or services by persons in behalf of the United States. The decorations system provides for recognition of varying degrees of heroism and merit.

§ 878.3 *Eligibility.* (a) Eligibility for a military or civilian-type decoration depends upon the individual's status at the time the heroic deed or meritorious service was performed.

(b) Members of the Reserve components not on active duty with the Air Force are eligible for award of the Distinguished Flying Cross, the Soldier's Medal, the Air Medal, and the Commendation Ribbon, provided that the requirements are otherwise fulfilled.

(c) In order for an award to be made, the military service of a person must have been honorable subsequent to the time he distinguished himself.

(40 Stat. 871, secs. 11, 12, 44 Stat. 789, as amended; 10 U. S. C. 1409, 1428, 1429; E. O. 9158, May 11, 1942, 7 F. R. 3541; 3 CFR, 1943 Cum. Supp., as amended by E. O. 9242-A, Sept. 11, 1942, 7 F. R. 7874, 3 CFR, 1943 Cum. Supp.)

§ 878.4 *Repetitive awards.* (a) Only one decoration will be awarded for a single act of heroism, a single meritorious achievement, or one continuous period of meritorious service.

(b) Only one basic award of any decoration will be made unless otherwise specified in §§ 878.1 to 878.35. Oak-Leaf Clusters are awarded in lieu of additional awards of the same medal. Awards of Oak-Leaf Clusters to the same individual for the same decoration will be numbered progressively and will be worn on the ribbon bar. A silver Oak-Leaf Cluster will be worn in lieu of five bronze clusters.

§ 878.5 *Posthumous, missing in action, and prisoners of war awards.* (a) Next of kin of deceased persons are entitled to receive decorations earned but not presented because of death. The next of kin eligible for posthumous presentation of decorations will be selected from one of the following, in the order listed: Widow, widower, eldest son, eldest daughter, father, mother, eldest brother, eldest sister, eldest grandchild.

(b) All elements of decorations earned but not presented to personnel who later become missing or prisoners of war will be forwarded to the Director of Military Personnel, Headquarters USAF, Washington 25, D. C. Awards of this nature will not be publicized until final determination of recipient's status is officially announced.

(40 Stat. 871, as amended, secs. 11, 12, 44 Stat. 789, as amended; 10 U. S. C. 1409, 1411, 1428, 1429. E. O. 9158, May 11, 1942; 7 F. R. 3541; 3 CFR, 1943 Cum. Supp.; as amended by E. O. 9242-A, Sept. 11, 1942, 7 F. R. 7874, 3 CFR, 1943 Cum. Supp.; E. O. 9419, Feb. 4, 1944, 9 F. R. 1495; 3 CFR, 1944 Supp.; E. O. 9586, July 6, 1945, 10 F. R. 8523; 3 CFR, 1945 Supp.; E. O. 9734, June 6, 1946, 11 F. R. 6225; 3 CFR, 1946 Supp.)

§ 878.6 *Decorations carrying additional pay*—(a) *Retired pay.* The retired pay authorized by section 4 of the Armed Forces Voluntary Recruitment Act of 1945, as amended will be increased by 10 percent for any airman who is credited with extraordinary heroism in line of duty. The determination of the Secretary of the Air Force as to extraordinary heroism for purposes of receiving such increases in pay will be final and conclusive.

(b) *Medal of Honor Roll.* Persons who have been honorably discharged from service and who were awarded the Medal of Honor are, upon reaching the age of 65, entitled to receive a special tax-free pension of 10 dollars a month for life. Upon application to Headquarters USAF and approval by the Secretary of the Air Force, such holders of the Medal of Honor may have themselves placed on the Medal of Honor Roll. Payment of pensions is through the Veterans' Administration.

(Secs. 1-4, 39 Stat. 53, 54, as amended. sec. 4, 59 Stat. 539, as amended; 10 U. S. C. 948, 38 U. S. C. 391-394).

§ 887.7 *Recommendations.* (a) A recommendation for award of any decoration may be initiated by any person having knowledge of circumstances believed to warrant an award, but recommendations originating with the person's commander at the time the act or service was performed are generally preferred. Recommendations not originating from first-hand knowledge will be supported by documentary evidence.

(1) Each recommendation will be for one person and for a specific decoration. (If more than one person participated in the same act or service, the individual contribution of each participant will be recommended separately.)

(2) The completion of minimum stated requirements does not automatically entitle an individual to receive a decoration, but is used in conjunction with character of service in determining the appropriateness of submitting a formal recommendation for award. The absence of a formal recommendation for an award in official records is considered as an indication that such individual was not recommended.

(3) Recommendations for awards for meritorious service are based upon a completed period of service. Such recommendations will be initiated only when an individual has been reassigned or the specific duty for which recommended has terminated. In cases where it is definitely established that a person will be reassigned, retired or separated on a specific date and presentation is desired before the person's departure, a recommendation may be initiated prior to the individual's departure.

(4) Recommendations for award of civilian type decorations will be submitted in the same manner and forwarded through the same channels as military type decorations. Information required by paragraph (c) of this section which is clearly applicable to military personnel only, will be excluded in recommendations for civilian type awards.

(b) Recommendations requiring Department of the Air Force approval will be forwarded in duplicate to the Director

of Military Personnel, Headquarters USAF, Washington 25, D. C.

(c) Recommendations will contain the following:

(1) The designation of the recommended decoration, if applicable, as a numbered oak-leaf cluster, and also statement whether posthumous or missing in action.

(2) The name, grade, service number, present organization, present duty assignment, and complete home address of the person recommended.

(3) A narrative statement specific as to dates, places, and facts relating to the heroism, achievement, or service.

(4) Grade, duty assignment, and unit assignment at time of act or service.

(5) Names of other individuals who will be recommended for the same act or service.

(6) A statement that service in the Air Force subsequent to the date of the act or service was honorable.

(7) Whether other recommendations for awards to the person are pending.

(8) Awards of previous decorations with authorities therefor.

(9) If posthumous, prisoner of war, or missing in action, the name, address, and relationship of the next of kin.

(d) A proposed citation will be forwarded with each recommendation. The proposed citation must be unclassified and normally will be limited to 100–150 words. In addition to the citation, supporting documentary evidence will be attached as inclosures to the recommendation when required by paragraph (a) of this section.

(e) Recommendations considered by the Air Force Decorations Board are given full consideration for a lesser award should the recommended award be disapproved. In the event no award is granted, the submission, in exceptional cases, of a complete new recommendation for a lesser award, including additional factual information and data, is not precluded (see § 878.8).

§ 878.8 *Time limitations.* (a) Recommendations for awards of decorations must be in official channels within 2 years of the date of heroism, achievement, or service.

(b) Recommendations submitted and disapproved for awarde of decorations may be submitted for reconsideration only if new evidence, not previously considered, is included. A request for reconsideration of a recommendation for a decoration must be in official channels within 2 years of the termination date of the act or service performed.

(c) Recommendations for awards based upon World War II acts or service can no longer be submitted for consideration.

(d) Recommendations placed in official channels, but, through circumstances, lost or not acted upon may be resubmitted with supporting evidence.

(40 Stat. 871; 10 U S. C. 1409)

§ 878.9 *Foreign decorations.* (a) Decorations tendered by a foreign government to members of the Air Force may not be accepted or worn without the express consent of Congress. (Clause 8, Section 9, Article I, of the Constitution.)

(b) The approval of the Congress is not required to accept any foreign decoration tendered or awarded for services while the recipient was a bona fide member of the Armed Forces of the respective foreign nation and provided the award is duly accepted in accordance with the regulations of the nation making the award prior to the recipient's entrance into active Federal service of the Armed Forces of the United States.

(c) Members of the Air Force Reserve components, while not on active duty and while not holding an office of profit or trust under the Government, may, without specific consent of the Congress, accept a foreign decoration and may, as authorized by Air Force uniform regulations, wear such decoration on his uniform, provided the award is not in recognition of service performed while the recipient was on active duty with the United States Air Force. While on inactive status the mere holding of a reserve commission is not considered as placing the holder in an office of profit or trust.

(d) The approval of the Congress is not required to accept any foreign decoration tendered or awarded posthumously to a former member of the United States Air Force.

(e) Recipients of foreign decorations may participate in presentation ceremonies and receive the awards, notwithstanding the absence of the consent of the Congress. The receipt of a foreign award at such ceremony will not constitute an acceptance of the award. Immediately following such ceremony, the recipient will advise the Department of the Air Force, by letter to the Director of Military Personnel, Headquarters USAF, Attention: Personnel Services Division, of the proffered award, setting forth all circumstances and inclosing all elements of the award, to include the medal and/or appurtenances, and original copies of certificates and allied documents. When presentation is made without prior notification, the appropriate representative of the foreign nation concerned will be advised of the above provisions of the Constitution.

(f) Except as indicated in paragraph (g) of this section, members of the Air Force are not authorized to receive decorations from foreign governments for duties performed in connection with the Military Assistance Program. Such personnel will not participate in presentation ceremonies.

(g) Personnel of Military Assistance Advisory Groups and Aid Missions are authorized to receive awards, in the manner described in this section, for services in connection with actual combat operations only.

§ 878.10 *Authority to make awards.* Authority to make awards must be specifically delegated. Unless specifically delegated, authority is reserved to the Department of the Air Force.

§ 878.11 *Awards to foreign persons.* (a) The award of decorations to members of the armed forces of foreign nations in peacetime is prohibited except that the Legion of Merit or the Medal of Freedom, in the appropriate degree may be awarded to recognize:

(1) Service of marked international significance where the interests of the United States are involved.

(2) Service which has aided the United States in furthering its national policies.

(3) Service which has furthered the interest of the security of the United States or of any nation allied or associated with the United States during a period of national emergency declared by the President or the Congress.

(b) Recommendations for awards to foreign persons will embody a statement indicating that the award, if approved, will be in conformity with the awards policy of the nation concerned.

§ 878.12 *Military decorations.* Military type decorations are awarded by the Department of the Air Force according to the requirements for the award and the status of the person at the time of his act or service. Military-type decorations according to type and precedence (positioning) are listed in §§ 878.13 to 878.23.

§ 878.13 *Medal of Honor.* (a) The Medal of Honor is a five-pointed star in gold, centered with the head of Minerva and surrounded by green enamel laurel leaves suspended from a link surmounted by an eagle. The ribbon is the collar type of light blue silk and above the suspension carries an octagon of the same material with thirteen white stars.

(b) The Medal of Honor, established by law, is awarded to any person who, while an officer or airman in the Air Force, in conflict with an enemy of the United States, distinguishes himself conspicuously by gallantry and intrepidity at the risk of his life above and beyond the call of duty. Recommendations for this highest United States decoration must incontestably prove that the bravery or self-sacrifice involved conspicuous risk of life, the omission of which could not justly cause censure.

(c) The Medal of Honor is awarded in the name of Congress and is usually presented by the President of the United States. It should not be confused with specially enacted Congressional medals.

(d) Persons awarded the Medal of Honor, whether in the service or not, are entitled to space available transportation on military aircraft, including scheduled flights, within the continental limits of the United States. Cards of identification for this purpose are issued by the appropriate Departments.

(40 Stat. 870, 10 U. S. C. 1403)

CROSS REFERENCE: For regulations with respect to transportation on military aircraft by persons holding the Medal of Honor, see §§ 416.6 (c) (2) and 417.4 (g) of this title (18 F. R. 8640, 8642).

§ 878.14 *Distinguished Service Cross.* (a) The Distinguished Service Cross is a bronze cross on which is centered an eagle over a wreath. The ribbon is predominantly dark blue with edgings of red separated from the blue by white lines.

(b) The Distinguished Service Cross, established by law, is awarded to any person who, while serving in any capacity with the Air Force, distinguishes himself by extraordinary heroism in connection with military operations against an armed enemy of the United States. Criterion for such heroism is risk of life so extraordinary as to set the person apart from his comrades.

(c) Authority to award the Distinguished Service Cross to United States personnel may be delegated during wartime to commanders of major air commands, but awards to foreign persons are reserved to the Department of the Air Force.

(40 Stat. 870; 10 U. S. C. 1406)

§ 878.15 *Distinguished Service Medal.* (a) The Distinguished Service Medal is an inscribed circle of blue enamel supporting the coat of arms of the United States. The ribbon is predominantly white banded in red separated from the white by blue lines.

(b) The Distinguished Service Medal, established by law, is awarded to any person serving in any capacity with the Air Force who distinguishes himself by exceptionally meritorious service to the Government in a duty of great responsibility. Responsibility means the exercise of authority or judgment in duties which decide the successful outcome of any major military operation. In peacetime, awards are limited to recognizing services of national or international significance.

(c) Civilians and foreign nationals are eligible for this award only under exceptional circumstances.

(40 Stat. 870; 10 U. S. C. 1407)

§ 878.16 *Silver Star.* (a) The Silver Star is a small silver star within a wreath centered on a larger star of gold-colored metal. The ribbon has a center band of red flanked by equal bands of white between equal bands of blue bordered by white lines with blue edging.

(b) The Silver Star, established by law, is awarded to any person, military, civilian, or foreign, who, while serving in any capacity with the Air Force, distinguishes himself by gallantry in action against an enemy of the United States. Gallantry means heroism of high degree involving risk of life.

(c) Authority to award the Silver Star may be delegated during wartime down to include commanders of numbered air forces.

(40 Stat. 871, as amended; 10 U. S. C. 1412)

§ 878.17 *Legion of Merit.* (a) The Legion of Merit is a five-rayed white enamel pronged star on a green wreath with crossed arrows. The cloud and stars from the coat of arms of the United States are displayed in an enamel center. The ribbon is red-purple with white edges.

(b) The Legion of Merit, established by law, is awarded to personnel of armed forces who distinguished themselves by exceptionally meritorious conduct in the performance of outstanding service to the United States. In peacetime, awards of the decorations generally are limited to recognizing services of national or international significance.

(c) The Legion of Merit is awarded without degree to members of the Armed Forces of the United States.

(d) Awards to members of foreign armed forces are made in the degrees of Chief Commander, Commander, Officer, and Legionnaire varying the design respectively for a breast decoration, a collar decoraton, and two chest decorations. The Chief Commander and Commander degrees are comparable to awards of the Distinguished Service Medal for United States personnel and usually are reserved for foreign heads of states and commanders of armed forces respectively. The other degrees are comparable to awards of the Legion of Merit without degree to United States personnel. Subsequent awards are never in a lower degree. Duplicate awards in such instances are made in all degrees, except that of Legionnaire for which oak-leaf clusters are employed.

(e) Authority to award the Legion of Merit to United States personnel may be delegated during wartime to commanders of major air commands, but awards to foreign persons are reserved to the Department of the Air Force.

(Sec. 2, 56 Stat. 662; 10 U. S. C. 1408b)

§ 878.18 *Distinguished Flying Cross.* (a) The Distinguished Flying Cross is a bronze cross with rays on which is displayed a propeller. The ribbon is predominantly blue with a narrow red band center bordered by white lines. The edges are outlined with equal bands of white inside blue.

(b) The Distinguished Flying Cross, established by law, is awarded to any member of the Armed Forces of the United States and to any member of the Armed Forces of friendly foreign nations, who, while serving in any capacity with the Air Force, distinguishes himself by heroism or extraordinary achievement while participating in aerial flight. Both heroism and achievement must be entirely distinctive, involving operations that are not routine.

(c) The Distinguished Flying Cross may be awarded by special act of Congress to outstanding pioneers of aviation regardless of status.

(d) Authority to award the Distinguished Flying Cross may be delegated during wartime down to include commanders of numbered air forces.

(Sec. 12, 44 Stat. 789, as amended; 10 U. S. C. 1429)

§ 878.19 *Soldier's Medal.* (a) The Soldier's Medal is a bronze octagon displaying an eagle in relief with fasces and stars. The ribbon centers thirteen narrow stripes, seven white and six red, edged by broad bands of blue.

(b) The Soldier's Medal, established by law, is awarded to any member of the Armed Forces of the United States and to any member of the armed forces of friendly foreign nations, who, while serving in any capacity with the Air Force distinguishes himself by heroism involving voluntary risk of life under conditions other than those of conflict with an armed enemy of the United States. The saving of a life or the success of the voluntary heroic act is not essential for consideration for an award.

(c) Authority to award the Soldier's Medal may be delegated during wartime down to include commanders of numbered air forces.

(Sec. 11, 44 Stat. 789; 10 U. S. C. 1428)

§ 878.20 *Bronze Star Medal.* (a) The Bronze Star Medal is a bronze star bearing in the center a smaller star of the same color. The ribbon is predominantly red with a white-edged narrow blue band in the center and white lines at each edge.

(b) The Bronze Star Medal is awarded to any person who, while serving in any capacity with the Air Force, distinguishes himself either by heroism in surface combat against an armed enemy of the United States, or by meritorious achievement or meritorious service not involving participation in aerial flight, but in connection with military operations against an enemy.

(c) The Bronze Star Medal when awarded for heroism is marked by a bronze letter "V" (for valor) clasped to the ribbon. Only one such "V" is authorized; additional awards are designated by oak-leaf clusters.

(d) Authority to award the Bronze Star Medal to United States personnel may be delegated during wartime, down to include commanders of air divisions, but awards to foreign persons will not be delegated below commanders of oversea air commands.

(E. O. 9419, Feb. 4, 1944, 9 F. R. 1495; 3 CFR, 1944 Supp.)

§ 878.21 *Air Medal.* (a) The Air Medal is a bronze compass rose displaying an eagle in flight bearing lightning flashes. The ribbon is predominantly blue with two orange-gold bands just inside the edges.

(b) The Air Medal is awarded to any person who, while serving in any capacity with the Air Force, distinguishes himself by meritorious achievement while participating in aerial flight. It may be awarded to recognize single acts of merit or sustained operational activities against an enemy of the United States.

(c) Authority to award the Air Medal may be delegated during wartime down to include commanders of air divisions.

(E. O. 9158, May 11, 1942, 7 F. R. 3541; 3 CFR, 1943 Cum. Supp., as amended by E. O. 9242-A, Sept. 11, 1942, 7 F. R. 7874, 3 CFR, 1943 Cum. Supp.)

§ 878.22 *Commendation Ribbon.* (a) The Commendation Ribbon consists of a ribbon and medallion. The medallion is a bronze hexagon bearing the eagle, shield, and arrows from the seal of the Department of Defense. The ribbon is medium green with white edges and five white lines in the center.

(b) The Commendation Ribbon, established by the Secretary of War, December 18, 1945, is awarded to members of the Armed Forces of the United States who, while serving in any capacity with the Air Force, distinguish themselves by meritorious achievement or meritorious service. The degree of merit need not be unique but it must be dis-

tinctive. Acts of courage which do not meet the risk of life requirements for award of the Soldier's Medal may be considered as evidence of a meritorious achievement warranting award of a Commendation Ribbon.

(c) A member or former member of the Armed Forces who received an individual letter of commendation, dated between December 7, 1941 and January 1, 1946, bearing the signature of an officer above the grade of brigadier general, or an officer occupying a position of major general or above, may submit such letter to the Director of Military Personnel, Headquarters USAF, Washington 25, D. C., for evaluation. Consideration will be given to these letters as evidence of meritorious achievement or meritorious service warranting an award of the Commendation Ribbon, provided that the achievement or service was not previously recognized by another decoration. Such letters may be submitted until July 1, 1954. The Commendation Ribbon will not be awarded retroactively for letters of commendation forwarded after that date.

(d) Authority to award the Commendation Ribbon to personnel below the grade of brigadier general is delegated to commanders of major air commands. In wartime, authority may be delegated down to include commanders of air divisions.

§ 878.23 *Purple Heart.* (a) The Purple Heart is a heart-shaped pendant of purple enamel bearing the relief head of General Washington in gold and the Washington shield in colors. The ribbon is dark purple with white edges.

(b) The Purple Heart established by General George Washington in 1782, is awarded to members of the Armed Forces of the United States, and civilian citizens of the United States, who, while serving with the Air Force, are wounded in action against an enemy of the United States. The wound must have necessitated medical treatment and must have been received as a direct result of an act of the enemy. Indirect results of enemy action, such as disease, exposure, or personal injury not directly attributable to an act of the enemy, are not a basis for an award. Multiple wounds received at the same instant are counted as a basis for but one award.

(c) Personnel otherwise eligible for an award of the Purple Heart who did not, because of unusual circumstances, receive an award may submit any available facts as evidence warranting this award to the Director of Military Personnel, Headquarters USAF, Washington 25, D. C. Whenever possible, a certificate from a medical officer should be supplied, attesting to the probable cause of a scar or injury.

(d) Awards of the Purple Heart made during World War II for meritorious achievement or service may be submitted for evaluation and substitution of another more appropriate decoration.

(e) Posthumous awards of the Purple Heart to Air Force personnel killed in action will be made by the Department of the Air Force.

(f) Authority to award the Purple Heart may be delegated during wartime down to include commanders of groups or comparable organizations.

§ 878.24 *Civilian decorations.* Civilian-type decorations are not awarded to any person for any act or service performed while serving as a member of the military service. Civilian-type decorations according to type and precedence (positioning) are listed in §§ 878.25 to 878.29.

§ 878.25 *Medal for Merit.* (a) The Medal for Merit consists of a bronze eagle upon a circle of blue enamel with white stars, suspended from a ribbon of magenta silk centering two white lines.

(b) The Medal for Merit, established by law, is awarded to civilians who distinguished themselves by exceptionally meritorious conduct in the performance of outstanding services. Awards to foreign civilians were limited to those of Allied nations who aided in World War II. This award is comparable to the Distinguished Service Medal.

(c) Authority to award the Medal for Merit is vested in the President of the United States who established the Medal for Merit Board to consider recommendations submitted by the services and other agencies.

(Sec. 2, 56 Stat. 662; 10 U. S. C. 1408b; E. O. 9637, Oct. 3, 1945, 10 F. R. 12543; 3 CFR, 1945 Supp., as amended by E. O. 9857A, May 27, 1947, 12 F. R. 3583; 3 CFR, 1947 Supp.)

NOTE: This decoration is not currently being awarded and will not be awarded until directed by the President.

§ 878.26 *President's Certificate of Merit.* (a) The President's Certificate of Merit, unlike most other decorations, has neither ribbon nor medallion. It consists solely of a certificate signed by the President of the United States.

(b) The President's Certificate of Merit, was awarded to any civilian who performed a meritorious act or service aiding the United States or its allies during World War II.

(E. O. 9734, June 6, 1946, 11 F. R. 6225; 3 CFR, 1946 Supp., as amended by E. O. 9857B, May 27, 1947, 12 F. R. 3585; 3 CFR, 1947 Supp.)

NOTE: This decoration is not currently being awarded and will not be awarded until directed by the President.

§ 878.27 *Medal of Freedom.* (a) The Medal of Freedom is a circular bronze medallion bearing the head of the goddess of freedom with a ribbon of red silk centering four white lines.

(b) The Medal of Freedom may be awarded to any person not hereinafter specifically excluded, who, on or after December 7, 1941, has performed a meritorious act or service which has either:

(1) Aided the United States in the prosecution of a war against an enemy or enemies, or

(2) Aided any nation engaged with the United States in the prosecution of a war against a common enemy or enemies, or

(3) Furthered the interests of the security of the United States or of any nation allied or associated with the United States during any period of national emergency declared by the President or the Congress, and for which act or service the award of any other United States medal or decoration is considered inappropriate.

NOTE: In special circumstances and without regard to the existence of a state of war or national emergency, the Medal of Freedom may also be awarded by, or at the direction of, the President of the United States, to any person, not hereinafter specifically excluded, for performance of a meritorious act or service in the interests of the security of the United States.

(c) The Medal of Freedom will not be awarded to a citizen of the United States for any act or service performed within the continental limits of the United States; neither will it be awarded to a member of the Armed Forces of the United States. Awards to citizens of the United States will be without reference to degree and the Medal of Freedom without Palm will be issued.

(d) Awards to citizens and members of armed forces of foreign nations are made in the following degrees which correspond to the respective military decorations indicated:

(1) Gold Palm (Legion of Merit, Chief Commander);

(2) Silver Palm (Legion of Merit, Commander);

(3) Bronze Palm (Legion of Merit, Officer or Legionnaire);

(4) Without Palm (Bronze Star Medal).

(E. O. 9586, July 6, 1945, 10 F. R. 8523; 3 CFR, 1945 Supp., as amended by E. O. 10336, April 3, 1952, 17 F. R. 2957; 3 CFR, 1952 Supp.)

§ 878.28 *Exceptional Service Award.* (a) The Exceptional Service Award consists of a gold colored medal bearing the Air Force coat of arms within a wreath of laurel leaves and a ribbon of dark blue silk centering three dotted golden-orange lines.

(b) The Exceptional Service Award, established by the Secretary of the Air Force, August 30, 1948, recognizes United States civilians not employed by the Air Force, who distinguish themselves by exceptional services rendered to the Department of the Air Force. Additionally, this decoration may be awarded to any civilian, United States or foreign, not employed by United States Government for an act of heroism involving voluntary risk of life. This award is similar to the Exceptional Civilian Service Award which is awarded only to civilian employees of the Department of the Air Force.

§ 878.29 *Air Force Scroll of Appreciation.* (a) The Air Force Scroll of Appreciation consists of a signed citation describing the act or service being recognized. It is not accompanied by a lapel pin or other device.

(b) The Air Force Scroll of Appreciation, established by the Secretary of the Air Force in August 1948, recognizes heroic or meritorious achievement or service rendered to any activity of the Department of the Air Force by any civilian, not employed by the Government. Acts of courage which do not meet the risk of life requirements for award of the Exceptional Service Award may be considered as evidence of a meritorious achievement warranting award of the Air Force Scroll of Appreciation.

It may be awarded to groups or organizations as well as to individuals.

§ 878.30 *Presentations.* (a) At presentations, elements of an award properly include a leatherette or plastic case containing the medal with ribbon, ribbon bar, clusters if any, lapel button or rosette, and a citation. The citation, which is furnished by the awarding authority, consists of a text typed on plain paper and suitable for reading at the ceremony. General orders published by the awarding authority are not essential at the time of the ceremony but may be furnished later.

(b) Whenever a recipient not on active duty waives formal presentation, the various elements comprising the award will be forwarded by courier or registered mail. In posthumous cases, presentations will be held in accordance with the desires of the recipients.

§ 878.31 *Wearing of decorations.* United States decorations are worn immediately above the pocket, on the left breast, in order of precedence from the wearer's right to left, preceding all United States service awards and in one or more lines, as required.

§ 878.32 *Replacements.* (a) Replacement for medals and appurtenances lost or destroyed through no fault or neglect on the part of the person to whom awarded will be replaced without charge to members of the Air Force on active duty and members of the Reserve components upon application to the commanders having custody of the field personnel records group.

(b) Persons not on active duty and not members of Reserve components, and next of kin of deceased personnel may address their applications to the Air Force Liaison Unit, Military Personnel Records Center, 4300 Goodfellow Boulevard, St. Louis 20, Missouri.

(c) Certificates are supplied upon individual request by the recipient of a decoration, addressed to the Air Force Liaison Unit, Military Personnel Records Center, 4300 Goodfellow Boulevard, St. Louis 20, Missouri. A copy of the general orders announcing the award, if available, or the authority for the award should accompany each request.

§ 878.33 *Exhibitions.* Applications by public institutions and patriotic organizations for sample decorations for exhibit purposes may be addressed to the Director of Military Personnel, Headquarters USAF, Washington 25, D. C., for approval by the Secretary of the Air Force. Cost, transportation, and packing charges as well as the engraving of each decoration with the words "Exhibition only" will be borne by the applicant.

§ 878.34 *Manufacture, sale, and possession.* The manufacture, sale, possession, or the pictorial representation in regulation size of the likeness of any United States Air Force decoration or device is prohibited by law unless authorized by the Department of the Air Force.

(62 Stat. 731, 732, as amended; 18 U. S. C. 701, 704)

§ 878.35 *Miscellaneous.* (a) Decorations differ from service medals in design; each decoration has distinctive shape. Service medals are usually circular with pictorial relief.

(b) Rosettes or lapel emblems for wear with civilian clothes are included with each medal when presented. Lapel emblems usually are enamel facsimiles of the ribbon.

[SEAL] K. E. THIEBAUD,
Colonel, U. S. Air Force,
Air Adjutant General.

TITLE 32A—NATIONAL DEFENSE, APPENDIX

Chapter XIV—General Services Administration

[Rev. 2]

REG. 3—MANGANESE REGULATION: PURCHASE PROGRAM FOR DOMESTIC MANGANESE ORE AT DEMING, NEW MEXICO

By amending the provisions of section 6, this revision permits shippers of lots aggregating less than two hundred (200) tons in any thirty (30) day period to receive settlement on the same basis as shippers of lots aggregating two hundred (200) tons or more. This revision also modifies the rejection provisions for subspecification material in sections 4 and 6 by making rejection of such material permissive instead of mandatory. This revision embodies or supersedes Revision 1, dated September 19, 1952, and Amendments 1 and 2 to said Revision 1, dated August 13, 1953, and September 25, 1953, respectively.

Sec.
1. Basis and purpose.
2. Definitions.
3. Participation in the Program.
4. Deliveries.
5. Duration of the Program.
6. Price schedule for ores.
7. Ores containing lead and zinc in excess of the allowable maximum.

AUTHORITY: Section 1 to 7 issued under sec. 704, 64 Stat. 816, as amended, Pub. Law 95, 83d Cong.; 50 U. S. C. App. 2154. Interpret or apply sec. 303, 64 Stat. 801, as amended, Pub. Laws 95, 206, 83d Cong.; 50 U. S. C. App. 2154, E. O. 10480, 18 F. R. 4939.

SECTION 1. *Basis and purpose.* This regulation interprets and implements the authority of the Administrator of General Services to purchase manganese ore of domestic origin at Deming, New Mexico, for the fiscal years 1952–1958, pursuant to Executive Order 10480, dated August 14, 1953 (18 F. R. 4939). In accordance with the provisions and specifications of the Program as set forth herein and as they may be hereafter amended and revised, the Administrator will buy domestically produced manganese ore containing not less than fifteen percent (15%) manganese.

SEC. 2. *Definitions.* As used in this regulation:

(a) "Administrator" means the Administrator of General Services.

(b) "Program" means the purchase of manganese ore as set forth in this regulation.

(c) "Depot" means the purchase depot of the Government at Deming, New Mexico.

(d) "Manganese ore" means crude ore containing not less than 15 percent manganese, mined in the United States, its Territories and possessions.

(e) "Long ton unit of manganese" means 22.4 pounds of manganese contained in a long dry ton of manganese ore.

SEC. 3. *Participation in the Program.* Any person may participate in the Program by notice given to the General Services Administration Regional Office, Building 41, Denver Federal Center, Denver, Colorado, in the form of a letter, postcard or telegram postmarked or dated by the telegraph office not later than June 30, 1954. Such notice shall state that the writer desires to participate in the Program and will deliver manganese ore to the depot. Such notice must be signed and a return address given. Any person participating in the Program will promptly be sent a certificate authorizing him to deliver manganese or meeting minimum specifications.

SEC. 4. *Deliveries.* Manganese ore to be purchased by the Government under the Program is to be delivered f. o. b. depot. Delivery of less than five (5) long tons of ore at one time will not be accepted. Participants in the Program must give the Government reasonable notice with respect to deliveries of ore. Each delivery will be sampled and assayed by the Government at the depot and payment of an estimated recovery basis will be made in accordance with the analysis of such sample and as provided in section 6 of this regulation. Deliveries not conforming to the minimum specifications may be rejected, and expenses in connection therewith will be borne by the seller.

SEC. 5. *Duration of the Program.* This Program shall terminate and be of no further force or effect when six million (6,000,000) contained long ton units of manganese have been delivered to the depot and accepted by the Government under this Program, or at the close of business June 30, 1958, whichever first occurs.

SEC. 6. *Price schedule for ores.* (a) The following prices per long dry ton will be paid for manganese ore delivered f. o. b. depot. Where the fractional manganese content is 0.5 percent or below, payment will be made as though no fractional content were involved. Where such fractional content is 0.51 percent or above, payment will be made at the next higher figure.

Percent Mn in ore:	*To be paid for 1 long dry ton*
15	$8 54
16	10 24
17	12 00
18	13 71
19	15 43
20	17 20
21	19 13
22	21 06
23	23 05

Percent Mn in ore:	*To be paid for 1 long dry ton*
24	$24.99
25	26.94
26	29.64
27	32.40
28	35.11
29	37.88
30	40.60
31	44.73
32	46.86
33	50.00
34	53.14
35	56.29
36	60.74
37	65.15
38	69.61
39	74.03
40 fines	78.00
40 ore	88.00

The above price schedule applies to lots received from individual shippers aggregating less than 200 tons during any 30-day period, and shall constitute the final and definite price for such lots, unless, for such lots, individual shippers thereof shall have notified the Government in writing that they desire settlement in accordance with the provisions of paragraph (b) of this section for each accumulation of fifty (50) tons.

(b) For lots received from individual shippers aggregating two hundred (200) tons or more during any thirty (30) day period, and for lots received from individual shippers aggregating fifty (50) tons for which the shipper has notified the Government of its desire to receive settlement in accordance with the provisions of this section, the price schedule appearing in paragraph (a) of this section shall serve as a basis for preliminary settlement pending laboratory tests. The preliminary settlement shall be adjusted up or down, as the case may be, as a result of tests for laboratory-determined recoverability. Final settlement shall be calculated on the basis of $2.30 per long ton unit of manganese determined from the laboratory tests to be recoverable from the ore, subject to a charge of $10 per ton of ore (the estimated cost of sampling, milling, and handling) and to the specifications, premiums, and penalties set forth below.

Specifications	*Percent*
Manganese	48.0
Iron	6.0
Silica plus alumina	11.0
Phosphorus	.12

Premiums

Manganese content above 48.0 percent (dry basis): ½ cent for each 1.0 percent.

Iron content below 6.0 percent (dry basis): ½ cent for each 1.0 percent.

Penalties

Manganese content below 48.0 percent (dry basis): 1 cent for each 1.0 percent, down to and including 44.0 percent. Below 44.0 percent: 4 cents, plus 1½ cents for each 1.0 percent down to 40.0 percent minimum. Iron content above 6.0 percent (dry basis): 1 cent for each 1.0 percent, up to and incuding 8.0 percent. Above 8.0 percent: 2 cents plus ¾ cent for each 1.0 percent up to 16 percent maximum. Silica plus alumina content above 11.0 percent (dry basis): 1 cent for each 1.0 percent up to 15 percent maximum. Phosphorus content above 0.12 percent (dry basis): ½ cent for each 0.01 percent up to 0.3 percent maximum.

The Government may reject any lot which, on the basis of the laboratory testing, cannot be beneficiated to a product the chemical analysis of which falls within the following limits in all respects. The Government reserves the right to dispense with laboratory testing of shipments aggregating less than 200 tons over a 30-day period.

	By weight (dry basis) (percent)
	Minimum
Manganese (Mn)	40.0
	Maximum
Iron (Fe)	16.0
Silica plus alumina (SiO_2 plus Al_2O_3)	15.0
Phosphorus (P)	.30
Copper plus lead plus zinc (Cu plus Pb plus Zn). Of which not more than 0.25 percent may be copper	1.00

Sec. 7. *Ores containing lead and zinc in excess of the allowable maximum.* Ores containing lead and zinc exceeding the maximum percentage allowed by section 6 of this regulation shall be accepted and purchased under this program, provided that such ores are amenable to nodulization, and as a result of nodulization the contained lead and zinc of the ores will be reduced to the maximum percentage allowed by section 6 of this regulation. Such ores shall be subject to a charge of $2.25 per long dry ton to cover the cost of nodulization.

This regulation, as revised, is effective immediately.

Dated: April 8, 1954.

AL E. SNYDER,
Assistant Administrator.

[F. R. Doc. 54-2830; Filed, Apr. 14, 1954; 8:55 a. m.]

[Rev. 2]

REG. 4—MANGANESE REGULATION: PURCHASE PROGRAM FOR DOMESTIC MANGANESE ORE AT BUTTE AND PHILIPSBURG, MONTANA

This revision modifies the provisions of, and redesignates the previously numbered section 9, to permit shippers of manganese oxide ore in lots aggregating less than two hundred (200) tons in any thirty (30) day period to receive settlement on the same basis as shippers of lots aggregating two hundred (200) tons or more. This revision also modifies the rejection provisions for subspecification material by making rejection of such material permissive instead of mandatory. This revision embodies or supersedes Revision 1, dated July 25, 1952, and Amendments 1 through 4, to said Revision 1, dated January 12, February 19, August 13, and September 25, 1953, respectively.

Sec.
1. Basis and purposes.
2. Definitions.
3. Participation in the Program.
4. Duration of the Program.
5. Deliveries of manganese carbonate ore.
6. Price schedule for manganese carbonate ore.
7. Purchases of manganese oxide ore.
8. Price schedule for manganese oxide ore.
9. Minimum requirements for manganese oxide ore.
10. Deliveries of manganese oxide ore.
11. Weighing, sampling and analysis of manganese oxide ore.

AUTHORITY: Sections 1 to 11 issued under sec. 704, 64 Stat. 816, as amended, Pub. Law 95, 83d Cong.; 50 U. S. C. App. 2154. Interpret or apply sec. 303, 64 Stat. 801, as amended, Pub. Laws 95, 206, 83d Cong.; 50 U. S. C. App. 2154 E. O. 10480, 18 F. R. 4939.

SECTION 1. *Basis and purpose.* This regulation interprets and implements the authority of the Administrator of General Services to purchase manganese carbonate ore and manganese oxide ore of domestic origin at Butte, Montana, and at Philipsburg, Montana, for the fiscal years 1952–58, pursuant to Executive Order 10480, dated August 14, 1953 (18 F. R. 4939). In accordance with the provisions of this Program as set forth herein, and as they may be hereafter amended and revised, the Administrator will buy domestically produced manganese carbonate ore and manganese oxide ore. Sections 5 and 6 of this regulation provide for the purchase by the Government of manganese carbonate ore. Such ore shall contain not less than fifteen percent (15%) manganese in the case of ore delivered at Philipsburg, nor less than twelve percent (12%) in the case of ore delivered at Butte. Sections 7 through 11 of this regulation provide for the purchase by the Government of manganese oxide ore containing not less than eighteen percent (18%) manganese.

SEC. 2. *Definitions.* As used in this regulation:

(a) "Administrator" means the Administrator of General Services.

(b) "Program" means the purchase of manganese carbonate ore and manganese oxide ore as set forth in this regulation.

(c) "Depot" means the purchase depots of the Government at Butte, Montana and at Philipsburg, Montana.

(d) "Manganese carbonate ore" means crude ore from production of ore containing not less than 90 percent of the manganese as carbonate, mined in the United States, its Territories and possessions.

(e) "Manganese oxide ore" means crude manganese oxide ores and concentrates, or a mixture of oxide and carbonate containing less than ninety percent (90%) carbonate, mined in the United States, its Territories and possessions.

(f) "Long ton unit of manganese" means 22.4 pounds of manganese contained in a long dry ton of manganese ore.

SEC. 3. *Participation in the Program.* Subject to the last sentence of this section, any person may participate in the Program by notice given to the General Services Administration, Regional Office, Federal Office Building, Seattle 4, Washington, in the form of a letter, postcard or telegram postmarked or dated by the telegraph office not later than June 30, 1954. Such notice shall state that the writer desires to participate in the Program and will deliver manganese ore to either or both of the depots, giving the estimated monthly rate of delivery. Such notice must be signed and a return address given. Any person participating in the Program will promptly be sent a certificate authorizing him to deliver manganese ore meeting minimum specifications. Since the purpose of the Program is to obtain from marginal or submarginal sources manganese ore which would not otherwise be produced, the Government reserves the right to exclude commercially established production of manganese ore from participation in the Program.

SEC. 4. *Duration of the Program.* This Program shall terminate and be of no further force or effect when six million (6,000,000) contained long ton units of manganese have been delivered to the depots and accepted by the Government under this Program, or at the close of business June 30, 1958, whichever first occurs.

SEC. 5. *Deliveries of manganese carbonate ore.* Manganese carbonate ore to be purchased by the Government under this Program is to be delivered f. o. b. depot. Ore produced in Granite, Powell, and Ravalli Counties is to be delivered f. o. b. depot, Philipsburg, Montana, and will be paid for on that basis, as provided in section 6 of this regulation. Delivery of less than five (5) long tons of ore at one time will not be accepted. Participants in the Program must give the Government reasonable notice with respect to deliveries of ore. Each delivery will be sampled by the Government and payment will be made in accordance with the analysis of such sample, as provided in section 6. Deliveries not conforming to the minimum specifications and the requirements of this regulation may be rejected, and all expenses incurred by the Government in connection with such rejected shipments shall be borne by the seller. The seller shall be held responsible for the removal of any lot rejected. Upon the seller's failure to remove a rejected lot within a reasonable time after due notice, the Government may remove such lot and the cost of such removal shall be for the seller's account; or the Government, at its option, may otherwise dispose of such rejected lot without liability therefor.

SEC. 6. *Price schedule for manganese carbonate ore.* Payment for manganese carbonate ore delivered f. o. b. depot shall be made on the basis of the following table:

Percent of manganese in ore	To be paid for 1 long dry ton delivered f. o. b. depot, Philipsburg	To be paid for 1 long dry ton delivered f. o. b. depot, Butte
12		$6.05
13		7.59
14		9.46
15	$6.43	11.43
16	8.72	13.43
17	10.75	16.27
18	12.79	19.01
19	15.04	21.46
20	17.22	23.62
21	19.04	25.21
22	20.89	26.89
23	22.73	28.41
24	24.62	30.07
25	26.53	31.74
26	28.39	33.54
27	29.90	35.35
28	31.38	37.11
29	33.21	38.76
30	34.81	40.42
31	50.28	51.33
32	52.17	53.26
33	54.06	55.18
34	55.93	57.11
35	57.94	59.03
36	59.72	60.94
37	61.61	62.87
38	63.50	64.79
39	65.38	66.72
40	67.28	68.64

The following premiums and penalties will be paid:

(a) For each 1 percent of iron as oxide in excess of 3 percent, a penalty of ½ of 1 percent manganese shall be imposed.

(b) For each 1 percent of calcium oxide plus magnesium oxide in excess of 9 percent, a penalty of 1 percent manganese shall be imposed.

(c) A credit of 0.25 percent manganese shall be allowed for each 1 percent of calcium oxide plus magnesium oxide below 7 percent, provided, this credit does not apply to Butte ore containing more than 15 percent manganese. In addition, payment for any gold, silver, lead, or zinc contained in the manganese carbonate ore shall be made on the basis of the following tables:

Gold

No pay if 0.03 ounce or less (per short dry ton).

0.031 ounce to 0.05 ounce—pay for 20 percent at $30 per ounce.

0.051 ounce to 0.10 ounce—pay for 30 percent at $30 per ounce.

0.101 ounce to 0.15 ounce—pay for 40 percent at $30 per ounce.

0.151 ounce to 0.20 ounce—pay for 50 percent at $30 per ounce.

Over 0.201 ounce—pay for 60 percent at $30 per ounce.

Silver

No pay if 2.0 ounces or less (per short dry ton).

2.1 ounces to 5.0 ounces—pay for 30 percent at market price.

5.1 ounces to 7.5 ounces—pay for 45 percent at market price.

7.6 ounces to 10.0 ounces—pay for 60 percent at market price.

Over 10.1 ounces—pay for 60 percent at market price.

Lead

No pay if 1.0 percent or less (per short dry ton).

1.1 percent to 2.0 percent—pay for 40 percent at market less 2 cents.

2.1 percent to 3.0 percent—pay for 45 percent at market less 2 cents.

3.1 to 4.0 percent—pay for 50 percent at market less 2 cents.

4.1 percent to 5.0 percent—pay for 55 percent at market less 2 cents.

5.1 percent and over—pay for 60 percent at market less 2 cents.

NOTE: Payments shall be made only for lead occurring as sulfide. Oxide lead content shall be deducted from total lead content to determine sulfide lead content. Should oxide lead content exceed one-third of total lead content, no lead payment shall be made.

Zinc

No pay if 1 percent or less (per short dry ton).

1.1 percent to 2.0 percent—pay for 30 percent at ½ market price.

2.1 percent to 3.0 percent—pay for 35 percent at ½ market price.

3.1 percent to 4.0 percent—pay for 40 percent at ½ market price.

4.1 percent to 5.0 percent—pay for 45 percent at ½ market price.

5.1 percent and over—pay for 50 percent at ½ market price.

NOTE: Oxide zinc content shall be deducted from total zinc content to determine sulfide zinc content. Should oxide zinc content be 10 percent or more of total, no zinc payment shall be made.

(d) No payment shall be made for manganese contained in the ore as silicates.

SEC. 7. *Purchases of manganese oxide ore.* Manganese oxide ore meeting the specifications and requirements herein set forth shall be purchased by the Government at Butte, and Philipsburg, Montana, from any person authorized to participate in this Program pursuant to the provisions of section 3 of this regulation, as revised. All deliveries of manganese oxide ore hereunder shall be either f. o. b. Government Depot, Butte, Montana, or f. o. b. railway cars, Philipsburg, Montana. For the purposes of this regulation, a lot means the quantity of manganese oxide ore delivered for sale to the Government at any one time. Delivery of less than five (5) long tons of ore at one time will not be accepted. Participants in the program shall give the Government reasonable notice with respect to proposed deliveries. Shipments not conforming to the minimum specifications and the requirements of this regulation may be rejected, and all expenses incurred by the Government in connection with such rejected shipments shall be borne by the seller. The seller shall be held responsible for the removal of any lot rejected. Upon the seller's failure to remove a rejected lot within a reasonable time after due notice, the Government may remove such lot and the cost of such removal shall be for the seller's account; or the Government, at its option, may otherwise dispose of such rejected lot without liability therefor.

SEC. 8. *Price schedule for manganese oxide ore.* The Government shall purchase, pursuant to the price schedule set forth in paragraph (a) of this section and the requirements of this regulation, as revised, manganese oxide ore delivered either (1) f. o. b. Government Depot, Butte, Montana, or (2) f. o. b. railway cars, Philipsburg, Montana. Two methods of payment shall be employed:

(a) Subject to the right of the Government to determine whether laboratory testing (for recoverability) shall be performed, final and definite payment for lots delivered by individual shippers aggregating less than two hundred (200) tons during any thirty (30) day period shall be made in accordance with the following schedule, unless for such lots, individual shippers thereof shall have notified the Government in writing that they desire settlement in accordance with the provisions of paragraph (b) of this section for each accumulation of fifty (50) tons.

Percent of manganese in the ore or concentrate:	*To be paid for 1 long dry ton*
18	$4.87
19	7.08
20	9.18
21	11.35
22	13.60
23	15.61
24	18.01
25	19.82
26	21.83
27	24.51
28	26.45
29	29.09
30	31.33
31	33.61
32	35.94
33	38.22

Percent of manganese in the ore or concentrate:	To be paid for 1 long dry ton
34	$40.64
35	43.09
36	45.60
37	47.32
38	49.89
39	51.62

NOTE: Where the fractional marginal content is 0.5 percent or below, payment will be made as though no fractional content were involved. Where the fractional content is 0.51 percent or above, payment will be made at the next higher figure.

(b) For lots received from individual shippers aggregating two hundred (200) tons or more during any thirty (30) day period, and for lots of lesser aggregate tonnages received from individual shippers for which the shipper has notified the Government of its desire to receive settlement in accordance with the provisions of this section, preliminary payments based on the schedule appearing in paragraph (a) of this section shall be made to the seller. Final settlement shall be deferred pending laboratory tests to determine the recoverability of manganese from such lots. Following such determination the preliminary payment shall be adjusted up or down, as the case may be, to reflect the final price, and final settlement for the purchase of such lots shall be made forthwith. The final price shall be based on the manganese content determined to be recoverable from such lots, as a result of the laboratory tests, at the rate of $2.30 per long ton unit (22.4 pounds) for contained manganese meeting the following chemical analysis, subject to premiums and penalties as herein below set forth for manganese which does not meet such analysis:

CHEMICAL ANALYSIS

	Percent
Manganese	48.0
Iron	6.0
Silica plus alumina	11.0
Phosphorus	.12

PREMIUMS

Manganese content above 48.0 percent (dry basis): ½ cent for each 1.0 percent.

Iron content below 6.0 percent (dry basis): ½ cent for each 1.0 percent.

PENALTIES

Manganese content below 48.0 percent (dry basis): 1 cent for each 1.0 percent down to and including 44.0 percent. Below 44.0 percent: 4 cents, plus 1½ cents for each 1.0 percent down to 40.0 percent minimum. Iron content above 6.0 percent (dry basis): 1 cent for each 1.0 percent up to and including 8.0 percent. Above 8.0 percent: 2 cents plus ⅜ cent for each 1.0 percent up to 16 percent maximum. Silica plus alumina content above 11.0 percent (dry basis): 1 cent for each 1.0 percent up to 15 percent maximum. Phosphorus content above 0.12 percent (dry basis): ½ cent for each .01 percent up to 0.3 percent maximum.

Each purchase under this paragraph shall be subject to a flat charge, to be deducted in making final settlement, for treatment, sampling, handling, stockpiling, switching and withdrawal of the manganese oxide ore, at the rate of $16.60 for each long ton of manganese oxide ore contained in the offering.

SEC. 9. *Minimum requirements for manganese oxide ore.* The Government may reject any lot offered pursuant to sections 7 through 11 of this regulation, which on the basis of laboratory testing, cannot be beneficiated to a product, the chemical analysis of which falls within the following limits in all respects:

	By weight (dry basis) (percent)
Manganese (minimum)	40.0
Iron (maximum)	16.0
Silica plus alumina (maximum)	15.0
Phosphorous (maximum)	.3
Copper plus lead plus zinc, of which not more than 0.25 percent may be copper (maximum)	1.0

SEC. 10. *Deliveries of manganese oxide ore.* (a) With each delivery of a lot, the seller shall indicate whether the lot is to be held to accumulate for an offering of fifty (50) tons and for which the shipper desires settlement under the provisions of paragraph (b) of section 8, or for an offering of two hundred (200) tons or more. If it is to be held, the lot shall be weighed, moisture content determined, and commingled with other lots delivered by the seller. Lots to be held for an offering of two hundred (200) tons or more shall be commingled with other lots delivered in a thirty (30) day period. Lots to be held for an offering of fifty (50) tons shall be commingled with other lots until such fifty (50) tons have been accumulated. Accumulated lots shall be commingled into a single composite lot for subsequent sampling and analysis, and the seller shall not be permitted, at a subsequent time, to make withdrawals from a composite lot. Composite lots shall be sampled and analyzed at the end of thirty (30) day periods in the case of lots aggregating two hundred (200) tons or more during a thirty (30) day period, and, in the case of lesser aggregate tonnages, when fifty (50) tons have been accumulated. Payment shall be made to the seller in accordance with the provisions of paragraph (b) of section 8.

(b) If the delivered lot is not to be held for accumulation purposes, it shall be weighed, determination made for moisture content, sampled and analyzed, and payment made immediately to the seller in accordance with the provisions of paragraph (a) of section 8.

SEC. 11. *Weighing, sampling and analysis of manganese oxide ore.* (a) Weighing, sampling and moisture determination shall be performed at the Government's depot in accordance with standard practices. The seller may be represented at these operations. The Government's determination as to weight, sampling and moistdre content shall be final and conclusive. Three samples shall be prepared, one for the Government, one for the seller and one for umpire purposes. The umpire sample shall be sealed and set aside for umpire purposes.

(b) A difference between the Government's analysis and the seller's analysis shall be resolved, where such difference does not exceed one-half of 1 percent of manganese; one-half of 1 percent of silica plus alumina; one-half of 1 percent of iron; 0.03 of 1 percent of phosphorus; and 0.05 of 1 percent of copper plus lead plus zinc, of which not more than 0.25 percent may be copper, by taking the average of the two analyses, which average shall be the final and conclusive analysis. Where a greater difference exists between the Government's analysis and the seller's analysis, the umpire sample shall be referred to a chemical analyst satisfactory to both the Government and the seller whose analysis shall be final and conclusive. The cost of the umpire analysis shall be borne in accordance with usual trade practices.

This regulation, as revised, is effective immediately.

Dated: April 8, 1954.

AL E. SNYDER,
Assistant Administrator.

[Rev. 1]

REG. 5—MANGANESE REGULATIONS: PURCHASE PROGRAM FOR DOMESTIC MANGANESE ORE AT WENDEN, ARIZONA

By amending the provisions of section 6, this revision permits shippers of lots aggregating less than two hundred (200) tons in any thirty (30) day period to receive settlement on the same basis as shippers of lots aggregating two hundred (200) tons or more. This revision also modifies the rejection provisions for subspecification material in sections 4 and 6 by making rejection of such material permissive instead of mandatory. This revision embodies or supersedes this regulation as originally issued on June 27, 1952, and Amendments 1 through 4 thereof, dated September 19, 1952, March 20, August 13, and September 25, 1953, respectively.

Sec.
1. Basis and purpose.
2. Definitions.
3. Participation in the Program.
4. Deliveries.
5. Duration of the Program.
6. Price schedule for ores.

AUTHORITY: Sections 1 to 7 issued under sec. 704, 64 Stat. 816, as amended, Pub Law 95, 83d Cong.; 50 U. S. C. App. 2154. Interpret or apply sec. 303, 64 Stat. 801, as amended, Pub. Laws 95, 206, 83d Cong.; 50 U. S. C. App. 2154. E. O. 10480, 18 F. R. 4939.

SECTION 1. *Basis and purpose.* This regulation interprets and implements the authority of the Administrator of General Services to purchase manganese ore of domestic origin at Wenden, Arizona, pursuant to Executive Order 10480, dated August 14, 1953 (18 F. R. 4939). In accordance with the provisions and specifications of the Program as set forth in this regulation, the Administrator will buy domestically produced manganese ore containing not less than fifteen percent (15%) manganese.

SEC. 2. *Definitions.* As used in this regulation:

(a) "Administrator" means the Administrator of General Services.

(b) "Program" means the purchase of manganese ore as set forth in this regulation.

(c) "Depot" means the purchase depot of the Government at Wenden, Arizona.

(d) "Manganese ore" means crude ore containing not less than fifteen percent (15%) manganese, mined in the United States, its territories and possessions.

(e) "Long ton unit of manganese" means 22.4 pounds of manganese contained in a long dry ton of manganese ore.

SEC. 3. *Participation in the Program.* Any person may participate in the Program by notice given to the General Services Administration Regional Office, 4th Floor, 49 4th Street, San Francisco 3, California, in the form of a letter, postcard, or telegram postmarked or dated by the telegraph office not later than June 30, 1954. Such notice shall state that the writer desires to participate in the program and will deliver manganese ore to the depot. Such notice must be signed and a return address given. Any person participating in the program will promptly be sent a certificate authorizing him to deliver ore meeting minimum specifications.

SEC. 4. *Deliveries.* Manganese ore to be purchased by the Government under the Program is to be delivered f. o. b. depot. Delivery of less than five (5) long tons of ore at one time will not be accepted. Participants in the Program must give the Government reasonable notice with respect to deliveries of ore. Each delivery will be sampled and assayed by the Government at the depot and payment on an estimated recovery basis will be made in accordance with the analysis of such sample and as provided in section 6. Deliveries not conforming to the minimum specifications may be rejected, and expenses in connection therewith will be borne by the seller.

SEC. 5. *Duration of the Program.* This Program shall terminate and be of no further force or effect when six million (6,000,000) contained long ton units of manganese have been delivered to the depot and accepted by the Government under this program, or at the close of business June 30, 1958, whichever first occurs.

SEC. 6. *Price schedule for ores.* (a) The following prices per long dry ton will be paid for manganese ore delivered f. o. b. depot. Where the fractional manganese content is 0.5 percent (0.5%) or below, payment will be made as though no fractional content were involved. Where such fractional content is 0.51 percent (0.51%) or above, payment will be made at the next higher figure.

Percent Mn in ore:	To be paid for 1 long dry ton
15	$8.54
16	10.24
17	12.00
18	13.71
19	15.48
20	17.20
21	19.13
22	21.06
23	23.05
24	24.99
25	26.94
26	29.64
27	32.40
28	$35.11
29	37.88
30	40.60
31	44.73
32	46.86
33	50.00
34	53.14
35	56.29
36	60.74
37	65.15
38	69.61
39	74.03
40 fines	78.00
40 ore	88.00

The above price schedule applies to lots received from individual shippers aggregating less than two hundred (200) tons during any thirty (30) day period, and shall constitute the final and definite price for such lots, unless, for such lots, individual shippers thereof shall have notified the Government in writing that they desire settlement in accordance with the provisions of paragraph (b) of this section for each accumulation of fifty (50) tons.

(b) For lots received from individual shippers aggregating two hundred (200) tons or more during any thirty (30) day period, and for lots received from individual shippers aggregating fifty (50) tons for which the shipper has notified the Government of its desire to receive settlement in accordance with the provisions of this paragraph, the price schedule appearing in paragraph (a) of this section shall serve as a basis for preliminary settlement pending laboratory tests. Such tests shall be performed on lots accumulated during a thirty (30) day period, or when fifty (50) tons have been accumulated, whichever is applicable. The preliminary settlement shall be adjusted up or down, as the case may be, as a result of tests for laboratory-determined recoverability. Final settlement shall be calculated on the basis of $2.30 per long ton unit of manganese determined from the laboratory tests to be recoverable from the ore, subject to a charge of $10 per ton of ore (the estimated cost of sampling, milling, and handling) and to the specifications, premiums, and penalties set forth below.

SPECIFICATIONS

	Percent
Manganese	48.0
Iron	6.0
Silica plus alumina	11.0
Phosphorus	.12

PREMIUMS

Manganese content above 48.0 percent (dry basis): ½ cent for each 1.0 percent.

Iron content below 6.0 percent (dry basis): ½ cent for each 1.0 percent.

PENALTIES

Manganese content below 48.0 percent (dry basis): 1 cent for each 1.0 percent, down to and including 44.0 percent. Below 44.0 percent: 4 cents, plus 1½ cents for each 1.0 percent down to 40.0 percent minimum. Iron content above 6.0 percent (dry basis): 1 cent for each 1.0 percent, up to and including 8.0 percent. Above 8.0 percent: 2 cents plus ⅜ cent for each 1.0 percent up to 16 percent maximum. Silica plus alumina content above 11.0 percent (dry basis): 1 cent for each 1.0 percent up to 15 percent maximum. Phosphorus content above 0.12 percent (dry basis): ½ cent for each 0.01 percent up to 0.3 percent maximum.

The Government may reject any lot which, on the basis of the laboratory testing, cannot be beneficiated to a product the chemical analysis of which falls within the following limits in all respects. The Government reserves the right to dispense with laboratory testing of shipments aggregating less than 200 tons over a 30-day period.

	By weight (dry basis) (percent)
	Minimum
Manganese (Mn)	40.0
	Maximum
Iron (Fe)	16.0
Silica plus alumina (SiO_2 plus Al_2O_3)	15.0
Phosphorus (P)	.30
Copper plus lead plus zinc (Cu plus Pb plus Zn)	[1] 1.00

[1] Of which not more than 0.25 percent may be copper.

SEC. 7. *Ores containing lead and zinc in excess of the allowable maximum.* Ores containing lead and zinc exceeding the maximum percentage allowed by section 6 of this regulation shall be accepted and purchased under this Program: *Provided*, That such ores are amenable to nodulization, and as a result of nodulization the contained lead and zinc of the ores will be reduced to the maximum percentage allowed by section 6 of this regulation. Such ores shall be subject to a charge of $2.25 per long dry ton to cover the cost of nodulization.

This regulation, as revised, is effective immediately.

AL E. SNYDER,
Assistant Administrator.

Dated: April 8, 1954.

[F. R. Doc. 54-2831; Filed, Apr. 14, 1954; 8:55 a. m.]

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 114—TREATMENT OF MAILS: POSTAGE REFUNDS: INTERNATIONAL REPLY COUPONS: DISPOSITION OF FOREIGN DEAD MATTER

PART 127—INTERNATIONAL POSTAL SERVICE: POSTAGE RATES, SERVICE AVAILABLE AND INSTRUCTIONS FOR MAILING

MISCELLANEOUS AMENDMENTS

1. a. Section 114.5 *Special-delivery matter* is amended to read as follows:

§ 114.5 *Special-delivery service.* Articles intended for special delivery may be sent to certain countries subject to the fees and under the conditions set forth in Part 127 of this chapter.

b. Section 114.25 *International reply coupons* is amended to read as follows:

§ 114.25 *International reply coupons.* International reply coupons shall be issued to postmasters and sold to the public for the purpose of furnishing correspondents in other countries a means for procuring postage for the prepayment of reply, pursuant to the Universal Postal Union Convention. (See Part 127 of this chapter.)

(R. S. 161, 396, 398; secs. 304, 309, 42 Stat. 24, 25, 48 Stat. 943; 5 U. S. C. 22, 369, 372)

2. a. In § 127.231 *China (including Taiwan (Formosa))* change the footnote to paragraph (b) to read as follows:

[1] Parcel post service is available only to Taiwan (Formosa) and the island of Quemoy.

b. In § 127.355 *South-West Africa (including Walvis Bay)* make the following changes:

i. Amend paragraph (a) (5) to read as follows:

(5) *Air mail service.* Postage rates: Letters, letter packages and post cards, 25 cents per half ounce. Air letter sheets, 10 cents each. Other Postal Union articles, 68 cents for the first 2 ounces and 47 cents for each additional 2 ounces. (See § 127.20.)

ii. In paragraph (b) (1) insert immediately after the table of rates in subdivision (i), subdivision (ii) to read as follows:

(ii) *Air parcel rates.*

[Rates $1.31 first 4 ounces; $0.94 each additional 4 ounces]

Lb.	Oz.	Rate	Lb.	Oz.	Rate
0	4	$1.31	5	12	$18.23
0	8	2.25	6	0	19.17
0	12	3.19	6	4	20.11
1	0	4.13	6	8	21.05
1	4	5.07	6	12	21.99
1	8	6.01	7	0	22.93
1	12	6.95	7	4	23.87
2	0	7.89	7	8	24.81
2	4	8.83	7	12	25.75
2	8	9.77	8	0	26.69
2	12	10.71	8	4	27.63
3	0	11.65	8	8	28.57
3	4	12.59	8	12	29.51
3	8	13.53	9	0	30.45
3	12	14.47	9	4	31.39
4	0	15.41	9	8	32.33
4	4	16.35	9	12	33.27
4	8	17.29	10	0	34.21

[Rates $1.31 first 4 ounces; $0.94 each additional 4 ounces]

Lb.	Oz.	Rate	Lb.	Oz.	Rate
9	4	$35.15	10	4	$38.91
9	8	36.09	10	8	39.85
9	12	37.03	10	12	40.79
10	0	37.97	11	0	41.73

Each air parcel must have affixed the blue Par Avion label (Form 2978). (See § 127.55 (b).)

c. In § 127.378 *Viet-Nam (Annam, Cochin-China and Tonkin)* amend paragraph (a) (2) to read as follows:

(2) *Registration.* Fee, 55 cents. (See §§ 127.130 to 127.139.)

(R. S. 161, 396, 398; secs. 304, 309, 42 Stat. 24, 25, 48 Stat. 943; 5 U. S. C. 22, 369, 372)

[SEAL] ABE MCGREGOR GOFF, *Solicitor.*

PROPOSED RULE MAKING

FEDERAL POWER COMMISSION

[18 CFR Part 152]

[Docket No. R-136]

APPLICATION FOR EXEMPTION FROM CERTAIN PROVISIONS OF THE NATURAL GAS ACT

NOTICE OF PROPOSED RULE MAKING

APRIL 7, 1954.

Promulgation of Part 152 of the Commission's general rules and regulations to govern the filing of applications for exemption from jurisdiction under the Natural Gas Act pursuant to Public Law No. 323, 83d Congress, 2d Session, approved March 27, 1954, 68 Stat. 36.

1. Notice is hereby given of proposed rule making in the above-entitled matter.

2. On March 27, 1954, the President approved the Hinshaw bill, H. R. 5976, 83d Congress, thereby amending the Natural Gas Act (15 U. S. C. 717) by adding a new subsection (c) to section 1. (Pub. Law 323, 83d Cong., 2d sess., 68 Stat. 36.) This new subsection became effective immediately and reads as follows:

(c) The provisions of this Act shall not apply to any person engaged in or legally authorized to engage in the transportation in interstate commerce or the sale in interstate commerce for resale, of natural gas received by such person from another person within or at the boundary of a State if all the natural gas so received is ultimately consumed within such State, or to any facilities used by such person for such transportation or sale, provided that the rates and service of such person and facilities be subject to regulation by a State commission. The matters exempted from the provisions of this Act by this subsection are hereby declared to be matters primarily of local concern and subject to regulation by the several States. A certification from such State commission to the Federal Power Commission that such State commission has regulatory jurisdiction over rates and service of such person and facilities and is exercising such jurisdiction shall constitute conclusive evidence of such regulatory power or jurisdiction.

3. Since the new subsection is not self-executing and no company is automatically exempt from the jurisdiction and regulation of the Commission by reason of its provisions, the Commission proposes to amend its general rules and regulations by promulgating a new Part 152, to read as set out in the attachment hereto, for the purpose of enabling companies now made exempt from the Commission's jurisdiction under certain conditions to make the showing necessary to qualify for such exemption.

4. Upon receipt of an application for exemption under subsection (c) the Commission will publish notice thereof in the FEDERAL REGISTER and forward a copy to the State commission involved with a request for consideration by that agency of the issuance of a certificate that the natural gas (1) rates, (2) service, and (3) facilities of the Applicant are subject to the regulatory jurisdiction of the State commission and the State commission is exercising such jurisdiction. If the exemption is granted, the exempted company shall be responsible for calling to the attention of the State commission and this Commission any future operations which may make the exemption inapplicable to it.

5. This rule is proposed to be issued pursuant to the authority granted to the Federal Power Commission by the Natural Gas Act, as amended, particularly sections 1 (c) and 16 thereof (52 Stat. 830, 68 Stat. 36; 15 U. S. C. 717 (c), 717o).

6. The proposed rule is designed to make available to the Commission all the facts necessary to enable it to determine whether the particular company qualifies for the exemption provided by the new law.

7. Any interested person may submit to the Federal Power Commission, Washington 25, D. C., not later than 30 days from the date of the publication of this notice in the FEDERAL REGISTER, data, views and comments in writing concerning the proposed amendments. The Commission will consider these written submittals before acting upon the proposed amendments. An original and 9 copies should be filed of any such submittals.

[SEAL] LEON M. FUQUAY, *Secretary.*

PART 152—APPLICATION FOR EXEMPTION FROM THE PROVISIONS OF THE NATURAL GAS ACT PURSUANT TO SECTION 1 (c) THEREOF

§ 152.1 *Who may apply.* On and after March 27, 1954, application for exemption from the provisions of the Natural Gas Act and the rules and regulations of the Commission issued pursuant thereto may be made by any person as defined in the Natural Gas Act legally engaged in, or legally authorized to engage in, or owning facilities for, the transportation in interstate commerce or the sale in interstate commerce, for resale, of natural gas received by such applicant from another person within or at the boundary of a State, if all of the natural gas so received is ultimately consumed in such State: *Provided*, That the natural gas rates and service of the applicant and its natural gas facilities are subject to regulation by a State commission as defined in the Natural Gas Act and that such State commission is exercising that jurisdiction.

§ 152.2 *Form of application.* An application under this part shall conform with §§ 1.15 and 1.16 of this chapter and the original application shall be signed and verified under oath by a responsible officer of the applicant.

§ 152.3 *Contents of application.* Every application shall set forth in the order indicated the following:

(a) The exact legal name of applicant.

(b) The name, title, and post office address of the person to whom correspondence in regard to the application shall be addressed.

(c) Citation by name, docket number and date of order, if any, by virtue of which applicant is engaged or authorized to engage in the operations sought to be exempted pursuant to this part.

(d) A description of the facilities utilized in the operation sought to be exempted, including the point at which delivery from the applicant's supplier is taken and the point or points at which sales are made.

(e) A detailed statement of pertinent facts as to the existing service, if any, or authorized service by applicant, including a showing that all of the natural gas which applicant receives, or expects to receive, from out-of-State services is and will be ultimately consumed within the State in which the operations sought to be exempted are conducted.

(f) A complete list by F. P. C. filing designations of all rate schedules, contracts, service agreements or tariffs (as defined in §§ 154.11 to 154.14 of this chapter), if any, covering applicant's purchases and sales of natural gas within the particular State concerned.

(g) A map showing (1) all principal lines of applicant, (2) each and every connection by applicant with the pipe lines or distribution facilities of any other pipe line company or gas distributing utility, and (3) the detailed distribution facilities of applicant within five miles of the State Line.

(h) A citation of the State law by specific references to the statutory sections, together with a copy thereof, under which the State is authorized to exercise jurisdiction over the natural gas rates and service of applicant and its facilities.

§ 152.4 *Certificate from State Commission.* Upon receipt of an application for exemption under subsection (c) of section 1 the Commission will publish notice thereof in the FEDERAL REGISTER and forward a copy to the State Commission involved with a request for consideration by that agency of the issuance of a certificate that the natural gas (a) rates, (b) service, and (c) facilities of the Applicant are subject to the regulatory jurisdiction of the State Commission and that the State Commission is exercising such jurisdiction, with reference to the State statutes involved. If the Certificate is issued, one original and four conformed copies should be forwarded to this Commission by the State Commission.

§ 152.5 *Future inapplicability of exemption.* If an exemption from the provisions of the Natural Gas Act is granted pursuant to section 1 (c), the exempted person shall be responsible for calling to the attention of the State Commission by which it is regulated and to the Federal Power Commission any future operations in which it may engage which may make the exemption inapplicable to it.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[P. & S. Docket No. 143]

MARKET AGENCIES AT OMAHA UNION STOCK YARDS, OMAHA, NEBRASKA

NOTICE OF PETITION FOR MODIFICATION OF RATE ORDER

Pursuant to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 181 et seq.), an order was issued on March 4, 1954, continuing in effect to and including June 1, 1954, the order of August 19, 1952 (11 A. D. 701), which authorized respondents to put into effect the current schedule of rates and charges.

On March 31, 1954, respondents filed a petition requesting authority to put into effect for a period of two years beginning June 1, 1954, a new schedule of rates and charges, designated as Tariff No. 15 and filed with the petition, which contains certain modifications of the currently authorized schedule.

Those parts of the proposed new schedule which contain modifications of the currently authorized schedule are set forth below.

SELLING AND RESELLING CHARGES

SECTION A

(The selling charges apply only when animals offered for sale are sold)

	Per head
Cattle:	
Consignments of 1 head and 1 head only	$1.50
Consignments of more than 1 head:	
First 5 head in each consignment	1.25
Next 10 head in each consignment	1.15
Each head over 15 in each consignment	1.10
Calves:	
Consignments of 1 head and 1 head only	.90
Consignments of more than 1 head:	
First 5 head in each consignment	.80
Next 10 head in each consignment	.70
Each head over 15 in each consignment	.60
Bulls	2.00
T. B. reactors, bang reactors, cripples, suspects, subjects, or condemned	2.00

SECTION B

Hogs:	
Consignments of 1 head and 1 head only	$0.65
Consignments of more than 1 head:	
First 10 head in each consignment	.45
Next 15 head in each consignment	.40
Each head over 25 in each consignment	.35
Stags or boars (250 pounds or over):	
Cripples or subjec's	.85

SECTION D—RESALES

Cattle	$0.85
Calves	.50
Bulls	1.15
Hogs	.30
Boars and stags (250 pounds or over)	.50
Sheep	.14

BUYING CHARGES

SECTION F

(The charges for buying any species of livestock shall be the same as the selling charges for that species with the following exceptions:)

Cattle and calves:

1. The minimum charge on a purchase order of cattle, and/or calves, shipped out by rail, shall be $25.00 × the number of cars in which the animals are shipped.

2. On trucked out cattle and calves for immediate slaughter the unit of charge shall be 22,000 pounds. On purchase orders weighing less than 22,000 pounds the maximum charge shall be $25.00. On purchase orders weighing 22,000 pounds or over the charge shall be $25.00 for each unit of 22,000 pounds. In the case of those purchase orders which are of such weight that a fraction of a unit results, the charge on the fraction shall be computed by dividing the weight of the fraction by the average per head weight of the cattle in the purchase order. The number of animals so ascertained shall carry a charge of $1.10 per head for cattle and 60 cents per head for calves.

Hogs:

1. The minimum charge on hogs for immediate slaughter shipped out by rail shall be $20.00 per single deck car and the maximum $25.00 per single deck. The minimum charge on double deck cars shall be $30.00 per car, and the maximum $32.00 per double deck.

2. On trucked out hogs for immediate slaughter, the unit of the charge shall be 17,000 pounds. On purchase orders of less than 17,000 pounds the maximum charge shall be $21.00; on purchase orders weighing 17,000 pounds or over the charge shall be $21.00 for each unit of 17,000 pounds. In the case of those purchase orders which are of such weight that a fraction of a unit results, the charge on the fraction shall be computed by dividing the weight of the fraction by the average per head weight of the hog in the purchase order. The number of animals so ascertained shall carry a charge of 30 cents per head.

NOTE: There shall be no draft charge on purchases but when it is necessary for the agency to purchase and pick up a purchase order from more than two market agencies and/or dealers, an additional charge of 50 cents shall be made for each market agency and/or dealer in excess of two. This section shall not apply to purchases of sheep or hogs.

NOTE: Market Agencies driving cattle to Railroad or Truck Chutes for outbound shipment shall perform such service for a charge of $2.00 per car or truck.

NOTE: Packers maintaining their own buyers on this market may make special arrangements with market agencies to pay for and bill out their purchases, the terms of which special arrangements shall be placed on file with the Department of Agriculture through the District Supervisor.

Notwithstanding such arrangements, if additional service is rendered to the purchaser by the agency or its employees, such as assistance in locating or selecting livestock, arranging for transportation, driving, etc., the full buying commission shall be assessed.

MISCELLANEOUS CHARGES

SECTION G

NOTE: Rates described in this section applicable only by market agencies registered to both buy and sell on commission.

1. When a commission firm renders service to any purchaser of livestock by paying for and/or rendering service relative to tuberculosis or abortion tests, such service shall be deemed the same as a purchase of livestock and shall be charged for at the regular buying rates.

2. When a purchaser of livestock buys and pays for it himself, but has a market agency render any one of the following services, namely, bill it out, drive it directly to the loading-out pens, or indirectly to them by

way of the facilities for spraying, vaccinating, testing, branding, castrating, etc., the charge for rendering any one or any of these services combined shall be 30 cents per head for cattle, 20 cents per head for calves, 10 cents per head for hogs, and 6 cents per head for sheep.

The proposed modifications, if authorized, will produce additional revenue for the respondent market agencies and increase the cost of marketing livestock. Accordingly, it appears that this public notice should be given of the petition and its contents in order that all interested persons may have an opportunity to be heard in the matter.

All interested persons who desire to be heard in the matter should notify the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., within fifteen days from the date of publication of this notice.

Done at Washington D. C., this 9th day of April 1954.

[SEAL] AGNES B. CLARKE,
Hearing Clerk.

[P. & S. Docket No. 383]

MARKET AGENCIES AT ST. LOUIS NATIONAL STOCK YARDS

NOTICE OF PETITION FOR MODIFICATION OF RATE ORDER

Pursuant to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U. S. C. 181 et seq.), an order was issued on May 22, 1953 (12 A. D. 487), authorizing respondents to assess the current schedule of rates and charges to and including May 30, 1954.

On April 1, 1954, a petition was filed on behalf of respondents requesting authority to put into effect, upon the expiration of the current schedule, a schedule of rates and charges, filed with the petition, containing certain modifications in the presently authorized rates and charges. Those parts of the proposed new schedule which contain modifications of the currently authorized schedule are set forth below.

SECTION B—SELLING CHARGES

	Per head
Hogs:	
Consignments of 1 head and 1 head only	$0.55
Consignments of more than 1 head:	
First 10 head in each consignment	.41
Next 15 head in each consignment	.36
Each head over 25 in each consignment	.31
Sheep:	
Consignments of 1 head and 1 head only	.60
Consignments of more than 1 head:	
First 10 head in each 240 head in each consignment	.40
Next 50 head in each 240 head in each consignment	.30
Next 60 head in each 240 head in each consignment	.20
Next 120 head in each 240 head in each consignment	.12

MAXIMUM CHARGES

The maximum selling charge on any one full consignment of sheep shall not exceed an amount equal to $25 multiplied by the number of single-deck cars in the consignment plus an amount equal to $35 multiplied by the number of double-deck cars in the consignment.

SECTION C—RESALES

	Per head
Bulls	$1.80
Cattle	1.05
Calves	.50
Hogs	.32
Sheep	.35

The proposed modifications, if authorized, will produce additional revenue for the respondent market agencies and increase the cost of marketing livestock. Accordingly, it appears that this public notice should be given of the petition and its contents in order that all interested persons may have an opportunity to be heard in the matter.

All interested persons who desire to be heard in the matter shall notify the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., within fifteen days from the date of publication of this notice.

Done at Washington, D. C., this 9th day of April 1954.

[SEAL] AGNES B. CLARKE,
Hearing Clerk.

[7 CFR Part 973]

[Docket No. AO-178-A4]

HANDLING OF MILK IN MINNEAPOLIS-ST. PAUL, MINNESOTA MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND ORDER AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.) hereinafter referred to as the act and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to a proposed marketing agreement and a proposed order amending the order, as amended, regulating the handling of milk in the Minneapolis-St. Paul, Minnesota, marketing area. Interested parties may file written exceptions to the decision with the Hearing Clerk, United States Department of Agriculture, Washington, 25, D. C., not later than the close of business on the 10th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. The hearing on the record of which the proposed marketing agreement and order was formulated, was conducted at St. Paul, Minnesota on October 21 and 22, 1953, pursuant to notice thereof which was issued on October 7, 1953 (18 F. R. 6510).

The material issues of record related to:

1. Redefining certain terms used in the order and adding certain additional terms;
2. Revising those provisions relating to the classification of milk particularly milk transferred between plants;
3. Relating the class prices more closely to those fixed in the Chicago, Illinois, marketing area;
4. Adding to the class prices the costs of performing the services in the case of milk which is transferred by a cooperative association to another handler in processed and packaged form;
5. Revising the rates of location differentials applicable to both producers and handlers;
6. Levying the administrative assessment on all producer milk instead of only on that which is classified as Class I; and
7. Revising certain other administrative provisions of the order.

Findings and conclusions. The following findings and conclusions on the material issues of record are based upon the evidence contained on the hearing record.

1. *Definition of terms.* From the evidence which has been presented, it is concluded that several of the terms presently used in the order should be redefined and that several additional terms should be defined.

At the present time plants subject to the regulation are distinguished from those not subject to it by use of the terms "pool plant" and "non-pool plant." Since the Minneapolis-St. Paul milk order does not provide for a market-wide pool, it is recommended that the nomenclature of the two types of plants be changed to "fluid milk plant" and "non-fluid milk plant." In addition it is recommended that the standards which determine whether a plant is subject to regulation should be changed. Currently a country plant becomes a pool plant subject to the regulation if milk is disposed of from such plant in the marketing area and is classified as Class I during the months of December through July. The evidence indicates that while normally it may be necessary to augment the market supply with emergency milk only during the months of August through November, there are occasionally other times when it may also be necessary. Because a plant which furnishes milk in such an emergency at the present time is likely to become a handler subject to the order, it is extremely difficult to secure the needed milk. To remedy this situation the order should be amended to provide that any plant which supplies milk on no more than 3 days during a delivery period shall be a non-fluid milk plant except from the regulation. As a further safeguard to prevent evasion of the terms of the order, however, it should be provided that such a plant be exempt only if its disposition of Class I milk within the marketing area during the delivery period is not in excess of 95,000 pounds, approximately equivalent to 3 average size tank loads.

The definition of handler should be revised not only to reflect the change in the definition of a fluid milk plant but to exclude from regulation state or Federally owned and operated institutions which dispose of milk solely for use on their own premises and to their own facilities. There are within the marketing area certain government owned institutions such as hospitals which process the milk which is utilized in their own dining halls. Such institutions secure their entire supply of milk either from proprietary handlers or from cooperative associations and pay at least the Class I price for their purchases. Since they do not dispose of any milk to other persons it is desirable to exempt them from regulation of the marketing order.

It is also recommended that the term "producer" be revised to eliminate producer-handlers. At the present time there are very few producer-handlers in the market. When the order was issued there were several of them and it was necessary to include such persons as producers with respect to milk which they disposed of to other handlers because in some instances these producer-handlers were disposing of the bulk of their milk to proprietary handlers with only a small proportion of it disposed of on their own account directly to consumers. The producer-handlers now remaining on the market are smaller operators who deliver virtually their entire production on their own routes.

It is also recommended that the term "producer-handler" be revised to place a limit of 50,000 pounds during the delivery period on the amount of milk which may be purchased by such a person from a handler which is a cooperative association without such person's becoming a fully regulated handler. The present order designates as a producer-handler one who receives no milk from the farms of other producers. Thus there is no limit to the amount of milk which might be purchased by a producer-handler from other handlers. The proponents of the amendment believe that a restriction should be placed on the amount of milk that a producer-handler is permitted to purchase from a cooperative association which is a handler. In the Minneapolis-St. Paul market virtually all of the milk is produced by members of the cooperative associations and a substantial portion of it is physically handled by the cooperative associations in their own plants and delivered to proprietary handlers in tank trucks. In recent years a decided shift has occurred from the delivery of milk directly from farms to bottling plants to the delivery of milk in tanks from cooperative plants to bottling plants. Many of the larger proprietary handlers operate their own farms from which they receive a small portion of the milk they distribute. Unless some action is taken many of these handlers could soon achieve the status of producer-handler by purchasing all their milk from the association in tank trucks while maintaining their own small farm operations. If this should occur the handlers of the bulk of the milk would be exempt from the regulation and the cooperative associations would be the only handlers subject to the order. The limitation of 50,000 pounds of milk or its equivalent during a delivery period is a reasonable breaking point and any plant which receives less than this amount can properly be considered a producer-handler.

It was proposed by the proprietary handlers that the definition of the term, "handler," be broadened to include anyone selling milk in the marketing area except a store or vender who purchases its milk from a proprietary handler. This proposal is closely related to other proposed amendments discussed below which would fix processing charges on milk, either wholly or partially processed and packaged, purchased from operating cooperative associations. There is evidence that some of the cooperative associations may be indulging in unfair competitive practices in that they dispose of milk to wholesale outlets at less than the Class I price by failing to add to the price of the milk the full cost of the service performed in the processing and packaging. This problem is discussed at length below. This proposal is not adopted because the solution to this problem does not lie in extending the scope of the order to persons who do not operate milk plants and who merely purchase for resale milk which has been processed and packaged elsewhere.

For administrative convenience it has also been proposed that definitions of "producer milk" and "other source milk" be added to the order. The addition of these terms will not affect the operations of the order in any way but will aid in clarifying the language of its provisions and these definitions should be adopted.

It was also proposed that definitions of Grade A and Grade B milk be added to the order. When the original order was issued the Minneapolis and St. Paul market was not on a Grade A basis. Recently, however, the two cities have adopted the United States Public Health Service Standard Milk Ordinance and only milk that meets this standard is eligible for distribution as fluid milk in the two cities. The ordinance also requires that only Grade A milk be utilized for fluid cream. Because of the present shortage of Grade A milk, however, this portion of the ordinance has not been enforced, but the health authorities have advised all handlers that as soon as sufficient Grade A milk is available on a year around basis, only Grade A milk will be permitted in fluid cream. The addition of the term Grade A milk, to the order is necessary in connection with the proposal which is discussed below relating to the allocation to Class I milk of the Grade A receipts of the handler.

2. *Classification.* It has been recommended that the definitions of Class I and Class II milk be modified slightly. The Class I definition should be amended by adding concentrated milk and deleting eggnog. Concentrated milk heretofore has been considered as falling within the Class I definition although it has not been specifically named in the order and when produced by handlers subject to the order it has been classified as Class I. It is a product which is required to be produced from Grade A milk and is in direct competition with fluid whole milk. The change therefore is primarily one for clarification purposes.

Eggnog is a very minor item normally manufactured only during the Christmas holidays. It is not required by the health departments to be produced from Grade A milk. It appears that much of the eggnog disposed of within the marketing area is manufactured by ice cream companies which are not subject to regulation. To continue to classify it as Class I makes it uneconomical for handlers subject to the order to dispose of producer milk in this product.

The definition of Class II should be amended to include frozen cream. Under the present order frozen cream is classified as Class I. When such cream is taken out of storage and utilized in the manufacture of ice cream it must be reclassified by the market administrator and credit given to the handler who placed it in storage. Experience has shown that virtually all of the cream placed in storage is utilized as ice cream which is a Class II product. From an administrative standpoint, therefore, it would greatly simplify the administration of the order if frozen cream placed in a cold storage warehouse were classified as Class II initially rather than being classified first as Class I and reclassified when taken out of storage. This change would have little effect either on the cost of milk to handlers or on returns to producers.

The section of the order dealing with transfers of milk between plants should also be revised. The present order makes no reference to milk which may be diverted by a handler either to the plant of another handler or to the plant of a non-handler. The recent rapid expansion in the collection of milk from farms in tank trucks has greatly increased the opportunity for the diversion of milk directly from the farm to the plant of another handler or non-handler. Accordingly, the transfer section should refer not only to milk which is transferred from one plant to another but also to milk which is diverted from the farm directly to another plant.

With respect to milk transferred or diverted to a non-handler's plant located less than 100 miles from the marketing area the requirement that the non-handler sign a supporting statement with respect to the classification of the milk should be eliminated. It is often extremely difficult for the handler who causes the milk to be transferred or diverted to secure certification from the non-handler in time to file it with the market administrator by the 8th day after the end of the delivery period. It is proposed that the market administrator, in computing the monthly pool for the handler, shall classify such milk as Class II if the handler who transferred or diverted it reports that it was utilized in Class II. If the plant to which the milk was transferred does not maintain satisfactory records showing the utilization of the milk, or refuses to permit the market administrator to verify its utilization, such milk would be reclassified as Class I. In the event that verification discloses that the Class II utilization in the receiving plant was less than the

amount of milk reported as having been utilized in Class II an amount equal to the difference would be reclassified as Class I. With respect to milk transferred or diverted to a plant located more than 100 miles from the marketing area the provision should be changed with respect to milk which is transferred in the form of cream in consumer packages. At the present time any cream transferred to a plant more than 100 miles from the marketing area is classified as Class II. Experience has shown that such milk is normally utilized in the manufacture of ice cream or candy. However, when cream is shipped in bottles ready for distribution to consumers it must be assumed that it is intended for Class I use and should be classified and priced accordingly.

Other source milk which is caused to be diverted from a non-fluid milk plant to the fluid milk plant of a handler in the marketing area should be considered as having been received by the cooperative association which caused it to be so diverted. The cooperative associations follow the practice of furnishing all proprietary handlers in the market with their entire supply of fluid milk and cream. Whenever receipts from producers have been insufficient to care for the Class I requirements of the market the cooperative association has purchased the emergency supplies which are needed. Usually the emergency milk has been received physically by the association and then transferred to the plants of the handlers who required it. When the milk is delivered directly from the plant of origin to the plant of a handler it should continue to be considered as having been received by the cooperative association in its capacity as a handler rather than by the handler operating the fluid milk plant in the marketing area. Such a provision would result in the other source milk being allocated over the entire receipts of the cooperative association rather than over the receipts of only the plant in which the milk was actually utilized and thereby tend to prevent the replacement of producer milk for Class I use. It is customary for the emergency milk to be delivered to one or two plants in tank loads rather than for each plant to receive a proportionate share of the needed supply. When allocated over only the receipts at the plant where received, virtually the entire amount would be allocated to Class I but if it were prorated over the receipts of the cooperative association which furnishes milk to the handlers it is likely that a much smaller proportion of it would be classified as Class I. The adoption of the proposal would also simplify the accounting and present fewer administrative problems.

Grade A milk should be allocated to Class I before any non-Grade A milk is so allocated. The present order provides that all producer milk received in the plant shall be allocated to Class I before any other milk is allocated to Class I. The term producer applies to any dairy farmer whose milk is received at a fluid milk plant regardless of whether the milk is of Grade A quality. Certain handlers, particularly cooperative associations, regularly purchase Grade A milk from other sources for use in Class I but because of the allocation provisions such Grade A milk is classified in Class II and the non-Grade A producer milk which actually is used in Class II is allocated to Class I. The proponents of this amendment (certain proprietary handlers) said this gives an unfair competitive advantage to these cooperatives. Since the Grade A milk in question has been allocated to Class II, the plants which furnish it are not regulated by the order. Accordingly there is no requirement to pay producers the minimum price for milk received. Because of these conditions, such plants would probably be willing to dispose of milk to handlers at less than the Class I price at least during the flush production months of the year. It is the contention of the proponents that the cooperative handlers who purchase milk pay less than the Class I price for the milk they distribute. They allege that these cooperatives neither pay the Class I price to the plant which furnishes the milk nor do they pay their producer-members the full use value of the milk according to its classification as fixed by the order. Since only Grade A milk is permitted to be sold in Minneapolis and St. Paul, allocating Class I sales to Grade A milk would help to rectify this situation and would further correct the existing anomaly whereby a plant that is a regular source of Class I milk for the market can escape regulation because some milk, not acceptable for use as Class I milk in Minneapolis or St. Paul, is received at the plant which it furnishes with Grade A milk. Adoption of the proposal therefore would be of benefit not only to the proprietary handlers on the market, but to the farmers who supply milk to unregulated plants which are a regular source for the Class I supply for the market. Allocation to Class I of the milk in question would make these plants subject to the regulation and would require them to pay producers for their milk according to its utilization.

3. *Class prices.* The Class I price provision should be amended by adding to it a proviso that whenever "the supply and demand ratio" computed under the Chicago milk order affects the Class I price computed under the Chicago order by more than 6 cents the Class I price under the Minneapolis-St. Paul order would be adjusted by a like amount. The milksheds of the markets are contiguous and overlapping in northern Wisconsin. There are many plants in this region which are in a position to and do ship either to the Chicago market or to the Minneapolis-St. Paul market. There is at least one plant which regularly supplies milk to both markets and there are many others regularly supplying Chicago which at times ship milk to the Minneapolis-St. Paul market. Many producers in the area are also in a position to ship milk either to a Chicago or to a Minneapolis-St. Paul plant. Thus, it is necessary that the prices under both orders be comparable in this area of overlapping. During the past year the "supply and demand ratio" reduced the Chicago Class I price substantially below the Class I price fixed in the Minneapolis-St. Paul market. To avert a threatened disruption of the stability of the two markets in the area of overlapping it was necessary to suspend a portion of the pricing provisions of the Minneapolis-St. Paul order to reduce the price to a level comparable to that in Chicago. During the previous year the "supply and demand ratio" raised Chicago prices somewhat above those prevailing in the Minneapolis-St. Paul market and handlers in the latter market found it necessary to pay premiums over the prices fixed by the order to maintain returns to producers at a level comparable to that received by Chicago producers. To prevent a recurrence of this dislocation it appears desirable to provide in the Minneapolis-St. Paul order that price changes due to the supply-demand adjustment under the Chicago order be reflected in a similar change in the Class I price under this order. The evidence indicates that a change of not more than 6 cents in the Chicago supply-demand adjustment would not be a sufficient amount to cause producers or plants to shift from one market to the other but that a variation greater than this amount could cause a dislocation of supplies. Accordingly, it is concluded that whenever the nominal differentials in the Chicago order are affected more than 6 cents by the "supply and demand ratio", the differentials in the Minneapolis-St. Paul area should be adjusted by a like amount.

In order to maintain this relationship it is also necessary that the Class I price in the Minneapolis-St. Paul order be based on manufacturing values during the preceding rather than during the current delivery period. The Chicago order fixes the Class I price on the values of manufactured products during the preceding delivery period while the Minneapolis-St. Paul market fixes the Class I prices in relation to manufacturing values during the period in which the milk is received. While in most instances the use of different months as a basis would not have any great effect on class price, during periods of rapidly changing prices the effects could be substantial.

An additional factor favoring the adoption of the use of manufacturing values for the preceding delivery period is that it would permit handlers to know at the beginning of the delivery period the cost of the milk which they would sell during the delivery period. At the present time handlers do not know the exact price for the milk they sell until after the end of the delivery period in which it has been sold. If the proposed amendment is adopted handlers will know not later than the 5th day of the month the exact price they are required to pay for Class I milk sold during the month.

The formula for computing the Class II price should be revised by increasing the "make allowance" from 65 cents to 75.2 cents per hundredweight. Since the Class II formula was last amended several years ago, the costs of fuel, labor, supplies, etc., used in the manufacture of dairy products have increased and processing and marketing charges for manufacturing milk have also increased. The record shows that under the Chicago order a comparable formula for pricing manufaucturing milk provides a "make allowance" of 75.2 cents. In view of the need for maintaining a close relationship between the prices in the two markets it appears desirable to place a similar make allowance in the Minneapolis-St. Paul order.

4. *Processing differentials.* It was proposed by proprietary handlers that, in the case of milk which is purchased by a handler from a cooperative association already processed and packaged, the marketing order should provide that such handler be required to pay, in addition to the Class I price, an amount equal to the costs of processing, packaging and other services performed by the association. These handlers contend that certain associations in their efforts to secure an outlet in the market have been furnishing milk already bottled to other handlers or to large wholesale outlets such as chain stores at a price which does not reflect the Class I price plus the costs of receiving, processing, and packaging the milk. They contend that as a result of this alleged practice on the part of certain cooperatives those handlers who comply with the provisions of the order and purchase milk from producers at the class prices fixed by the order are at a competitive disadvantage. They contend that it is impossible for them to compete with handlers who are able to purchase packaged milk at less than the Class I price plus a reasonable charge for the processing and packaging. They further allege that these cooperative associations have been paying their producer members somewhat less than the minimum uniform prices computed and announced by the market administrator and that the excessive checkoff or under payment is used to absorb the losses incurred in selling packaged milk at less than cost.

There is reason to believe that there is some foundation to the charges which they have made. It does not appear, however, that the solution to the problem lies in fixing an arbitrary processing differential in the order. The costs of performing such services vary greatly from plant to plant depending on the volume of milk processed and the efficiency of the plant operation and would change rapidly with changing economic conditions. If a flat rate were fixed by the order it would, in the case of some plants, be less than the actual costs of the service while in other plants it would be more than sufficient to cover these costs. Again as changing conditions affect the industry as reflected by the cost of labor, packaging, and machinery and similar items the adequacy of the differential would vary. Thus it would be virtually impossible to fix a rate which would reflect the exact cost of performing the services involved. Even the witnesses who appeared for the plants varied greatly in their estimates as to what the actual cost of performing such services would be. It was suggested by one witness that the market administrator regularly audit the books of the cooperative associations to determine in each case the cost of performing the services rendered and that the charge for such services be based on the actual costs as reflected by the books of the cooperative. Such an approach to the problem is impractical, however. The difficulties involved in making complete cost analyses of the operation of the various plants would be prohibitive. Moreover, because of the wide variation in costs that would undoubtedly be shown between plants the resulting rates would vary widely. This would result in fixing different prices to different handlers.

The Agricultural Marketing Agreement Act of 1937 is intended only to fix minimum prices which handlers must pay producers for milk which they receive from them and does not provide for the fixing of resale prices at either the wholesale or retail level. It appears that the fixing of a differential on packaged milk transferred between handlers would fall in this category and thus would be outside the scope of the marketing orders issued under the act, unless it could be established that maintenance of the minimum producer price provisions of the order required such action.

5. *Location differentials.* It was proposed that the rate of location differential applicable at both the handler and the producer level be revised. The present order provides that with respect to milk received at a plant located more than 15 miles from the Minnesota Transfer Viaduct over University Avenue in St. Paul the Class I price shall be reduced 1 cent for each full mile that such plant is more than 15 miles from the Viaduct. The rate of the location differential to producers is identical to the handler location differential.

At the time the differentials were fixed in the order, on the handler level, at least, they applied in part to milk which was moved to the market from country plants in processed form. At the present time all of the milk moved from country plants to the city is moved in tank trucks. The evidence in the record reveals that the going rates for moving milk in tank trucks from plants within the milkshed to the Minnesota Transfer Viaduct are substantially less than the rates provided by the present order. On milk received at plants located between 15 and 20 miles from the Viaduct the order should be amended to provide that the location differential shall be 8 cents and for each additional 10 miles up to 50 miles the deduction should be increased 2 cents per hundredweight. Beyond 50 miles the amount of the deduction should be increased 1 cent per hundredweight for each additional 10 miles that the plant is distant from the Viaduct. These rates reflect present actual transportation rates for moving milk from country plants to plants located in the city.

It was proposed that the maximum location differential to be allowed should be 19 cents, which would be the rate applicable to plants located between 90 and 100 miles from the viaduct. The evidence, however, does not justify placing a limit on the amount of the deduction.

The location differential to handlers would apply only to milk which is classified as Class I milk. Customarily, milk is not moved to the marketing area for use in Class II products. All of the country plants which supply the Minneapolis-St. Paul market are equipped for manufacturing dairy products. The value of these dairy products at the plant of manufacture is approximately the same as it would be were they manufactured in the marketing area. Accordingly, there is no need to fix a location differential on milk manufactured into Class II products and to do so would reimburse handlers at the expense of producers for milk which they do not move.

The location differential to producers should be fixed at the same rate as that applied to handlers on Class I milk. Present location differentials to producers are higher than necessary to account for the costs of moving the milk from distant locations.

6. *The administrative assessment.* The order should be amended to provide that the administrative assessment be levied on all producer milk rather than on only that used in Class I as is now provided. The present method of assessing the costs of administration creates inequities among handlers. There are many plants which ship into the market as Class I milk only a very small proportion of their total receipts. The cost of auditing these plants and verifying the utilization of milk is as great as the costs of auditing the city plants handling a comparable volume of milk which is utilized almost entirely in Class I. Thus, at the present time these handlers whose milk is utilized primarily in Class I are bearing more than their proper share of the costs of administering the order.

The maximum rate of assessment should also be reduced from 2 cents per hundredweight to 1½ cents per hundredweight. As a result of these combined changes the market administrator will receive approximately the same amount of money to operate his office but the cost would be shared more equitably by all handlers subject to regulation.

7. *Other administrative provisions.* The order should be amended to delete the requirement that handlers report the receipts of milk from individual producers who are members of a cooperative association. The present order provides that each handler shall submit to the market administrator his producer payroll which shall show the pounds of milk and the butterfat content thereof, received from each producer during the delivery period. Most of the producers on the market are members of the cooperative associations which exercise complete control over the disposition of their milk. As the daily requirements of the handlers vary, certain loads of milk may be shifted from one plant to another and the milk of certain producers may be received at several plants during the month. Since certain producers will be reported by several handlers this results in very cumbersome

reports. In the case of producers who are members of the cooperative associations the handler does not account to the individual producer for the milk but deals directly with the cooperative association which in turn maintains the record for each individual producer. Under the circumstances, it appears desirable to require that the handler report his receipts from the cooperative association rather than from its individual members and that a report of receipts from individual producers be required only with respect to those producers who are not members of a cooperative association. Adoption of the proposal will greatly simplify the bookkeeping problems both in the plant of the handler and in the office of the market administrator.

In addition to the amendments discussed above it has been necessary to make several minor changes in the terminology of the order either as a direct result of the changes proposed above or to clarify references to market quotations which are used in determining class prices. These changes will not in any way affect the operations of the marketing order with respect to the handlers regulated by it.

General findings. (a) The proposed marketing agreement and the order, amending the order, as amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices for milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order amending the order, as amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest.

(c) The proposed order amending the order, as amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Proposed findings and conclusions. Briefs were filed on behalf of the two largest cooperative associations and the majority of the handlers in the market. The briefs contained proposed findings of fact, conclusions, and argument with respect to the proposals discussed at the hearing. Every point covered in the briefs was carefully considered along with the record evidence in making the findings and reaching the conclusions hereinbefore set forth. To the extent that such suggested findings and conclusions contained in the briefs are inconsistent with the findings and conclusions contained herein the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this decision.

Recommended marketing agreement and order. The following order amending the order, as amended, is recommended as the detailed and appropriate means by which these conclusions may be carried out. A proposed marketing agreement is not included because the regulatory provisions thereof would be the same as those contained in the order:

1. Delete § 973.5 and substitute therefor the following:

§ 973.5 *Fluid milk plant.* "Fluid milk plant" means a milk plant (a) where milk is processed or packaged and from which Class I milk, as defined in § 973.41 (a), is disposed of to retail or wholesale outlets (including plant stores) in the marketing area, or (b) from which skim milk or butterfat is transferred or diverted to a plant described in paragraph (a) of this section: *Provided*, That any such transferring plant shall not be included in this definition if such transfers or diversions are made (1) only during the months of August, September, October, and November, or (2) on not more than 3 days during any other month and in a total amount not in excess of 95,000 pounds. Any plant which has been designated a fluid milk plant shall continue to be so designated during any delivery period in which skim milk and butterfat are transferred or diverted to another fluid milk plant until August 1 of the year following that in which such transfer was last made.

2. Delete § 973.6 and substitute therefor the following:

§ 973.6 *Non-fluid milk plant.* "Non-fluid milk plant" means any milk processing plant during any delivery period in which it does not meet the requirements of a fluid milk plant as defined in § 973.5.

3. Delete §§ 973.8, 973.9 and 973.10 and substitute therefor the following:

§ 973.8 *Producer.* "Producer" means any person other than a producer-handler, who produces milk which is shipped directly to a fluid milk plant from the farm where produced.

§ 973.9 *Handler.* "Handler" means any person in his capacity as the operator of a fluid milk plant, but this definition shall not include a state or federally owned and operated institution which disposes of Class I milk solely for use on its own premises or to its own facilities.

§ 973.10 *Producer-handler.* "Producer-handler" means any person who both produces milk and is a handler and who receives no milk directly from the farms of other producers and not more than 50,000 pounds of milk (3.5 percent butterfat equivalent) during a delivery period from other handlers which are cooperative associations: *Provided*, That the maintenance, care, and management of the dairy animals necessary to produce the milk and the processing, packaging, and distribution of the milk are the personal enterprise and personal risk of such person.

4. Add as §§ 973.14, 973.15 and 973.16 the following:

§ 973.14 *Producer milk.* "Producer milk" means any skim milk and butterfat contained in milk received at a fluid milk plant directly from the farms of producers.

§ 973.15 *Other source milk.* "Other source milk" means all skim milk and butterfat received at a fluid milk plant other than that skim milk and butterfat contained in producer milk or received from other handlers.

§ 973.16 *Grade A milk.* "Grade A milk" means milk which is produced under a Grade A permit or rating issued by a municipal health authority exercising jurisdiction in the marketing area, or milk which is permitted by such a health authority to be disposed of for consumption as milk under a Grade A label.

5. Delete § 973.32 and substitute therefor the following:

§ 973.32 *Reports as to producers and cooperative associations of producers.* Each handler shall, on or before the 25th day of each delivery period, submit to the market administrator such handler's producer payroll for the preceding delivery period which shall show for each producer or cooperative association of producers (a) the total pounds of milk delivered with the average butterfat test thereof and (b) the net amount of the payment to each producer or to each cooperative association of producers together with the prices, deductions and charges involved.

6. Delete § 973.41 and substitute therefor the following:

§ 973.41 *Classes of utilization.* Subject to the conditions set forth in §§ 973.42 and 973.43, the classes of utilization shall be as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat disposed of for consumption in the form of milk, skim milk (including reconstituted skim milk), concentrated milk, buttermilk, flavored milk drinks (except flavored milk drinks in hermetically sealed containers), cream (sweet or sour, including mixtures of cream and milk or skim milk containing less butterfat than the legal standard for cream), and all skim milk and butterfat not specifically accounted for pursuant to paragraph (b) of this section.

(b) *Class II milk.* Class II milk shall be all skim milk and butterfat stored in a public cold storage warehouse as frozen cream, or disposed of as animal feed, and all skim milk and butterfat used to produce a milk product other than those specified in paragraph (a) of this section.

7. Delete § 973.43 and substitute therefor the following:

§ 973.43 *Transfers.* Skim milk or butterfat transferred or diverted in fluid form as milk, skim milk, or cream, by a handler shall be classified as follows:

(a) As Class I milk if transferred or diverted to another handler (except a producer-handler) unless utilization in Class II is mutually indicated in writing to the market administrator by both handlers on or before the 8th day after the end of the delivery period within which such transfer or diversion occurred, but in no event shall the amount classified in either class exceed the total use in such class by the transferee handler: *Provided*, That if either or both handlers have received other source skim milk or butterfat, the skim milk or butterfat transferred or diverted from a fluid milk plant shall be classified at both plants so as to return the highest class utilization to milk of producers.

(b) As Class I milk if transferred in the form of milk, skim milk or cream to a producer-handler.

(c) As Class I milk if transferred or diverted in the form of milk, skim milk or cream to a non-fluid milk plant located less than 100 miles from the marketing area unless (1) the handler reports to the market administrator on or before the 8th day after the end of the delivery period that such skim milk or butterfat was utilized in Class II, (2) the non-fluid milk plant maintains records showing the receipt and utilization of all skim milk and butterfat at such plant which are made available to the market administrator for purposes of verification, and (3) such non-fluid milk plant had actually used not less than an equivalent amount of skim milk and butterfat in Class II: *Provided*, That if verification of such records discloses that an equivalent amount of skim milk and butterfat had not been used in Class II, the remaining pounds shall be classified as Class I.

(d) As Class I milk is transferred or diverted in the form of milk or skim milk or transferred in the form of cream in consumer packages, and as Class II if transferred in the form of cream in bulk, to a purchaser whose plant is located more than 100 miles from the marketing [redacted]

8. Delete § 973.45 (a) and substitute therefor the following:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the pounds of skim milk in Class II the pounds of non-Grade A skim milk received from non-fluid milk plants: *Provided*, That if such receipts from non-fluid milk plants are greater than the pounds of skim milk in Class II an amount equal to the difference shall be subtracted from the pounds of skim milk in Class I;

(2) Subtract from the remaining pounds of skim milk in Class II the pounds of non-Grade A skim milk received from other fluid milk plants: *Provided*, That if such receipts from other fluid milk plants are greater than the amount of skim milk remaining in Class II an amount equal to the difference shall be subtracted from Class I;

(3) Subtract from the remaining pounds of skim milk in Class II the pounds of non-Grade A skim milk received from producers: *Provided*, That if such receipts from producers are greater than the pounds of skim milk remaining in Class II an amount equal to the difference shall be subtracted from Class I;

(4) Subtract from the remaining pounds of skim milk in Class II the pounds of Grade A skim milk received from non-fluid milk plants: *Provided*, That if such receipts from non-fluid plants are greater than the pounds of skim milk remaining in Class II an amount equal to the difference shall be subtracted from Class I;

(5) Subtract from the remaining pounds of skim milk in each class respectively, the pounds of Grade A skim milk received from other fluid milk plants in accordance with its classification as determined pursuant to § 973.43 (a); and

(6) If the total pounds of skim milk remaining in both classes exceed the pounds of skim milk received from producers an amount equal to the difference shall be subtracted from Class II: *Provided*, That if the remaining pounds of skim milk in Class II are less than the amount to be subtracted an amount equal to the difference shall be subtracted from Class I.

9. Amend § 973.50 (a) by adding thereto the following: "*Provided*, That in any delivery period in which the "supply and demand ratio" computed pursuant to § 941.51 of Order Number 41, as amended, regulating the handling of milk in the Chicago, Illinois, marketing area, affects the Class I price computed pursuant to § 941.52 (a) of such order by more than 6 cents, the price computed pursuant to this paragraph shall be adjusted by a like amount."

10. Delete § 973.50 (b) and substitute therefor the following:

(b) *For Class II milk.* The price shall be that determined by the market administrator as follows: (1) Multiply by 4.24 the simple average of the daily wholesale selling prices per pound (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter at New York as reported by the Department of Agriculture during the delivery period; (2) multiply by 8.2 the weighted average of carlot prices for spray process nonfat dry milk solids, for human consumption f. o. b. manufacturing plants in the Chicago area, as published by the Department of Agriculture for the period from the 26th day of the immediately preceding delivery period through the 25th day of the current delivery period; (3) add into one sum the amounts obtained in subparagraphs (1) and (2) of this paragraph; and (4) subtract 75.2 cents therefrom.

11. Amend § 973.51 to read as follows:

§ 973.51 *Basic prices.* The basic price to be used in determining the Class I price shall be the price for Class II milk computed pursuant to § 973.50 (b) for the preceding delivery period or that computed from either of the formulas set forth in paragraphs (a) and (b) of this section, whichever is the highest.

(a) The average of the basic or field prices ascertained to have been paid for milk of 3.5 percent butterfat content received during the preceding delivery period at the following plants or places for which prices are reported to the market administrator by the listed companies or by the Department of Agriculture:

Companies and Locations
Borden Co., Mount Pleasant, Mich.
Carnation Co., Sparta, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Wayland, Mich.
Pet Milk Co., Coopersville, Mich.
Borden Co., Orfordville, Wis.
Borden Co., New London, Wis.
Carnation Co., Clinton, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Oconomowoc, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Belleville, Wis
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) (1) Multiply by 6 the simple average of the daily wholesale selling prices (using the midpoint of any price range as one price) per pound of Grade AA (93-score) bulk creamery butter at New York as reported by the Department of Agriculture during the preceding delivery period; (2) add 2.4 times the weekly prevailing price of "Cheddars" during the preceding delivery period on the Wisconsin Cheese Exchange at Plymouth, Wisconsin, as reported by the Department of Agriculture; (3) divide the resulting sum by 7; (4) add 30 percent thereof; and (5) multiply the resulting sum by 3.5.

12. Delete § 973.52 and substitute therefor the following:

§ 973.52 *Location differential to handlers.* (a) With respect to producer milk purchased or received at a fluid milk plant and which is classified as Class I milk, the price per hundredweight computed pursuant to § 973.50 (a) shall be reduced by the amount indicated below for the distance that such plant is located from the Minnesota Transfer Viaduct over University Avenue in St. Paul. Such deduction shall be based on the airline mileage as computed by the market administrator.

(b) For the purposes of this section, the milk which is classified as Class I during each delivery period shall be considered to have been first that which was received from producers at such handler's fluid milk plant located nearest to the Minnesota Transfer Viaduct and then that milk which was received at such handler's other fluid milk plants in the order of their distance from the Minnesota Transfer Viaduct.

Location of Plant and Amount of Deduction

	Cents
0 to 15 miles	0
15 to 20 miles	8
20 to 30 miles	10
30 to 40 miles	12
40 to 50 miles	14
50 to 60 miles	15
60 to 70 miles	16
70 miles or over	[1] 17

[1] Plus an additional 1 cent for each 10 miles or fraction thereof in excess of 80 miles.

13. Add as § 973.64 the following:

§ 973.64 *Other source milk diverted by a cooperative association.* Other source milk caused by a cooperative association to be delivered to a fluid milk plant for its account from a non-fluid milk plant operated by a person who is not a handler shall be considered to have

been first received by such cooperative association.

14. Amend § 973.70 by deleting the reference to "§ 973.45 (a) (3)" and substituting therefor a reference to "§ 973.45 (a) (6)".

15. Delete § 973.82 and substitute therefor the following:

§ 973.82 *Location differential to producers.* In making payment pursuant to § 973.80 (a) and (b) for milk received from producers at a fluid milk plant, each handler shall deduct from the uniform price payable to such producer the amount indicated below for the distance that such plant is located from the Minnesota Transfer Viaduct over University Avenue in St. Paul.

Location of Plant and Amount of Deduction	*Cents*
0 to 15 miles	0
15 to 20 miles	8
20 to 30 miles	10
30 to 40 miles	12
40 to 50 miles	14

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2, 3]

[Docket No. 10930]

CLASS B FM BROADCAST STATIONS; REVISED TENTATIVE ALLOCATION PLAN

NOTICE OF PROPOSED RULE MAKING

In the matter of amendment of the Revised Tentative Allocation Plan for Class B FM Broadcast Stations; Docket No. 10930.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 7th day of April 1954;

The Commission having under consideration a proposal to amend the Revised Tentative Allocation Plan for Class B FM Broadcast Stations; and

It appearing, that notice of proposed rule making (FCC 54-247) setting forth the above amendment was issued by the Commission on February 25, 1954, and was duly published in the FEDERAL REGISTER (19 F. R. 1185), which notice provided that interested parties might file statements or briefs with respect to the said amendment on or before March 26, 1954; and

It further appearing, that no comments were received either favoring or opposing the adoption of the proposed reallocation;

It further appearing, that the immediate adoption of the proposed reallocation would facilitate consideration of a pending application requesting a Class B assignment in Effingham, Illinois;

It further appearing, that authority for the adoption of the proposed amendment is contained in section 4 (i), 301, 303 (c), (d), (f), and (r), and 307 (b) of the Communications Act of 1934, as amended,

It is ordered, That effective immediately, the Revised Tentative Allocation Plan for Class B FM Broadcast Stations is amended as follows:

General area	Channels	
	Delete	Add
Effingham, Ill		239
Peoria, Ill	239	

(Sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Released: April 8, 1954.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[47 CFR Part 8]

[Docket No. 10963]

CERTIFICATION OF HARMONIC SUPPRESSION CAPABILITIES OF SHIP TRANSMITTERS

EXTENSION OF TIME FOR FILING

In the matter of amendment of Part 8 of the Commission's rules regarding certification of harmonic suppression capabilities of ship transmitters operating on 2738 kc.; Docket No. 10963.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 13th day of April 1954:

The Commission having under consideration the petition filed in the above entitled proceedings by the American Waterways Operators, Inc., requesting an extension of time in which to file comments directed to the Commission's notice of proposed rule making in this docket from April 15, 1954, to April 25, 1954;

It appearing, that good and sufficient reasons have been advanced by the American Waterways Operators, Inc., in its petition for an extension of time in which to file comments, and that the public interest would be served by a grant of said petition;

It is ordered, That the time for filing comments in the above entitled proceedings is hereby extended from April 15, 1954, to April 26, 1954.

Released: April 14, 1954.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

NOTICES

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

NEVADA

SMALL TRACT CLASSIFICATION ORDER NO. 55, AMENDED

APRIL 7, 1954.

Pursuant to the authority delegated to me by the Regional Administrator, Region II, Bureau of Land Management, by Order No. 1, Amendment No. 2, dated January 29, 1953 (18 F. R. 23), Small Tract Classification Order Nevada No. 55 issued February 24, 1950, is hereby amended to permit sale for homesite purposes only in accordance with the following schedule:

T. 20 S., R. 60 E., M. D. M.,
Sec. 36, Tracts 1 to 48, inclusive, at $250.00 per tract,
Tracts 49 to 64, inclusive, at $375.00 per tract.

E. I. ROWLAND,
Regional Chief, Division of Lands.

NEVADA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

APRIL 7, 1954.

An application, serial number Nevada 018060, for the withdrawal from all forms of appropriation under the public land laws, of the lands described below was filed on February 9, 1954, by the Department of the Army, Corps of Engineers.

For a period of 30 days from the date of publication of this notice, persons having cause to object to the proposed withdrawal may present their objections in writing to the Regional Administrator, Region II, Bureau of Land Management, Department of the Interior at 630 Sansome Street, San Francisco, California. In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where proponents of the order can explain its purpose.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER, either in the form of a public land order or in the form of a notice of determination if the application is rejected. In either case, a separate notice will be sent to each interested party of record.

The lands involved in the application are:

T. 36 N., R. 37 E., M. D. M.,
Sec. 12, S½SE¼NW¼, N½NE¼SW¼, SW¼SW¼NE¼, NW¼NW¼SE¼.
T. 36 N., R. 38 E., M. D. M.,
Sec. 18, E½SW¼SE¼, W½SE¼SE¼.

J. H. FAVORITE,
Acting Regional Administrator.

[F. R. Doc. 54-2792; Filed, Apr. 14, 1954; 8:47 a. m.]

IDAHO

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

APRIL 7, 1954.

An application, serial number Idaho 04411, for the withdrawal from all forms of appropriation under the public land laws, except as noted below of the lands described below was filed on July 30, 1953, by Corps of Engineers, Department of the Army.

The purposes of the proposed withdrawal: Saylor Creek Bombing and Gunnery Range.

For a period of 30 days from the date of publication of this notice, persons having cause to object to the proposed withdrawal may present their objections in writing to the Regional Administrator, Region I, Bureau of Land Management, Department of the Interior at Swan Island Station, Portland 18, Oregon. In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where proponents of the order can explain its purpose.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER, either in the form of a public land order or in the form of a notice of determination if the application is rejected. In either case, a separate notice will be sent to each interested party of record.

The lands involved in the application are:

BOISE MERIDIAN, IDAHO

Tps. 7, 8 and 9 S., Rs. 7, 8, 9, 10, 11, and West Half of R. 12 E.;
North Half of Tps. 10 S., Rs. 7, 8, 9, 10, 11, and West Half of R. 12 E.

The area described aggregates approximately 419,120 acres.

Use of the lands described for military purposes and seasonal grazing use was authorized by the Secretary of the Interior on April 20, 1942, and was extended under authority of Special Land Use Permit Idaho 04331, approved by the Secretary of the Interior May 12, 1953. The proposed withdrawal will provide for the continuation of such use under the same terms and conditions of the permit of May 12, 1953 and which are listed below:

1. The Department of the Air Force shall take all reasonable precautions to prevent and suppress brush and range fires occuring within the withdrawn lands during the period of military use, or outside such lands resulting from military use, and to prevent the pollution of waters on or in the vicinity of the withdrawn lands. The Department of the Air Force may enter into an agreement with the Bureau of Land Management to provide for a transfer of funds for the suppression of range fires by the Bureau of Land Management.

2. Authorized employees of the Department of the Interior and other Federal or State employees shall be permitted by the Department of the Air Force to enter the withdrawn lands on official business upon obtaining proper clearance from the commanding officer, Mt. Home Air Force Base, or other appropriate Air Force officer in charge.

3. The Department of the Air Force shall not enclose roads or trails commonly in public use except at such times as it may be necessary to do so in the interests of safety or national security in the discretion of the Air Force officer in charge.

4. Grazing use of the withdrawn lands shall be administered by the Bureau of Land Management. Grazing use shall be permitted at the discretion of the official of the Bureau of Land Management in charge during the period March 1 to May 31 each year during which season no use of the lands for aerial gunnery shall be permitted; provided, that the Air Force officer in charge may authorize the Bureau of Land Management to permit grazing use earlier than March 1 or later than May 31 in all or a portion of the withdrawn lands if such use will not interfere with the military use of such lands.

5. The Department of the Air Force, not later than February 28 each year, shall destroy any unexploded bombs or other munitions left on the area.

6. The Department of the Air Force shall adequately post the withdrawn lands annually, specifying the dates closed for public use and the dates open to public use.

7. The Department of the Air Force shall exercise precaution to prevent the destruction of range resources and to provide for reseeding or such other rehabilitation work as may be necessary on the withdrawn lands or public lands adjacent thereto if such lands are damaged by military use. Such rehabilitation shall be accomplished under cooperative agreement between the Department of the Air Force and the Bureau of Land Management.

8. The Department of the Air Force shall repair, restore, or replace existing or future range improvements upon the withdrawn lands which are damaged or demolished by military operations. Such rehabilitation shall be accomplished under cooperative agreement between the Department of the Air Force and the Bureau of Land Management.

JAMES F. DOYLE,
Acting Regional Administrator.

[Docket DA-404]

IDAHO

RESTORATION ORDER UNDER FEDERAL POWER ACT

APRIL 8, 1954.

Pursuant to determination DA-404, Idaho, of the Federal Power Commission and in accordance with Order No. 427, section 2.22 (a) (4) of the Director, Bureau of Land Management, approved August 16, 1950, 15 F. R. 5641, it is ordered as follows:

Subject to valid existing rights and the provisions of existing withdrawals the lands hereinafter described so far as they are withdrawn and reserved for power purposes are hereby restored to location and entry for mining purposes only, subject to the provisions of section 24 of the Federal Power Act of June 10, 1920 (41 Stat. 1075; 16 U. S. C. sec. 818), as amended, and subject to the stipulation that there is reserved to the United States, its successors or assigns, the prior right to use any or all portions of the lands for purposes of flowage, and subject to the further stipulation that, if and when the lands are required wholly or in part for purposes of power development, any structures, machinery, or improvements placed thereon which shall be found to interfere with such development shall be removed or relocated as may be necessary to eliminate interference with power development without expense to the United States or its permittees or licensees.

BOISE MERIDIAN

T. 31 N., R. 2 W.,
Sec. 27, Lot 3,
Sec. 28, Lot 8,
Sec. 34, Lots 2, 3, 4, and 5.

The areas described aggregate 226.90 acres.

The subject lands are situated on both sides of the Salmon River and are withdrawn in Power Site Reserve No. 8 of July 2, 1910, as modified by Executive Order No. 131 of February 25, 1914. The topography of the lands is exceptionally rough and mountainous, and the lands are classified as suitable for mining and potential power site purposes.

This order shall become effective on publication in the FEDERAL REGISTER at which time the lands described will be available for location under the United States Mining Laws subject to the reservations, stipulations, and conditions herein provided.

T. M. TYRRELL,
Acting Regional Administrator.

ALASKA

NOTICE OF PROPOSED WITHDRAWAL AND RESERVATION OF LANDS

APRIL 6, 1954.

An application, serial number Fairbanks 010581, for the withdrawal from all forms of appropriation under the public land laws, of the lands described below was filed on September 8, 1953, by Civil Aeronautics Administration, Department of Commerce. The purposes of the proposed withdrawal: To amend and enlarge A. N. S. withdrawal No. 162 of June 25, 1941.

For a period of 30 days from the date of publication of this notice, persons having cause to object to the proposed withdrawal may present their objections in writing to the Regional Administrator, Region VII, Bureau of Land Management, Department of the Interior at Box 480, Anchorage, Alaska. In case any objection is filed and the nature of the opposition is such as to warrant it, a public hearing will be held at a convenient time and place, which will be announced, where opponents to the order may state their views and where proponents of the order can explain its purpose.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER, either in the form of a public land order or in the form of a notice of determination if the application is rejected. In either case, a separate notice will be sent to each interested party of record.

The lands involved in the application are:

(a) To make the land described therein conform to the legal description thereof as established by U. S. Survey No. 2630; and

(b) To enlarge Air Navigation Site Withdrawal No. 162 by adding the following-described abutting lands and associated noncorporeal rights, viz:

Beginning at corner No. 3 of U. S. Survey No. 2630, Alaska, said corner being located approximately at latitude N. 62°58'15" and longitude W. 141°54'10", go N. 13°55' W. 1,000 feet; thence S. 76°05' W. 2,500 feet more or less to the center line of an existing access road near the easterly bank of Moose Creek; thence southerly along the center line of said access road 1,050 feet more or less to the line from corner No. 2 to corner No. 3 of said U. S. Survey No. 2630; thence N. 76°05' E. 2,350 feet more or less along last said line of said survey to the point of beginning; containing 55.7 acres of land, more or less; together with rights-of-way from the westerly boundary of the above described tract of land to Moose Creek for sewer and water supply lines.

LOWELL M. PUCKETT,
Regional Administrator.

Bureau of Reclamation

[Commissioner's Order 31]

REGIONAL DIRECTORS

DELEGATION OF AUTHORITY TO APPROVE EXCHANGE OF FARM UNITS

APRIL 7, 1954.

This order restates the authority of Regional Directors to approve the exchange of farm units and authorizes redelegations to subordinate officials.

SECTION 1. *Delegation.* Regional Directors may, subject to the requirements of the act of August 13, 1953 (67 Stat. 566), and regulations issued thereunder, approve the exchange of unpatented farm units and farm units of resident owners of private land on Federal irrigation projects and perform all other acts necessary to effect their exchange.

SEC. 2. *Redelegation.* Regional Directors may, in writing, redelegate to officials in charge of projects the authority granted in section 1.

SEC. 3. *Revocation.* Order No. 28 (19 F. R. 520) is revoked.

SEC. 4. *Authority.* This order is issued pursuant to Departmental Order No. 2749 (19 F. R. 1523).

W. A. DEXHEIMER,
Commissioner.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

SALES OF CERTAIN COMMODITIES AT FIXED PRICES

APRIL 1954 DOMESTIC AND EXPORT PRICE LISTS

Pursuant to the pricing policy of Commodity Credit Corporation issued March 22, 1950, as amended January 9, 1953 (15 F. R. 1593, 18 F. R. 176), and subject to the conditions stated therein, the following commodities are available for sale in the quantities and at the prices stated:

APRIL 1954 EXPORT PRICE LIST

Commodity and approximate quantity available (subject to prior sale)	Export price list
Cottonseed oil, refined, 965,000,000 pounds.[1]	12¼ cents per pound in lots of 500 tons and over and 12¾ cents per pound in lots under 500 tons PSY or better, basis in-store at point of export; export to friendly countries other than Canada, which remains on a bid basis. (See Domestic Sales Release for prices U. S. territories and possessions.) Upon written agreement, with full cost reimbursement to be made by the buyer, CCC may deliver oil f. o. b. tankcars or tankwagons or named vessel.
Cottonseed oil, crude, 15,000,000 pounds.[1]	Bid basis, in store at point of export or f. o. b. tankcars or tankwagons at producers' mills. On in-store sales, if buyer and CCC agree in writing, CCC will effect loading of oil into vessel or tankcars or tankwagons, with buyer compensating for all costs incurred. Available New Orleans CSS Commodity office.
Linseed oil, raw, 2,000,000 pounds, plus additional quantities as available.[1]	Bid basis, f. o. b. tankcars at points of storage locations. Available Cincinnati, Portland, and Minneapolis CSS Commodity offices.
Peanuts [1]	Peanuts are available as farmers' stock for export on bid basis, f. o. b. points of storage locations, subject to the terms and conditions of U. S. D. A. Announcements CCC Peanut Forms 34 and 40. Available through the Oils and Peanut Division, CSS, U. S. D. A., Washington 25, D. C., and Dallas CSS Commodity office.
Large lima beans, 1952 crop (bagged), 300,000 hundredweight.[1]	$5 per 100 pounds for U. S. No. 1 f. a. s. Hueneme, Long Beach, Los Angeles, San Francisco, or Stockton, California (CCC option). U. S. No. 2, 25 cent discount. U. S. Extra No. 1, 10 cent premium. Subject terms GR 212, as amended. Available Portland CSS Commodity office.
Red kidney beans, 1953 crop (bagged), 247,000 hundredweight.[1]	To Western Hemisphere countries $10 per 100 pounds. For export to other countries $6 per 100 pounds, f. a. s. New York City basis, U. S. No. 1 grade. Discount U. S. No. 2 grade, 25 cents; premium CHP 15 cents per 100 pounds. Available Chicago CSS Commodity office.
Pea beans, 1953 crop (bagged), 213,000 hundredweight.[1]	To Western Hemisphere countries $8 per 100 pounds. For export to other countries $7 per 100 pounds, f. a. s. Philadelphia, Baltimore, Norfolk, basis U. S. No. 1 grade. Discount No. 2 grade, 25 cents; premium CHP 15 cents per 100 pounds. Available Chicago CSS Commodity office.
Wheat, bulk [1]	Sales made for export pursuant to Announcement GR 261 and 262
Corn, bulk [1] 50,000,000 bushels	Market price on date of sale at point of delivery, provided delivery takes place within 15 days unless otherwise agreed upon.
Grain sorghums, 5,000,000 hundredweight, plus additional quantities as available.[1]	Bid basis. Available Dallas, Kansas City, and Minneapolis CSS Commodity offices.
Flaxseed, approximately 34,000 bushels.[1]	Bid basis. Available Portland CSS Commodity office.

[1] These same lots also are available from the domestic sales price list announced today.

APRIL 1954 DOMESTIC PRICE LIST

Commodity and approximate quantity available (subject to prior sale)	Domestic price list
Nonfat dry milk solids (in carload lots only); 455,000,000 pounds, spray; 85,000,000 pounds, roller.	Spray process, U. S. Extra Grade, 16 cents per pound; roller process, U. S. Extra Grade, 14.25 cents per pound. Prices apply "in store" at location of stocks.[1]
Salted creamery butter (in carload lots only); 315,000,000 pounds.	U. S. Grade A and higher: All States except those listed below, 60.5 cents per pound. New York, New Jersey, Pennsylvania, New England and other States bordering the Atlantic Ocean and Gulf of Mexico, 61.25 cents per pound. U. S. Grade B: 2 cents per pound less than Grade A prices. Prices apply "in store" at location of stocks.[1]
Cheddar cheese, cheddars, flats, twins and rindless blocks (standard moisture basis in carload lots only); 325,000,000 pounds.	U. S. Grade A and higher: All States except those listed below, 34¼ cents per pound. New York, New Jersey, Pennsylvania, New England, and other States bordering the Atlantic and Pacific Oceans and Gulf of Mexico, 35¼ cents per pound. U. S. Grade B: 1 cent per pound less than Grade A prices. All prices are subject to usual adjustment for moisture content. Prices apply "in store" at location of stocks.[1]
Cottonseed oil, crude, 15,000,000 pounds.[1]	Market price but not less than 15 cents per pound prime, Valley basis, f. o. b. tankcars or tank-wagons at producer's mills subject to premiums or discounts comparable to those in Bulletin 3 of the 1953 crop cottonseed price support program. Available New Orleans CSS Commodity office. Price will not be reduced during period ending Aug. 31, 1954.
Cottonseed oil, refined, 865,000,000 pounds.[1]	Market price but not less than the minimum crude price, with appropriate adjustments for refining, location and quality f. o. b. tankcars or tankwagons at points of storage locations. Available New Orleans CSS Commodity office. Price will not be reduced during period ending Aug. 31, 1954
Linseed oil, raw, 2,000,000 pounds, plus additional quantities as available.[1]	Market price on date of sale, but not less than equivalent of the 1953 price support for flaxseed. Price will not be reduced during period ending July 31, 1954. Available Cincinnati, Portland, and Minneapolis CSS Commodity offices
Peanuts: [2] Farmers' stock, 1952 crop, 5,000 tons.	Bid basis, f. o. b. points of storage locations, subject to the terms and conditions of Announcement CCC Peanut Form 40. In addition, farmers' stock peanuts from CCC stocks, including any 1953 crop peanuts acquired by calling loans, may be offered under separate announcement for domestic crushing subject to the terms and conditions of CCC Peanut Form 34. Available Dallas CSS Commodity office.

See footnotes at end of table.

APRIL 1954 DOMESTIC PRICE LIST—Continued

Commodity and approximate quantity available (subject to prior sale)	Domestic price list
Cotton, 235,000 bales	Sales will be made by the New Orleans office at prices not less than the higher of: (1) the market price as determined by the CCC, or (2) 90 percent of the current support price, increased by carrying charges, (although sales may be made at prices below the minimum if necessary to meet competition). Sales will be restricted to the New Orleans CSS Commodity office.
Wool, shorn and pulled grease (including some scoured), 1,000,000 pounds	The lesser of (1) the market value, or (2) 103 percent of the price support purchase price for the current season, plus warehouse charges, interest, and carrying charges. Available Boston CSS Commodity office.
Dry edible beans (bagged)	Price based on the small lots sold by growers at point of production. Amount of purchase to be limited to quantities as specified. For other grades of all beans, adjust by factors specified for U. S. No. 1 basis. California points of production.
Large lima beans, 1952 crop, California, 1,000,000 hundredweight	$14.50 per 100 pounds. Available Portland CSS Commodity office.
Pea beans, 1953 crop, 250,000 hundredweight	$9.75 per 100 pounds. Available Dallas CSS Commodity office. Michigan points of production.

[1] "In store" means at the processor's plant or warehouse but with any prepaid storage and outhandling charges for the account of the buyer.

[2] Prices will not be reduced during the period ending June 30, 1954.

[3] These same lots also are available at export sales prices announced today.

SECURITIES AND EXCHANGE COMMISSION

[File No. 7-1600]

CONSUMERS POWER CO.

NOTICE OF APPLICATION FOR UNLISTED TRADING PRIVILEGES, AND OF OPPORTUNITY FOR HEARING

In the matter of application by the Philadelphia-Baltimore Stock Exchange for unlisted trading privileges in Consumers Power Company, Common Stock, No. Par Value; File No. 7-1600.

At a regular session of the Securities and Exchange Commission, held at its office in the city of Washington, D. C., on the 9th day of April, A. D. 1954.

The Philadelphia-Baltimore Stock Exchange, pursuant to section 12 (f) (2) of the Securities Exchange Act of 1934 and Rule X-12F-1 thereunder, has made application for unlisted trading privileges in the Common Stock, No Par Value, of Consumers Power Company, a security listed and registered on the Detroit Stock Exchange, on the Midwest Stock Exchange, and on the New York Stock Exchange.

Rule X-12F-1 provides that the applicant shall furnish a copy of the application to the issuer and to every exchange on which the security is listed or already admitted to unlisted trading privileges. The application is available for public inspection at the Commission's principal office in Washington, D. C.

Notice is hereby given that, upon request of any interested person received prior to April 26, 1954, the Commission will set this matter down for hearing. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to this matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[File Nos. 54-66, 59-61, 59-35]

FEDERAL WATER AND GAS CORP. ET AL.

ORDER APPROVING AND RELEASING JURISDICTION WITH RESPECT TO FEES AND EXPENSES

APRIL 9, 1954.

The Commission having previously approved a plan of liquidation of Federal Water and Gas Corporation ("Federal"), a registered holding company, pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("act") and the Commission having in such proceeding reserved jurisdiction over fees and expenses incurred in connection therewith; and

The Commission, on July 21, 1952, having issued its order authorizing the payment of certain fees and expenses; and

Federal having now filed an application seeking authorization for the payment of additional counsel fees to Hughes, Hubbard, Blair & Reed in the amount of $5,000 and reimbursement for expenses in the amount of $402.66 and the payment of $2,118 to the New York Trust Company for services as Distributing Agent;

It appearing to the Commission that the fees and expenses so proposed to be paid by Federal are for necessary services and are reasonable and that jurisdiction may appropriately be released to permit payment thereof:

It is hereby ordered, That Federal be, and it hereby is, authorized to pay the fees and expenses as indicated above and that the jurisdiction heretofore reserved be, and hereby is, released with respect to the payment by Federal of the fees and expenses as requested.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

No. 73——6

[File No. 70-3238]

DELAWARE POWER & LIGHT CO.

NOTICE OF FILING OF DECLARATION REGARDING ISSUANCE AND SALE OF PRINCIPAL AMOUNT OF BONDS

APRIL 9, 1954.

Notice is hereby given that Delaware Power & Light Company ("Delaware"), a registered holding company, has filed a declaration with this Commission pursuant to the provisions of the Public Utility Holding Company Act of 1935 ("act"), designating sections 6 (a) and 7 of the act and Rule U-50 thereunder as applicable to the proposed transaction, which is summarized as follows:

Delaware proposes to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, $10,000,000 principal amount of its First Mortgage and Collateral Trust Bonds, __ Percent Series due 1984. The Bonds are to be issued under and secured by the Mortgage and Deed of Trust of Delaware to The New York Trust Company, Trustee, dated as of October 1, 1943, and indentures supplemental thereto, and by a further supplemental indenture to be dated as of May 1, 1954.

The rights and preferences of the proposed Bonds will be substantially identical with the presently outstanding First Mortgage and Collateral Trust Bonds except with respect to the interest rate, redemption prices and maturity date thereof. The invitation for bids will specify that the amount to be received by Delaware shall not be less than 100 percent nor more than 102.75 percent of the principal amount thereof and that the interest rate shall be a multiple of ⅛ of 1 percent.

According to Delaware the net proceeds from the sale of the new bonds are to be used for necessary and desirable additions and improvements to its properties and also the properties of its subsidiaries.

The estimated fees and expenses to be paid in connection with the issue and sale of the Bonds are to be supplied by amendment.

Delaware has filed an application with the Public Service Commission of Delaware for approval of the proposed issue and sale of Bonds.

The Commission is requested to issue its order permitting the declaration to become effective on April 26, 1954.

Notice is further given that any interested person may, not later than April 23, 1954, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said filing which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after April 23, 1954, such declaration may be permitted to become effective, as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transaction as provided in Rules U-20 (a) and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 29116]

LIQUEFIED CHLORINE GAS FROM CHARLESTON, W. VA., AND POINTS GROUPED THEREWITH TO DOCTORTOWN, GA.

APPLICATION FOR RELIEF

APRIL 12, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to his tariff I. C. C. No. 4510, pursuant to fourth-section order No. 17220.

Commodities involved: Liquefied chlorine gas, in tank-car loads.

From: Charleston, W. Va., and points grouped therewith.

To: Doctortown, Ga.

Grounds for relief: Competition with rail carriers and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
Secretary.

[4th Sec. Application 29117]

COAL FROM KENTUCKY, VIRGINIA, AND WEST VIRGINIA TO ST. LOUIS, MO., AND EAST ST. LOUIS, ILL.

APPLICATION FOR RELIEF

APRIL 12, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: Roy S. Kern, Agent, for carriers parties to schedule listed below.

Commodities involved: Coal and coal briquettes, carloads.

From: Mines in Kentucky, Virginia and West Virginia.

To: St. Louis, Mo., and East St. Louis, Ill.

Grounds for relief: Competition with rail carriers, circuitous routes, market competition, and to maintain grouping.

Schedules filed containing proposed rates: Norfolk and Western Railway Company, I. C. C. No. 3379–B, supp. 12.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 29118]

PAPER AND PAPER ARTICLES FROM RICHMOND, VA., TO CAMDEN, N. J.

APPLICATION FOR RELIEF

APRIL 12, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin, Agent, for carriers parties to schedule listed below.

Commodities involved: Paper and paper articles, carloads.

From: Richmand, Va.

To: Camden, N. J.

Grounds for relief: Competition with rail carriers, circuitous routes, and additional route.

Schedules filed containing proposed rates: Chesapeake and Ohio Railway Company, I. C. C. No. 13165, supp. 66.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

FEDERAL REGISTER

VOLUME 19 NUMBER 74

Washington, Friday, April 16, 1954

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

[Civil Air Regs., Amdt. 3-11]

PART 3—AIRPLANE AIRWORTHINESS; NORMAL, UTILITY, AND ACROBATIC CATEGORIES

FLASHING RATES FOR POSITION LIGHTS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C. on the 12th day of April 1954.

Currently effective § 3.700 (e) of Part 3 of the Civil Air Regulations requires that, if a position light flasher is used, the position light system shall be energized at a rate of not less than 60 nor more than 100 flashes per minute with an on-off ratio between 2:1 and 1:1. This requirement became effective on January 15, 1951. Some time later, it was found that one of the most popular low-cost flashers being used with position lights could not comply with these standards. This flasher, which was widely used, was thus rendered ineligible for installation on airplanes type certificated in accordance with provisions of Part 3 in effect after January 15, 1951. Since, in general, greater conspicuity is obtained with flashing position lights than with steady lights, safety is served by encouraging the use of flashing position lights. Therefore, to determine whether the present requirements for flashing rates could be extended without impairing safety to enable the use of this low-cost flasher, an investigation was undertaken. This investigation, which included practical tests, revealed that an extension of the upper limit of the flashing rate to 120 f. p. m. is justified, and that no noticeable deterioration in conspicuity occurs at this increased limit. It was also revealed that with the higher flash rate limit, a somewhat higher limit on the on-off ratio would be desirable because it tends to increase the apparent intensity of the light. This amendment, therefore, increases the upper limit of the flashing rate from 100 to 120 f. p. m., and the upper limit of the on-off ratio from 2:1 to 2.5:1.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 3 of the Civil Air Regulations (14 CFR, Part 3, as amended) effective May 17, 1954.

By amending § 3.700 (e) by deleting the numerals "100" and "2:1" and inserting in lieu thereof the numerals "120" and "2.5:1" respectively.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 603, 52 Stat. 1007, 1009, as amended; 49 U. S. C. 551, 553)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

[F. R. Doc. 54-2872; Filed, Apr. 15, 1954; 8:52 a. m.]

[Civil Air Regs., Amdt. 6-5]

PART 6—ROTORCRAFT AIRWORTHINESS

FLASHING RATES FOR POSITION LIGHTS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 12th day of April 1954.

Currently effective § 6.632 (e) of Part 6 of the Civil Air Regulations requires that, if a position light flasher is used, the position light system shall be energized at a rate of not less than 60 nor more than 100 flashes per minute with an on-off ratio between 2:1 and 1:1. This requirement became effective on January 15, 1951. Some time later, it was found that one of the most popular low-cost flashers being used with position lights could not comply with these standards. This flasher, which was widely used, was thus rendered ineligible for installation on rotorcraft type certificated in accordance with provisions of Part 6 in effect after January 15, 1951. Since, in general, greater conspicuity is obtained with flashing position lights than with steady lights, safety is served by encouraging the use of flashing position lights. Therefore, to determine whether the present requirements for

45 Chapter I: Part 107	2212

flashing rates could be extended without impairing safety to enable the use of this low-cost flasher, an investigation was undertaken. This investigation, which included practical tests, revealed that an extension of the upper limit of the flashing rate to 120 f. p. m. is justified, and that no noticeable deterioration in conspicuity occurs at this increased limit. It was also revealed that with the higher flash rate limit, a somewhat higher limit on the on-off ratio would be desirable because it tends to increase the apparent intensity of the light. This amendment, therefore, increases the upper limit of the flashing rate from 100 to 120 f. p. m., and the upper limit of the on-off ratio from 2:1 to 2.5:1.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 6 of the Civil Air Regulations (14 CFR, Part 6, as amended) effective May 17, 1954.

By amending § 6.632 (e) by deleting the numerals "100" and "2:1" and inserting in lieu thereof the numerals "120" and "2.5:1" respectively.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 603, 52 Stat. 1007, 1009, as amended; 49 U. S. C. 551, 553)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

TITLE 6—AGRICULTURAL CREDIT

Chapter IV—Commodity Stabilization Service and Commodity Credit Corporation, Department of Agriculture

Subchapter B—Loans, Purchases, and Other Operations

[1954 C. C. C. Grain Price Support Bulletin 1, Supp. 1, Grain Sorghums]

PART 421—GRAINS AND RELATED COMMODITIES

SUBPART—1954-CROP GRAIN SORGHUMS PRICE SUPPORT PROGRAM

EDITORIAL NOTE: In Federal Register Document 54–2740, published at page 2117 of the issue for Tuesday, April 13, 1954, §§ 421.426 through 421.435 are redesignated §§ 421.526 through 421.535, respectively.

TITLE 15—COMMERCE AND FOREIGN TRADE

Chapter III—Bureau of Foreign Commerce, Department of Commerce

Subchapter B—Export Regulations

[6th Gen. Rev. of Export Regs., Amdt. P. L. 72]

PART 399—POSITIVE LIST OF COMMODITIES AND RELATED MATTERS

TIN MILL PRODUCTS

Section 399.1 *Appendix A—Positive List of Commodities* is amended in the following particulars:

The following commodities are deleted from the Positive List:

Dept. of Commerce Schedule B No.	Commodity
	Tin mill products:
	Tin plate:
609010	Secondary tinplate.
609020	Circles, cobbles, strip, and scroll shear butts.
604110	Hot dipped (production plate).
604110	Other hot dipped.
604150	Electrolytic coated (production plate).
604150	Other electrolytic coated.
604170	Lithographic misprints.
604170	Other tinplate, decorated, embossed, lithographed, lacquered, or otherwise advanced.
612380	Tin cans (packers or cannery type) finished or unfinished, and specially fabricated parts, n. e. s.

This amendment shall become effective as of April 15, 1954.

(Sec. 3, 63 Stat. 7; 65 Stat. 43; 67 Stat. 62; 50 U. S. C. App. Sup. 2023. E. O. 9630, Sept. 27, 1945, 10 F. R. 12245, 3 CFR, 1945 Supp.; E. O. 9919, Jan. 3, 1948, 13 F. R. 59, 3 CFR, 1948 Supp.)

TITLE 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53399]

PART 19—CUSTOMS WAREHOUSES AND CONTROL OF MERCHANDISE THEREIN

Correction

In Federal Register Document 53–10685, issue of December 24, 1953, the first amendment under Part 19 (page 8690) should read:

1. Section 19.1 (a) is amended by deleting the second sentence from subparagraph (3).

TITLE 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 141e—BACITRACIN AND BACITRACIN-CONTAINING DRUGS; TESTS AND METHODS OF ASSAY

PART 146c—CERTIFICATION OF CHLORTETRACYCLINE (OR TETRACYCLINE) AND CHLORTETRACYCLINE- (OR TETRACYCLINE-) CONTAINING DRUGS

PART 146e—CERTIFICATION OF BACITRACIN AND BACITRACIN-CONTAINING DRUGS

MISCELLANEOUS AMENDMENTS

By virtue of the authority vested in the Secretary by the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 507, 59 Stat. 463, as amended by 61 Stat. 11, 63 Stat. 409, 67 Stat. 389; sec. 701, 52 Stat. 1055; 21 U. S. C. 357, 371; 67 Stat. 18), the regulations for tests and methods of assay for antibiotic and antibiotic-containing drugs (21 CFR Part 141e; 19 F. R. 1141) and certification of batches of antibiotic and antibiotic-containing drugs (21 CFR Parts 146c, 146e; 18 F. R. 5366, 5591, 7311; 19 F. R. 229, 1141) are amended as indicated below:

1. Part 141e is amended by adding the following new section:

§ 141e.422 *Bacitracin-polymyxin-neomycin ointment*—(a) *Potency*—(1) *Bacitracin content.* Proceed as directed in § 141e.409 (a) (1). Its content of bacitracin is satisfactory if it contains not less than 85 percent of the number of units per gram that it is represented to contain.

(2) *Polymyxin content.* Proceed as directed in § 141e.409 (a) (2), except calculate from the quantity of neomycin found (using the method prescribed in subparagraph (3) of this paragraph) the

quantity of neomycin that would be present when the sample is diluted to contain 100 units of polymyxin (labeled potency) per milliliter. Prepare the polymyxin standard curve by adding this calculated quantity of neomycin to each concentration of polymyxin used for the curve. Use this standard curve to calculate the polymyxin content of the sample. Its content of polymyxin is satisfactory if it contains not less than 85 percent of the number of units that it is represented to contain.

(3) *Neomycin content.* Proceed as directed in § 141e.411 (a) (2). Its content of neomycin is satisfactory if it contains not less than 85 percent of the number of milligrams that it is represented to contain.

(b) *Moisture.* Proceed as directed in § 141a.8 (b) of this chapter.

2. Section 146c.201 *Chlortetracycline hydrochloride* • • • is amended in the following respects:

a. Paragraph (a) *Standards of identity* • • • is amended by deleting the period at the end of the first sentence and adding the following phrase: "with or without one or more suitable and harmless buffer substances if it is intended for intravenous use."

b. Paragraph (a) (1) and (7) is amended to read:

(1) Its potency, and the potency of the chlortetracycline used in the manufacture of chlortetracycline for intravenous use, is not less than 900 micrograms per milligram, except if it is intended for use solely in the manufacture of a veterinary drug for nonparenteral use its potency is not less than 820 micrograms per milligram;

• • • • •

(7) Its pH in an aqueous solution containing 10 milligrams per milliliter is not less than 2.3 and not more than 3.3, except if it is intended for intravenous use and it contains buffer substances its pH is not less than 8 and not more than 9.5.

c. Paragraph (b) *Packaging* is amended by changing the clause "and each shall contain one or more suitable and harmless diluents" in the last sentence to read: "and each shall contain one or more suitable and harmless buffer substances".

d. In paragraph (c) *Labeling* subparagraph (1) (v) is amended by changing the word "diluents" to read "buffer substances".

e. Paragraph (d) *Request for certification* • • • is amended by changing the period at the end of the first sentence of subparagraph (1) to a semicolon and adding the following new clause: "and if it is intended for intravenous use and contains buffer substances, the date and the results of the latest test for potency of the chlortetracycline used in making such batch."

f. Paragraph (d) is further amended by adding the following new subparagraph (5):

(5) If such batch is intended for intravenous use and it contains buffer substances, such person shall submit in connection with his request (unless it has been previously submitted) one immediate container containing approximately 0.5 gram of the chlortetracycline used in making such batch.

g. In paragraph (e) *Fees*, subparagraph (1) is amended by changing the period at the end thereof to a semicolon and adding the following new clause: "$4.00 for each immediate container in the sample submitted in accordance with paragraph (d) (5) of this section."

3. Section 146c.218 *Tetracycline hydrochloride* is amended in the following respects:

a. Paragraph (a) *Standards of identity* • • • is amended by deleting the period at the end of the first sentence and adding the following phrase: "with or without one or more suitable and harmless stabilizing agents."

b. Paragraph (a) (1), (7), and (8) is revised to read:

(1) Its potency, and the potency of the tetracycline hydrochloride used in the manufacture of tetracycline hydrochloride for intravenous use, is not less than 900 micrograms per milligram.

• • • • •

(7) Its pH in an aqueous solution containing 10 milligrams per milliliter is not less than 1.8 and not more than 2.8, except if it is intended for use by injection its pH is not less than 2.0 and not more than 3.0.

(8) Its extinction coefficient $E^{1\%}_{1cm.}$, and the extinction coefficient of the tetracycline hydrochloride used in the manufacture of tetracycline for intravenous use, is 372 ± 15 at 380 mμ.

c. Paragraph (b) is revised to read:

(b) *Packaging; labeling; request for certification, check tests and assays, samples; fees.* Tetracycline hydrochloride conforms to all requirements and procedures prescribed for chlortetracycline hydrochloride by § 146c.201 (b), (c), (d), and (e), except that:

(1) It shall be labeled with an expiration date that is 24 months after the month during which the batch was certified.

(2) The person who requests certification of a batch of tetracycline hydrochloride that contains stabilizing agents and is intended for intravenous use shall submit with his request (unless they were previously submitted) the results of the latest tests and assays made on the batch of the tetracycline hydrochloride used in making such batch for potency and extinction coefficient and a sample consisting of two packages each containing approximately 500 milligrams of the tetracycline hydrochloride used in making such batch for potency and extinction coefficient.

(3) The fee for the services rendered with respect to each immediate container of the tetracycline hydrochloride used in the manufacture of a batch of tetracycline hydrochloride for intravenous use submitted in accordance with the requirements prescribed therefor by subparagraph (2) of this paragraph shall be $4.00.

4. Part 146e is amended by adding the following new section:

§ 146e.422 *Bacitracin-polymyxin-neomycin ointment.* (a) Bacitracin-polymyxin-neomycin ointment conforms to all requirements prescribed by § 146e.409 for bacitracin-polymyxin ointment, and is subject to all procedures prescribed by § 146e.409 for bacitracin-polymyxin ointment, except that:

(1) Its content of neomycin is not less than 3.0 milligrams per gram. The neomycin used conforms to the standards prescribed by § 146e.410 (a) (2).

(2) In addition to the labeling prescribed by § 146e.409 (a) (5), each package shall bear on the outside wrapper or container and the immediate container the number of milligrams of neomycin in each gram of the batch.

(3) In addition to complying with the requirements of § 146e.409 (a) (7), a person who requests certification of a batch of bacitracin-polymyxin-neomycin ointment shall submit with his request a statement showing the batch mark and (unless they were previously submitted) the results and date of the latest tests and assays of the neomycin used in making the batch for potency, toxicity, moisture, and pH. He shall also submit in connection with his request a sample consisting of not less than 7 packages of bacitracin-polymyxin-neomycin ointment and (unless it was previously submitted) a sample consisting of 5 packages of the neomycin used in making the batch, each containing approximately 0.5 gram.

(b) The fee for the services rendered with respect to each immediate container in the sample of neomycin submitted in accordance with the requirements prescribed therefor by paragraph (a) (3) of this section shall be $4.00.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371)

Notice and public procedure are not necessary prerequisites to the promulgation of this order, and I so find, since it was drawn in collaboration with interested members of the affected industry and since it would be against public interest to delay providing for the amendments set forth above.

This order shall become effective upon publication in the FEDERAL REGISTER, since both the public and the affected industry will benefit by the earliest effective date, and I so find.

Dated: April 12, 1954.

[SEAL] NELSON A. ROCKEFELLER, *Acting Secretary.*

[F. R. Doc. 54-2835; Filed, Apr. 15, 1954; 8:45 a. m.]

PART 146a—CERTIFICATION OF PENICILLIN AND PENICILLIN-CONTAINING DRUGS

CHANGE OF NAME OF DIBENZYLETHYLENEDIAMINE DIPENICILLIN G

Correction

In F. R. Doc. 54-2755, appearing in the issue for Wednesday, April 14, 1954, at page 2139, the reference in amendatory paragraph 2c to "§ 146.69" should read "§ 146a.69".

TITLE 29—LABOR

Chapter X—National Mediation Board

PART 1206—HANDLING OF REPRESENTATION DISPUTES UNDER RAILWAY LABOR ACT

TIME LIMITS ON APPLICATIONS

Due to a typographical error in the original document, § 1206.4 (a), appearing on page 2121 of the FEDERAL REGISTER, April 13, 1954, F. R. Doc. 54-2683; filed April 12, 1954, is corrected as follows:

§ 1206.4 *Time limit on applications.* (a) The National Mediation Board will not accept an application for the investigation of a representation dispute for a period of two (2) years from the date of a certification covering the same craft or class of employees on the same carrier in which a representative was certified, except in unusual or extraordinary circumstances.

[SEAL] E. C. THOMPSON, *Secretary.*

AUTHORITY: §§ 21.1 to 21.38 issued under R. S. 161; 5 U. S. C. 22.

This part was approved on January 19, 1954, by the Assistant Secretary of Defense (Manpower and Personnel) for the purpose of establishing uniform security practices within industrial plants or educational institutions and all organizations and facilities used by prime and subcontractors having classified information of the military departments in their custody. The term "security," as used herein, refers to the safeguarding of information classified by the Government as Top Secret, Secret, or Confidential against unlawful dissemination, duplication, or observation because of its importance to National defense.

SUBPART A—GENERAL

§ 21.1 *Scope.* This part supersedes the Department of Defense Industrial Security Manual for Safeguarding Classified Security Information dated December 13, 1951, and previous editions, and establishes the requirements for the safeguarding of official information the unauthorized disclosure of which would or could harm, tend to impair, or otherwise threaten the security of the Nation. The requirements of this part reflect the provisions of applicable Federal Statutes and Executive Orders.

§ 21.2 *Applicable Federal Statutes and Executive Orders.* (a) Espionage Acts, Title 18 U. S. C., sections 793, 794, 795, 797, 798.

(b) Sabotage Acts, Title 18 U. S. C., sections 2151 through 2156.

(c) Air Corps Act of 1926, Title 10 U. S. C., section 310 (j).

(d) Title 50 U. S. C., sections 781 through 826 (inclusive).

(e) Atomic Energy Act of 1946, Title 42 U. S. C., section 1810.

(f) Executive Order 10104, February 1, 1951.

(g) Executive Order 10501, November 5, 1953.

§ 21.3 *Definitions.* The following definitions are established for the purpose of this part.

(a) *Access, accessibility.* The ability and opportunity to obtain knowledge of classified information.

(b) *Alien.* Any person not a citizen or national of the United States. (See Immigrant Alien, paragraph (l) of this section.)

(c) *Authorized persons.* Those persons cited in Subpart C of this part who (1) need access to the classified information involved in order to fulfill the purposes of the Government's release thereof, and (2) have been appropriately cleared, by Government or Contractor, as appropriate, for the receipt of such information.

(d) *Bound documents.* Books or pamphlets, the pages of which are permanently and securely fastened together in such a manner that one or more pages cannot be extracted from the bound copy without defacement or alteration of the book.

(e) *Classified information.* The term "Classified information" as used herein means official information which requires protection in the interest of National Defense.

(f) *Compromise.* Known or suspected loss of value of classified information as a result of an unauthorized person having obtained access to such information. As used in this part, the term "unauthorized person" refers to any person not authorized to have access to the specific classified information in accordance with the provisions of this part.

(g) *Confidential.* All information and material, the unauthorized disclosure of which could be prejudicial to the Defense interests of the Nation.

(h) *Contracting officer.* Any officer or civilian employee of any military department, who, in accordance with procedures prescribed by each respective department, has been or shall be designated a contracting officer (and whose designation has not been terminated or revoked) with the authority to enter into and administer contracts and make determinations and findings with respect thereto or any part of such authority.

(i) *Contractor.* Any industrial, educational, commercial or other entity which has executed a contract or a Department of Defense Security Agreement (DD Form 441) with a Department of Defense agency or activity.

(j) *Foreign nationals.* All persons not citizens of, or immigrant aliens to, the United States; and all citizens of the United States and immigrant aliens who act as representatives, officials, or employees of a foreign government, firm, corporation, or individual are considered foreign nationals.

(k) *Graphic arts industry.* Includes all types of facilities and individuals engaged in performing any consultation, service, or the production of any component or end product which contributes to or results in the reproduction of classified information. Regardless of trade names or specialized processes, it will include writing, illustrating, advertising services, copy preparation, all methods of printing, finishing services, duplicating, photo-copying, and film processing activities.

(l) *Immigrant alien.* Any person lawfully admitted into the United States under an immigration visa for permanent residence. An immigrant alien is a national of the United States.

(m) *Information.* The term "information" as used in this part means knowledge which can be communicated, either orally or by means of material.

(n) *Key employee.* Any employee, as differentiated from owners, directors, or officers, at a facility who requires access to classified information for the purpose of preparing a bid or quotation.

(o) *Material.* Any document, product or substance on, or in which, information may be recorded or embodied.

Material shall include everything, regardless of its physical character or make-up. Information which is transmitted orally shall be considered as material for purposes of security. Machinery, documents, apparatus, devices, photographs, recordings, reproductions, notes, sketches, maps, and letters, as well as all other products, substances or material, shall fall into the general term of material.

(p) *"Restricted Data".* All information designated as being "Restricted Data" within the meaning of Public Law 585—79th Congress (Atomic Energy Act of 1946), including all documents and other material of such designation which bear the following markings in addition to their security classification markings: "Restricted Data—Atomic Energy Act 1946."

(q) *Secret.* All information and material, the unauthorized disclosure of which could result in serious damage to the Nation.

(r) *Security cognizance.* The responsibility for the implementation of the Department of Defense industrial security program for an individual facility which the Assistant Secretary of Defense (Manpower and Personnel) has assigned to one military department for that purpose.

(s) *Security office.* Any command, office, unit, agency, or person within a military department, designated by that military department to discharge the Department of Defense responsibilities for industrial security matters at the facility.

(t) *Top Secret.* All information and material, the defense aspect of which is paramount, and the unauthorized disclosure of which could result in exceptionally grave damage to the Nation.

§ 21.4 *Designation of Security Office.* The Department of Defense will assign security cognizance to a military department, which will designate the security office responsible for insuring that all Department of Defense classified information is properly safeguarded and will coordinate all industrial security matters of concern to the Contractor and activities of the military departments. The management of each facility which has been assigned to one of the military departments for cognizance will be notified in writing of this action by the department receiving the asignment at such time as the industrial security program is initiated for the facility. The foregoing does not relieve field representatives of the military departments, in coordination with the security office of the cognizant military department, of the responsibility for exercising safeguarding controls of classified information in connection with departmental contracts, nor does it affect in any way the responsibility for contract inspection of the contracts which are administered by military department field representatives.

§ 21.5 *Special requirements for graphic arts.* Subpart H of this part provides specific security measures for the safeguarding of classified information during the development, performance of service or production of material by the graphic arts industry. The security measures apply whether the work is performed on the premises of the prime contractor or at the graphic art facility which is a subcontractor. The provisions contained in Subpart H of this part supplement the provisions of Subparts A through G of this part.

§ 21.6 *General requirements.* The Contractor:

(a) Shall be responsible for safeguarding all classified information under his control, shall determine which of his employees or subcontractors require possession of or access to any element of the information, and shall not supply or disclose such information to any unauthorized person.

(b) Shall provide suitable protective measures within his facility for the safeguarding of classified information.

(c) Shall exclude (this does not imply the dismissal or separation of any employee) from any part of his plants, facilities, or sites at which classified work for any military department is being performed, any person or persons whom the Secretary of the military department concerned or his duly authorized representative, in the interest of security, may designate in writing.

(d) Shall bring to the attention of his personnel engaged in the preparation of bids, quotations, or in the performance of work on contracts which involve access to classified information, their continuing individual responsibilities for safeguarding classified information and that the unauthorized disclosure of classified information violates Department of Defense regulations and contractual obligations and is punishable under the provisions of Federal Statutes.

(e) Shall bring to the attention of every employee whose employment is terminated and who had access to classified information during the period of his employment, that disclosure to unauthorized persons of such classified information is prohibited by Department of Defense Regulations and contractual obligations and is punishable under the provisions of the Federal Statutes.

(f) Shall not incorporate any special features of design or construction in any non-military project or in any military project other than that for which they are furnished or designed if such incorporation will disclose classified information, except with the prior written authorization of the contracting officer concerned.

(g) Shall insure that the combinations of safes and dial type padlocks used to lock containers holding classified material shall be classified in accordance with the classification of the highest Classified material stored in the containers and that they shall be changed at intervals of at least once every year and at the earliest practicable time following:

(1) The relief, transfer, or discharge of any person having knowledge of the combination.

(2) The compromise or suspected compromise of the container through loss or possible compromise of the combination.

(3) The initial receipt of locked containers.

(h) Shall perform security checks within the facility to insure that at all times security precautions are taken to protect classified information in the possession of the facility and will designate an individual or individuals to make checks, on a room or area basis, to insure that all classified material has been properly and safely stored.

(i) Shall execute and return the receipt form furnished with all information received from the Government classified Top Secret and Secret. If Top Secret or Secret information is received without a receipt form attached, the sender will be immediately informed by the Contractor. In those special cases where the sender deems it necessary, a receipt form shall be included with Confidential information, in which case the receiver of the classified information shall execute the receipt. Similarly, a subcontractor shall receipt for all information received from the Contractor classified Top Secret and Secret, and in addition, he shall receipt for Confidential information in those special cases where the sender deems it necessary.

(j) Shall return all classified information, including reproductions thereof, to the contracting officer concerned or his duly authorized field representative, unless specifically authorized in writing by the contracting officer to retain or otherwise dispose of such matter. Such classified information shall be returned:

(1) On or before the date for opening of bids when a bid is not submitted.

(2) Within 15 days after notification that a bid or negotiation proposal has not been accepted.

(3) At such other times as the contracting officer concerned or his duly authorized representative may direct or agree.

(k) Should the Department of Defense Security Agreement (DD Form 441) be terminated for any reason by either party and not be superseded by a new Security Agreement, shall tender all classified information in his possession to the military department concerned, which shall provide disposition instructions to the Contractor.

(l) In those special cases in which retention of certain classified information is necessary for the maintenance of essential records of the Contractor, and when so specifically requested, with justification therefor, the contracting officer concerned may authorize its retention by the Contractor.

(m) When requested by the security office of the cognizant military department may permit the review of the organization's personnel records pertaining to the individual for whom the Contractor has requested a personnel security clearance. Failure on the part of the Contractor to permit such review will delay the granting of interim security clearances.

§ 21.7 *Reports.* The Contractor shall submit immediately to the security office of the cognizant military department:

(a) A Confidential report of any information coming to his attention concerning existing or threatened espionage, sabotage, or subversive activities at

any of his plants, factories, laboratories, or other sites, at which work for any military department is being performed or at which material in connection therewith is acquired, fabricated, manufactured, is in process of research, is being developed, or stored.

(b) A Confidential report of any compromise of classified information.

(c) A Confidential report of any information coming to his attention concerning any of his employees having access to classified information or who are in the process of being cleared for access to classified information which indicates that such access is not, or would not be, clearly consistent with the interest of National defense.

(d) A report of any change of ownership, officers, or directors, operating name or addresses of the facility (or facilities) covered by the Security Agreement, during the period the Security Agreement is in effect, except that the provisions of this paragraph shall not be construed as requiring a report of stock transferred not affecting the control of the corporation.

(e) When requested by the security office of the cognizant military department in writing, and stated to be needed in connection with an official investigation being conducted by an agency within the Department of Defense, information available to the Contractor concerning any of his employees working in any of his plants, factories, or sites at which work for a military department is being performed.[1]

SUBPART B—HANDLING OF CLASSIFIED INFORMATION

The classification of defense information shall be determined by the Government, and the Contractor shall be notified of such security classifications. (To accomplish this, a Security Requirements Check List, DD Form 254 and Appendix 254–1, will be furnished by the contracting officer concerned prior to, or concurrent with, the award of the contract.) When the Contractor has been notified of the classification, he shall safeguard the information by clearly indicating on all subsequent material related thereto the applicable classification marking and by maintaining the security controls as established in this part.

§ 21.8 *Marking*—(a) *Procedure.* After determination of the classification to be assigned thereto, classified information shall be plainly and conspicuously marked or stamped (not typed) in accordance with the procedures set forth in this section.

(1) *Bound documents.* Classified books or pamphlets, the pages of which are permanently and securely bound together so that the pages thereof cannot be removed without damage of mutilation, shall be marked Top Secret, Secret, or Confidential whichever is appropriate, at the top and bottom on the outside of the front cover and back cover and all printed, typed, or written pages which contain classified information, including the reverse side, if used.

(2) *Correspondence and unbound documents.* Correspondence and other documentary material not permanently and securely bound together, except as otherwise indicated in subparagraphs (4) and (5) of this paragraph, shall be marked with the appropriate defense classification at the top and bottom of each page, including the cover page, if used. The marking at the top shall be placed so that it will not be hidden from view when the pages are clipped or stapled together.

(3) *Art work.* Original art work shall have the security classification stamped or marked conspicuously in top and bottom margins of the mounting board and on all overlays and cover sheets.

(4) *Charts, maps, drawings and tracings.* The assigned defense classification shall be affixed under the legend, title block, or scale in such manner as it will be reproduced on all copies made therefrom. Such classification shall also be marked at the top and bottom in each instance.

(5) *Photographs, films, and microfilms.* Classified photographs and films and their containers shall be conspicuously marked with the assigned defense classification. Continuous cover aerial reconnaissance mapping negatives, microfilm in roll form, and motion picture film, shall be marked with the appropriate classification at the beginning and ending of each roll. These and other classified negatives which do not lend themselves to marking shall be handled on a classified basis, and shall be kept in containers, properly secured which shall bear the classification marking to which the contents are entitled. In addition, motion picture films shall state in the title the classification thereof. Classified sound recordings shall be marked with the appropriate classification if practicable; if marking of the recording is not practicable, its container shall be marked.

(6) *Composition tapes and recordings.* All composition tapes and recordings shall have the security classification stamped at the beginning and ending of each roll. Rolls will be kept in containers, properly secured, which shall bear the classification marking to which the contents are entitled.

(7) *Materiel.* Items of classified materiel shall be properly marked to indicate the defense classification, whenever practicable. Classified materiel which does not lend itself to marking shall have securely affixed or attached a tag, sticker, or similar device bearing the appropriate defense clasification marking. If neither method is practicable, recipients shall be specifically notified in writing of the classification of such items.

(b) *Additional markings*—(1) *Classified material.* Documents containing classified defense information furnished authorized persons other than those of, or in the employ of, agencies of the Department of Defense, shall, in addition to being marked Top Secret, Secret, or Confidential bear notation substantially as follows:

This document contains information affecting the National defense of the United States within the meaning of the Espionage Laws, Title 18, U. S. C., Sections 793 and 794, the transmission or revelation of which in any manner to an unauthorized person is prohibited by law.

When classified items of materiel or material which do not lend themselves to marking are furnished to such persons, they shall be specifically notified in writing of such notation.

(2) *"Restricted Data."* In addition to the markings prescribed above, "Restricted Data" will be marked in capital letters, "Restricted Data—Atomic Energy Act 1946," not less than ¼-inch in height.

(c) *Marking of regraded documents and materials*—(1) *Classification markings.* Regraded documents and material shall be marked or stamped (not typed) with the new appropriate classification in the same manner as originally classified documents or material and the old markings lined through, except for bound documents, which is downgraded, will be regraded only on the front and back cover, and title, first and last pages. If the classification is canceled the markings shall be lined through, except for bound documents which will require the cancellation markings only on the front and back cover and title, first and last pages. In cases where recipients have been notified in writing of the classification of items, they will be notified of regrading action in the same manner. Prints of motion-picture film shall show regrading action on leaders attached between the plain leader and the first title frame. Material such as plates, negatives, standing type, proofs, etc., will have a statement attached thereto showing the regrading but which will in no way alter the reproducibility of the material.

(2) *Copies of regraded documents.* The Contractor shall promptly mark copies of regraded documents, as appropriate, to include the authority cited, upon receipt of regrading notices, except as authorized in subparagraph (3) of this paragraph.

(3) *Bulk files.* When a document has been downgraded, bulk files or supplies thereof need not be marked as provided in subparagraph (2) of this paragraph, until copies are charged out for use. The change or cancellation of defense classification shall be indicated inside the file drawer or other storage container.

§ 21.9 *Receiving and recording.* All classified information furnished by the Government shall be received and recorded at one or more control stations established at the Contractor's plant. A register shall be maintained of the receipt and dispatch of all classified information. A record shall also be made of the number of copies of classified information reproduced by the Contractor. The supervision of control stations shall be vested in responsible employees designated by the Contractor and cleared to receive the classified information. Prior to opening, each container shall be carefully inspected and any evidence of tampering shall be reported promptly to the dispatching activity. Upon opening the inner container, the receipt found

[1] This requirement of the Department of Defense is not intended to preclude similar reporting on these incidents to appropriate law enforcement agencies such as the Federal Bureau of Investigation.

therein (when furnished) shall be dated, signed, and returned to the sender. Any discrepancy between the receipt and the contents shall be reported at once to the dispatching activity. The inner container shall be destroyed by burning or pulping if the subject matter has been in contact therewith, unless its retention is necessary as evidence of tampering.

§ 21.10 *Accounting*—(a) *General.* The Contractor shall submit to the security office of the cognizant military department, when so directed, an accounting of all defense material classified Top Secret or Secret. Records will be maintained in file for one year following transfer or destruction of the document. For defense material classified Confidential, the Contractor is required to maintain a record of the receipt and reproduction of Confidential information as required by § 21.9, which record is subject to inspection by the security office of the cognizant military department.

(b) *Additional requirements for Top Secret.* (1) It is mandatory that all persons who have knowledge of Top Secret information be identifiable at all times. The Contractor will maintain a record by document, title, name and date, of all individuals, including stenographic, clerical, technical, and production personnel who are afforded access to Top Secret information.

(2) The number of persons who work on Top Secret information shall be kept to an absolute minimum and each person shall be individually warned against disclosing such matters to persons whose duties do not require knowledge thereof.

(3) The dissemination of Top Secret information shall be effected by direct contact whenever practicable, without transmittal of documents.

(4) It is mandatory that transmittal and custody of Top Secret information be covered by a receipt system, both within and without the plant.

(5) Each copy of a Top Secret document shall be numbered in series. Distribution records and receipts shall show the copy number of each document transmitted.

(6) The designated employee in the control station shall open and deliver Top Secret material to the individuals who must see and work on the material.

(7) Under no circumstances shall Top Secret information be transmitted by mail channels.

§ 21.11 *Storage*—(a) *Classified Information.* The Contractor will not be eligible for the receipt of classified information in connection with precontract negotiations, submission of bids, etc., or for the award of a contract and performance thereunder until he has adequate storage as described in this section.

(1) *Top Secret.* Top Secret information while not in use will be stored in a safe or a safe-type steel file container having a three-position dial-type combination lock and being of such weight, size, construction or installation as to minimize the possibility of surreptitious entry, physical theft, damage by fire or tampering.

(2) *Secret or Confidential.* Secret or Confidential information while not in use shall be stored in one of the following ways:

(i) In the same manner as Top Secret information.

(ii) In three-tumbler combination lock fire-resistant steel safe files.

(iii) In locked desks or file cabinets when a continuous watch by an officially assigned armed guard is maintained (the armed guard shall be a contractor employee who has been appropriately investigated and cleared. He shall not be authorized access to the information except as necessary in the performance of his guard duties; i. e., when material is left astray, etc.).

(iv) In steel file cabinets secured by a steel bar and padlock of the three-position combination dial-type from which the manufacturer's identification number has been obliterated.

(b) *Bulky material.* When it is impractical to store classified material because of its nature or size in accordance with the provisions of paragraph (a) of this section the Contractor shall safeguard such material by control of the area in which it is located, to the extent required by Subpart D of this part.

(c) *Supervision of storage containers.* Only a minimum number of authorized persons should possess the combination or keys to the storage space or have access to the material stored therein. Safes and other containers in which classified information is stored shall habitually be kept locked when not under the direct supervision of an authorized person officially entrusted with the combination, keys, or the contents.

§ 21.12 *Transmission*—(a) *Preparation for transmission.* Printed or written information classified Top Secret, Secret, or Confidential shall be transmitted in double sealed opaque containers. The classified information shall be protected from direct contact with the inner cover by a cover sheet or by folding inward. Only the inner container shall indicate the classification and when appropriate the marking "Restricted Data—Atomic Energy Act 1946," and shall include therein a receipt form which identifies the addressor, the addressee, and the contents in such a manner as not to reveal classified information, except that Confidential information shall require a receipt only when the sender determines it necessary. Both the inner and outer containers shall indicate the addressee and addressor.

(b) *Limited to Continental United States.* No classified information nor material shall be transmitted outside the Continental limits of the United States without the specific approval of, and in accordance with instructions issued by, the contracting officer concerned.

(c) *Top Secret.* Top Secret information shall be transmitted within the limits of the Contractor's facility by a messenger designated by the Contractor and who is cleared for access to Top Secret information. Transmittal beyond the Contractor's establishment will be made only when authorized by the Government. When so authorized, transmittal shall be by messenger approved by the Government.

(d) *Secret.* Secret information shall be transmitted by one of the following means:

(1) Messenger designated by the Contractor and who is cleared for access to Secret information.

(2) United States registered mail, including registered air mail.

(3) Protected commercial express, air or surface, under billing which assures the highest degree of protective handling.

(e) *Confidential.* Use of non-registered mails is prohibited. Confidential information shall be transmitted by one of the following means:

(1) By means established for transmittal of information of a higher classification.

(2) Messenger designated by the Contractor, who has been cleared for access to Confidential information.

(f) *Cryptographic information.* Cryptographic information shall be transmitted in accordance with specific instructions issued by the contracting officer.

(g) *Intraplant transmittal of classified information.* Classified information, except Top Secret, may be transmitted within an individual facility in accordance with procedures established by the Contractor, provided they are based upon and consistent with this part and these procedures have been approved by the security office of the cognizant military department. The procedures of this part will govern all interplant transmission of classified information.

(h) *Bulky material.* Whenever the size or quantity of classified information is of such bulk as not to lend itself to transmission as prescribed in paragraph (g) of this section, such material will be transmitted in accordance with specific instructions to be furnished by the contracting officer.

§ 21.13 *Reproduction.* All copies or reproductions of classified material shall be appropriately marked or stamped in the same manner as the original thereof.

(a) *Non-reproducible material.* The Contractor shall not make or permit to be made, without prior written authorization of the contracting officer, any photograph or other reproduction of Top Secret information or Secret information (when specifically prohibited), for any purpose.

(b) *Reproducible material.* The Contractor may reproduce, without prior authorization of the contracting officer, information classified Secret (unless specifically prohibited) or Confidential when such reproduction is essential to:

(1) The performance of the contract.

(2) The preparation of a bid or quotation.

(3) Authorized correspondence in connection with the contract.

(4) Preparation of patent applications to be filed in the U. S. Patent Office, but this paragraph shall not be deemed to authorize the filing of patent applications, and such applications shall not be filed except as provided elsewhere in the contract.

§ 21.14 *Destruction.* (a) All Top Secret and Secret information and information classified as Confidential furnished the Contractor by the Government, shall be destroyed only when authorized in writing by the contracting officer. Accountability records will be maintained by the Contractor to reflect the destruction of such material.

(b) Confidential information developed or reproduced by the Contractor in connection with a Department of Defense contract may be destroyed upon determination by the Contractor that the material is obsolete or in excess of contractual and/or legal requirements.

(c) Destruction of classified information may be accomplished by one of the following methods:

(1) Printed or written defense information shall either be burned or destroyed by reduction to pulp by appropriate cleared personnel in the presence of a cleared witness. Those documents which require authorization of the contracting officer prior to destruction pursuant to paragraph (a) of this section, will also require a certificate indicating the date of destruction and identifying the document, executed and signed by both the destroying and witnessing individuals, and forwarded to the contracting office authorizing the destruction. Copies of certificates of destruction shall be retained by the Contractor for a minimum of one year.

(2) When destruction by reduction to pulp is elected by the Contractor, the equipment employed shall be of a type recommended by the Department of Defense. The security office of the cognizant military department will furnish a list of approved equipment.

(3) When disposal is authorized, Top Secret, Secret, and Confidential defense equipment shall be melted or destroyed beyond recognition and so as to prevent reconstruction. Necessary destruction may be limited to those portions of the equipment which incorporate the classified features. A certificate indicating the date of destruction and identifying the equipment shall be executed and signed by both the individual destroying and the individual witnessing such destruction and shall be forwarded to the contracting officer authorizing the destruction. The contracting officer will determine whether the witness must be a representative of his office or of the Contractor. Copies of certificates of destruction shall be retained by the Contractor for a minimum of one year.

(d) *Classified waste.* Preliminary drafts, carbon sheets, carbon ribbons, plates, stencils, composition tapes, masters, stenographic notes, work sheets, and similar items containing classified information shall be disposed of by burning, melting, or by reduction to pulp immediately after they have served their purpose, or shall be given the same classification and safeguarded in the same manner as the material produced from them.

SUBPART C—ACCESS

§ 21.15 *General.* An individual shall be permitted to have access to classified information only when cleared by the Government or the Contractor, as the case may be, as specified in this subpart and then he will be given access to such material only to the extent of his clearance. An individual requiring clearance shall be selected by the Contractor's determination of the individual's need for such information in the performance of his assigned duties. Appeals procedures for those denied clearances by the Government are provided, in certain instances, under regulations approved by the Secretaries of the military departments.

§ 21.16 *Precontract negotiations.* In the case of precontract negotiations, advertisements, and preparations of bids under Invitation to Bid, officers, directors, owners, and key employees of the Contractor directly involved in such negotiations will be cleared by the Government, unless notified by the Government that such clearances are not required.

§ 21.17 *After award of contract.* In the event a contract is awarded, in addition to those individuals cleared under the provision of § 21.16, access to classified information is authorized only to individuals as specified in the following:

(a) United States citizen employees of the Contractor who require access to information classified Top Secret or Secret or to "Restricted Data" or cryptographic material classified Confidential in connection with the performance of work on the contract, and who have been cleared by the Government.

(b) Immigrant alien employees of the Contractor who require access to information classified Top Secret, Secret, or Confidential in connection with the performance of work on the contract, and who have been cleared by the Government.

(c) United States citizen employees of the Contractor, who require access to information classified Confidential in connection with the performance of work on the contract, and who have been cleared by the Contractor (except employees referred to in paragraph (a) of this section who require access to "Restricted Data" or cryptographic material classified Confidential and who are cleared by the Government). A clearance by the Contractor shall be based on a determination that the individual's employment records are in order as to United States citizenship and that there is no information known to the Contractor which indicates that the employee's access to Confidential information is not clearly consistent with the interests of National security. The Contractor is not authorized to revoke a clearance that he has granted.

(d) Other persons specifically authorized in writing by the Government.

(e) Colleges and universities, when Department of Defense Contractors, shall not grant clearances to their employees for access to information classified Confidential.

§ 21.18 *Preemployment applications not authorized.* A personnel clearance action for an individual will not be initiated prior to the employment of the individual by the Contractor requesting such action.

§ 21.19 *Application for clearance.* Applications for clearance shall be made by the Contractor for his officers, directors, owners, and employees for whom Government clearance is required as specified in §§ 21.16, 21.17 (a) and (b), and shall be made to the security office of the cognizant military department by submission of the following:

(a) DD Form 48 ("Personnel Security Questionnaire" to be furnished by the Government) completed and executed by United States citizens.

(b) DD Form 49 ("Immigrant Alien Questionnaire" to be furnished by the Government) completed and executed by immigrant aliens.

(c) One properly completed and executed fingerprint card (to be furnished by the Government).

(d) Special requirements for colleges and universities: Colleges and universities, when Department of Defense Contractors, shall furnish to the security office of the cognizant military department the following information, in addition to that required in paragraphs (a) and (c) of this section, when clearance is required for their personnel, other than immigrant aliens, for access to Confidential:

(1) Verification of citizenship.

(2) Any information, derogatory or otherwise, available to the college or university officials or indicated in the personnel records of the college or university which will aid the military department concerned in reaching a decision as to whether a clearance should be issued. This may include the obtaining of a secrecy agreement from the individual concerned.

§ 21.20 *Contractor's clearance record.* The Contractor shall maintain a current record of his employees who have been cleared for access to classified information. The record will indicate the degree and date of clearance and whether cleared by a specific military department or the Contractor.

§ 21.21 *Employment of aliens.* No alien, or immigrant alien, employed by a contractor for furnishing or constructing aircraft, or aircraft parts or aeronautical accessories for the Government shall be permitted to have access to the unclassified plans or specifications or the work under construction or to participate in the contract trials without written consent beforehand of the Secretary of the military department concerned. Application for such consent shall be made by submission of DD Form 49, completed and executed by the alien or immigrant alien, to the security office of the cognizant military department.

SUBPART D—CONTROL OF AREAS

When, because of the nature or size of classified material, it is otherwise impractical to prevent access to it by unauthorized individuals, and storage is not provided for as required by § 21.11 (a), the Contractor shall safeguard such material by control of the area in which the material is located, provided further that the Government and the Contractor shall agree upon the extent of the control of areas at the time such parties

enter into a contract if such an agreement is necessary.

§ 21.22 *Area designations.* Industrial plants may be divided into the following areas as circumstances require:

(a) *Closed areas.* Areas that contain material classified Top Secret or Secret which may be accessible shall be designated "Closed areas" and so marked.

(b) *Restricted areas.* Areas that contain material classified Confidential which may be accessible shall be designated "Restricted areas" and so marked.

(c) *Open areas.* Areas not defined in paragraph (a) or (b) of this section, or areas containing classified material which is not accessible, shall be known as open areas.

§ 21.23 *Area control*—(a) *Closed areas.* (1) Shall be segregated or separated from adjacent areas by a physical barrier capable of preventing observation or entrance by unauthorized individuals.

(2) During working hours, admittance shall be controlled by the posting of guards at all unlocked entrances.

(3) During non-working hours, admittance shall be controlled by locked entrances and exits, and armed guards on patrols commensurate with the accessibility and size of the area.

(4) At all times, personnel assigned to the area shall challenge the presence of unauthorized individuals.

(b) *Restricted areas.* (1) Controls prescribed by paragraph (a) (1) and (4) of this section, are applicable to restricted areas.

(2) During working hours, admittance shall be controlled by Contractor authorized personnel at all unlocked entrances.

(3) During non-working hours, admittance shall be controlled by locked entrances and exits, and guards on patrols commensurate with the accessibility and size of the area.

(c) *Open areas.* Open areas containing classified material which is not accessible need not be segregated or separated. Open areas containing Top Secret or Secret material shall be protected by armed guards on patrol during non-working hours.

§ 21.24 *Supplemental control systems.* A central electrical alarm service (a service which is cleared as prescribed in Subpart F of this part, and which the operation of the electric protective signals and devices are automatically signalled to a central station which has trained guards and operators in attendance at all times, which monitors the signal end of the alarm system, which provides the response to a signal and which supervises the functions of the system), or an electrical protective system without a central alarm service (one in which the electrical protective circuits automatically signal an alarm and where supervision is maintained over the maintenance and repair of the system) may be used by the Contractor to supplement guard personnel required in § 21.23 (a), (b), and (c). The use of an electrical protective system with or without central alarm service may be authorized by the contracting officer of the military department concerned to supplant the use of guard personnel required by § 21.23 (b) and (c), where the material involved is classified Confidential. Where electrical protective systems are applied to the premises, all accessible openings thereto must be electrically protected. All material and equipment used in the system shall equal or exceed the Grade A specifications of the Underwriters' Laboratories where applicable for the purpose for which it is used, and all installations should be Type III or better in accordance with the accepted Underwriters' Laboratories standards for burglar alarm systems with the additional requirement that a signal be maintained at the control station or visible from outside the facility showing the system to be in operation and in working order after normal working hours.

§ 21.25 *Intra-plant control.* The Contractor shall maintain an adequate control of individuals on his premises by means of one or more of the following:

(a) Employee investigations.

(b) Guards.

(c) Lobby receptionists and visitor registers.

(d) Employee identification badges or cards.

SUBPART E—VISITORS

§ 21.26 *Visitor category.* For the purpose of this part, the term "visitor" includes any person admitted to the Contractor's plant where Department of Defense classified work is in progress who will have access to classified information or material exclusive of:

(a) Persons employed on the classified work by the Contractor or his subcontractors.

(b) Persons employed on classified work being performed by a subcontractor who must have access to classified work at a facility of the prime Contractor or at a facility of another subcontractor engaged in the performance of work in connection with the same prime contract, provided the prime Contractor determines that such access is necessary for the performance of the prime contract and subcontracts involved.

(c) Representatives of the Department of Defense who are directly and officially concerned in the performance of the contract.

(d) Authorized representatives of Federal Executive Departments or Agencies having internal security investigative responsibilities by statute or by Executive Directive.

(e) Authorized representatives of certain Federal Departments or Agencies which have executed and which have in effect an agreement with the Department of Defense to permit certain of their representatives designated by name to visit Department of Defense Contractors' facilities for agreed purposes. The security officer of the cognizant military department will notify management of clearance status of individuals falling within this category.

§ 21.27 *Authorization to visit.* The Contractor shall obtain the prior authorization of the security office of the cognizant military department before granting permission for any visitor to have access to classified information or to enter Closed or Restricted areas.

SUBPART F—SUBCONTRACTORS, VENDORS, AND SUPPLIERS

§ 21.28 *Determination of clearance status.* The prime Contractor shall determine from the security office of the cognizant military department whether the subcontractor, prospective subcontractor, vendor, or supplier has been granted a prescribed facility clearance prior to disclosing any classified material. If the subcontractor or prospective subcontractor, vendor, or supplier does not have a prescribed facility clearance, the prime Contractor shall request the security office of the cognizant military department to initiate appropriate clearance action.

§ 21.29 *Notification of selection.* For each classified contract, the prime Contractor, immediately upon selection of a subcontractor or subcontractors with whom he will be dealing, shall furnish in writing to the contracting officer or his duly authorized field representative the names and addresses of each of the subcontractors to be engaged on classified work under the contract concerned. Prior to the award of a subcontract involving classified information, the prime Contractor shall request the contracting officer or his duly authorized field representative administering the prime contract to furnish a Department of Defense Security Requirements Check List (DD Form 254) (if not previously furnished) which shall accompany each subcontract so awarded.

§ 21.30 *Action by subcontractor.* The subcontractor shall furnish to the security office of the cognizant military department properly executed forms necessary to process a facility clearance. The prime Contractor shall not disclose classified material to the subcontractor or prospective subcontractor, vendor, or supplier until after such subcontractor, vendor, or supplier has executed the Department of Defense Security Agreement and a facility clearance has been granted.

§ 21.31 *Return of classified information.* In case of prime Contractor-subcontractor relationship, the subcontractor will be governed in the return of classified information to the prime Contractor as provided herein, except that approval of the contracting officer concerned will be obtained prior to the prime Contractor authorizing the retention of any classified information by the subcontractor.

§ 21.32 *Application to sub-contractors.* For the purposes of this part, each subcontractor shall be considered as a prime Contractor with respect to his subcontractors.

SUBPART G—CRYPTOGRAPHIC INFORMATION

§ 21.33 *Application of part.* (a) The provisions of this part apply to research, development, and production of cryptographic equipment supplemented by special instructions to be issued by any specific contract pertaining to cryptographic equipment issued by the contracting officer concerned, notice thereof having been furnished the Contractor.

(b) Cryptographic clearances for employees and facilities will be issued by the appropriate military department under regulations concerning this subject. Denials or revocations of cryptographic clearances are not appealable.

SUBPART H—GRAPHIC ARTS

This subpart establishes the special procedures to supplement the foregoing provisions of this part and will be followed in safeguarding the production and distribution of graphic arts involving classified information.

§ 21.34 *Production Control Records.* Production Control Records shall be plainly and conspicuously marked or stamped (not typed) with the same degree of classification as the defense information being processed. Such records, unless they contain or have permanently affixed thereto classified information, will automatically be declassified after delivery of the product has been made. The Contractor may at his discretion combine the receipt system with the production record; however, when such records are combined, they must be retained for a one-year period.

§ 21.35 *Area controls, additional requirements.* The facility shall meet the over-all requirements for the proper physical safeguarding of the classified information to be entrusted to the facility. Because of the nature and size of printed matter and production procedures, certain types of activities will be subject to additional area control as follows:

(a) *Press rooms.* During the time classified information is being run on the press, the press itself shall be identified and marked as classified information of the category of the material being run and will not be declassified until the run has been completed and all classified information removed from the press. During such periods, the Contractor shall be responsible for insuring that only authorized employees engaged in operating the press are given access to the information. Management restrictions shall prohibit other employees from the immediate vicinity of the press. When this procedure for press room security is installed by the Contractor, plates, blankets, chases, etc., need not be removed from the press at close of working hours when the press run is incomplete, provided the area meets the security requirements of Subpart D of this part.

(b) *Dark rooms.* Admittance to all film processing units will be restricted to personnel appropriately cleared, who are assigned to the particular job or jobs involving classified information.

(c) *Bindery areas.* Shall be secured by the same method as press room areas.

(d) *Shipping entrances.* Will be secured at all times, loading and unloading operations will be performed under the supervision of an appropriately cleared responsible employee of the Contractor.

(e) *Proof reading areas.* Shall be controlled by physical barriers that will prevent access either visually or by sound, or entrance by unauthorized individuals.

§ 21.36 *Special production conditions*—(a) *Over-runs.* Excess quantities must be held to a minimum, an exact count of finished products must be made. Quantities in excess of the contract requirements will be destroyed in compliance with the provision of § 21.14.

(b) *Proofs.* A record shall be kept of the numbers and disposition of proofs. Galley or page proofs approved by the contracting officer shall be retained until product is delivered and will then be returned to the contracting officer.

(c) *Waste disposal.* At each production point at which waste, spoilage, trimmings, cuttings, may accumulate in the course of manufacture, the Contractor shall provide waste containers appropriately marked for the disposal of the classified material. These containers must be adequately safeguarded and the waste promptly destroyed. Waste should not be retained in production areas during non-working hours.

(d) *Return of samples.* All graphic art samples shall be returned to the contracting officer or his field representative immediately after completion of the work.

(e) *Bulk shipment.* Graphic arts products that are shipped in bulk will be stacked in the inner container face up. A cover sheet will be placed on top of the material before sealing container. The Contractor will maintain a record of the quantity in each container and when the copies are serially numbered, the Contractor shall number the inner containers and the record shall show which serial numbers were packed in each container. The classification marking shall be stamped on all outside surfaces of the inner container. Containers shall be sealed by wire stapling or by tape so that tampering would be noticed. Address labels will be placed on the top surface of both containers, and receipts will be attached to the inner container with a temporary fastener that permits removal by consignee.

§ 21.37 *Destruction, special requirements.* Material shall be destroyed in accordance with the provisions of § 21.14 by the following approved methods of destruction listed below:

Paper products	Burn or pulp.
Plastics, film, acetates, cloth	Burn.
Metals:	
Foundry type	Distribute in type case.
All other metals	Melt.
Wooden type	Distribute in type case.
Class negatives	Dissolve in emulsion.
Blankets, rubber, felt, wool	Burn.
Plaster molds	Crush beyond recognition.
Wax molds	Melt or burn.

Other materials not listed, or new materials which may be developed, shall be destroyed beyond recognition as such, and so as to prevent reconstruction.

§ 21.38 *Mailing lists*—(a) *Classified.* When a mailing list is of itself classified but the contents are not classified, the material will be automatically unclassified at the point of mailing or when separated from the list at the point of shipping. When classified mailing lists are prepared or maintained by a Contractor, all material which retains an impression of the address such as carbons, addressing plates, identification strips and verification lists will become classified.

(b) *Unclassified.* When a mail list is not of itself classified but is used for the distribution of classified matter, it will be given the same classification of the material when affixed to the containers covering classified material. The list may be declassified when removed from the container.

Approved:

JOHN A. HANNAH,
Assistant Secretary of Defense (Manpower and Personnel).

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter II—Corps of Engineers, Department of the Army

PART 203—BRIDGE REGULATIONS

TONAWANDA INNER HARBOR (LITTLE RIVER), NEW YORK

Pursuant to the provisions of section 5 of the River and Harbor Act of August 18, 1894 (28 Stat. 362; 33 U. S. C. 499), § 203.190 is hereby amended in respect to the regulations for the New York Central System bridge between Island Street, North Tonawanda, and Tonawanda Island, New York, as follows:

§ 203.190 *Navigable waters in the State of New York and their tributaries; bridges where constant attendance of draw tenders is not required.* • • •

(f) The bridges to which this section applies, and the regulations applicable in each case, are as follows:

• • • • • •

(9) Tonawanda Inner Harbor (Little River); the New York Central Railroad Company bridge between Island Street, North Tonawanda, and Tonawanda Island. From December 16 to March 31, inclusive, and between 8 p. m. and 4 a. m., eastern standard time, April 1 to December 15, inclusive, at least 24 hours' advance notice required. At all other times, the draw shall be opened promptly for the passage of any vessel unable to pass under the closed bridge.

[Regs., March 26, 1954, 823 (Little R.-Tonawanda, N. Y.-Island St.)-ENGWO] (28 Stat. 362; 33 U. S. C. 499)

[SEAL] WM. E. BERGIN,
Major General, U. S. Army,
The Adjutant General.

[F. R. Doc. 54-2844; Filed, Apr. 15, 1954; 8:47 a. m.]

PART 207—NAVIGATION REGULATIONS

WRANGELL NARROWS, ALASKA

Pursuant to the provisions of section 7 of the River and Harbor Act of August

8, 1917 (40 Stat. 266; 33 U. S. C. 1), § 207.800 is hereby amended to accomplish minor revisions to the regulations where references are made to navigational aids, as follows:

§ 207.800 *Wrangell Narrows, Alaska; use, administration, and navigation.*

• • •

(d) *Tow Channel.* (1) The following route shall be taken by all tows passing through Wrangell Narrows when the towboat has a draft of nine feet or less (northbound, read down; southbound, read up):

East of Battery Islets:
East of Tow Channel Buoy 1 TC.
East of Tow Channel Buoy 3 TC.
West of Tow Channel Buoy 4 TC.
East of Colorado Reef:
East of Wrangell Narrows Channel Light 21.
West of Wrangell Narrows Channel Lighted Buoy 23.
East of Tow Channel Buoy 5 TC.
East of Tow Channel Buoy 7 TC.
West of Petersburg:
East of Wrangell Narrows Channel Light 56 FR.
East of Wrangell Narrows Channel Light 56 Qk FR.
East of Wrangell Narrows Channel Light 58 FR., thence proceeding to west side of channel and leaving Wrangell Narrows by making passage between Wrangell Narrows Channel Daybeacon 61 and Wrangle Narrows North Entrance Lighted Bell Buoy 63 F.

• • • • •

[Regs., March 23, 1954, 800 211 (Wrangell Narrows, Alaska)–ENGWO] (40 Stat. 266; 33 U. S. C. 1)

[SEAL] WM. E. BERGIN,
Major General, U. S. Army.,
The Adjutant General.

TITLE 39—POSTAL SERVICE

Chapter I—Post Office Department

PART 58—REGISTRATION OF DOMESTIC MAIL MATTER

SURCHARGES FOR OVER-VALUE REGISTERED MAIL OR INSURED MAIL TREATED AS REGISTERED MAIL

Pursuant to Post Office Department Order No. 55593, dated April, 5, 1954, issued under authority of section 12 (a) (1) of the act of October 30, 1951 (65 Stat. 676; 39 U. S. C. 246f), paragraph (b) of § 58.3 *Registry fees and limits of indemnity*, 39 CFR 58.3 (b), is hereby amended to read as follows:

(b) *Surcharges for over-value registered mail or insured mail treated as registered mail.* (1) When the declared value exceeds the maximum indemnity provided by the fee by $1,000 or more and up to but not exceeding $1,000,000, there shall be charged additional fees (surcharges) for each $1,000 or part of $1,000 on articles addressed for delivery to points within the several postal zones, as follows: For local delivery or for delivery within the first zone, 12 cents; for delivery within the second zone, 14 cents; for delivery within the third zone, 16 cents; for delivery within the fourth zone, 17 cents; for delivery within the fifth or sixth zones, 18 cents; for delivery within the seventh or eighth zones, 19 cents.

(2) When the declared value exceeds the maximum indemnity covered by the fee by more than $1,000,000, the surcharge rates shall be as follows:

SURCHARGE RATES FOR REGISTERED MAIL AND INSURED MAIL TREATED AS REGISTERED MAIL VALUED IN EXCESS OF 1,000,000

Over—	To—	Local and first zone	Second zone	Third zone	Fourth zone	Fifth and sixth zones	Seventh and eighth zone
$1,000,000	$2,000,000	$170	$210	$290	$290	$320	$360
$2,000,000	$3,000,000	225	285	355	410	460	525
$3,000,000	$4,000,000	280	360	455	530	600	690
$4,000,000	$5,000,000	330	430	545	635	725	830
$5,000,000	$6,000,000	380	500	635	740	850	1,010
$6,000,000	$7,000,000	425	565	725	850	965	1,160
$7,000,000	$8,000,000	465	625	810	960	1,115	1,315
$8,000,000	$9,000,000	500	685	895	1,065	1,235	1,465
$9,000,000	$10,000,000	540	735	975	1,165	1,355	1,610
$10,000,000	$11,000,000	570	790	1,065	1,265	1,475	1,760
$11,000,000	$12,000,000	610	840	1,135	1,365	1,590	1,890
$12,000,000	$13,000,000	645	885	1,205	1,460	1,710	2,025
$13,000,000	$14,000,000	680	930	1,280	1,560	1,820	2,160
$14,000,000	$15,000,000	710	970	1,350	1,650	1,930	2,290

(3) When the declared value exceeds $15,000,000, rates may be applied to such shipments, not less than the maximum zone rates specified in the preceding schedule, based on considerations of weight, space, and value of the shipments.

(R. S. 161, 396, secs. 304, 309, 42 Stat. 24, 25, sec. 3, 45 Stat. 469, as amended; 5 U. S. C. 22, 369, 39 U. S. C. 381a)

The foregoing regulation shall become effective May 1, 1954.

[SEAL] ABE MCGREGOR GOFF,
Solicitor.

TITLE 45—PUBLIC WELFARE

Chapter I—Office of Education, Department of Health, Education, and Welfare

PART 107—FEDERAL ASSISTANCE IN THE CONSTRUCTION OF MINIMUM SCHOOL FACILITIES IN AREAS AFFECTED BY FEDERAL ACTIVITIES

DETERMINATION MADE FOR FISCAL YEAR 1955 OF INSUFFICIENCY OF AVAILABLE FUNDS; FINAL DATE FOR FILING APPLICATIONS

Subpart B of Part 107, 45 CFR (18 F. R. 6708) issued pursuant to Public Law 815, 81st Congress, as amended (64 Stat. 967, as amended by 67 Stat. 522) is amended by adding sections making determination of insufficiency of available funds for fiscal year 1955 for title III of said law and establishing a final date for filing of applications under title III. The new sections read as follows:

§ 107.25 *Determination made for fiscal year 1955 of insufficiency of available funds under title III.* The Commissioner has determined that funds which may be available in fiscal year 1955 (including any funds available in fiscal year 1954 which may not be needed for payments on applications filed on or before November 24, 1953) may not be sufficient to pay in full the amounts which all applicants filing complete applications under title III may be entitled to receive under title III, and this part.

§ 107.26 *Final date for filing applications under title III.* Pursuant to section 303 of title III and § 107.2 (a), June 30, 1954, is fixed as the date on or before which all complete applications for payments to which applicants may be entitled under title III from funds then available for fiscal year 1955 (including any funds available in fiscal year 1954 which may not be needed for payments on applications filed on or before November 24, 1953) or which may be made available shall be filed. Complete applications heretofore filed in compliance with this part shall be considered as filed for purposes of this section. Such complete applications may be modified or amended on or before June 30, 1954.

(Sec. 208, 64 Stat. 975, 67 Stat. 522; 20 U. S. C. 278)

Dated: April 6, 1954.

[SEAL] S. M. BROWNELL,
United States Commissioner of Education

Approved: April 12, 1954.

NELSON A. ROCKEFELLER,
Acting Secretary of Health, Education, and Welfare.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[Misc. 62779, 63138]

ALASKA

PARTIALLY REVOKING DEPARTMENTAL ORDER OF JANUARY 24, 1938, WITHDRAWING PUBLIC LANDS FOR SCHOOL SITES

APRIL 12, 1954.

Upon the recommendation of the Bureau of Indian Affairs, and in accordance with Departmental Order No. 2583, sec. 2.22 (a) of August 16, 1950, it is ordered as follows:

The order of the Assistant Secretary of the Interior of January 24, 1938, reserving certain public lands in Alaska as school sites for the benefit of the natives of Alaska pending survey, is hereby revoked so far as it affects lands in the following-described areas:

Attu (East of Greenwich): Longitude 172°-50' E., latitude 53° N.;
Colville (East of Barrow):
Kwiguk (at mouth of the Yukon).

The order reserved not to exceed forty acres at each site.

The lands at Attu were withdrawn by Executive Order No. 1733 of March 3, 1912, as a part of the Aleutian Islands National Wildlife Refuge.

The lands in the Colville area are included in the withdrawal made by Public Land Order No. 82 of January 22, 1943, for use in conection with the prosecution of the war.

At 10:00 a. m. on the 35th day after the date of this order, the public lands in the Kwiguk area released by this order shall, subject to valid existing rights and the provisions of existing withdrawals, be opened to settlement under the homestead laws and the homesite act of May 26, 1934 (48 Stat. 809; 48 U. S. C. 461) only, and to those forms of appropriation only by qualified veterans of World War II for whose services recognition is granted by the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended, and by other qualified persons entitled to preference under the said act. Commencing at 10:00 a. m. on the 126th day after the date of this order, any of such lands not settled upon by veterans or other persons entitled to credit for service shall become subject to settlement and other forms of appropriation by the public generally in accordance with the appropriate laws and regulations.

Applications for these lands, which shall be filed in the Land Office, Fairbanks, Alaska, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations to the extent that such regulations are applicable. Applications under the homesite or homestead laws shall be governed by the regulations contained in Part 64 to 66, inclusive, of Title 43 of the Code of Federal Regulations.

Inquiries concerning the lands shall be addressed to the Manager, Land Office, Bureau of Land Management, Fairbanks, Alaska.

EARL G. HARRINGTON,
Acting Assistant Director.

[F. R. Doc. 54-2833; Filed, Apr. 15, 1954; 8:45 a. m.]

Geological Survey

[Power Site Cancellation 102]

WIND RIVER, WASHINGTON

POWER SITE CLASSIFICATION NO. 156

Pursuant to authority vested in me by the act of March 3, 1879 (20 Stat. 394; 43 U. S. C. 31), and by Departmental Order No. 2333 of June 10, 1947 (43 CFR 4.623; 12 F. R. 4025), Power Site Classification No. 156, approved December 4, 1926, is hereby canceled in so far and to the extent that it affects the following described lands:

WILLAMETTE MERIDIAN, WASHINGTON

T. 4 N., R. 7 E., unsurveyed, in sec. 5, beginning at the quarter corner common to this section and section 32, T. 5 N., R. 7 E., from which a concrete post set in 6 in. stovepipe marked REF 1 on top, on west bank of Tyee Creek and west of Wind River highway near bridge across said creek, a corner of the original fish-cultural station, bears S. 14°45' W., 12.77 chains.

From said beginning point, by metes and bounds, East 10 chains, South 25 chains, West 40 chains, North 25 chains, East 30 chains to place of beginning, containing 100 acres.

T. 5 N., R. 7 E., unsurveyed, in sec. 32, beginning at the quarter corner common to this section and section 5, T. 4 N., R. 7 E., as described above.

From said beginning point, by metes and bounds, West 30 chains, North 30 chains, East 40 chains, South 30 chains, West 10 chains to place of beginning, containing 120 acres.

The two above-described areas aggregate 220 acres, more or less.

Dated April 5, 1954.

THOMAS B. NOLAN
Acting Director.

DEPARTMENT OF COMMERCE

Bureau of Foreign Commerce

[Case 176]

GONDRAND BROTHERS, INC., ET AL.

ORDER DENYING EXPORT PRIVILEGES

In the matter of: Gondrand Brothers, Inc., Harold S. Unger and Robert J. Winter, all of 33 Broadway, New York 6, New York, Respondents; Case No. 176

The respondents, Gondrand Brothers, Inc., Harold S. Unger and Robert J. Winter, having been charged by the Director, Investigation Staff, Office of International Trade (now the Bureau of Foreign Commerce), of the Department of Commerce, with having violated the Export Control Act of 1949, as amended, and regulations promulgated thereunder, and having been duly served with the charging letter, appeared herein by attorneys and demanded an oral hearing, which hearing has been duly held, after notice, before a Compliance Commissioner, to whom all the evidence in support of the charges and in opposition thereto has been presented.

The Compliance Commissioner has submitted to me for consideration his report and recommendations together with a transcript of the testimony given at the hearing, all exhibits submitted thereat and the charging letter.

Now, upon consideration of all the facts in this case, after reviewing the entire record and the report and recommendations of the Compliance Commissioner, I hereby make the following:

Findings of fact. 1. At all times hereinafter mentioned, Gondrand Brothers, Inc. was and now is a corporation engaged in the business of forwarding goods for export, servicing exports and financing exports, at 33 Broadway, New York 6, New York, and in other cities in the United States; that Harold S. Unger was and is in charge of that portion of its business relating to exports to Brazil; and that Robert J. Winter was and is an employee under and assisting Unger in his duties on behalf of Gondrand Brothers, Inc. The said corporation and the individuals are hereinafter referred to as respondents.

2. That on and prior to March 17, 1952, respondents knew that a firm in New York, hereinafter referred to as "Exporter" had made a contract with a firm in Brazil, hereinafter referred to as "Purchaser", wherein and whereby Exporter had agreed to sell and Purchaser had agreed to buy twelve tons of Type 302 stainless steel sheets, which sheets were nickel bearing, in scarce supply and for which Exporter was unable to obtain an export license.

3. That on and prior to March 17, 1952, respondents knew that Exporter had applied for and obtained from the Office of International Trade, now the Bureau of Foreign Commerce, an export license pursuant to which Exporter was licensed to ship to Purchaser 200,000 pounds of Type 430 stainless steel sheets, said Type 430 being non-nickel bearing, and in more plentiful supply than Type 302.

4. Purchaser hired Gondrand Brothers, Inc. to supervise completion of this contract on its behalf in the United States.

5. In pursuance of its employment by Purchaser, and for the purpose of enabling Exporter to export from the United States to Purchaser in Brazil, Type 302 stainless steel sheets which were the subject matter of the said contract and which were actually exported from the United States, respondents prepared and submitted to the Collector of Customs five shipper's export declarations in which they described the sheets being exported as "stainless steel sheets" and made no disclosure that the said sheets were Type 302 although they did certify therein that the sheets were being exported under the authority of Exporter's license which was identified by number only.

6. That further in pursuance of its employment by Purchaser, and for the purpose of having Exporter export from the United States to Purchaser in Brazil, additional Type 302 stainless steel sheets, the subject matter of the said contract, respondents Gondrand Brothers, Inc. and Unger gave delivery instructions to Exporter, paid Exporter for said steel sheets and notified Purchaser of the exportation of such additional Type 302 stainless steel sheets, with the knowledge that Type 302 stainless steel sheets were being exported without an export license authorizing such exportations.

7. That all the acts hereinabove set forth were performed by those respondents found to have performed them, with knowledge that Type 302 steel sheets were being exported and for the purpose of having them exported, even though such respondents knew that Exporter did not have a license for such exportation.

From the foregoing, I conclude (a) that respondents knowingly made false certifications and concealed material facts regarding the stainless steel sheets so exported in violation of § 381.1 (b) (1), of the export control regulations (15 CFR Part 381); (b) that they caused the exportation of Type 302 stainless steel sheets for which no validated license had been issued and for which no general license had been established in violation of § 370.2 and of § 372.1 (c), of the export control regulations (15 CFR Parts 370, 372); (c) that respondents Gondrand Brothers, Inc. and Unger knowingly participated in an exportation in a manner contrary to the ethical standards set forth in § 384.2 (a) (1) (v), of the export control regulations (15 CFR Part 384).

The Compliance Commissioner, in making his recommendation as hereinafter embodied in this order and otherwise, has taken into consideration the nature of the violations found, the manner in which the violations came to be committed, the actions of the individual respondents herein, their relative responsibility, the financial situation of the corporate respondent, the nature of its business, the manner in which its affairs had been handled under a previous management, the steps taken to avert and prevent future violations, the effect which any suspension imposed herein may have upon non-related persons and firms for whom such respondent is engaged in a servicing capacity and other factors. So that innocent customers of the corporate respondent may have the opportunity to make other arrangements, he has also recommended that the order as to it become effective the third Monday following the date thereof. It is my conclusion, upon the basis of the facts disclosed in the record and after giving due consideration to such recommendation, which includes remedial action in addition to that hereinafter provided, that the terms of the recommended orders are reasonable, necessary and proper to achieve effective enforcement of the law and they are accordingly adopted.

Now, therefore, it is ordered:

I. Effective 12:01 a. m., May 3, 1954, and terminating 12 o'clock, midnight, May 22, 1954, respondent Gondrand Brothers, Inc., its agents, servants and employees be, and they hereby are suspended, denied and declared ineligible from, and to exercise any privileges of, participation directly or indirectly in any manner or capacity in the exportation of any commodity from the United States to any foreign destination, excluding Canada. Without limitation of the generality of the foregoing denial of export privileges, participation in an exportation is deemed to include and prohibit respondents' participation, directly or indirectly in any manner or capacity, (a) as a party or as a representative of a party to any validated export license application, (b) in the obtaining or using of any validated or general export license or other export control documents, (c) in the receiving, ordering, buying, selling, using, or disposing in any foreign country of any commodities in whole or in part exported or to be exported from the United States, and (d) in storing, financing, forwarding, transporting, or other servicing of such exports from the United States.

II. Respondent Unger, for a period of six (6) months commencing May 3, 1954, and respondent Winter, for a period of two (2) months commencing May 3, 1954, and any person acting in their behalf or for their account be and they hereby are suspended, denied and declared ineligible from, and to exercise any privileges of, participation directly or indirectly in any manner or capacity in the exportation of any commodity from the United States to any foreign destination, excluding Canada. Without limitation of the generality of the foregoing denial of export privileges, participation in an exportation is deemed to include and prohibit respondents' participation, directly or indirectly in any manner or capacity, (a) as a party or as a representative of a party to any validated export license application, (b) in the obtaining or using of any validated or general export license or other export control documents, (c) in the receiving, ordering, buying, selling, using, or disposing in any foreign country of any commodities in whole or in part exported or to be exported from the United States, and (d) in storing, financing, forwarding, transporting, or other servicing of such exports from the United States.

III. Such denial of export privileges shall extend not only to the persons and company mentioned in and within the scope of Parts I and II hereof, but also to any person, firm, corporation, or business organization with which such persons and company may be now or hereafter related by ownership, control, position of responsibility, or other connection in the conduct of trade involving exports from the United States or services connected therewith; but nothing in this part contained shall be deemed to limit or prevent the owners of stock in Condrand Brothers, Inc. or any firms or business enterprises affiliated with them or in which they have an interest, provided they do no business in and are not engaged in business in the United States, from receiving, forwarding or transporting in countries other

than the United States, goods or commodities which have been exported from the United States, provided that any and all such activities are in conformance with all regulations, laws and restrictions otherwise applicable to or related to such exportations.

IV. No person, firm, corporation, or other business organization shall, without prior disclosure to, and specific authorization from, the Bureau of Foreign Commerce, directly or indirectly in any manner or capacity, (a) apply for, obtain, or use any license, shipper's export declaration, bill of lading, or other export control document relating to any exportation of commodities from the United States, or (b) order, receive, buy, use, dispose of, finance, transport, forward, or otherwise service or participate in, any exportation from the United States, or in a reexportation of any commodity exported from the United States, with respect to which any of the persons or company within the scope of Parts I and II hereof have any interest of any kind or nature, direct or indirect.

Dated: April 12, 1954.

JOHN C. BORTON,
Director,
Office of Export Supply.

FEDERAL TRADE COMMISSION

[File No. 21-463]

DIAMOND INDUSTRY

NOTICE OF HOLDING OF TRADE PRACTICE CONFERENCE

Notice is hereby given that a trade practice conference for the Diamond Industry will be held by the Federal Trade Commission in the Biltmore Hotel, New York City, on May 6, 1954, commencing at 10 a. m., e. d. t.

All persons, firms, and corporations engaged in importing, cutting, mounting, distributing or marketing loose diamonds (other than industrial), or jewelry or other products set with diamonds, are cordially invited to attend and participate in this industry conference.

The purpose of the conference is to afford industry members an opportunity to consider and propose for establishment, subject to the Commission's approval, rules designed to eliminate and prevent unfair methods of competition, unfair or deceptive acts or practices, and other trade abuses which violate laws administered by the Commission, and rules directed to the effective maintenance of ethical competitive standards for the protection of both the industry and the public.

After the May 6th conference, and before any rules are finally approved by the Commission, a draft of proposed rules in the form deemed appropriate will be made available to all interested and affected parties, including consumers, upon public notice affording them opportunity to present their views, criticisms, and suggestions respecting the rules, and to be heard at a public hearing.

Issued: April 13, 1954.

By direction of the Commission.

TEXAS EASTERN TRANSMISSION CORP.

NOTICE OF APPLICATION

APRIL 12, 1954.

Take notice that on March 22, 1954, Texas Eastern Transmission Corporation (Texas Eastern), a Delaware corporation having its principal place of business at Shreveport, Louisiana, filed an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing it to sell and deliver additional volumes of natural gas under its SGS-B Rate Schedule to Consumers Gas Company, the Village of Norris City, Illinois, and the Town of Fulton, Mississippi.

The total increase in daily volumes of gas to be delivered to all three customers is 1,825 Mcf per day at 15.025 psia, which Texas Eastern states is required by such customers to enable them to meet increased market requirements or to replace other sources of gas supply. No new construction will be required.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 3d day of May 1954. The application is on file with the Commission and available for public inspection.

SECURITIES AND EXCHANGE COMMISSION

[File Nos. 7-1601—7-1608]

AMERICAN OPTICAL CO. ET AL.

NOTICE OF APPLICATION FOR UNLISTED TRADING PRIVILEGES, AND OF OPPORTUNITY FOR HEARING

APRIL 9, 1954.

In the matter of applications by the Boston Stock Exchange for unlisted trading privileges in American Optical Company, Common Stock, No Par Value, 7-1601; Crown Zellerbach Corporation, Common Stock, $5 Par Value, 7-1602; Public Service Company of Indiana, Inc., Common Stock, No Par Value, 7-1603; Duquesne Light Company, Common Stock, $10 Par Value, 7-1604; Atlantic Coast Line Railroad Company, Common Stock, No Par Value, 7-1605; The Budd Company, Common Stock, No Par Value, 7-1606; General Telephone Corporation, Common Stock, $20 Par Value, 7-1607; United Air Lines, Inc., Common Stock, $10 Par Value, 7-1608.

The Boston Stock Exchange, pursuant to section 12 (f) (2) of the Securities Exchange Act of 1934 and Rule X-12F-1 thereunder, has made application to extend unlisted trading privileges to each of the above-mentioned securities, each of which is registered and listed on the New York Stock Exchange.

Rule X-12F-1 provides that the applicant shall furnish a copy of each application to the issuer and to every exchange on which the security is listed or already admitted to unlisted trading privileges. Each application is available for public inspection at the Commission's principal office in Washington, D. C.

Notice is hereby given that, upon request of any interested person received prior to April 26, 1954, the Commission will set the matter down for hearing. In addition, any interested person may submit his views or any additional facts bearing on these applications by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing, these applications will be determined by order of the Commission on the basis of the facts stated in the applications, and other information contained in the official files of the Commission.

By the Commission.

[File Nos. 54-75, 54-161, 59-8, 59-20]

COMMONWEALTH & SOUTHERN CORP. (DELAWARE) ET AL.

SUPPLEMENTAL ORDER WITH RESPECT TO FEE AND EXPENSES

APRIL 12, 1954.

In the matter of The Commonwealth & Southern Corporation (Delaware), File No. 54-161; The Commonwealth & Southern Corporation (Delaware), respondent, File No. 59-20; The Commonwealth & Southern Corporation (Delaware), and its subsidiary companies, respondents, File No. 59-8; The Commonwealth & Southern Corporation (Delaware), File No. 54-75.

The Commission by its order dated November 22, 1948, having approved a plan filed under section 11 (e) of the Public Utility Holding Company Act of 1935 by The Commonwealth & Southern Corporation, a registered holding company, for its liquidation and dissolution; and

Said order having reserved jurisdiction over the determination of the reasonableness and appropriate allocation of all fees and expenses and other remuneration incurred in connection with said plan and the transactions incident thereto; and

Applications for allowances for fees and reimbursement of expenses having been filed, a public hearing with respect to such applications having been held, and the Division of Public Utilities of the Commission having issued a recommended findings and opinion; and

The Commission having issued its memorandum opinion and order dated December 28, 1951 (Holding Company Act Release No. 10986) and supplemental order dated January 23, 1952 (Holding Company Act Release No. 11021), and its memorandum findings and opinion and supplemental order dated August 11, 1952 (Holding Company Act Release No. 11430), releasing jurisdiction with respect to the payment of certain fees and expenses; and

An application having been filed by Clark, Carr & Ellis requesting that the Commission approve and allow a fee of $14,000 and reimbursement of expenses of $545.33 heretofore paid to them by The Commonwealth & Southern Corporation and The Southern Company on account of legal services rendered to the said companies in connection with the proceedings upon the applications for allowances of fees and reimbursement of expenses herein; and

The Commission having considered the said application of Clark, Carr & Ellis, and having found that the aforesaid fee and reimbursement of expenses are not unreasonable, and deeming it

appropriate that they should be approved and allowed, and that the jurisdiction heretofore reserved with respect thereto should be released:

It is ordered, That the fee of $14,000 and reimbursement of expenses of $545.33 heretofore paid to Clark, Carr & Ellis be, and they hereby are, approved and allowed, and that the jurisdiction heretofore reserved with respect thereto be, and hereby is, released.

By the Commission.

[File No. 70-2647]

ELECTRIC ENERGY, INC., ET AL.

SUPPLEMENTAL ORDER RELEASING JURISDICTION OVER CERTAIN FEES AND EXPENSES

APRIL 12, 1954.

In the matter of Electric Energy, Inc., Middle South Utilities, Inc., Union Electric Company of Missouri, File No. 70-2647.

Middle South Utilities, Inc., ("Middle South"), a registered holding company, Union Electric Company of Missouri ("Union Electric"), a registered holding company and a public utility company, and Electric Energy, Inc., ("Electric Energy"), a public utility subsidiary of Middle South and Union Electric, having filed a joint application-declaration and amendments thereto, pursuant to sections 6, 7 and 12 of the Public Utility Holding Company Act of 1935 ("act") regarding (i) the issuance and sale by Electric Energy to two insurance companies of a maximum of $100,000,000 principal amount of 3 percent First Mortgage Sinking Fund Bonds, due December 1, 1979, and (ii) the execution by all the applicants-declarants of certain contracts; and

The Commission having by order dated June 26, 1951, granted the amended application and permitted the amended declaration to become effective, subject to a reservation of jurisdiction over all fees and expenses to be incurred in connection with the proposed transactions; and

The Commission having by a further order dated July 21, 1952, released jurisdiction with respect to certain estimated fees and expenses as specified in said order; and

Willkie Owen Farr Gallagher & Walton as special counsel to the purchasers of the bonds, having advised the Commission that in addition to the fees and expenses it received for its services in connection with the issuance and sale of the bonds including such services in connection with the initial closing for the bonds, it has also received $12,300 for its services in connection with fourteen secondary closings for these bonds, plus expenses of $295.57; and

The Commission having examined the record as so completed and it appearing to the Commission that the additional fees and expenses of Willkie Owen Farr Gallagher & Walton are not unreasonable and it appearing appropriate to the Commission that the jurisdiction heretofore reserved with respect to such fees and expenses be released:

It is ordered, That the jurisdiction heretofore reserved with respect to said fees and expenses herein be, and the same hereby is, released.

By the Commission.

[File No. 70-3215]

GENERAL PUBLIC UTILITIES CORP.

ORDER REGARDING CAPITAL CONTRIBUTION BY PARENT TO SUBSIDIARY

APRIL 12, 1954.

General Public Utilities Corporation ("GPU"), a registered holding company, having filed with this Commission a declaration pursuant to section 12 of the Public Utility Holding Company Act of 1935 ("act") and Rule U-45 thereunder with respect to proposed transactions, which are summarized as follows:

GPU proposes to make cash capital contributions in the aggregate amount of $350,000 to its public utility subsidiary, Northern Pennsylvania Power Company ("North Penn"). Each such contribution will, upon receipt by North Penn, be credited to the stated capital applicable to its Common Stock. Such capital contributions will be made by GPU from time to time, but not later than December 31, 1954, as North Penn requires funds for construction purposes or to reimburse its treasury for expenditures therefrom for construction purposes or to repay bank loans utilized for such purposes. Thus GPU will, by these cash capital contributions, assist North Penn with its construction program which is designed to insure that North Penn will continue to be in a position to meet the demands of its consuming public.

It is requested that the Commission's order be expedited and made effective forthwith upon issuance and it is stated that no state or Federal Commission other than this Commission has jurisdiction over the proposed transactions. It is estimated that expenses in connection with the transactions will not exceed $300.

Due notice having been given of the filing of said declaration, and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and in the interest of investors and consumers that said declaration as amended be permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that said declaration as amended be, and it hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[F. R. Doc. 54-2877; Filed, Apr. 15, 1954; 8:53 a. m.]

[File No. 70-3230]

COLUMBIA GAS SYSTEM, INC., AND CUMBERLAND AND ALLEGHENY GAS CO.

NOTICE OF FILING OF APPLICATION-DECLARATION REGARDING ISSUANCE AND SALE OF COMMON STOCK AND INSTALLMENT NOTES BY SUBSIDIARY AND ACQUISITION THEREOF BY PARENT

APRIL 12, 1954.

Notice is hereby given that The Columbia Gas System, Inc. ("Columbia"), a registered holding company, and one of its wholly-owned subsidiary companies, Cumberland and Allegheny Gas Company ("Cumberland"), have filed a joint application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("act"), designating sections 6 (b), 9 and 10 of the act and Rule U-50 (a) (3) as applicable to the proposed transactions which are summarized as follows:

Cumberland proposes to issue and sell to Columbia at par, 4,000 shares of common stock, $25 par value.

Cumberland also proposes to issue and sell to Columbia $600,000 principal amount of __ percent Installment Promissory Notes at a price equivalent to the principal amount of such notes. The notes are to be registered and will be payable in equal installments on February 15 of each of the years 1956 to 1980 inclusive. Interest on the unpaid principal amount of the notes is to be payable semi-annually on February 15 and August 15 at the rate of 4 percent per annum or such lower rate, being a multiple of ⅛ of 1 percent, as shall be not less than the "cost of money" to Columbia in respect of its next sale of Senior Debentures. It is Columbia's present intention to sell Senior Debentures later this year and during the interim period the proposed installment notes will carry interest at the rate of 4 percent per annum subject, however, to an adjustment in the rate following the sale of Senior Debentures.

It is anticipated that Cumberland will first issue and sell its common stock when and as funds are required by it up to a maximum amount of $100,000 and thereafter Cumberland will sell its installment notes to Columbia up to a maximum amount of $600,000. However, none of the common stock or installment notes will be sold or purchased subsequent to March 31, 1955.

According to the filing, the financing is for the purpose of supplying Cumberland with funds required to complete its 1954 construction program involving estimated expenditures of $1,546,600 for gas wells, transmission and distribution lines, and other facilities.

The estimated fees and expenses aggregate $1,220.

Cumberland has applied to the Public Service Commission of West Virginia for approval of the proposed issuance and sale of common stock and notes.

Notice is further given that any interested person may, not later than April 26, 1954, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said filing which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after April 26, 1954, said joint application-declaration, as filed or as amended, may be granted and permitted to become effective, as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

By the Commission.

UNITED STATES TARIFF COMMISSION

[Investigation 35]

WOOL GLOVES AND MITTENS AND WOOL GLOVE LININGS

INVESTIGATION INSTITUTED

Investigation instituted. Upon application of the American Knit Handwear Association, Inc., Gloversville, New York, received March 29, 1954, the United States Tariff Commission, on the 12th day of April 1954, under the authority of section 7 of the Trade Agreements Extension Act of 1951, as amended, and section 332 of the Tariff Act of 1930, instituted an investigation to determine whether the products described below, or any of them, are, as a result in whole or in part of the duty or other customs treatment reflecting concessions granted thereon under the General Agreement on Tariffs and Trade, being imported into the United States in such increased quantities, either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products.

Tariff Act of 1930 Par. No.	*Description*
1114 (b)	Gloves and mittens, finished or unfinished, wholly or in chief value of wool, valued over $1.75 per dozen pairs.
1114 (d)	Glove and mitten linings, knit or crocheted, finished or unfinished, wholly or in chief value of wool, valued over $2 per pound.
1529 (a)	Gloves and mittens, wholly or in chief value of wool, classifiable under paragraph 1529 (a), Tariff Act of 1930, at current rates of duty lower than 90 percent ad valorem.

Inspection of application. The application filed in this case is available for public inspection at the office of the Secretary, United States Tariff Commission, Eighth and E Streets NW., Washington, D. C., and in the New York office of the Tariff Commission, located in Room 437 of the Custom House, where it may be read and copied by persons interested.

I certify that the above investigation was instituted by the United States Tariff Commission on the 12th day of April 1954.

Issued: April 13, 1954.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 29119]

COAL, SLACK, FROM MINES IN CLINTON, MO., GROUP TO MISSOURI CITY, MO.

APPLICATION FOR RELIEF

APRIL 13, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for Missouri-Kansas-Texas Railroad Company and Wabash Railroad Company.

Commodities involved: Coal, slack, or finely crushed that has passed or will pass through screen with round openings one and one-quarter (1¼) inches in diameter, carloads.

From: Mines in Missouri in Clinton, Mo., group.

To: Missouri City, Mo.

Grounds for relief: Rail competition, circuity, and to meet intrastate rates.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3920, supp. 76.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

CRUDE COAL, PETROLEUM OR WATER GAS TAR FROM ALABAMA AND TENNESSEE TO HAMMOND AND OLIVER, LA.

APPLICATION FOR RELIEF

APRIL 13, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedules listed below.

Commodities involved: Crude coal, petroleum or water gas tar, in tankcar loads.

From: Points in Alabama and Tennessee and points grouped therewith.

To: Hammond and Oliver, La.

Grounds for relief: Rail competition, circuity, to apply rates constructed on the basis of the short line distance formula and additional destinations.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 710, supp. 290 C. A. Spaninger, Agent I. C. C. No. 717, supp. 303.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

MERCHANDISE FROM TENNESSEE AND GEORGIA TO CHICAGO, ILL., ST. LOUIS, MO., AND EAST ST. LOUIS, ILL.

APPLICATION FOR RELIEF

APRIL 13, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent for carriers parties to schedule listed below.

Commodities involved: Merchandise, in mixed carloads.

From: Chattanooga, North Chattanooga, Tenn., and Savannah, Ga.

To: Chicago, Ill., and points grouped therewith, St. Louis, Mo., and East St. Louis, Ill.

Grounds for relief: Competition with rail carriers, and circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1305, supp. 43.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. [No. 31437]

EASTERN BITUMINOUS COAL ASSOCIATION ET AL. V. BALTIMORE AND OHIO RAILROAD CO., ET AL.

IMPLEMENTING PREVIOUSLY PRESCRIBED SPECIAL RULES OF PROCEDURE

It appearing that by order of March 12, 1954 (19 F. R. 1559) special rules were prescribed, directing, among other things, the prehearing interchange of prepared material;

And it further appearing that upon consideration of the record, and good cause appearing therefor:

It is ordered, That the special rules entered herein by order of March 12, 1954 (19 F. R. 1559), be, and they are hereby, amended by the addition thereto of the following rule:

12. *Written objections.* So far as practicable, any objection to the admissability of prepared testimony or exhibits, which shall have been interchanged pursuant to rule 1 hereof, and any reply to such objection, shall be presented in the form of a written statement (which need not be verified), clearly and specifically identifying the testimony or exhibit, or portions thereof, to which objection is taken, and stating the basis for such objection. Such statement shall be mailed to affiant or witness sponsoring such testimony or exhibit, or to his counsel, not later than 2 weeks prior to, and any reply thereto shall be mailed not later than 1 week prior to, the date of hearing at which the material is to be tendered in evidence. Two copies of each such statement, and of any reply thereto, shall be mailed concurrently to the Examiner. Any objection made pursuant to this rule must formally be renewed upon the record at the appropriate hearing.

It is further ordered, That except as herein modified the said order of March 12, 1954, shall remain in full force and effect:

And it is further ordered, That in addition to service hereof upon all parties of record, a copy hereof also shall be filed with the Director, Division of the Federal Register, Washington, D. C.

Dated at Washington, D. C., this 8th day of April A. D. 1954.

By the Commission.

PLASTER, GYPSUM WALLBOARD, AND RELATED ARTICLES FROM OR TO POINTS IN OFFICIAL TERRITORY AND BETWEEN POINTS IN NORTHERN ILLINOIS, SOUTHERN WISCONSIN, AND IOWA

APPLICATION FOR RELIEF

APRIL 13, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Agent, for carriers parties to schedule listed below.

Commodities involved: Plaster, gypsum wallboard, and related articles, carloads.

Between: Points in official territory on the one hand and points in northern Illinois and southern Wisconsin and points in Iowa on the other.

Grounds for relief: Rail competition, competition with motor carriers, to maintain grouping, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: H. R. Hinsch, Agent, I. C. C. No. 4577, supp. 7.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

rust, discoloration, birds, other disease or mechanical or other means. Cobs shall be fairly well filled with plump and milky kernels and well covered with fresh husks. The length of each cob shall be not less than 6 inches and the ears shall not be clipped. (See § 51.839.)

§ 51.836 *U. S. No. 1.* U. S. No. 1 consists of ears of green corn of similar varietal characteristics which are well trimmed, well developed, and which are free from smut and decay and free from injury caused by rust and free from damage caused by discoloration, birds, worms, other insects, other disease or mechanical or other means. Cobs shall be fairly well filled with plump and milky kernels and fairly well covered with fresh husks. Each ear may be clipped but each clipped ear shall be properly clipped. Unless otherwise specified, the length of each cob, clipped or unclipped, shall be not less than 5 inches. (See § 51.839.)

§ 51.837 *U. S. No. 2.* U. S. No. 2 consists of ears of green corn of similar varietal characteristics which are fairly well trimmed, fairly well developed and which are free from smut and decay and free from serious damage caused by birds, worms, other insects, other disease or mechanical or other means. Cobs shall not be poorly filled and kernels shall be plump and milky and fairly well covered with fresh husks. Each ear may be clipped but each clipped ear shall be properly clipped. Unless otherwise specified, the length of each cob, clipped or unclipped, shall be not less than 4 inches. (See § 51.839.)

UNCLASSIFIED

§ 51.838 *Unclassified.* Unclassified consists of ears of green corn which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no grade has been applied to the lot.

TOLERANCES

§ 51.839 *Tolerances.* (a) In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) *For defects.* 10 percent, by count, in any lot for ears of corn which fail to meet the requirements of the grade, including therein not more than 2 percent for decay; and,

(2) *For off-size.* 5 percent, by count, in any lot for ears of corn which fail to meet the requirements as to length of cob.

COUNT

§ 51.840 *Requirements as to count.* The number of ears of corn in any package may be specified by count or in terms of dozens or half dozens. Variation from the number specified shall be permitted as follows: *Provided,* That the average for the lot is not less than the number specified nor more than two ears greater than the number specified:

Specified number per package:	*Variation permitted in individual packages*
60 ears or less	3 ears under count, 5 ears over count.
More than 60 ears	4 ears under count, 6 ears over count.

APPLICATION OF TOLERANCES

§ 51.841 *Application of tolerances.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided,* That the averages for the entire lot are within the tolerances specified:

(1) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any package; and,

(2) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any package.

DEFINITIONS

§ 51.842 *Similar varietal characteristics.* "Similar varietal characteristics" means that the ears in any package have similar kernel color and character of growth. Ears of field corn and sweet corn, or white and yellow corn, shall not be mixed in the package.

§ 51.843 *Well trimmed.* "Well trimmed" means that the ears are practically free from loose husks and that the shank shall be not more than 6 inches in length and not extend more than one inch beyond the point of attachment of the outside husk.

§ 51.844 *Well developed.* "Well developed" means that the ears are fairly straight and are not stunted. Nubbins are not well developed ears.

§ 51.845 *Insect injury.* "Insect injury" means that insect frass is present, or there is visible evidence of insect injury.

§ 51.846 *Injury.* "Injury" means any defect which more than slightly affects the appearance, or the edible or shipping quality of the ear. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as injury:

(a) Rust when the aggregate area on the husk exceeds one square inch, or when the rust extends deeper than 2 layers of husks;

(b) Discoloration caused by frost or spray burn, or similar types of discoloration when affecting an aggregate area of more than 3 square inches on the husk, or when exceeding an aggregate area of 25 percent of the surface of all blades attached to the husk; and,

(c) Mechanical injury when more than 4 kernels are crushed or broken.

§ 51.847 *Fairly well filled.* "Fairly well filled" means that the rows of kernels show fairly uniform development, and that the appearance and quality of the edible portion of the ear are not materially affected by poorly developed rows. When the ear has not been clipped, not more than one-fourth of the length of the cob may have poorly developed or missing kernels at the tip. When the ear has been clipped, it shall have practically no poorly developed kernels at the tip of the cob. Missing or poorly developed kernels on other parts of the ear shall not aggregate more than one square inch on a cob 6 inches in length, and a proportionally greater area shall be permitted on a longer cob and a proportionally lesser area on a shorter cob.

§ 51.848 *Plump and milky.* "Plump and milky" means that the kernels are well developed and the contents have a milky or creamy consistency.

§ 51.849 *Well covered.* "Well covered" means that the husk enclosing the ear is tight and undisturbed, except that a slight opening may have been made at the tip: *Provided,* That the disturbed part has been properly replaced so that the appearance of the ear is not more than slightly affected.

§ 51.850 *Fresh.* "Fresh" means that the husks have fairly good green color and are not badly wilted.

§ 51.851 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the ear. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Discoloration caused by frost or spray burn, or similar types of discoloration when affecting an aggregate area of more than 5 square inches on the husk, or when exceeding an aggregate area of 50 percent of the surface of all blades attached to the husk;

(b) Worm injury on unclipped ears when extending more than 1½ inches from the tip on an ear 6 inches in length (proportionately greater or lesser amounts permitted on longer or shorter ears, respectively), or when affecting the kernels on other parts of the ear, or any worm injury on clipped ears; and,

(c) Mechanical damage when more than 8 kernels are crushed or broken.

§ 51.852 *Fairly well covered.* "Fairly well covered" means that the husk enclosing the ear is fairly tight and undisturbed except that an opening may have been made at the tip: *Provided,* That the disturbed part has been properly replaced so that the appearance of the ear is not materially affected.

§ 51.853 *Properly clipped.* "Properly clipped" means that either the end of the cob, or the end of the cob and husk have been neatly removed approximately at a right angle to the longitudinal axis.

§ 51.854 *Fairly well trimmed.* "Fairly well trimmed" means that the appearance of the individual ear of corn is not seriously affected by loose husks and that the shank shall not be more than 6 inches in length and not extend more than 2 inches beyond the point of attachment of the outside husk.

§ 51.855 *Fairly well developed.* "Fairly well developed" means that the ears are not stunted to the extent that the appearance is seriously affected.

§ 51.856 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the ear. The following defect, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Worm injury on unclipped ears when extending more than 2 inches from the tip on an ear 6 inches in length (proportionately greater or lesser amounts permitted on longer or shorter ears, respectively), or when affecting more than 4 kernels on other parts of the cob, or any worm injury on clipped ears extending more than one-fourth inch from the tip.

§ 51.857 *Poorly filled.* "Poorly filled" means, on unclipped ears, that the edible quality or appearance is affected to a greater extent than that of an ear 6 inches in length which has one-third of the cob at the tip end and an aggregate area 1½ inches square on other portions of the ear with undeveloped kernels or open spaces; and means, on clipped ears, that the edible quality or appearance is affected to a greater extent than that of an ear 6 inches in length which has one inch at the tip end and an aggregate area 1½ inches square on other portions of the ear with undeveloped kernels or open spaces.

The United States Standards for Green Corn contained in this subpart shall become effective 30 days after publication hereof in the FEDERAL REGISTER and will thereupon supersede the United States Standards for Green Corn which have been in effect since August 3, 1950. (18 F. R. 7100).

Dated: April 14, 1954.

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Navel Orange Reg. 29]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.329 *Navel Orange Regulation 29*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on April 15, 1954, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date of this section.

(b) *Order.* (1) The quantity of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., April 18, 1954, and ending at 12:01 a. m., P. s. t., April 25, 1954, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 358,050 boxes;

(iii) District 3: Unlimited movement;

(iv) District 4: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) Navel oranges handled pursuant to the provisions of this section shall be subject to any size restrictions applicable thereto which have heretofore been issued on the handling of such oranges and which are effective during the period specified herein.

(4) As used in this section, "handled," "handler," "boxes," "prorate base," "District 1," "District 2," "District 3," and "District 4" shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Done at Washington, D. C., this 16th day of April, 1954.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Lemon Reg. 533]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

§ 953.640 *Lemon Regulation 533*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 18 F. R. 6767), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on April 14, 1954, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time of this section.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., April 18, 1954, and ending at 12:01 a. m., P. s. t., April 25, 1954, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 350 carloads;

(iii) District 3: Unlimited movement.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is set forth below and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2," and "District 3," shall have the same mean-

ing as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. [illegible])

Done at Washington, D. C., this 15th day of April 1954.

PART 983—TYPE 62 SHADE-GROWN CIGAR-LEAF TOBACCO GROWN IN DESIGNATED PRODUCTION AREA OF FLORIDA AND GEORGIA

SUBPART—EXPENSES AND RATE OF ASSESSMENT

Notice was published in the March 16, 1954, daily issue of FEDERAL REGISTER (19 F. R. 1441) that consideration was being given to the proposals regarding the expenses and the fixing of the rate of assessment for the fiscal period beginning February 1, 1954, and ending January 31, 1955, inclusive, under Marketing Agreement No. 112 and Order No. 83 (7 CFR Part 983), regulating the handling of Type 62 shade-grown cigar-leaf tobacco grown in the designated area of Florida and Georgia, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.). After consideration of all relevant matters presented, including the proposals set forth in such notice which were submitted by the Control Committee (established pursuant to said marketing agreement and order), it is hereby found and determined that:

§ 983.302 *Expenses and rate of assessment for the fiscal period February 1, 1954, through January 1955*—(a) *Expenses.* Expenses in the amount of $5,300 are reasonable and are likely to be incurred by the Control Committee for its maintenance and functioning during the fiscal period beginning February 1, 1954, and ending January 31, 1955, inclusive.

(b) *Rate of assessment.* The following rate of assessment which each handler shall pay, in accordance with the applicable provisions of the said marketing agreement and order, is hereby fixed as the respective handler's pro rata share of the aforesaid expense: $1.25 per 1,000 pounds of tobacco handled by such handler as the first handler thereof during the fiscal period beginning February 1, 1954, and ending January 31, 1955, inclusive.

(c) Terms used in this section shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. 608c)

Issued at Washington, D. C., this 13th day of April 1954 to become effective 30 days after publication in the FEDERAL REGISTER.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

TITLE 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Agricultural Research Service, Department of Agriculture

Subchapter C—Interstate Transportation of Animals and Poultry

[B. A. I. Order 383, Revised, Amdt. 24]

PART 76—HOG CHOLERA, SWINE PLAGUE, AND OTHER COMMUNICABLE SWINE DISEASES

SUBPART B—VESICULAR EXANTHEMA

CHANGES IN AREAS QUARANTINED

Pursuant to the provisions of sections 1 and 3 of the act of March 3, 1905, as amended (21 U. S. C. 123, 125), sections 1 and 2 of the act of February 2, 1903, as amended (21 U. S. C. 111-113, 120), and section 7 of the act of May 29, 1884, as amended (21 U. S. C. 117), § 76.27, as amended, Subpart B, Part 76, Title 9, Code of Federal Regulations (19 F. R. 1367, 1597, 1947), which contains a notice of the areas in which swine are affected with vesicular exanthema, a contagious, infectious, and communicable disease, and which quarantines such areas because of said disease, is hereby further amended in the following respects:

1. Subdivisions (ix), (xii), (xiii), (xiv), (xv), and (xvi) of subparagraph (2) of paragraph (e), relating to Bristol County in Massachusetts, are amended to read:

(ix) That part of the Town of Rehoboth lying west of Reed Street, south of Providence Street, and north and east of Peckham Street; that part of the Town of Rehoboth lying north of Old Fall River Avenue, west of Barney Avenue, east of Wheaton Avenue, and south of Allen Avenue; and that part of the Town of Rehoboth lying north of Brook and Water Streets, south of Winter Street, east of Reed and Lake Streets, and west of School Street.

* * * * *

(xii) That part of the City of Swansea lying north of Marvel Road, south of Main Street, west of Sharp Lot Road, and east of Miller's Lane; that part of the Town of Swansea lying north of Haile's Hill Road, south of Stevens Road, west of Sharp Lot Road, and east of Box Street; and that part of the Town of Swansea lying north of Stevens Road, south of Marvel Road, east of Sharp Lot Road, and west of Park Street.

(xiii) The Myles Standish State School in the Town of Taunton lying east of State Route No. 140, south and west of Bassett Street, and north of the New York, New Haven, and Hartford Railroad; that part of the City of Taunton lying south of Norton Avenue, west of Crane Avenue, north of the New York, New Haven, and Hartford Railroad, and east of State Route No. 140; that part of the City of Taunton lying south of Thrasher Street, north of Longmeadow and Winter Streets and U. S. Route No. 44, east of School Street, and west of King Phillip Street; that part of the City of Taunton lying south of East Brittania, north of Thrasher Street, east of Washington Street, and west of King Phillip Street; that part of the City of Taunton lying south of Tremont Street, north of Glebe Street, east of Burt Street, and west of North Walker Street; and that part of the City of Taunton lying north of Spring Street, south of Cohannet Street, west of Dighton Avenue, and east of the Three Mile River.

(xiv) That part of the Town of Westport lying east of Main Road, north of Kirby Road, west of Drift Road, and south of Old County Road; that part of the Town of Westport lying north of Narrow Avenue, south of State Route No. 177 and Old County Road, east of Crandell Road, and west of Soddom Road; and that part of the Town of Westport lying north of Hix Bridge Road, south of Old County Road, east of Drift Road, and west of the Westport River.

(xv) That part of the Town of Attleboro lying north of Brown Street, south of Highland Avenue, west of Robinson Avenue, and east of Mendon Street; that part of the Town of Attleboro lying north of Highland Avenue, south of May Street, east of Mendon Street, and west of Washington Street; that part of the Town of Attleboro lying south of Payne Road, west of the New York, New Haven, and Hartford Railroad, east of Mendon Road, and North of Hunts Bridge Road; and that part of the Town of Attleboro lying north of Oak Hill Avenue, south of South Main Street, east of Locust Street, and west of Park Street.

(xvi) That part of the Town of Seekonk lying north of Asylum Street, south of County Street, west of Miller Street, and west of Bradley Street; and that part of the Town of Seekonk lying north of Ledge Road, south of Newman and Woodward Avenues, west of Bunnins River, and east of Arcade Avenue.

2. Subdivisions (vii), (ix), and (xv) of subparagraph (3) of paragraph (e), relating to Essex County in Massachusetts, are amended to read:

(vii) That part of the City of Gloucester lying north of State Route No. 121, south of Walker Street, and west of Lincoln Street; that part of the City of Gloucester lying southwest of Witham Street, north of Thatcher Street, and east of Eastern Street; and that part of the City of Gloucester lying south of State Route No. 121 and west of Woodman Street.

* * * * *

(ix) That part of the City of Haverhill lying north of State Route No. 125, south and east of the Boston and Maine Railroad and the Merrimac River, and east of Main Street; that part of the City of Haverhill lying northeast of County Bridge Road and State Route No. 110; that part of the City of Haverhill lying west of the Boston and Maine Railroad, east of Hilldale Avenue, and north of State Route No. 97; that part of the City of Haverhill lying south of State Route No. 97, east of Carleton Street, and northwest of Lowell Street; and that part of the City of Haverhill lying north of Lowell Avenue, east of Forest Street, south of State Route No. 97, and west of Carleton Street.

* * * * *

(xv) That part of the City of Peabody lying northeast of Lake Street (rear), northwest of the Boston and Maine Railroad, and southwest of Lake Street; that part of the City of Peabody lying north of Goodale Street, south of the Middleton Town Foundry, west of U. S. Route No. 1, and east of Morris Brooks; that part of the City of Peabody lying east of Farm Avenue, south of Forest Street, and north and west of Goldthwaite Brook; that part of the City of Peabody lying north of Lowell Street and east, west, and south of Goodale Street; that part of the City of Peabody lying north of Winona Street, south of Lowell Street, and west of Lake Street; that part of the City of Peabody lying south of Forest Street, north of State Route No. 128, east of U. S. Route No. 1, and west of Farm Avenue; that part of the City of Peabody lying south of Lynnfield Street, west of Lynn Street, north of Glenway Street, and east of the junction of Lynnfield and Glenway Streets; that part of the City of Peabody lying northeast of Russell Street, and southwest of the Boston and Maine Railroad; that part of the Town of Peabody lying south of State Route No. 114, north of the Lowell Branch of the Boston and Maine Railroad, east of Prospect Street, and west of State Route No. 128; and that part of the Town of Peabody lying east of U. S. Route No. 1, south of Forest Street, north of Locust Street, northwest of State Route No. 128, and west of Farm Avenue.

3. New subdivisions (xxi), (xxii), (xxiii), (xxiv), and (xxv) are added to subparagraph (3) of paragraph (e), relating to Essex County in Massachusetts, to read:

(xxi) That part of the Town of Boxford lying southwest of the Newburyport Branch of the Boston and Maine Railroad, and northwest of Bare Hill Road.

(xxii) That part of the Town of Bradford lying east of State Route No. 125, south of Willow Street, and west of Kingsbury Street.

(xxiii) The Town of Lawrence.

(xxiv) The Town of Newburyport.

(xxv) The Town of Newbury.

4. Subdivision (vii) of subparagraph (4) of paragraph (e), relating to Hampden County in Massachusetts, is amended to read:

(vii) That part of the Town of Holyoke lying north of Old Westfield Road, south of Westfield Road, west of Old Homestead Avenue, and east of the Holyoke Water Works; and that part of the Town of Holyoke lying north of Cross Road, south of Rock Valley Road, east of Mountain Road, and west of Southampton Road.

5. Subdivisions (xiv), (xv), and (xvii) of subparagraph (5) of paragraph (e), relating to Middlesex County in Massachusetts, are amended to read:

(xiv) That part of the Town of Hudson lying west of Chapin Street, and northwest of Brigham Street and the Aseabet River; that part of the Town of Hudson lying northwest of State Route No. 62 and northeast of Cox Street and Cemetery Road; and that part of the Town of Hudson lying south and west of Stratton Road and Cox Street, north of Main Street, and east of Manning Street.

(xv) That part of the Town of Lexington lying west of Westview Road and south of State Routes No. 4 and No. 25; that part of the Town of Lexington lying south of Moreland Avenue, west of Pleasant Street, east of Meadowbrook Avenue, and north of State Route No. 2; that part of the Town of Lexington lying south of State Route No. 2a and north of Lincoln Street; that part of the Town of Lexington lying south of Marrett Road, north of Moreland Avenue, east of Clamstis Brook, and west of Feller Road; and that part of the Town of Lexington lying south of Concord Avenue and east of Walnut Street.

* * * * *

(xvii) That part of the Town of Marlboro lying south of Robin Hill Road, east of Millham Road, west of Bigelow Street, and north of Elm Street; and that part of the Town of Marlboro lying southeast of Spoon Hill Road, northwest of Stow Road, north of U. S. Route No. 20, and east of Hosmer Street.

6. Subdivision (xx) of subparagraph (6) of paragraph (e), relating to Norfolk County in Massachusetts, is amended to read:

(xx) The Town of Braintree.

7. A new subdivision (xxi) is added to subparagraph (6) of paragraph (e), relating to Norfolk County in Massachusetts, to read:

(xxi) The Town of Medfield.

8. Subdivisions (i), (ii), (iii), and (xiv) of subparagraph (7) of paragraph (e), relating to Plymouth County in Massachusetts, are amended to read:

(i) That part of the Town of Abington lying south of Randolph Street, north of Rockland Street, west of Bedford Street, and east of Hancock Street; that part of the Town of Abington lying north and east of Randolph Street and west of Bedford Street; and that part of the Town of Abington lying south of Summer Street, east of Walnut Street, and west of Plymouth Street.

(ii) That part of the Town of Bridgewater lying southwest of Winter Street, north of Auburn Street, and east of Beaver Street; that part of the City of Bridgewater lying north of Flagg Street, southwest of Conant Street, and southeast of Summer Street; that part of the Town of Bridgewater lying south of Flagg and Auburn Streets, north and west of the Taunton River, and east of State Route No. 28; that part of the Town of Bridgewater lying south of West Center Street, north of Maple Street, and west of Pleasant Street; that part of the Town of Bridgewater lying south of Cedar Street, north of Pond Street, and east of Washington Street; and that part of the Town of Bridgewater lying south of Union Street; north of East Center Street, east of East Street, and west of Laurel Street.

(iii) That part of the Town of Brockton lying south of East Ashland Street, north of Court Street, and east of North Quincy Street; that part of the Town of Brockton lying south of Edson Street, north of Plain Street, east of Summer Street, and west of East Street; and that part of the City of Brockton lying north of North Carey Street, south of North Avenue, west of North Quincy Street, and east of Winter Street.

* * * * *

(xiv) That part of the Town of Rockland lying south of Summer Street and east of Beach Street; that part of the Town of Rockland lying south of Forest Street, west of Union Street, and east of Weymouth Street; and that part of the Town of Rockland lying south of Market Street, north of Summer Street, and east of Concord Street.

9. New subdivisions (xvii), (xviii), (xix), and (xx) are added to subparagraph (7) of paragraph (e), relating to Plymouth County in Massachusetts, to read:

(xvii) That part of the Town of Duxbury lying south of Tremont Street, north of Bay Road, and west of Chestnut Street.

(xviii) That part of the Town of East Bridgewater lying west of State Route No. 18.

(xix) That part of the Town of Kingston lying south of Wapping Road and Main Street and northwest of Elm Street.

(xx) That part of the Town of Whitman lying southeast of Pond Street, southwest of Franklin Street, and northeast of the New York, New Haven, and Hartford Railroad.

10. New subdivisions (xx) and (xxi) are added to subparagraph (8) of paragraph (e), relating to Worcester County in Massachusetts, to read:

(xx) That part of the Town of Charleton lying north of U. S. Route No. 20, south of Irish Mile, east of Griffin Road, and west of East Brookfield Road.

(xxi) That part of the Town of Shrewsbury lying north of U. S. Route No. 20, south of State Route No. 9, east of Lake Street, and west of Grafton Street.

11. Subparagraph (1) of paragraph (i), relating to Rhode Island, is amended to read:

(1) Bristol County.

12. A new subdivision (iv) is added to subparagraph (2) of paragraph (i), relating to Providence County in Rhode Island, to read:

(iv) That part of the City of Providence lying east of Hamlin Street, west of Elena Street, north of Olney Street, and south of Mineral Spring Avenue.

13. A new subparagraph (3) is added to paragraph (i), relating to Rhode Island, to read:

(3) All of Kent County except the following:

(i) That part of the Town of Coventry lying east of Hill Farm Road, west of Philips Hill Road, north of Flat River Road, and south of Markney Hill Road.

(ii) That part of the Town of Lincoln lying north of Whipple and Jencke Hill Roads, south of Twin River Road, and east of Lousquesset Pike.

Effective date. The foregoing amendment shall become effective upon issuance.

The amendment excludes certain areas in Massachusetts and Rhode Island from the areas in which vesicular exanthema has been found to exist and in which a quarantine has been established. Hereafter, the restrictions pertaining to the interstate movement of swine, and carcasses, parts and offal of swine, from or through quarantined areas, contained in 9 CFR, Part 76, Subpart B, as amended (18 F. R. 3636, as amended), will not apply to such areas. However, the restrictions pertaining to such movement from non-quarantined areas, contained in said Subpart B, as amended, will apply thereto.

The amendment relieves certain restrictions presently imposed, and must be made effective immediately to be of maximum benefit to persons subject to the restrictions which are relieved. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and the amendment may be made effective less than 30 days after publication in the FEDERAL REGISTER.

(Secs. 7, 23 Stat. 32, as amended, secs. 1, 2, 32 Stat. 791–792, as amended, secs. 1, 3, 33 Stat. 1264, as amended, 1265, as amended, 21 U. S. C. 111–113, 117, 120, 123, 125)

Done at Washington, D. C., this 13th day of April 1954.

Subchapter D—Exportation and Importation of Animals and Animal Products

[B. A. I. Order 373, Amdt. 11]

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), AND NEWCASTLE DISEASE (AVIAN PNEUMOENCEPHALITIS); PROHIBITED AND RESTRICTED IMPORTATIONS (REVISED)

NONEXISTENCE OF RINDERPEST AND FOOT-AND-MOUTH DISEASE IN THE CHANNEL ISLANDS

On February 26, 1954, there was published in the FEDERAL REGISTER (19 F. R. 1095) a notice of proposed determination of the nonexistence of rinderpest and foot-and-mouth disease in the Channel Islands, and of a proposed amendment of the regulations relating to prohibitions and restrictions on the importation of certain animals and animal products on account of such diseases. After due consideration of all relevant material submitted in connection with the notice, and pursuant to the provisions of section 306 of the Tariff Act of 1930 (19 U. S. C. 1306) and section 2 of the act of February 2, 1903, as amended (21 U. S. C. 111), it has been determined, and the Secretary of the Treasury has been notified, that rinderpest and foot-and-mouth disease do not now exist in the Channel Islands, and § 94.1, as amended, of Part 94, Subchapter D, Chapter I, Title 9 of the Code of Federal Regulations (§ 94.1 of B. A. I. Order 373, as amended), is hereby further amended to read as follows:

§ 94.1 *Designation of countries where rinderpest or foot-and-mouth disease exists; importations prohibited.* (a) Notice is hereby given that, in accordance with section 306 of the Tariff Act of 1930 (19 U. S. C. 1306), it has been determined that rinderpest or foot-and-mouth disease exists in the following designated countries, and that official notice thereof has been given to the Secretary of the Treasury:

(1) Mexico;

(2) Island of Martinique;

(3) All countries of South America; and

(4) All countries east of the 30th meridian west longitude and west of the International Date Line, except Australia, the Channel Islands, Greenland, Iceland, New Zealand, Northern Ireland, Norway, and the Republic of Ireland.

(b) The importation from the infected countries, designated in paragraph (a) of this section, into the United States of cattle, sheep, or other domestic ruminants, or swine, or of fresh, chilled, or frozen beef, veal, mutton, lamb, or pork (including the entry into any port of the United States of any vessel having on board as sea stores or otherwise such animals or meats from such countries), is prohibited.

The determination, notification, and amendment, remove the present prohibitions under section 306 of the Tariff Act upon the importation from the Channel Islands into the United States of the animals and meats specified in paragraph (b) of said § 94.1, and render the commodities specified in §§ 94.2 to 94.5 of said Part 94, as amended, and originating in the Channel Islands, no longer subject to the provisions of that part. The amendment also makes certain other changes in said § 94.1. Such changes are unsubstantial and do not affect the rights or obligations of any person.

Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is found upon good cause that further notice and other public procedure with respect to the amendment are unnecessary, and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

The foregoing amendment shall become effective upon issuance.

(Sec. 2, 32 Stat. 792, as amended, sec. 306, 46 Stat. 689; 19 U. S. C. 1306, 21 U. S. C. 111)

Done at Washington, D. C., this 12th day of April 1954.

[SEAL] M. R. CLARKSON,
Acting Administrator,
Agricultural Research Service.

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 62]

PART 610—MINIMUM EN ROUTE IFR ALTITUDES

MISCELLANEOUS AMENDMENTS

The minimum en route IFR altitudes appearing hereinafter have been coordinated with interested members of the industry in the regions concerned insofar as practicable. The altitudes are adopted without delay in order to provide for safety in air commerce. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 610 is amended as follows:

1. Section 610.13 *Green civil airway No. 3* is amended to read in part:

From—	To—	Minimum altitude
Philipsburg, Pa. (LFR)	Selinsgrove, Pa. (LF/RBN).	6,000
Selinsgrove, Pa. (LF/RBN).	Slatington (INT), Pa.	3,500

2. Section 610.16 *Green civil airway No. 6* is amended to read in part:

From—	To—	Minimum altitude
Greensboro, N. C. (LFR)	South Boston (INT), Va.	2,900
South Boston (INT), Va.	Blackstone, Va. (LFR).	2,900

3. Section 610.105 *Amber civil airway No. 5* is amended to read in part:

From—	To—	Minimum altitude
Waterloo (INT), Ill.	St. Louis, Mo. (LFR).	2,300

4. Section 610.106 *Amber civil airway No. 6* is amended to read in part:

From—	To—	Minimum altitude
Columbus, Ohio, (LFR)	A beam of Mansfield, Ohio (LF/RBN).	2,500
A beam of Mansfield, Ohio (LF/RBN)	Brighton (INT), Ohio	2,400
Brighton (INT), Ohio	Elyria, Ohio (LF/RBN).	2,200

5. Section 610.203 *Red civil airway No. 3* is amended to read in part:

From—	To—	Minimum altitude
Mt Holly (INT), N. J.	Freehold (INT), N. J.	1,500

6. Section 610.208 *Red civil airway No. 8* is amended to read in part:

From—	To—	Minimum altitude
Williamsport, Pa. (LFR)	Plymouth (INT), Pa	4,000
Plymouth (INT), Pa.	Stroudsburg (INT), Pa.	3,500

7. Section 610.213 *Red civil airway No. 13* is amended to read in part:

From—	To—	Minimum altitude.
Butler, Pa. (LF/RBN).	Ford (INT), Pa.	3,000
Ford (INT), Pa.	Philipsburg, Pa. (LFR).	4,000

8. Section 610.217 *Red civil airway No. 17* is amended to read in part:

From—	To—	Minimum altitude
Mansfield, Ohio (LF/RBN)	Bergholz, Ohio (LF/RBN).	2,500
Bergholz, Ohio (LF/RBN).	Pittsburgh, Pa. (LFR).	2,700

9. Section 610.221 *Red civil airway No. 21* is amended by adding:

From—	To—	Minimum altitude
Selinsgrove, Pa. (LF/RBN).	Wilkes-Barre, Pa. (LFR).	3,500

10. Section 610.226 *Red civil airway No. 26* is amended to read in part:

From—	To—	Minimum altitude
Wilkes-Barre, Pa. (LFR).	Slatington (INT), Pa.	3,500

11. Section 610.227 *Red civil airway No. 27* is amended to eliminate:

From—	To—	Minimum altitude
Int. 358° T from Lexington, Ky. (LF/RBN) and E course Louisville, Ky. (LFR).	Union (INT), Ky.	2,000
Union (INT), Ky.	Mt. Healthy (INT), Ohio.	2,300
Mt. Healthy (INT), Ohio.	Dayton, Ohio (LFR).	2,500
Dayton, Ohio (LFR).	Troy (INT), Ohio.	2,100
Troy (INT), Ohio.	Findlay, Ohio (LF/RBN).	2,100

12. Section 610.246 *Red civil airway No. 46* is amended to eliminate:

From—	To—	Minimum altitude
Jamestown, N. Dak. (LFR).	Aberdeen, S. Dak. (LFR).	2,800

13. Section 610.255 *Red civil airway No. 55* is amended to read in part:

From—	To—	Minimum altitude
Findlay, Ohio (LF, RBN).	Columbus, Ohio (LFR).	2,500

14. Section 610.261 *Red civil airway No. 61* is amended to read in part:

From—	To—	Minimum altitude
Butler, Pa. (LF/RBN)	New Alexandria (INT), Pa.	[1] 3,000

[1] 4,000'—Minimum crossing altitude at New Alexandria (LF/RBN), eastbound.

15. Section 610.285 *Red civil airway No. 85* is amended to read in part:

From—	To—	Minimum altitude
Butler, Pa. (LF/RBN)	Apollo (INT), Pa.	3,000
Apollo (INT), Pa.	Altoona, Pa. (LFR).	4,500

16. Section 610.303 *Red civil airway No. 103* is amended by adding:

From—	To—	Minimum altitude
Kenai, Alaska (LFR)	Skilak (INT), Alaska.	1,500

17. Section 610.641 *Blue civil airway No. 41* is amended to read in part:

From—	To—	Minimum altitude
Westfield Mass (LFR)	Hadley (INT), Mass.	3,000
Hadley (INT), Mass	Greenfield (INT), Mass.	3,500

18. Section 610.642 *Blue civil airway No. 42* is amended to read in part:

From—	To—	Minimum altitude
Grand Rapids, Mich. (LFR).	Saginaw, Mich. (LF/RBN).	2,200

19. Section 610.673 *Blue civil airway No. 73* is amended to read in part:

From—	To—	Minimum altitude
Pittsburgh, Pa. (LFR)	Ford (INT), Pa.	3,000
Ford (INT), Pa.	Brookville, Pa. (LF/RBN).	3,500

20. Section 610.675 *Blue civil airway No. 75* is added to read:

From—	To—	Minimum altitude
Cleveland, Ohio (LFR)	London, Ontario, Canada (LFR).[1]	2,400

[1] For that airspace over U. S. territory.

21. Section 610.680 *Blue civil airway No. 80* is added to read:

From—	To—	Minimum altitude
Darby (INT), Alaska	Moses Point, Alaska (LFR).	5,000

22. Section 610.686 *Blue civil airway No. 86* is amended to eliminate:

From—	To—	Minimum altitude
Fort Wayne, Ind. (LFR).	Dayton, Ohio (LFR)	2,500

23. Section 610.6003 *VOR civil airway No. 3* is amended by adding:

From—	To—	Minimum altitude
Flat Rock, Va. (VOR)	Potomac (INT), Va.	[1] 3,000

[1] 1,500'—Minimum terrain clearance altitude.

24. Section 610.6004 *VOR civil airway No. 4* is amended to read in part:

From—	To—	Minimum altitude
St. Louis, Mo. (VOR). Via N alter	Centralia, Ill (VOR) Via N alter	2,100
Centralia, Ill (VOR)	Evansville, Ind. (VOR)	2,100
Via S alter	Via S alter	2,400

25. Section 610.6005 *VOR civil airway No. 5* is amended to read in part:

From—	To—	Minimum altitude
Bowling Green, Ky. (VOR)	Louisville, Ky. (VOR)	2,200
Bowling Green, Ky. (VOR), via E alter.	Campbellsville (INT), Ky., via E alter.	[1] 3,000
Campbellsville (INT), Ky., via E alter.	Louisville, Ky (VOR) via E alter.	[1] 3,000

[1] 2,400'—Minimum terrain clearance altitude.

26. Section 610.6006 *VOR civil airway No. 6* is amended to read in part:

From—	To—	Minimum altitude
Selinsgrove, Pa. (VOR)	Allentown, Pa. (VOR)	3,500
Allentown, Pa. (VOR)	Summit (INT), N. J.	2,500

27. Section 610.6008 *VOR civil airway No. 8* is amended to read in part:

From—	To—	Minimum altitude
Mansfield, Ohio (VOR)	Berghoiz (INT), Ohio	2,500
Berghoiz (INT), Ohio	Pittsburgh, Pa. (VOR).	2,700

28. Section 610.6009 *VOR civil airway No. 9* is amended to read in part:

TITLE 29—LABOR

Chapter V—Wage and Hour Division, Department of Labor

PART 526—INDUSTRIES OF A SEASONAL NATURE

INCLUDING CERTAIN PELLETING OPERATIONS WITHIN DETERMINATION THAT ARTIFICIAL DRYING OF ALFALFA HAY AND SUBSEQUENT MANUFACTURE OF MEAL THEREFROM IS AN INDUSTRY OF A SEASONAL NATURE

On December 2, 1940, it was found that the artificial drying of alfalfa hay and the subsequent manufacture of meal therefrom is an industry of a seasonal nature within the meaning of section 7 (b) (3) of the Fair Labor Standards Act (5 F. R. 4801). Notice was published in the FEDERAL REGISTER on March 9, 1954 (19 F. R. 1321), that a prima facie case had been shown for amendment of the aforesaid determination to include the making of dehydrated alfalfa pellets which contain not more than 20 percent of ingredients other than alfalfa, during the period when dehydrating operations are carried on, when performed in a continuous series of operations with the dehydrating operations. A prima facie case had also been shown for including within the determination similar pelleting by dehydrating plants of an insubstantial amount of alfalfa which has

been dehydrated at other plants, when such pelleting is done while the dehydrating is in process. Interested persons were given 15 days from such date to file objection and request for hearing on this preliminary determination.

No objection and request for hearing has been received within the said 15 days.

Accordingly, pursuant to § 526.6 (b) (2) of the regulations contained in this part, the determination made on December 2, 1940, is amended to include the aforesaid pelleting operations. As amended, the determination will apply to the dehydrating of alfalfa and the subsequent manufacture of meal therefrom, and the following operations when performed at dehydrating plants during the period or periods when dehydrating operations are carried on: the making of dehydrated alfalfa pellets containing not more than 20 percent of ingredients other than alfalfa, including the pelleting of alfalfa dehydrated at other plants in any workweek when such pelleting constitutes no more than 20 percent of the pelleting volume; and any operations necessary or incident to the foregoing.

This determination shall become effective 30 days after publication in the FEDERAL REGISTER.

NOTE: This determination will be tabulated under § 526.101.

(52 Stat. 1060; 29 U. S. C. 201 et seq.)

Signed at Washington, D. C., this 9th day of April 1954.

WM. R. MCCOMB,
Administrator,
Wage and Hour Division.

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter II—Corps of Engineers, Department of the Army

PART 207—NAVIGATION REGULATIONS

SOUTHERN BRANCH, ELIZABETH RIVER, VIRGINIA

Pursuant to the provisions of section 7 of the River and Harbor Act of August 8, 1917 (40 Stat. 266; 33 U. S. C. 1), § 207.153 is hereby prescribed establishing and governing the use and navigation of naval restricted areas in the Southern Branch of Elizabeth River, along and adjacent to Norfolk Naval Shipyard, St. Helena Annex and Southgate Terminal, as follows:

§ 207.153 *Elizabeth River, Southern Branch, Va., naval restricted areas*—(a) *The areas*—(1) *St. Helena Annex Area.* Beginning at a point at St. Helena Annex of the Norfolk Naval Shipyard, on the eastern shore of Southern Branch of Elizabeth River, at latitude 36°49'43", longitude 76°17'26.5"; thence in a southwesterly direction to a point on the eastern boundary of Norfolk Harbor 40-foot channel at latitude 36°49'42", longitude 76°17'33"; thence in a southerly direction along the eastern boundary of Norfolk Harbor 40-foot channel to latitude 36°49'28", longitude 76°17'27"; thence easterly to the shore at latitude 36°49'28", longitude 76°17'22"; and thence, northerly along the shore to the point of beginning.

(2) *Norfolk Naval Shipyard Area.* Beginning at a point on the shore at the northeast corner of the Norfolk Naval Shipyard, at latitude 36°49'43.5", longitude 76°17'41.5"; thence due east approximately 100 feet to the western boundary of Norfolk Harbor 40-foot channel; thence in a southerly direction along the western boundary of the channel to latitude 36°48'58", longitude 76°17'34.5"; thence southwesterly to latitude 36°48'46", longitude 76°17'43.5"; thence southeasterly to the western boundary of Norfolk Harbor 40-foot channel at the point where it passes through the draw of the Norfolk and Portsmouth Belt Line Railroad bridge; thence in a southwesterly direction along the northerly side of the bridge to the western shore of Southern Branch of Elizabeth River; and thence along the shore in a northerly direction to the point of beginning.

(3) *Southgate Terminal Area.* Beginning at a point at the northeast corner of Southgate Terminal Annex of Norfolk Naval Shipyard, at latitude 36°48'23", longitude 76°17'39"; thence east to latitude 36°48'23", longitude 76°17'29"; thence southerly along the western boundary of Norfolk Harbor 35-foot channel to latitude 36°48'04", longitude 76°17'33"; thence west to latitude 36°48'04", longitude 76°17'41"; and thence along the shore in a northerly direction to the point of beginning.

(b) *The regulations.* (1) No loitering within the areas will be permitted.

(2) This section shall be enforced by the Commander, Norfolk Naval Shipyard, Portsmouth, Virginia.

[Regs., April 6, 1954, 800.2121 (Elizabeth River, Va.)-ENGWO] (40 Stat. 266; 33 U. S. C. 1)

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 23]

UNITED STATES STANDARDS FOR DRY WHEY [1]

NOTICE OF PROPOSED RULE MAKING

Notice is hereby given that the United States Department of Agriculture is considering the issuance, as hereinafter proposed, of United States Standards for Dry Whey pursuant to the authority contained in the Agricultural Marketing Act, 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.).

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed standards should file the same, in duplicate, with the Director, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D. C., not later than the close of business on the 30th day after publication of this notice in the FEDERAL REGISTER.

The proposed standards are as follows:

DEFINITION

§ 23.1 *Dry whey.* "Dry whey" is the product resulting by spray drying sweet, fresh cheese whey which has been pasteurized either before or during the process of manufacture at a temperature of 143° F. for 30 minutes or its equivalent in bacterial destruction and to which no alkali or other chemical has been added.

U. S. GRADE

§ 23.2 *Nomenclature of the U. S. grade*—(a) *Nomenclature.* The nomenclature of the U. S. Grade is U. S. Extra.

§ 23.3 *Basis for determination of U. S. grade.* The U. S. grade of dry whey is determined hereunder on the basis of alkalinity of ash, flavor and odor, physical appearance, bacterial estimate, butterfat content, moisture content, solubility index and titratable acidity.

§ 23.4 *U. S. Grade*—(a) *U. S. Extra.* Dry whey conforms to the following requirements:

(1) Flavor and odor (applies equally to the reliquefied form): Free from non-whey flavors and odors.

(2) Physical appearance: Has a uniform light color; free from lumps that do not break up under moderate pressure; and practically free from brown and black scorched particles.

(3) Alkalinity of ash: Not more than 225 ml. 0.1N HCl per 100 grams.

(4) Bacterial estimate: Not more than 50,000 per gram.

(5) Butterfat content: Not more than 1.25 percent.

(6) Moisture content: Not more than 5.00 percent.

(7) Solubility index: Not more than 1.25 ml.

(8) Titratable acidity: Not more than 0.16 percent.

§ 23.5 *Test methods.* (a) The test methods contained in Methods of Laboratory Analyses for Dry Whole Milk and Non-fat Dry Milk Solids, United States Department of Agriculture, May 1951 (Mimeo.), obtained from Dairy Division, Agricultural Marketing Service, are used to determine bacterial estimate, butterfat content, moisture content, solubility index, and titratable acidity. Where applicable, the reconstituted basis shall be 6.5 g. dry whey to 10.0 ml. water.

(b) The test method for dry skim milk contained in paragraph 15.97, page 251, of the publication "Official Methods of Analysis of the Association of Official Agricultural Chemists" 7th edition, 1950, published by the Association of Official Agricultural Chemists, Post Office Box 540, Benjamin Franklin Station, Washington 4, D. C., is used to determine the alkalinity of ash.

(60 Stat. 1090; 7 U. S. C. 2624)

Done at Washington, D. C., this 14th day of April 1954.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator,
Agricultural Marketing Service.

[F. R. Doc. 54-2913; Filed, Apr. 16, 1954; 8:52 a. m.]

[1] Compliance with these standards does not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act.

[7 CFR Part 960]

[Docket No. AO-253]

HANDLING OF MILK IN AKRON, OHIO, MARKETING AREA

DETERMINATION THAT HEARING SHOULD NOT BE REOPENED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and orders, a public hearing was conducted during March 1-6, 1954, at Akron, Ohio, pursuant to notice thereof, which was issued on February 10, 1954 (19 F. R. 859).

Near the close of the hearing, Mr. Paul W. Walter, attorney, representing the Akron Pure Milk Company, orally submitted a motion that the Secretary reopen the hearing for the sole purpose of considering testimony relative to enlarging the marketing area.

It appears unnecessary that the hearing be reopened for this purpose. The reasons which support this conclusion include the fact that the Akron Pure Milk Company did not respond to an invitation made prior to issuance of the hearing notice to submit additional proposals. Other interested parties submitted proposed modifications for inclusion in the notice of hearing.

Producers objected to the motion on the grounds that marketing conditions required consideration of the issuance of an order at the earliest practicable date. Moreover, no showing was made, nor does it appear from the record, that extension of the marketing area beyond the limits of the territory specified in the notice of hearing is necessary to effectuate the declared purposes of the act.

Accordingly, it is hereby determined that the motion to reopen the hearing for the consideration of marketing area be and it is hereby denied without prejudice to the right of any interested party to request an amendment hearing for the purpose of extending the marketing area should an order be issued and made effective for any portion of the proposed area.

Issued at Washington, D. C., this 14th day of April 1954.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

[F. R. Doc. 54-2912; Filed, Apr. 16, 1954; 8:51 a. m.]

[7 CFR Part 928]

[Docket No. AO 227-A4]

HANDLING OF MILK IN NEOSHO VALLEY MARKETING AREA

NOTICE OF HEARING ON PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of a public hearing to be held in the Twilight Lounge, Student Center, Kansas State Teachers College, Pittsburg, Kansas, beginning at 10:00 a. m., c. s. t., April 23, 1954, for the purpose of receiving evidence with respect to emergency and other economic conditions which relate to the handling of milk in the Neosho Valley marketing area and to the proposed amendments hereinafter set forth, or appropriate modifications thereof, to the tentative marketing agreement heretofore approved by the Secretary of Agriculture and to the order, as amended, regulating the handling of milk in the Neosho Valley marketing area. These proposed amendments have not received the approval of the Secretary of Agriculture.

Amendments to the order for the Neosho Valley marketing area have been proposed as follows:

By the K. M. O. Producers Association:

1. Amend § 928.8 (d) to read as follows:

(d) (1) Any cooperative association with respect to milk of producers which it causes to be diverted to an unapproved plant for the account of such association; (2) any cooperative association with respect to milk of producers which it causes to be diverted to an approved plant of another cooperative association for the account of the cooperative association making such diversions.

2. Add the following to § 928.11: "Skim milk and butterfat diverted under § 928.8 (d) (2) shall be classified as other source milk in the plant of the receiving cooperative."

By Dairy Division, Agricultural Marketing Service:

3. Amend § 928.44 (e) to read as follows:

(e) As Class II milk, if transferred or diverted in the form of milk, skim milk or cream to an unapproved plant located not more than 250 miles from the square at Chanute, Kansas, and from which no Class I milk is disposed of, except that where such unapproved plant is operated by a person who is also a handler or an affiliate of a handler, (1) the market administrator shall be permitted to audit the records of receipts and utilization at such unapproved plant, and (2) to the extent that skim milk or butterfat is disposed of from such unapproved plant to any other milk plant in the form of milk, skim milk or cream, skim milk or butterfat so transferred or diverted to such unapproved plant shall be classified as if moved directly from the approved plant to such other milk plant.

4. Make such changes as may be required to make the entire order conform with any amendments thereto which may result from the hearing.

Copies of this notice of hearing, and the order now in effect, may be procured from the Market Administrator, 523½ North Broadway, Pittsburg, Kansas, or the Hearing Clerk, United States Department of Agriculture, Room 1353, South Building, Washington 25, D. C., or may be there inspected.

Dated: April 15, 1954 at Washington, D. C.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214) and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners, and learning period for certificates issued under the general learner regulations (§§ 522.1 to 522.14) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Single Pants, Shirts and Allied Garments, Women's Apparel, Sportswear and Other Odd Outerwear, Rainwear, Robes and Leather and Sheep-Lined Garments Divisions of the Apparel Industry Learner Regulations (29 CFR 522.160 to 522.168, as amended June 2, 1952, 17 F. R. 3818).

Elder Manufacturing Co., Bloomfield, Mo., effective 4-13-54 to 4-12-55; 10 percent of the total number of factory production workers for normal labor turnover purposes (boys' wearing apparel).

Jane Evans Frocks, Inc., Front and Chestnut Streets, Souderton, Pa., effective 4-9-54 to 10-5-54; 5 learners for normal labor turnover purposes (replacement certificate) (ladies' and misses' dresses).

Henry Garment Co., Inc., 166 Garnett Street SW., Atlanta, Ga., effective 4-8-54 to 4-7-55; 10 percent of the total number of factory production workers for normal labor turnover purposes (trousers).

G. H. Hess, Inc., 1420 Market Street, Wheeling, W. Va., effective 4-9-54 to 4-8-55; 5 learners for normal labor turnover purposes (ladies' dresses and uniforms).

Horter Manufacturing Co., Inc., 222 South Santa Fe, El Paso, Tex., effective 4-6-54 to 4-5-55; 10 percent of the total number of factory production workers for normal labor turnover purposes (juvenile sportswear).

Howard-Lange Manufacturers, Hillcrest, Route 119, Connellsville, Pa., effective 4-16-54 to 4-15-55; 10 learners for normal labor turnover purposes (men's and boys' trousers).

Jan Garment Co., 54 South Pennsylvania Avenue, Wilkes-Barre, Pa., effective 4-7-54 to 4-6-55; 5 learners for normal labor turnover purposes (dresses).

LaCrosse Sportswear Corp., LaCrosse, Va., effective 4-9-54 to 4-8-55; 10 percent of the total number of productive factory workers for normal labor turnover purposes (shirts).

Marion Manufacturing Corp., Marion, Va., effective 4-23-54 to 4-22-55; 10 percent of the total number of factory production workers for normal labor turnover purposes (men's pajamas).

Mode O'Day Corp., 401 West Twenty-third Street., Fremont, Nebr., effective 4-7-54 to 4-6-55; 10 learners for normal labor turnover purposes (dresses).

Mode O'Day Corp., 59 South First West, Logan, Utah, effective 4-7-54 to 4-6-55; 10 percent of the total number of factory production workers for normal labor turnover purposes (dresses).

Norann Manufacturing Co., Inc., 140 East Center Street, Nesquehoning, Pa., effective 4-9-54 to 4-8-55; 10 percent of the total number of factory production workers for normal labor turnover purposes (dresses).

Orchid Blouse Co., Inc., 1100 Penn Avenue, Scranton, Pa., effective 4-23-54 to 4-22-55; 10 learners for normal labor turnover purposes (blouses).

H. A. Satin & Co., Inc., 121 North Middle Street, Grayville, Ill., effective 4-25-54 to 4-24-55; 10 learners for normal labor turnover purposes (dresses).

J. Ben Shapiro Manufacturing Co., Senoia, Ga., effective 4-9-54 to 4-8-55; 6 learners for normal labor turnover purposes (boys' slacks and pants).

Shreveport Garment Manufacturers, 410-420 Commerce Street, Shreveport, La., effective 4-12-54 to 10-11-54; 15 learners for plant expansion purposes (men's and boys' dungarees, etc.).

Steingut Dress Co., 228 Everhart Street, Dupont, Pa., effective 4-22-54 to 4-21-55; 5 learners for normal labor turnover purposes (dresses).

Glove Industry Learner Regulations (29 CFR 522.220 to 522.231, as amended July 13, 1953, 18 F. R. 3292).

Churchill-Swanson Manufacturing Co., 544 North Pearl Street, Centralia, Wash., effective 4-14-54 to 4-13-55; 10 learners for normal labor turnover purposes (work gloves).

Tennessee Glove Co., Inc., Tullahoma, Tenn., effective 4-21-54 to 4-20-55; 10 learners for normal labor turnover purposes (work gloves).

Wells Lamont Corp., Philadelphia, Miss., effective 3-31-54 to 3-30-55; 10 percent of the total number of employees engaged in machine stitching operations, for normal labor turnover purposes (work gloves).

Hosiery Industry Learner Regulations (29 CFR 522.40 to 522.51, as amended November 19, 1951, 16 F. R. 10733).

Crossville Hosiery Co., Inc., Crossville, Tenn., effective 4-6-54 to 4-5-55; 4 learners for normal labor turnover purposes.

Elizabeth City Hosiery Mills, Elizabeth City, N. C., effective 4-9-54 to 4-8-55; 5 percent of the total number of productive factory workers for normal labor turnover purposes.

Lawlor Hosiery Mills, Inc., 53 Bradley Street, Carrollton, Ga., effective 4-12-54 to 4-11-55; 5 percent of the total number of factory production workers for normal labor turnover purposes.

Ragan Knitting Co., Inc., 7 Cox Avenue, Thomasville, N. C., effective 4-14-54 to 4-13-55; 5 percent of the total number of factory production workers for normal labor turnover purposes.

Spalding Knitting Mills, East Broad Street, Griffin, Ga., effective 4-7-54 to 4-6-55; 5 percent of the total number of factory production workers for normal labor turnover purposes.

Knitted Wear Industry Learner Regulations (29 CFR 522.68 to 522.79, as amended January 21, 1952, 16 F. R. 12866).

Taylor Manufacturing Co., Greensburg Road, Campbellsville, Ky., effective 4-22-54 to 4-21-55; 5 percent of the total number of factory production workers for normal labor turnover purposes (men's and boys' underwear).

Regulations Applicable to the Employment of Learners (29 CFR 522.1 to 522.14).

Palm Beach Co., Bourne Avenue, Somerset, Ky., effective 4-19-54 to 4-18-55; 7 percent of the total number of factory production workers for normal labor turnover purposes. Machine operators (except cutting), hand sewers, pressers; each 480 hours at least 65 cents an hour for the first 240 hours and at least 70 cents an hour for the remaining 240 hours (palm beach coats).

The following special learner certificate was issued to the school-operated industry listed below:

Monterey Bay Academy, P. O. Box 191, Watsonville, Calif., effective 4-9-54 to 8-31-54; trellis shop—Millmen and other related skilled and semiskilled occupations including incidental clerical work in shop; 30 learners; 200 hours at 60 cents per hour, 150 hours at 65 cents per hour, 150 hours at 70 cents per hour.

The following special learner certificate was issued in Puerto Rico to the company hereinafter named. The effective and expiration dates, the number of learners, the learner occupations, the length of the learning period and the learner wage rates are indicated, respectively.

Cidra Knitting Mills, Inc., Cidra, P. R., effective 3-30-54 to 9-29-54; 28 learners: inspecting and examining, 240 hours at 30 cents an hour; knitting, looping, mending, repairing (fixers); each 240 hours at 30 cents an hour, 240 hours at 35 cents an hour (infants' hosiery)

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employment, and that experienced workers for the learner occupations are not available. The certificates may be cancelled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER, pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 12th day of April 1954.

MILTON BROOKE,
Authorized Representative of the Administrator.

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 10967, 10968, 10969, 10970]

COMMUNITY TELEVISION CO. ET AL.

STATEMENT AND ORDER CONTINUING HEARING

In re applications of M. J. Montesano, J. C. Stigemeier, C. C. Grimm and G. E. Adema, d/b as Community Television Company, Buffalo, New York, Docket No. 10967, File No. BPCT-1793; Great Lakes Television, Inc., Buffalo, New York, Docket No. 10968, File No. BPCT-1812; Leon Wyszatycki, d/b as Greater Erie Broadcasting Company, Buffalo, New York, Docket No. 10969, File No. BPCT-1827; WKBW-TV, Inc., Buffalo, New York, Docket No. 10970, File No. BPCT-1841; for construction permits for new television stations.

1. The above-entitled applications were designated for hearing in a consolidated proceeding by the Commission on March 24, 1954. Pursuant to § 1.813 of the Commission's rules an informal prehearing conference was held on April 1, 1954. At that time there was discussion as to the techniques and procedures to be followed with the expectation of conducting the hearing as rapidly and efficiently as possible. The scheduled date for the commencement of the hearing is April 23, 1954. The parties were required to exchange the data called for by the Commission's order of October 14, 1953 on April 8, 1954.

2. As a result of the discussions held on April 1, 1954, a joint motion was filed on April 7, 1954, by counsel for Great Lakes Television, Inc., Greater Erie Broadcasting Company and WKBW-TV, Inc., which requests a continuance of the dates for exchanging basic information and for the hearing conference which is to be held pursuant to § 1.841 of the rules. Community Television Company and the Broadcast Bureau have been advised of the contents of the motion, they have agreed to waive the time limitations set forth in § 1.745 of the rules and have consented to the granting of the motion in full. The motion recites the following procedural steps which have been approved by the parties:

a. On April 21, 1954, all parties shall submit their requests to the other parties for additional data which they may desire.

b. Not later than April 26, 1954, any objections to the above requests shall be filed.

c. On May 17, 1954 the data called for by the Commission's order of October 14, 1953, all information requested by the other parties to the proceeding, and all exhibits constituting each applicant's affirmative case shall be exchanged among the parties except such exhibits as may be prepared on the basis of the requests for additional data.

d. On May 25, 1954 the parties shall exchange their points of reliance.

e. On May 27, 1954 the hearing conference pursuant to § 1.841 shall be held subject to such change in date as may be required if any of the counsel or the Examiner in this proceeding shall attend the convention of the National Association of Radio and Television Broadcasters to be held in Chicago, Illinois from May 23 through May 27.

f. Any additional exhibits based upon the additional information requested on April 21 shall be exchanged among the parties three days prior to the date on which the taking of testimony shall commence.

3. It is a commonly known fact that applicants are often reluctant to divulge details of their proposals in advance of Hearing beyond the bare essentials required in the Commission's order of October 14, 1953, and the so-called McFarland letter. Understandably they feel that revelation of substantial information about their cases prior to the time points of reliance are drafted may place them at a disadvantage unless all other

applicants furnish comparable information in like detail. It is the purpose of the procedure proposed by the applicants in this case to overcome this reluctance. All of the affirmative cases will be divulged in the prehearing stages of the proceeding. The applicant who fails to set forth any facts upon which he expects to rely will, of course, do so at his peril. At the April 1 conference it was agreed, however, that oral testimony would be permitted for the purpose of explaining exhibits but that such testimony could not vary or add to the exhibit information.

4. As a consequence of the applicants' decision to present all of the exhibits in their affirmative cases on the day when they exchange the data requested by the McFarland letter, they have reasonably asked for more time in which to prepare this material. While delays in the commencement of a hearing are not ordinarily to be encouraged, the expressed purpose for this delay with its consequent promise of great time saving once the hearing is begun is sufficient to justify a continuance. It must also be noted that postponement of the formal conference date will, in all likelihood, have no effect on delaying the taking of testimony so that there will be no time lost ultimately in concluding the proceeding.

5. *Therefore it is ordered*, This 9th day of April 1954, that the joint motion herein referred to is granted; and

6. *It is further ordered*, That the date for the commencement of the hearing in this proceeding is continued from April 23, 1954, to May 27, 1954, with the attendant continuance of the date for exchanging basic data relating to the affirmative cases of each party from April 8, 1954, to May 17, 1954.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

[Docket Nos. 10980, 10981]

KFJI BROADCASTERS AND KLAMATH FALLS TELEVISION, INC.

ORDER CONTINUING PRE-HEARING

In re applications of KFJI Broadcasters, Klamath Falls, Oregon, Docket No. 10980, File No. BPCT-1299; Klamath Falls Television, Inc., Klamath Falls, Oregon, Docket No. 10981, File No. BPCT-1620; for construction permits for new television stations.

At the request of counsel for the applicants in the above-entitled proceeding, and with the concurrence of counsel for the Chief of the Broadcast Bureau,

It is hereby ordered, That the prehearing conference, pursuant to § 1.813 of the Commission's rules, heretofore scheduled for April 14, 1954, is continued to Tuesday, April 20, 1954, at 10:00 a. m., such conference to be held in the Commission's office at Washington, D. C.

Dated: April 13, 1954.

Released April 14, 1954.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] MARY JANE MORRIS,
Secretary.

DEPARTMENT OF DEFENSE

Corps of Engineers, Department of the Army

FEES FOR LICENSING AND RELATED ACTIVITIES

REVISED SCHEDULE

Notice was given in the FEDERAL REGISTER of January 29, 1954 (19 F. R. 514), of a proposed schedule of fees for the purpose of recovering the cost of issuing permits for work in navigable waters of the United States. The schedule has been revised after careful consideration of all comments received and a revised fee schedule, proposed to become effective July 1, 1954, is published below:

REVISED FEE SCHEDULE

Group	Classification	Fee per permit
1	Structures or work such as piers or landings, aerial or submarine cables, pipelines, moorings and icebreaker cells, pile clusters, dredging, dumping, fishing structures, jetties, pumping plants, oil well structures, structures for geophysical operations, or any other similar structures or work in any navigable water of the United States.	$5 when no notice required. $25 when only public notice required. $50 when public hearing required.
2	Structures such as bridges, dams, causeways, tunnels over or under any navigable water of the United States.	$50 when only public notice required. $100 when public hearing required.
3	Revised plans and extensions of time of permits and instruments of approval of plans.	Dependent upon action required, 50 percent of appropriate fee set forth above for group 1 or 2.

PRACTICE AND PROCEDURE

(a) *Exemptions.* No charges will be made for permits issued to charitable nonprofit organizations, and Federal, State and other public agencies.

(b) *Applicability.* (1) A fee will be charged only when an actual permit is required and issued for the performance of any of the work indicated above. The fee covers only the cost of issuing the permit and does not include any charges for inspection costs. The schedule of fees does not change in any respect existing practice and procedure in the issuance of permits or the charging for inspection costs. No permits will be required that were not heretofore required.

(2) The fee schedule contemplates a single payment, i. e., a Department permit to construct a pier carries with it the authority to maintain as authorized in proper repair.

(3) The fee covers all the work authorized, i. e., a permit to dredge and dispose of dredged material in designated areas shall be charged only a single fee, subject to subparagraph (1) of this paragraph.

(4) If the application is denied, the fee will be returned to the applicant with the letter disapproving his request.

(5) Under the Department's rules of practice and procedure District Engineers are not required to issue a public notice for such minor structures or work as in their opinion could offer no obstruction and to which there could be no objection from the standpoint of navigation. In all other cases a public notice is mandatory and a public hearing shall be held when necessary to develop all the facts and to afford interested parties full opportunity to be heard. In the event a public notice is issued and a public hearing is then found necessary, the fee paid for the public notice will be credited toward the fee for a public hearing.

(c) *Payment of fees.* (1) Upon receipt of an application the District Engineer will advise the applicant of the applicable fee as determined by the fee schedule. Full payment must be made and in no case will an application be processed prior to such payment.

(2) Payment may be made in legal tender, postal money order, or check payable to The Treasurer of the United States. All fees collected will be paid into the Treasury as miscellaneous receipts by the District Engineer.

(3) Receipts will be furnished only upon request in the case of payments in cash made in person. Sending of cash through the mails is entirely at the risk of the sender.

(d) *Effective date.* The schedule of fees shall take effect and apply to all applications received on and after July 1, 1954.

Any interested party may present such written comments and suggestions, in duplicate, as to the level and form of the proposed fees as he may desire to the Chief of Engineers, Corps of Engineers, U. S. Army, Building T-7, Washington 25, D. C., Attention: ENGWO, within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER.

[SEAL] WM. E. BERGIN,
Major General, U. S. Army,
The Adjutant General.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3210]

COLUMBIA GAS SYSTEM, INC.

ORDER PERMITTING AMENDED DECLARATION TO BECOME EFFECTIVE

APRIL 13, 1954.

The Columbia Gas System, Inc. ("Columbia"), a registered holding company, having filed a declaration and amendments thereto pursuant to section 7 of the Public Utility Holding Company Act of 1935 ("act") and Rule U-50 promulgated thereunder, regarding a proposed offer by Columbia to its stockholders of the right to purchase $50,000,000 principal amount of __ percent Subordinated Debentures ("Subordinated Debentures"); convertible into shares of common stock, without par value, of Columbia on and after January 1, 1955 to and including December 31, 1958, except that only $25,000,000 principal amount will be accepted for conversion during the year 1955.

The proposed rights offering will be made to stockholders of record on or about April 21, 1954, and will give such stockholders the right to subscribe, at a price equal to 100 percent of the principal amount thereof, for Subordinated Debentures at the rate of $100 principal amount for each 36 shares of common stock held of record. The subscription rights will be evidenced by Transferable Registered Warrants which will be issued to stockholders.

Columbia's offer to its stockholders is to be underwritten and public invitations for sealed bids will be made on or about April 13, 1954, for the purchase of the unsubscribed Subordinated Debentures at the principal amount thereof. Columbia will notify the prospective bidders prior to the time specified for the opening of bids of the interest rate, the redemption prices and the price at which the Subordinated Debentures may be converted into common stock.

A public hearing having been held after appropriate notice, the Commission having considered the record and having made and filed its findings and opinion herein:

It is ordered, That said declaration, as amended, be, and hereby is permitted to become effective forthwith subject to the terms and conditions prescribed in Rule U-24, and to the further condition that a bid for the purchase of the $50,000,000 principal amount of Subordinated Debentures by Columbia shall not be accepted until the interest rate, conversion price and redemption prices to be fixed for the Subordinated Debentures shall have been made a matter of record in this proceeding and a further order shall have been entered with respect thereto, which order shall contain such further terms and conditions as may then be deemed appropriate, for which purpose jurisdiction be, and the same hereby is, reserved.

It is further ordered, That jurisdiction be, and the same hereby is, reserved with respect to the reasonableness of all fees and expenses incurred in connection with the proposed transactions including fees of underwriter's counsel.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
Secretary.

[F. R. Doc. 54-2888; Filed, Apr. 16, 1954; 8:47 a. m.]

[File No. 70-3223]

ARKANSAS POWER & LIGHT CO.

ORDER GRANTING APPLICATION REGARDING ISSUE AND SALE OF PREFERRED STOCK AT COMPETITIVE BIDDING

APRIL 13, 1954.

Arkansas Power & Light Company ("Arkansas"), an electric utility company and a subsidiary of Middle South Utilities, Inc., a registered holding company, has filed an application, and an amendment thereto, pursuant to section 6 (b) of the Public Utility Holding Company Act of 1935 ("act") and Rule U-50 thereunder regarding the following proposed transaction:

Arkansas proposes to issue and sell at competitive bidding 70,000 shares of a new series of preferred stock, par value $100 per share, to provide a portion of the $25,000,000 it contemplates extending in 1954 for the construction of new facilities and the extension and improvement of its present facilities to provide service for its customers. Such series of preferred stock is to be created out of a new class of 250,000 shares of preferred stock proposed to be authorized by an amendment of the Certificate of Consolidation of Arkansas which was approved by an order of the Commission dated February 19, 1954 (Holding Company Act Release No. 12370).

The dividend rate of such preferred stock, to be a multiple of 1/4 of 1, and the price to be paid to the company, to be not less than $100 nor more than $102.75 per share, plus accrued dividends, will be fixed by proposals to be invited by the company pursuant to the requirements of Rule U-50. The company will reserve the right to reject any or all proposals at or after the opening thereof.

Arkansas has stated that no State Commission, other than the Arkansas Public Service Commission, and no Federal regulatory agency, other than this Commission, has any jurisdiction over the proposed transaction. The issue and sale of such preferred stock has been expressly authorized by the Arkansas commission.

The fees and commissions to be incurred in connection with the issue and sale of such preferred stock, except underwriting discounts and commissions, are estimated by Arkansas as follows:

Federal stamp tax	$7,700
Filing fee: Securities and Exchange Commission	719
Fees of transfer agent and registrar	1,750
Fees of company's counsel:	
House, Moses & Holmes	4,350
Reid & Priest	8,500
Expenses	100
Auditor's fees: Haskins & Sells	2,500
Printing and engraving	17,700
Miscellaneous	6,881
Total	50,100

The fees ($6,500) and disbursements (estimated at not more than $500) of White & Case, counsel for the purchasers, are to be paid by the successful bidders.

Arkansas requests that the Commission's order becomes effective pursuant to Rule U-23 under the act, and requests that there be no waiting period between the date of the Commission's order and its effective date.

Due notice having been given of the filing of said application and a hearing not having been requested of or ordered by the Commission; and the Commission finding that the applicable provisions of the act and rules promulgated thereunder are satisfied, and it appearing to the Commission that the estimated fees and expenses are not unreasonable, provided they do not exceed

the amounts estimated, and that the application should be granted:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of said act, that said application be, and the same hereby is, granted forthwith, subject to the terms and conditions prescribed in Rules U-24 and U-50.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 54-2886; Filed, Apr. 16, 1954; 8:46 a. m.]

[File No. 812-855]

AMERICAN RESEARCH AND DEVELOPMENT CORP. AND TAUNTON PEARL WORKS

NOTICE OF APPLICATION FOR EXEMPTION OF TRANSACTION BETWEEN AFFILIATES

APRIL 12, 1954.

Notice is hereby given that American Research and Development Corporation ("Research"), a registered closed-end non-diversified investment company, has filed an application pursuant to section 17 (b) of the Investment Company Act of 1940 requesting an order exempting from the provisions of section 17 (a) (2) of the act the purchase by Taunton Pearl Works ("Taunton") of 810 shares (30 percent) of its common stock owned by Research.

The principal business of Research is investigation and research with respect to new or existing enterprises, processes and products, and the furnishing of capital, by purchase of securities or otherwise, to companies (particularly small businesses) engaged in the conduct or development of new or existing enterprises, processes and products. Taunton, a manufacturer of jewelry novelties, is also engaged in military subcontracting for the production of small arms components.

The purchase by Taunton of its stock from Research is an integral part of certain transactions, the development of which is summarized as follows:

In January 1952 Research loaned Taunton $250,000 on its 5 percent note due July 15, 1953. The note was guaranteed by Richard S. Robie and secured by a pledge of all the outstanding Taunton stock except 405 shares (15 percent) received by Research as additional compensation for the loan. Subsequently the Taunton note was extended to December 31, 1952. The note was again extended to June 30, 1953, and for this second extension Research received an additional 405 shares (15 percent) of the common stock of Taunton out of the pledged stock. At the time of the original loan Richard S. Robie was the beneficial owner of all the outstanding stock of Taunton and at that time there were no officers, directors, or employees common to Taunton and Research. Subsequently, however, the Vice President of Research became a director of Taunton and intends to remain on Taunton's board until the described transactions are completed, although he left the employ of Research, effective December 1, 1953.

On June 30, 1953, the Taunton note became due and was unpaid. On September 24, 1953, Research accepted in payment thereof under an escrow arrangement, since discharged, $150,000 in cash and a note for $100,000 bearing interest at 5 percent and payable as follows: $50,000 on December 26, 1953; and $12,500 on March 31, June 30, September 30 and December 31, 1954. At the same time and under the same escrow arrangement Research accepted (1) in payment of interest on the $250,000 Taunton note a 5 percent note of Taunton in the sum of $20,833.33 payable quarterly on the last days of March, June, September and December, 1954, and (2) in payment of management and consulting fees due and payable to Research by Taunton a $20,000 5 percent note of Taunton payable quarterly on the same dates. The $100,000 note and the $20,833.33 note were unconditionally guaranteed by Richard S. Robie, and all the outstanding stock of Taunton other than the 810 shares or 30 percent owned by Research were pledged as security for said notes. The $20,000 note is not guaranteed or secured.

The transactions described in the preceding paragraph were in contemplation of Research's divestment of all its interest in Taunton, and at the same time and as an integral part of those transactions, Research agreed to sell and Taunton agreed to buy the 810 shares of Taunton common stock owned by Research for the sum of $12,631.80. Research states that the price of $12,631.80 for the Taunton stock is based upon the value per books of Taunton as of a date in the negotiations between Taunton and Research earlier than June 30, 1953, but Taunton's position had not changed materially during the intervening period. Research had carried the 810 shares of Taunton stock on its books at $.25 per share or $202.50 as of June 30, 1953, although as of September 30, 1953, Research revalued said stock at $15.594 per share or $12,631 in the light of the agreement with Taunton. In the absence of any market for Taunton stock book value on the books of Taunton was selected as the basis for the purchase. The 810 shares are to be held by Taunton as Treasury stock and are not to be reissued until all present indebtedness or any renewal or extension thereof has been paid in full.

Research and Taunton are, by definition, affiliated persons of each other under the act; hence Taunton is prohibited by the provisions of section 17 (a) (2) of the act from purchasing shares of its common stock from Research unless the Commission grants the application pursuant to section 17 (b) of the act.

Section 17 (a) of the act prohibits an affiliated person of a registered investment company, including an affiliate of such a person, from selling any security or other property to such registered company or to any company controlled by such registered company, subject to certain exceptions, unless the Commission upon application pursuant to section 17 (b) of the act, grants an exemption from the provisions of section 17 (a) of the act and finds that the terms of the proposed transaction, including the consideration to be paid, are reasonable and fair and do not involve overreaching on the part of anyone concerned, that the proposed transaction is consistent with the policy of each registered investment company concerned, as recited in its registration statement and reports filed under the act and is consistent with the general purposes of the act.

For a more detailed statement of the matters of fact and law asserted, all interested persons are referred to said application which is on file in the office of the Commission at Washington, D. C.

Notice is further given that any interested person may, not later than April 26, 1954, at 5:30 p. m., submit to the Commission in writing any facts bearing upon the desirability of a hearing on the matter and may request that a hearing be held, such request stating the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, the application may be granted as provided in Rule N-5 of the rules and regulations promulgated under the act.

By the Commission.

[File No. 70-3226]

WEST PENN POWER CO.

ORDER REGARDING ISSUE AND SALE OF FIRST MORTGAGE BONDS AT COMPETITIVE BIDDING

APRIL 13, 1954.

West Penn Power Company, a registered holding company and a public-utility subsidiary company of The West Penn Electric Company, also a registered holding company, having filed with this Commission an application-declaration pursuant to either sections 6 (b) or 7 of the Public Utility Holding Company Act of 1935 ("act") and Rule U-50 promulgated thereunder, regarding certain transactions, which are summarized as follows:

The Company proposes to issue and sell for cash after competitive bidding pursuant to Rule U-50, $12,000,000 principal amount of its First Mortgage Bonds Series P.

The net proceeds from the sale of the Series P Bonds are to be used by the Company for the construction of property additions and improvements.

The Series P Bonds are to be issued under the Indenture dated March 1, 1916, as amended and supplemented, between the Company and The Chase National Bank of the City of New York, as Trustee, and an indenture supplemental thereto to be dated as of April 1, 1954; are to be dated as of March 1, 1916 (as required by the Indenture); and are to mature on April 1, 1984. The price to the Company for the bonds (which shall be not less than 100 percent nor more than 102¾ percent of the principal amount thereof) and the coupon rate (which shall be a multiple of ⅛ percent) will be determined by the competitive bidding.

The application-declaration, as amended, states that the issue and sale of the bonds has been expressly authorized by the Pennsylvania Public Utility Commission, the State commission of the State in which applicant is organized and doing business.

Fees and expenses of West Penn Power Company are estimated as follows:

Price, Waterhouse & Co., independent accountants:	
Fees	$1,750.00
Expenses	26.64
Sullivan & Cromwell, counsel:	
Fees	10,000.00
Expenses	200.00
Printing	10,000.00
Charges of trustee	6,700.00
Federal stamp tax	13,200.00
Registration fee	1,248.00
Postage and other incidental expenses	1,852.00
Total	44,976.64

The fees and expenses of Simpson Thacher & Bartlett, counsel for the successful bidders, are estimated at $6,000 for fees and $75 for expenses, which amounts are to be paid by the successful bidders.

Notice of the filing of said application-declaration having been given in the manner prescribed by Rule U-23 and a hearing thereon not having been requested of or ordered by the Commission; and

The Commission finding that the applicable provisions of the act and the rules thereunder are satisfied, that it is not necessary to impose terms and conditions other than those set forth below, that the fees and expenses, if they do not exceed the estimates, are not unreasonable, and that the application-declaration, as amended, should be granted and permitted to become effective forthwith:

It is ordered, Pursuant to Rule U-23 and the applicable provisions of the act, that said application-declaration be, and the same hereby is, granted and permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24 and Rule U-50.

By the Commission.

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 29120]

CASTOR POMACE FROM TAFT, TEX., TO SOUTHERN TERRITORY

APPLICATION FOR RELIEF

APRIL 13, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Castor pomace, in packages or in bulk, carloads.

From: Taft, Texas.

To: Specified points in southern territory.

Grounds for relief: Rail competition, circuity, market competition, and to apply rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3746, supp. 152.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 29124]

FERTILIZER SOLUTIONS FROM VICKSBURG AND YAZOO, MISS., TO BRIGGS, IND.

APPLICATION FOR RELIEF

APRIL 13, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Fertilizer ammoniating solution and fertilizer nitrogen solution, in tank-car loads.

From: Vicksburg and Yazoo City, Miss.

To: Briggs, Ind.

Grounds for relief: Rail competition, circuity, market competition, and additional destination.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1366, supp. 23.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

ANHYDROUS AMMONIA FROM WYANDOTTE, MICH., TO WHITEWATER, WIS.

APPLICATION FOR RELIEF

APRIL 13, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Agent, for carriers parties to schedule listed below.

Commodities involved: Anhydrous ammonia, carloads and tank-car loads.

From: Wyandotte, Mich.

To: Whitewater, Wis.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: H. R. Hinsch, Agent, I. C. C. No. 4370, supp. 78.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. FEDERAL REGISTER

VOLUME 19 NUMBER 76

Washington, Tuesday, April 20, 1954

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10526

TRANSFERRING CERTAIN LANDS IN MISSISSIPPI FROM THE DEPARTMENT OF AGRICULTURE TO THE DEPARTMENT OF THE ARMY

By virtue of the authority vested in me by section 32 of Title III of the Bankhead-Jones Farm Tenant Act of July 22, 1937 (50 Stat. 522, 525; 7 U. S. C. 1011), and as President of the United States, and upon the recommendation of the Secretary of Agriculture, it is ordered as follows:

Subject to valid existing rights, the following-described lands, acquired and administered under Title III of the Bankhead-Jones Farm Tenant Act, are hereby transferred, together with any improvements thereon, to the Department of the Army for use, administration, and disposition in connection with the Grenada Dam and Reservoir Project, Mississippi:

A strip of land of varying width and one parcel of land lying and being situated in sections 25, 35, and 36, Township 24 North, Range 5 East, and in sections 2 and 3, Township 23 North, Range 5 East, Yalobusha Land Utilization Project, MS–LU–21, in Yalobusha County, Mississippi, more particularly described in four parts as follows:

PART 1B

A strip of land on each side of a center line being described as: Beginning at Station 227+44 on the north boundary of the SW ¼ of section 25, from which point the interior quarter section corner bears East, 217 feet distant, the north boundary of the SW ¼ being the north boundary of the strip of land herein described, and also being the southerly line of the property conveyed by Ed. Berry, *et al*, to the Chicago, St. Louis, and New Orleans Railroad Company, by deed dated May 22, 1948, run thence 50 feet on each side of the said center line, S. 30°23′ W., to Station 252+00; thence 75 feet on each side of the said center line, S. 30°23′ W., to Station 259+00; thence 50 feet on each side of the said center line, S. 30°23′ W., to Station 289+11 on the south boundary of the NE ¼ of section 35, from which point the southeast corner of the NE ¼ bears East, 781 feet distant, the said south boundary being the south boundary of the strip of land herein described; containing 14.96 acres, more or less.

PART 2B

A strip of land on each side of a center line being described as: Beginning at Station 299+15 on the east boundary of the NW¼ SE¼ of section 35, from which point the southeast corner of the NW¼SE¼ bears south, 498 feet distant, the said east boundary being the east boundary of the strip of land herein described, run thence 75 feet on each side of the said center line with a 1°00′ curve to the right, said curve being subtended by a chord that bears S. 42°15′ W., to Station 305+86 on the south boundary of the NW¼SE¼, from which point the southeast corner of the NW¼SE¼ bears East, 438 feet distant, the said south boundary being the south boundary of the strip of land herein described; containing 2.30 acres, more or less.

PART 3B

A strip of land on each side of a center line being described as: Beginning at Station 317+34 on the east boundary of the SW¼ of section 35, from which point the southeast corner of the SW¼ bears south, 549 feet distant, the said east boundary being the east boundary of the strip of land herein described, run thence 75 feet on each side of the said center line with a 1°00′ curve to the right to Station 327+90; thence continuing with said curve 150 feet to the north and 75 feet to the south to Station 328+50 on the south boundary of section 35, the said curve being subtended by a chord that bears S. 62°41′ W., the south boundary of section 35 being the south boundary of the strip of land herein described; containing 4.43 acres, more or less.

PART 4B

(1) A strip of land on each side of a center line being described as: Beginning at Station 331+90 on the east boundary of the W ½ NW ¼ of section 2, from which point the northwest corner of section 2 bears N. 84°05′ W., 1,330 feet distant, the said east boundary being the east boundary of the strip of land herein described, run thence 150 feet to the north of and 200 feet to the south of the said center line along a 1°00′ curve to the right to a P. T. at Station 335+45.06, the said curve being subtended by a chord that bears S. 72°27′ W.; thence 150 feet to the north and 200 feet to the south of the said center line, S. 74°13′ W., to Station 336+00; thence 200 feet on each side of the said center line, S. 74°13′ W., to Station 340+00; thence 200 feet to the north and 115 feet to the south of the said center line, S. 74°13′ W., to Station 342+00; thence 200 feet to the north

FEDERAL REGISTER

Published daily, except Sundays, Mondays, and days following official Federal holidays, by the Federal Register Division, National Archives and Records Service, General Services Administration, pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U. S. C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President. Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

The regulatory material appearing herein is keyed to the Code of Federal Regulations, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended August 5, 1953.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15¢) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, directly to the Government Printing Office, Washington 25, D. C.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

CFR SUPPLEMENTS

(For use during 1954)

The following Supplements are now available:

Titles 30–31 ($1.00)

Title 33 ($1.25)

Titles 44–45 ($0.75)

Previously announced: Title 3, 1953 Supp. ($1.50); Title 8 ($0.35); Titles 10–13 ($0.50); Title 16 ($1.00); Title 18 ($0.45); Titles 22–23 ($1.00); Title 24 ($0.75); Title 25 ($0.45); Titles 40–42 ($0.50); Title 49: Parts 1 to 70 ($0.60); Parts 71 to 90 ($0.65); Parts 91 to 164 ($0.45); Parts 165 to end ($0.60)

Order from Superintendent of Documents, Government Printing Office, Washington 25, D. C.

TITLE 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders), Department of Agriculture

[Docket No. AO226-A3-RO1]

PART 925—MILK IN THE PUGET SOUND, WASHINGTON MILK MARKETING AREA

ORDER AMENDING THE ORDER, AS AMENDED

§ 925.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order, and of the previously issued amendments thereto and all said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Puget Sound, Washington, marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient

Station 401+84 on the west boundary of the NW ¼ of section 3, from which point the southwest corner of the NW ¼ bears south, 750 feet distant, the said section line being the west boundary of the strip of land herein described; containing 35.75 acres, more or less. (2) A tract or parcel of land comprising that part of the NW ¼ of section 3, Township 23 North, Range 5 East, Yalobusha County, Mississippi, described as follows: Beginning at the southwest corner of the NW ¼ of section 3, run thence with the west boundary of section 3, north, 580 feet to the south right-of-way limits of the Illinois Central Railroad; run thence with said south right-of-way limits, N. 74°13' E; 2805 feet, to a point located on the east boundary of said NW ¼ of section 3; run thence with said east boundary, south, 1380 feet, to the southeast corner of said NW ¼ of section 3; run thence with the south boundary of said NW ¼ of section 3, West, 2710 feet, to the point of beginning; containing 61.0 acres, more or less.

The above-described lands aggregate approximately 118.44 acres.

DWIGHT D. EISENHOWER

THE WHITE HOUSE,
April 17, 1954.

[F. R. Doc. 54-3025; Filed, Apr. 19, 1954; 11:52 a. m.]

quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(b) *Additional findings.* It is hereby found and determined that good cause exists for making this amendatory order effective May 1, 1954. Such action is necessary in the public interest in order to reflect current marketing conditions and to insure the orderly marketing of available milk supplies. Accordingly, any further delay in the effective date of this order amending the order, as amended, will seriously impair the orderly marketing of milk in the Puget Sound, Washington, marketing area. The provisions of the said amendatory order are well known to handlers and producers, the public hearing having been held on August 10–11, 1953, and February 10, 1954, and a final decision on the amendment provisions having been issued March 25, 1954. Reasonable time under the circumstances has been afforded persons affected to prepare for its effective date. Therefore, it would be contrary to the public interest to delay the effective date of this amendatory order for 30 days after its publication in the FEDERAL REGISTER. (See sec. 4 (c) Administrative Procedure Act, Pub. Law 404, 79th Cong., 60 Stat. 237).

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order amending the order) of more than 50 percent of the volume of the milk covered by this order amending the order, as amended, which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of the producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who participated in a referendum on the question of approval of its issuance, and who during the determined representative period (January 1954) were engaged in the production of milk for sale in the said marketing area.

Order relative to handling. It is therefore ordered, that on and after the effective date hereof the handling of milk in the Puget Sound, Washington, marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended as follows:

1. Delete the last two sentences in § 925.6 (definition of "marketing area") and substitute therefor the following: "'District No. 1' of the marketing area shall include that part of the marketing area lying within the counties of King, Pierce, Snohomish, Thurston, and Grays Harbor. 'District No. 2' of the marketing area shall include that part of the marketing area lying within Whatcom County. 'District No. 3' of the marketing area shall include that part of the marketing area lying within the counties of Lewis and Pacific, and 'District No. 4' of the marketing area shall include that part of the marketing area lying within Skagit County."

2. Delete § 925.13 and substitute therefor the following:

§ 925.13 *Producer milk.* "Producer milk" or "milk received from producers" means milk qualified as described in § 925.12 and either received directly from a farm at a fluid milk plant or country plant or caused to be diverted by a handler for his account from such plant to a non-pool plant: *Provided*, That prior to August 1, 1954, milk so diverted shall be deemed to have been received by the diverting handler at the plant from which it was diverted: *And provided further*, That on and after August 1, 1954, any such milk either diverted to a non-pool plant or transferred pursuant to § 925.44 (a) (5) or (b) (5) shall be deemed to have been received by the diverting (or transferor) handler at the plant from which it was diverted (or so transferred), except that the application of §§ 925.53 and 925.81 to any such milk shall be made on the basis of the location of the plant of actual physical receipt, subject to the following conditions:

(a) Producer milk which is physically received from a farm at a plant(s) in one price district on not less than 60 percent of the days of its delivery during the month shall be priced as if received in such price district during the entire month;

(b) Producer milk which (1) was qualified under paragraph (a) of this section in one price district in each month during any August-December period, or (2) was not qualified under subparagraph (1) of this paragraph but which was delivered to a plant(s) in one price district on not less than 60 percent of the days of delivery from the date of first delivery of such milk through March 31, shall be priced during the next following April-June period as if received in such price district; and

(c) For purposes of applying the provisions of paragraphs (a) and (b) of this section in the case of a producer on every-other-day delivery, the days of non-delivery shall be considered as days of delivery.

3. Delete the language of § 925.44 through paragraph (a) (3) and substitute therefor the following:

§ 925.44 *Interplant movements.* Skim milk and butterfat transferred as any item specified in § 925.41 (a) (1) from a fluid milk plant or country plant to another plant shall be assigned (separately) to each class, in the following manner:

(a) From a country plant or fluid milk plant to a fluid milk plant: As Class I milk to the extent Class I milk is available at the transferee plant, subject to the following provisions:

(1) In the event the quantity transferred exceeds the total of receipts from producers and other handlers at the transferor plant, such excess shall be assigned last to the Class I available at the transferee plant;

(2) If more than one transferor plant is involved, the available Class I milk shall be assigned to the transferor plants in the following order:

(i) To fluid milk plants located in District No. 1;

(ii) To country plants located in District No. 1 or in the counties of Kitsap and Mason;

(iii) To fluid milk plants located in District No. 4;

(iv) To country plants located in District No. 4;

(v) To fluid milk plants located in District No. 2;

(vi) To country plants located in District No. 2;

(vii) To fluid milk plants not located in District No. 1, District No. 4, District No. 2, or the counties of Kitsap and Mason;

(viii) To country plants not located in District No. 1, District No. 4, District No. 2, or the counties of Kitsap and Mason;

(3) If Class I is not available in amounts equal to the sum of the quantities to be assigned pursuant to subparagraph (2) of this paragraph, the transferee handler may designate, within each of the eight categories of plants listed in such subparagraph, the plant(s) to which the available Class I milk shall be assigned.

4. Delete the language of § 925 44 (b) (2) and (3) and substitute therefor the following:

(2) If more than one transferor plant is involved, the available Class II milk shall be assigned to the transferor plant in the following order:

(i) To country plants not located in District No. 1, District No. 4, District No. 2, or the counties of Kitsap and Mason;

(ii) To fluid milk plants not located in District No. 1, District No. 4, District No. 2, or the counties of Kitsap and Mason;

(iii) To country plants in District No. 2;

(iv) To fluid milk plants in District No. 2;

(v) To country plants in District No. 4;

(vi) To fluid milk plants in District No. 4;

(vii) To country plants located in District No. 1 or in the counties of Kitsap and Mason; and

(viii) To fluid milk plants located in District No. 1 or in the counties of Kitsap and Mason.

(3) If Class II milk is not available in amounts equal to the sum of the quantities to be assigned pursuant to subparagraph (2) of this paragraph, the transferee handler may designate, within each of the eight categories of plants listed in such subparagraph, the plant(s) to which the available Class I milk shall be assigned.

5. Delete § 925.53 and substitute therefor the following:

§ 925.53 *Location adjustments to handlers on Class I milk.* In computing the value of each handler's milk pursuant to § 925.70 the following location adjustments shall be credited with respect to each hundredweight of skim milk and butterfat, respectively, in producer milk received (including milk diverted or transferred without prior physical receipt in accordance with the provisions of § 925.13) at a plant not located in District No. 1 or in the counties of Kitsap and Mason and classified as Class I milk: 45 cents at any plant located in Clallam or Jefferson Counties; 30 cents at any plant located in District No. 2; 20 cents at any plant located in District No. 4; and 40 cents at any other plant located outside of District No. 1 and the counties of Kitsap and Mason.

6. Delete § 925.70 (a) (6) and (b) and substitute therefor the following:

(6) Add, with respect to other source milk (including overage allocated to other source milk) received at each fluid milk plant and country plant of such handler in excess of the total volume of his Class II milk (except allowable shrinkage) at such plant, an amount computed by multiplying the hundredweight of such other source milk by the difference between the Class I milk and Class II milk prices adjusted, respectively, by the butterfat differentials provided in § 925.52 (based on the butterfat test of such other source milk), and in the case of a fluid milk plant or country plant not located in District No. 1 or in the counties of Kitsap or Mason, such difference shall be reduced as follows: 45 cents at any such plant located in Clallam or Jefferson Counties, 30 cents at any plant located in District No. 2, 20 cents at any plant located in District No. 4, and 40 cents at any other plant located outside of District No. 1 or the counties of Kitsap or Mason.

(b) The value of milk of each handler at any plant where only other source milk was received and from which, during the month, some other source milk was disposed of within the marketing area as Class I milk pursuant to § 925.41 (a) (1) shall be a sum of money computed by the market administrator by multiplying the hundredweight of such other source milk so disposed of by the difference between the Class I milk and Class II milk prices adjusted, respectively, by the butterfat differentials provided in § 925.52 (based on the butterfat test of such other source milk), and, in the event disposition within the marketing area was restricted to Districts Nos. 2, 3, or 4, such difference shall be reduced by 30 cents, 40 cents and 20 cents per hundredweight, respectively.

7. Delete § 925.81 through paragraph (a) and substitute therefor the following:

§ 925.81 *Location adjustment to producers.* In making payments to producers pursuant to § 925.80 (a) (1) and subject to the application of § 925.13 the following adjustments for location are applicable:

(a) Deductions may be made per hundredweight of base milk received from producers as follows: 45 cents at plants located in Clallam and Jefferson Counties, 30 cents at plants located in District No. 2, 20 cents at plants located in District No. 4, and 40 cents at other plants located outside of District No. 1 and the counties of Kitsap and Mason.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Issued at Washington, D. C., this 15th day of April to be effective on and after the 1st day of May 1954.

[SEAL] JOHN H. DAVIS,
Assistant Secretary of Agriculture.

[F. R. Doc. 54–2959; Filed, Apr. 19, 1954; 8:52 a. m.]

LIMITATION OF SHIPMENTS

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953; 18 F. R. 6767), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended, and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice and engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, is insufficient, and this amendment relieves restriction on the handling of lemons grown in the State of California or in the State of Arizona.

Order, as amended. The provisions in paragraph (b) (1) (ii) of § 953.639 (Lemon Regulation 532, 19 F. R. 2082) are hereby amended to read as follows:

(ii) District 2, 350 carloads.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 15th day of April 1954.

[SEAL] S. R. SMITH,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[F. R. Doc. 54–2960; Filed, Apr. 19, 1954; 8:52 a. m.]

TITLE 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Agricultural Research Service, Department of Agriculture

Subchapter C—Interstate Transportation of Animals and Poultry

[B. A. I. Order 383, Revised, Amdt. 25]

PART 76—HOG CHOLERA, SWINE PLAGUE, AND OTHER COMMUNICABLE SWINE DISEASES

SUBPART B—VESICULAR EXANTHEMA

CHANGES IN AREAS QUARANTINED

Pursuant to the provisions of sections 1 and 3 of the act of March 3, 1905, as amended (21 U. S. C. 123, 125), sections 1 and 2 of the act of February 2, 1903, as amended (21 U. S. C. 111–113, 120), and section 7 of the act of May 29, 1884, as amended (21 U. S. C. 117), § 76.27, as amended, Subpart B, Part 76, Title 9, Code of Federal Regulations (19 F. R. 1367, as amended), which contains a notice of the areas in which swine are affected with vesicular exanthema, a contagious, infectious, and communicable disease, and which quarantines such areas because of said disease, is hereby amended by adding a new paragraph (j) to read as follows:

(j) *Michigan:* That area consisting of Kimball, Port Huron, and Wales Townships in St. Clair County.

Effective date. The foregoing amendment shall become effective upon issuance.

The amendment includes the area specified in said new paragraph (j) of § 76.27, within the areas in which vesicular exanthema has been found to exist and in which a quarantine has been established. Hereafter, the restrictions pertaining to the interstate movement of swine, and carcasses, parts and offal of swine, from or through quarantined areas, contained in 9 CFR Part 76, Subpart B, as amended (18 F. R. 3636, as amended), will apply to such area.

The amendment imposes certain further restrictions necessary to prevent the spread of vesicular exanthema, a contagious, infectious, and communicable disease of swine, and must be made effective immediately to accomplish its purpose in the public interest. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

(Secs. 4, 8, 23 Stat. 22, as amended, sec. 2, 32 Stat. 792, as amended, secs. 1, 3, 33 Stat. 1264, as amended, 1265, as amended; 21 U. S. C. 120, 111, 123, 125. Interprets or applies sec. 7, 23 Stat. 32, as amended; 21 U. S. C. 117)

Done at Washington, D. C., this 14th day of April 1954.

[SEAL] M. R. CLARKSON,
Acting Administrator,
Agricultural Research Service.

TITLE 14—CIVIL AVIATION

Chapter I—Civil Aeronautics Board

Subchapter A—Civil Air Regulations

[Amdt. 3-12; Civil Air Regulations]

PART 3—AIRPLANE AIRWORTHINESS; NORMAL, UTILITY, AND ACROBATIC CATEGORIES

MISCELLANEOUS AMENDMENTS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of April 1954.

A study of the administrative portions of Part 3 of the Civil Air Regulations indicates that they do not set forth in sufficient detail and clarity the scope of the part and the choice of regulations applicable to issuance of and changes in type certificates. This has caused some difficulty in the administration of the regulations with respect to these matters. This amendment is concerned mainly with setting forth clearly the scope of the part, § 3.0, and those regulations that are applicable to the issuance of and change to a type certificate. It also makes several other minor changes.

Although no basic change in policy from that followed in the past is contemplated, this amendment specifies in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the rules regarding the designation of applicable regulations, § 3.11, apply not only to a new airplane type for which application for a type certificate is made but also to any type irrespective of the date of original application for a type certificate. For example, the provisions which require, or which permit the applicant to elect, compliance with newer regulations would be effective not only to new type airplanes but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the airplane need not comply with any regulations made effective subsequent to the date of application for a type certificate. A significant clarification is being made which defines those changes in an airplane type which are sufficiently extensive to warrant treating it as a new type. Another important change is the establishment of a time limitation of 3 years for the effectiveness of an application for type certification. The amendments to the other administrative provisions, §§ 3.12, 3.13, and 3.19, also include minor changes for purposes of clarification. In addition to the proposed changes to the administrative provisions of Part 3, two other changes are being made with respect to combustion heaters and fire precautions for cabin interiors (§ 3.388), which are considered minor in nature.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 3 of the Civil Air Regulations (14 CFR, Part 3, as amended) effective May 18, 1954.

1. By amending § 3.0 to read as follows:

§3.0 *Applicability of this part.* This part establishes standards with which compliance shall be demonstrated for the issuance of and changes to type certificates for normal, utility, and acrobatic category airplanes. This part, until superseded or rescinded, shall apply to all airplanes for which applications for type certification under this part were made between the effective date of this part (November 13, 1945) and March 31, 1953. For applications for a type certificate made after March 31, 1953, this part shall apply only to airplanes which have a maximum weight of 12,500 pounds or less.

2. By amending § 3.11 to read as follows:

§ 3.11 *Designation of applicable regulations.* The provisions of this section shall apply to all airplane types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the airplane shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required, except that for applications pending on May 1, 1954, such three-year period shall commence on that date. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter, a change to a type certificate (see § 3.13 (b)) may be accomplished, at the option of the holder of the type certificate, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 3.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a component, equipment installation, or system installation of the airplane, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 3.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

NOTE: Examples of new or redesigned components and installations which might require compliance with regulations in effect on the date of application for approval, are: New powerplant installation which is likely to introduce additional fire or operational hazards unless additional protective measures are incorporated; the installation of an auto-pilot or a new electric power system.

(e) If changes listed in subparagraphs (1) through (3) of this paragraph are made, the airplane shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in the number of engines;

(2) A change to engines employing different principles of operation or propulsion;

(3) A change in design, configuration, power, or weight which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

3. By amending § 3.12 to read as follows:

§ 3.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 3.11.)

4. By amending § 3.13 (b) by deleting the parenthetical reference "(See also § 3.11 (a).)" at the end of the paragraph.

5. By amending § 3.13 by adding a new paragraph (c) to read as follows:

§ 3.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 3.12 shall be considered as incorporated in the type certificate as though set forth in full.

6. By amending § 3.19 to read as follows:

§ 3.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 3.11 (d) and (e), and Part 1 of this subchapter.)

7. By amending § 3.388 (a) by deleting the second sentence and inserting in lieu thereof the following: "In compartments where smoking is to be permitted, the wall and ceiling linings, the covering of all upholstering, floors, and furnishings shall be flame-resistant."

8. By amending § 3.388 (b) to read as follows:

§ 3.388 *Fire precautions.* • • •

(b) *Combustion heaters.* If combustion heaters are installed, they shall be of an approved type. The installation shall comply with applicable parts of the powerplant installation requirements covering fire hazards and precautions. All applicable requirements concerning fuel tanks, lines, and exhaust systems shall be considered.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 603, 52 Stat. 1001, 1009, as amended; 49 U. S. C. 551, 553)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

[Amdt. 4b-1, Civil Air Regulations]

PART 4b—AIRPLANE AIRWORTHINESS; TRANSPORT CATEGORIES

MISCELLANEOUS AMENDMENTS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of April 1954.

A study of the administrative portions of Part 4b of the Civil Air Regulations indicates that they do not set forth in sufficient detail and clarity the scope of the part and the choice of regulations applicable to issuance of and changes in type certificates. This has caused some difficulty in the administration of the regulations with respect to these matters. This amendment is concerned mainly with setting forth clearly the scope of the part, § 4.0, and those regulations that are applicable to the issuance of and change to a type certificate. It also makes several other changes.

Although no basic change in policy from that followed in the past is contemplated, this amendment specifies in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the rules regarding the designation of applicable regulations, § 4b.11, apply not only to a new airplane type for which application for type certificate is made but also to all types irrespective of the date of original application for a type certificate. For example, the provisions which require, or which permit the applicant to elect, compliance with newer regulations would be effective not only to new type airplanes but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the airplane need not comply with any regulations made effective subsequent to the date of application for a type certificate. A significant clarification is being made which defines those changes in an airplane type which are sufficiently extensive to warrant treating it as a new type. Another important change is the establishment of a time limitation of 5 years for the effectiveness of an application for type certification. The amendments to the other administrative provisions, §§ 4.12, 4.13, and 4.19, also include minor changes for purposes of clarification.

The presently effective regulations provide for the location of the pilot and his controls and instruments with respect to the plane of rotation of the propellers, etc. Since in certain instances the airworthiness regulations require flight crew personnel in addition to the pilot, these provisions (§§ 4b.350, 4b.351, and 4b.353) are being amended to make them applicable to the minimum flight crew which is required for safe operation of the airplane.

Part 4b does not contain specific criteria for the installation of reversible propeller control systems. This amendment adds § 4b.407 which requires the application of the principle of fail-safe design to propeller reversing systems in newly certificated transport category airplanes. The intent of the rule is to preclude unwanted reversing of the propeller during normal or emergency operation in case of a single failure or malfunction of the system. It is also intended that single failures or malfunctions be considered in conjunction with manipulation of the controls by the pilot, and that failure of primary structural parts, the occurrence of which is expected to be extremely remote, need not be considered.

A change is being made to the requirements which establish the power supply needed for operation of equipment, systems, and installations during normal and power failure conditions. The change makes clear that the essential power load requirements under power failure conditions may be reduced in conjunction with a monitoring procedure and, for the two-engine-inoperative condition, permits taking into account for power supply requirements only those loads which are necessary for controlled flight.

Several additional changes of relatively minor nature are being made with the intent of clarifying the regulations.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 4b of the Civil Air Regulations (14 CFR, Part 4b, as amended) effective May 18, 1954:

1. By amending § 4b.0 by deleting the words "a type certificate and inserting in lieu thereof the words "and changes to type certificates".

2. By amending § 4b.11 to read as follows:

§ 4b.11 *Designation of applicable regulations.* The provisions of this section shall apply to all airplane types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the airplane shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds five years, a new application for type certificate shall be required, except that for applications pending on May 1, 1954, such five-year period shall commence on that date. At the option of the applicant, a new application may be filed prior to the expiration of the five-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter, a change to the type certificate (see § 4b.13 (b)) may be accomplished, at the option of the holder of the type certificate, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 4b.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a component, equipment installation, or system installation of the airplane, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 4b.13 (c) do not provide complete

standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

NOTE: Examples of new or redesigned components and installations which might require compliance with regulations in effect on the date of application for approval, are: New powerplant installation which is likely to introduce additional fire or operational hazards unless additional protective measures are incorporated; the installation of an auto-pilot, a pressurization system, or a new electric power system.

(e) If changes listed in subparagraphs (1) through (3) of this paragraph are made, the airplane shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application for type certificate shall be required and the regulations effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in the number of engines;

(2) A change to engines employing different principles of operation or propulsion;

(3) A change in design, configuration, power, or weight which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

3. By amending § 4b.12 to read as follows:

§ 4b.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 4b.11.)

4. By amending § 4b.13 (b) by deleting the parenthetical reference: "(See also § 4b.11 (a).)" at the end of the paragraph.

5. By amending § 4b.13 by adding new paragraph (c) to read as follows:

§ 4b.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 4b.12 shall be considered as incorporated in the type certificate as though set forth in full.

6. By amending § 4b.19 to read as follows:

§ 4b.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 4b.11 (d) and (e), and Part 1 of this subchapter.)

7. By amending § 4b.350 by adding the following general paragraph preceding paragraph (a):

§ 4b.350 *Pilot compartment; general.* All references to flight crew in §§ 4b.350 through 4b.353 shall mean the minimum flight crew established in accordance with § 4b.720.

8. By amending § 4b.350 (a) to read as follows:

§ 4b.350 *Pilot compartment; general.* • • •

(a) The arrangement of the pilot compartment and its appurtenances shall provide safety and assurance that the flight crew will be able to perform all of their duties and operate the controls in the correct manner without unreasonable concentration and fatigue.

9. By amending § 4b.350 (b) by deleting the words "pilots" and inserting in lieu thereof the words "flight crew".

10. By amending § 4b.351 (a) (2) by deleting the words "pilot's vision" and inserting in lieu thereof the words "the flight crew's normal duties".

11. By amending § 4b.353 (c) by deleting in two instances the word "pilots'" and inserting in lieu thereof the words "flight crew's".

12. By amending § 4b.362 (e) (7) by adding the word "approved" at the beginning of the phrase "means shall be provided to assist the occupants in descending to the ground".

13. By adding a new § 4b.407 to read as follows:

§ 4b.407 *Propeller reversing system.* The propeller reversing system, if installed, shall be such that no single failure or malfunctioning of the system during normal or emergency operation will result in unwanted travel of the propeller blades to a position substantially below the normal flight low-pitch stop. Failure of structural elements need not be considered if occurrence of such failure is expected to be extremely remote.

14. By amending § 4b.604 (m) by deleting the words "engine cylinder displacement" and inserting in lieu thereof the words "cylinder displacement of the engine".

15. By amending § 4b.606 (c) by adding a new subparagraph (4) to read as follows:

§ 4b.606 *Equipment, systems, and installations.* • • •

(c) *Power supply.* • • •

(4) In determining the probable operating combinations and durations of essential loads for the partial power failure conditions prescribed in subparagraphs (2) and (3) of this paragraph, it shall be permissible to assume that the power loads are reduced in accordance with a monitoring procedure which is consistent with safety in the types of operations authorized. If a particular load is not required to maintain controlled flight it need not be considered for the two-engine-inoperative condition on airplanes with four or more engines as prescribed in subparagraph (3) of this paragraph.

(Sec. 205; 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 606, 52 Stat. 1007, 1009, as amended; 49 U. S. C. 551, 553)

By the Civil Aeronautics Board.

[Amdt. 5-2, Civil Air Regulations]

PART 5—GLIDER AIRWORTHINESS

MISCELLANEOUS AMENDMENTS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of April 1954.

A study of the administrative portions of Part 5 of the Civil Air Regulations indicates that they do not set forth in sufficient detail and clarity the scope of the part and the choice of regulations applicable to issuance of and changes in type certificates. This has caused some difficulty in the administration of the regulations with respect to these matters. This amendment is concerned mainly with setting forth clearly the scope of the part, § 5.0, and those regulations that are applicable to the issuance of and change to a type certificate.

Although no basic change in policy from that followed in the past is contemplated, this amendment specifies in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the rules regarding the designation of applicable regulations (§ 5.11) apply not only to a new glider type for which application for a type certificate is made but also to all types irrespective of the date of original application for a type certificate. For example, the provisions which require, or which permit the applicant to elect, compliance with newer regulations would be effective not only to new type gliders but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the glider need not comply with any regulations made effective subsequent to the date of application for a type certificate. A significant clarification is being made which will require that when sufficiently extensive changes are made in a glider type, it shall be treated as a new type. Another important change is the establishment of a time limitation of 3 years for the effectiveness of an application for type certification. The amendments to the other administrative provisions, §§ 5.12, 5.13, and 5.19, also include minor changes for purposes of clarification.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 5 of the Civil Air Regulations (14 CFR, Part 5, as amended) effective May 18, 1954.

1. By amending § 5.0 by inserting the words "and changes to" between the words "issuance of" and "type certificates" and by adding the following date in parentheses "(March 5, 1952)" after the phrase "effective date of this part".

2. By amending § 5.11 to read as follows:

§ 5.11 *Designation of applicable regulations.* The provisions of this section shall apply to all glider types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the glider shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required, except that for applications pending on May 1, 1954, such three-year period shall commence on that date. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter, a change to the type certificate (see § 5.13 (b)) may be accomplished, at the option of the holder of the type certificate, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 5.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a component, equipment installation, or system installation of the glider, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 5.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

(e) If a change in design, configuration, or weight is made which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations, the glider shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

3. By amending § 5.12 to read as follows:

§ 5.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 5.11.)

4. By amending § 5.13 (b) by deleting the parenthetical reference "(See also § 5.11 (a).)" at the end of the paragraph.

5. By amending § 5.13 by adding new paragraph (c) to read as follows:

§ 5.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 5.12 shall be considered as incorporated in the type certificate as though set forth in full.

6. By amending § 5.19 to read as follows:

§ 5.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 5.11 (d) and (e), and Part 1 of this subchapter.)

(Sec. 205; 52 Stat. 934; 49 U. S. C. 425. Interpret or apply secs. 601, 603, 52 Stat. 1007, 1009, as amended; 49 U. S. C. 551, 553)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

[Amdt 6-6, Civil Air Regulations]

PART 6—ROTORCRAFT AIRWORTHINESS

MISCELLANEOUS AMENDMENTS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of April 1954.

A study of the administrative portions of Part 6 of the Civil Air Regulations indicates that they do not set forth in sufficient detail and clarity the scope of the part and the choice of regulations applicable to issuance of and changes in type certificates. This has caused some difficulty in the administration of the regulations with respect to these matters. This amendment is concerned mainly with setting forth clearly the scope of the part, § 6.0, and those regulations that are applicable to the issuance of and change to a type certificate. It also makes several other changes.

Although no basic change in policy from that followed in the past is contemplated, this amendment specifies in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the rules regarding the designation of applicable regulations, § 6.11, apply not only to a new rotocraft type for which application for a type certificate is made but also to all types irrespective of the date of original application for a type certificate. For example, the provisions which require, or which permit the applicant to elect, compliance with newer regulations would be effective not only to new type rotorcraft but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the rotorcraft need not comply with any regulations made effective subsequent to the date of application for a type certificate. A signifiant clarification is being made which defines those changes in a rotorcraft type which are sufficiently extensive to warrant treating it as a new type. Another important change is the establishment of a time limitation of 3 years for the effectiveness of an application for type certification. The proposed amendments to the other administrative provisions, §§ 6.12, 6.13, and 6.19, also include minor changes for purposes of clarification.

Currently effective § 6.103 (a) requires a rotor blade high-pitch limiting device designed to prevent the rotor rpm from dropping below a safe minimum. Difficulty has been encountered in complying with this requirement as it is presently worded. When the limiting device is set at sea level at relatively low temperature conditions it limits the use of full available power at higher altitudes and temperatures. In order to overcome the difficulty which has been encountered with the language and retain the original intent of the regulations, this amendment permits the use of means, other than a high-pitch limiting device, to accomplish the intended results.

Presently effective requirements with respect to the rotor drive and control mechanism endurance tests do not specify the condition in which the various parts must be at the conclusion of the tests in order to be considered acceptable. The intent of these provisions, § 6.412 (a), is being made clear by requiring that all parts be in serviceable condition at the conclusion of the tests.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 6 of the Civil Air Regulations (14 CFR, Part 6, as amended) effective May 18, 1954:

1. By amending § 6.0 by inserting the words "and changes to" between the words "issuance of" and "type certificates", and by adding the following date in parentheses "(May 24, 1946)" after the phrase "effective date of this part".

2. By amending § 6.11 to read as follows:

§ 6.11 *Designation of applicable regulations.* The provisions of this section shall apply to all rotorcraft types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the rotorcraft shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required, except that for applications pending on May 1, 1954, such three-year period shall commence on that date. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter, a change to the type certificate (see § 6.13 (b)) may be accomplished, at the option of the holder of the type certificate, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 6.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a component, equipment installation, or system installation of the rotorcraft, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 6.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

NOTE: Examples of new or redesigned components and installations which might require compliance with regulations in effect on the date of application for approval, are: New powerplant installation which is likely to introduce additional fire or operational hazards unless additional protective measures are incorporated; the installation of a new rotor system or a new electric power system.

(e) If changes listed in subparagraphs (1) through (3) of this paragraph are made, the airplane shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in the number of engines or rotors;

(2) A change to engines or rotors employing different principles of operation or propulsion;

(3) A change in design, configuration, power, or weight which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

3. By amending §6.12 to read as follows:

§ 6.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 6.11.)

4. By amending § 6.13 (b) by deleting the parenthetical reference: "(See also § 6.11 (a).)" at the end of the paragraph.

5. By amending § 6.13 by adding new paragraph (c) to read as follows:

§ 6.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 6.12 shall be considered as incorporated in the type certificate as though set forth in full.

6. By amending § 6.19 to read as follows:

§ 6.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 6.11 (d) and (e), and Part 1 of this subchapter.)

7. By amending § 6.103 (a) by deleting the last two sentences and inserting in lieu thereof the following: "A means shall be provided to prevent rotational speeds substantially less than the approved minimum rotor rpm in any flight condition with full throttle and with pitch control of the main rotor(s) in the high-pitch position. It shall be acceptable for such means to allow the use of higher pitch in an emergency, provided that the means incorporate provisions to prevent inadvertent transition from the normal operating range to the higher-pitch angles."

8. By amending § 6.412 (a) by adding at the end of the paragraph the following sentence: "At the conclusion of the endurance testing, all parts shall be in a serviceable condition."

(Sec. 205; 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 603, 52 Stat. 1007, 1009, as amended; 49 U. S. C. 551, 553)

By the Civil Aeronautics Board.

[Amdt. 13-2, Civil Air Regulations]

PART 13—AIRCRAFT ENGINE AIRWORTHINESS

MISCELLANEOUS AMENDMENTS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of April 1954.

A study of the administrative portions of Part 13 of the Civil Air Regulations includes that they do not set forth in sufficient detail and clarity the scope of the part and the choice of regulations applicable to issuance of and changes in type certificates. This has caused some difficulty in the administration of the regulations with respect to these matters. This amendment is concerned mainly with setting forth clearly the scope of the part, § 13.0, and those regulations that are applicable to the issuance of and change to a type certificate.

Although no basic change in policy from that followed in the past is contemplated, this amendment specifies in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the rules regarding the designation of applicable regulations, § 13.11, apply not only to a new engine type for which application for a type certificate is made but also to all types irrespective of the date of original application for a type certificate. For example, the provisions which require, or which permit the applicant to elect, compliance with newer regulations would be effective not only to new type engines but also to all existing types certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the engine need not comply with any regulations made effective subsequent to the date of application for a type certificate. A significant clarification is being made which defines those changes in an engine type which are sufficiently extensive to warrant treating it as a new type. Another important change is the establishment of a time limitation of 3 years for the effectiveness of an application for type certification. The amendments to the other administrative provisions, §§ 13.12, 13.13, and 13.19, also include minor changes for the purposes of clarification.

The present requirements do not sufficiently define the conditions under which accelerations and decelerations must be accomplished. This amendment makes clear that in performing these operations the power control lever must be moved from one extreme position to the other in not more than one second. An exception is made to allow as long as two seconds for propeller turbines where more than one regime of control lever motion is scheduled. The change also makes clear that accelerations or decelerations, whichever the case may be, must be accomplished in changing power settings during the take-off and idling operations tests.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 13 of the Civil Air Regulations (14 CFR Part 13, as amended) effective May 18, 1954:

1. By amending § 13.0 by inserting the words "and changes too" between the words "issuance of" and "type certificates", and by adding the following date in parentheses "(August 20, 1938)" after the phrase "effective date of this part".

2. By amending § 13.11 to read as follows:

§ 13.11 *Designation of applicable regulations.* The provisions of this section shall apply to all engine types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the engine shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required, except that for applications pending on May 1, 1954, such three-year period shall commence on that date. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator, pursuant to § 1.24 of this subchapter, a change to the type certificate (see § 13.13 (b)) may be accomplished, at the option of the holder of the type certificate, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 13.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a major component of the engine, and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 13.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

(e) If changes listed in subparagraphs (1) and (2) of this paragraph are made, the engine shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in the principle of operation;

(2) A change in design, configuration, power limitations, or speed limitations, which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

3. By amending § 13.12 to read as follows:

§ 13.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 13.11.)

4. By amending § 13.13 (b) by deleting the parenthetical reference: "(See also § 13.11 (a).)" at the end of the sentence.

5. By amending § 13.13 by adding a new paragraph (c) to read as follows:

§ 13.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 13.12 shall be considered as incorporated in the type certificate as though set forth in full.

6. By amending § 13.19 to read as follows:

§ 13.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 13.11 (d) and (e), and Part 1 of this subchapter.)

7. By amending § 13.254 (a) by adding after the first sentence the following sentence: "In changing the power setting after each period, the power-control lever shall be moved in the manner prescribed in paragraph (f) of this section."

8. By amending § 13.254 (f) by adding at the end of the paragraph the following sentence: "In complying with the provisions of this paragraph the power-control lever shall be moved from one extreme position to the other in not more than 1 second, except where different regimes of control operations are incorporated necessitating scheduling of the power-control lever motion in going from one extreme position to the other, a longer period of time shall be acceptable but in no case shall this time exceed 2 seconds."

(Sec. 205; 52 Stat. 984; 49 U. S. C. 425. Interpret or apply §§ 601, 603; 52 Stat. 1007, 1009, as amended; 49 U. S. C. 551, 555)

By the Civil Aeronautics Board.

[Amdt. 14-2, Civil Air Regulations]

PART 14—AIRCRAFT PROPELLER AIRWORTHINESS

MISCELLANEOUS AMENDMENTS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of April 1954.

A study of the administrative portions of Part 14 of the Civil Air Regulations indicates that they do not set forth in sufficient detail and clarity the scope of the part and the choice of regulations applicable to issuance of and changes in type certificates. This has caused some difficulty in the administration of the regulations with respect to these matters. This amendment is concerned mainly with setting forth clearly the scope of the part, § 14.0, and those regulations that are applicable to the issuance of and change to a type certificate.

Although no basic change in policy from that followed in the past is contemplated, this amendment specifies in more detail the prerogatives of the applicant in choosing the regulations. It should be noted that the rules regarding the designation of applicable regulations, § 14.11, apply not only to a new propeller type for which application for a type certificate is made but also to all types irrespective of the date of original application for a type certificate. For example, the provisions which require, or which permit the applicant to elect, compliance with newer regulations would be effective not only to new type propellers but also to all existing types

certificated under this part. This provision in no way negates the long standing rule that, except in unusual cases, the propeller need not comply with any regulations made effective subsequent to the date of application for a type certificate. A significant clarification is being made which defines those changes in a propeller type which are sufficiently extensive to warrant treating it as a new type. Another important change is the establishment of a time limitation of 3 years for the effectiveness of an application for type certification. The amendments to the other administrative provisions, §§ 14.12, 14.13, and 14.19, also include minor changes for the purposes of clarification.

In addition, this amendment adds a new requirement which prescribes that reversible propeller designs incorporate features within themselves or be adaptable to a reversing system in an airplane which is compatible with the principle of fail-safe design (§ 14.103). The intent of this rule is to assure that new reversible propeller designs will incorporate features which will preclude unwanted reversing during normal or emergency operation in case of a single failure or malfunctioning of the system when installed in an airplane. It is not intended by this rule to consider the failure of primary structural parts, the occurrence of which is expected to be extremely remote.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 14 of the Civil Air Regulations (14 CFR, Part 14, as amended) effective May 18, 1954:

1. By amending § 14.0 by inserting the words "and changes to" between the words "issuance of" and "type certificates", and by adding the following date in parentheses "(August 20, 1938)" after the phrase "effective date of this part".

2. By amending § 14.11 to read as follows:

§ 14.11 *Designation of applicable regulations.* The provisions of this section shall apply to all propeller types certificated under this part irrespective of the date of application for type certificate.

(a) Unless otherwise established by the Board, the propeller shall comply with the provisions of this part together with all amendments thereto effective on the date of application for type certificate, except that compliance with later effective amendments may be elected or required pursuant to paragraphs (c), (d), and (e) of this section.

(b) If the interval between the date of application for type certificate and the issuance of the corresponding type certificate exceeds three years, a new application for type certificate shall be required, except that for applications pending on May 1, 1954, such three-year period shall commence on that date. At the option of the applicant, a new application may be filed prior to the expiration of the three-year period. In either instance the applicable regulations shall be those effective on the date of the new application in accordance with paragraph (a) of this section.

(c) During the interval between filing the application and the issuance of a type certificate, the applicant may elect to show compliance with any amendment of this part which becomes effective during that interval, in which case all other amendments found by the Administrator to be directly related shall be complied with.

(d) Except as otherwise provided by the Board, or by the Administrator pursuant to § 1.24 of this subchapter, a change to the type certificate (see § 14.13 (b)) may be accomplished, at the option of the holder of the type certificate, either in accordance with the regulations incorporated by reference in the type certificate pursuant to § 14.13 (c), or in accordance with subsequent amendments to such regulations in effect on the date of application for approval of the change, subject to the following provisions:

(1) When the applicant elects to show compliance with an amendment to the regulations in effect on the date of application for approval of a change, he shall show compliance with all amendments which the Administrator finds are directly related to the particular amendment selected by the applicant.

(2) When the change consists of a new design or a substantially complete redesign of a major component of the propeller and the Administrator finds that the regulations incorporated by reference in the type certificate pursuant to § 14.13 (c) do not provide complete standards with respect to such change, he shall require compliance with such provisions of the regulations in effect on the date of application for approval of the change as he finds will provide a level of safety equal to that established by the regulations incorporated by reference at the time of issuance of the type certificate.

(e) If changes listed in subparagraphs (1) through (3) of this paragraph are made, the propeller shall be considered as a new type, in which case a new application for type certificate shall be required and the regulations together with all amendments thereto effective on the date of the new application shall be made applicable in accordance with paragraphs (a), (b), (c), and (d) of this section.

(1) A change in number of blades;

(2) A change in the principle of pitch change operation;

(3) A change in design which the Administrator finds is so extensive as to require a substantially complete investigation of compliance with the regulations.

3. By amending § 14.12 to read as follows:

§ 14.12 *Recording of applicable regulations.* The Administrator, upon the issuance of a type certificate, shall record the applicable regulations with which compliance was demonstrated. Thereafter, the Administrator shall record the applicable regulations for each change in the type certificate which is accomplished in accordance with regulations other than those recorded at the time of issuance of the type certificate. (See § 14.11.)

4. By amending § 14.13 (b) by deleting the parenthetical reference "(See also § 14.11 (a).)" at the end of the paragraph.

5. By amending § 14.13 by adding new paragraph (c) to read as follows:

§ 14.13 *Type certificate.* • • •

(c) The applicable provisions of this part recorded by the Administrator in accordance with § 14.12 shall be considered as incorporated in the type certificate as though set forth in full.

6. By amending § 14.19 to read as follows:

§ 14.19 *Changes in type design.* (For requirements with regard to changes in type design and the designation of applicable regulations therefor, see § 14.11 (d) and (e), and Part 1 of this subchapter.)

7. By adding a new § 14.103 to read as follows:

§14.103 *Reversible propellers.* Reversible propellers shall be adaptable for use with a reversing system in an airplane so that no single failure or malfunctioning of the reversing system during normal or emergency operation will result in unwanted travel of the propeller blades to a position substantially below the normal flight low-pitch stop. Failure of structural elements need not be considered if the occurance of such failure is expected to be extremely remote.

(Sec. 205; 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 603, 52 Stat. 1007, 1009, as amended; 49 U. S. C. 551, 553)

By the Civil Aeronautics Board.

[Amdt. 40-6, Civil Air Regulations]

PART 40—SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

EN ROUTE LIMITATIONS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of April 1954.

Currently effective § 40.75 pertaining to en route limitations with two engines inoperative, permits the assumption that the second engine will become inoperative 90 minutes after the point of departure. This could lead to an unsafe operation in long overwater flights. The present requirements are not clear also with respect to the rate of climb required when the failure of the engine occurs at an altitude which is above the minimum prescribed altitude. This amendment clarifies these provisions by prescribing that both engines must be considered to fail simultaneously at the point along the route which has the most critical effect on the take-off weight. It also prescribes that if the altitude at which engine failure occurs is above the minimum prescribed altitude, a descent may be assumed to an altitude at which the rate of climb is zero, provided that the latter is sufficiently above the minimum prescribed altitude to assure compliance, during the subsequent portion of the flight, with the prescribed rate of climb at the prescribed minimum altitude.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 40 of the Civil Air Regulations (14 CFR, Part 40, as amended) effective, May 18, 1954.

By amending § 40.75 to read as follows:

§ 40.75 *En route limitations; two engines inoperative.* The provisions of this section shall apply only to airplanes certificated in accordance with the performance requirements of Part 4b of this subchapter. No airplane having four or more engines shall be flown along an intended track except under the conditions of either paragraph (a) or paragraph (b) of this section.

(a) No place along the intended track shall be more than 90 minutes away from an available landing area at which a landing can be made in accordance with the requirements of § 40.78, assuming all engines to be operating at cruising power.

(b) The take-off weight shall not be greater than that which would permit the airplane, with the two critical engines inoperative, to have a rate of climb in feet per minute equal to 0.01 V_{50}^2 (V_{50} being expressed in miles per hour) along all points of the route, from the point where the two engines are assumed to fail simultaneously to the landing area, either at an altitude of 1,000 feet above the elevation of the highest ground or obstruction within 10 miles on either side of the intended track or at an altitude of 5,000 feet, whichever is higher. The point where the two engines are assumed to fail shall be that point along the route which is most critical with respect to the take-off weight. In showing compliance with this prescribed rate of climb, the following shall apply:

(1) It shall be permissible to consider that the weight of the airplant as it proceeds along its intended track is progressively reduced by normal consumption of fuel and oil with all engines operating up to the point where the two engines are assumed to fail and with two engines operating beyond that point.

(2) Where the engines are assumed to fail at an altitude above the prescribed minimum altitude, compliance with the prescribed rate of climb at the prescribed minimum altitude need not be shown during the descent from the cruising altitude to an altitude at which the rate of descent becomes zero, if the latter is sufficiently above the prescribed minimum altitude to assure compliance with the prescribed rate of climb at the prescribed minimum altitudes during the subsequent portion of the flight.

(3) If fuel jettisoning is provided, the airplane's weight at the point where the two engines are assumed to fail shall be considered to be not less than that which would include sufficient fuel to proceed to an available landing area at which a landing can be made in accordance with the requirements of § 40.78 and to arrive there at an altitude of at least 1,000 feet directly over the landing area.

(Sec. 205; 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 52 Stat. 1007, 1010, as amended; 49 U. S. C. 551, 554)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN, *Secretary.*

[F. R. Doc. 54-2973; Filed, Apr 19, 1954; 8:55 a. m.]

[Amdt. 41-12, Civil Air Regulations]

PART 41—CERTIFICATION AND OPERATION RULES FOR SCHEDULED AIR CARRIER OPERATIONS OUTSIDE THE CONTINENTAL LIMITS OF THE UNITED STATES

EN ROUTE LIMITATIONS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of April 1954.

Currently effective § 41.30 pertaining to en route limitations with two engines inoperative, permits the assumption that the second engine will become inoperative 90 minutes after the point of departure. This could lead to an unsafe operation in long overwater flights. The present requirements are not clear also with respect to the rate of climb required when the failure of the engines occurs at an altitude which is above the minimum prescribed altitude. This amendment clarifies these provisions by prescribing that both engines must be considered to fail simultaneously at the point along the route which has the most critical effect on the take-off weight. It also prescribes that if the altitude at which engine failure occurs is above the minimum prescribed altitude, a descent may be assumed to an altitude at which the rate of climb is zero, provided that the latter is sufficiently above the minimum prescribed altitude to assure compliance, during the subsequent portion of the flight, with the prescribed rate of climb at the prescribed minimum altitude.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 41 of the Civil Air Regulations (14 CFR, Part 41, as amended) effective May 18, 1954.

By amending § 41.30 (c) to read as follows:

§ 41.30 *En route limitations.* • • •

(c) *Airplanes with four or more engines; two engines inoperative.* The provisions of this paragraph shall apply only to airplanes certificated in accordance with the performance requirements of Part 4b of this subchapter. No airplane having four or more engines shall be flown along an intended track except under the conditions of either subparagraph (1) or subparagraph (2) of this paragraph.

(1) No place along the intended track shall be more than 90 minutes away from an available landing area at which a landing can be made in accordance with the requirements of § 41.34, assuming all engines to be operating at cruising power.

(2) The take-off weight shall not be greater than that which would permit the airplane, with the two critical engines inoperative, to have a rate of climb in feet per minute equal to 0.01 V_{50}^2 (V_{50} being expressed in miles per hour) along all points of the route, from the point where the two engines are assumed to fail simultaneously to the landing area, either at an altitude of 1,000 feet above the elevation of the highest ground or obstruction within 10 miles on either side of the intended track or at an altitude of 5,000 feet, whichever is higher. The point where the two engines are assumed to fail shall be that point along the route which is most critical with respect to the take-off weight. In showing compliance with this prescribed rate of climb, the following shall apply:

(i) It shall be permissible to consider that the weight of the airplane as it proceeds along its intended track is progressively reduced by normal consumption of fuel and oil with all engines operating up to the point where the two engines are assumed to fail and with two engines operating beyond that point.

(ii) Where the engines are assumed to fail at an altitude above the prescribed minimum altitude, compliance with the prescribed rate of climb at the prescribed minimum altitude need not be shown during the descent from the cruising altitude to an altitude at which the rate of descent becomes zero, if the latter is sufficiently above the prescribed minimum altitude to assure compliance with the prescribed rate of climb at the prescribed minimum altitudes during the subsequent portion of the flight.

(iii) If fuel jettisoning is provided, the airplane's weight at the point where the two engines are assumed to fail shall be considered to be not less than that which would include sufficient fuel to proceed to an available landing area at which a landing can be made in accordance with the requirements of § 41.34 and to arrive there at an altitude of at least 1,000 feet directly over the landing area.

(Sec. 205; 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 52 Stat. 1007, 1010, as amended; 49 U. S. C. 551, 554)

By the Civil Aeronautics Board.

[Amdt. 42-28, Civil Air Regulations]

PART 42—IRREGULAR AIR CARRIER AND OFF-ROUTE RULES

EN ROUTE LIMITATIONS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 13th day of April 1954.

Currently effective § 42.75 pertaining to en route limitations with two engines inoperative, permits the asumption that the second engine will become inoperative 90 minutes after the point of departure. This could lead to an unsafe operation in long overwater flights. The present requirements are not clear also with respect to the rate of climb required when the failure of the engines occurs at an altitude which is above the minimum prescribed altitude. This amendment clarifies these provisions by prescribing that both engines must be considered to fail simultaneously at the point along the route which has the most critical effect on the take-off weight. It also prescribes that if the altitude at which engine failure occurs is above the minimum prescribed altitude, a descent may be assumed to an altitude at which the rate of climb is zero, provided that the latter is sufficiently above the minimum prescribed altitude to assure compliance, during the subsequent portion of the flight, with the prescribed rate of climb at the prescribed minimum altitude.

Interested persons have been afforded an opportunity to participate in the making of this amendment, and due consideration has been given to all relevant matter presented.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 42 of the Civil Air Regulations (14 CFR, Part 42, as amended) effective May 18, 1954.

By amending § 42.75 to read as follows:

§ 42.75 *En route limitations; two engines inoperative.* The provisions of this section shall apply only to airplanes certificated in accordance with the performance requirements of Part 4b of this subchapter. No airplane having four or more engines shall be flown along an intended track except under the conditions of either paragraph (a) or paragraph (b) of this section.

(a) No place along the intended track shall be more than 90 minutes away from an available landing area at which a landing can be made in accordance with the requirements of § 42.78, assuming all engines to be operating at cruising power.

(b) The take-off weight shall not be greater than that which would permit the airplane, with the two critical engines inoperative, to have a rate of climb in feet per minute equal to 0.01 $V_{s_0}^2$ (V_{s_0} being expressed in miles per hour) along all points of the route, from the point where the two engines are assumed to fail simultaneously to the landing area, either at an altitude of 1,000 feet above the elevation of the highest ground or obstruction within 10 miles on either side of the intended track or at an altitude of 5,000 feet, whichever is higher. The point where the two engines are assumed to fail shall be that point along the route which is most critical with respect to the take-off weight. In showing compliance with this prescribed rate of climb, the following shall apply:

(1) It shall be permissible to consider that the weight of the airplane as it proceeds along its intended track is progressively reduced by normal consumption of fuel and oil with all engines operating up to the point where the two engines are assumed to fail and with two engines operating beyond that point.

(2) Where the engines are assumed to fail at an altitude above the prescribed minimum altitude, compliance with the prescribed rate of climb at the prescribed minimum altitude need not be shown during the descent from the cruising altitude to an altitude at which the rate of descent becomes zero, if the latter is sufficiently above the prescribed minimum altitude to assure compliance with the prescribed rate of climb at the prescribed minimum altitudes during the subsequent portion of the flight.

(3) If fuel jettisoning is provided, the airplane's weight at the point where the two engines are assumed to fail shall be considered to be not less than that which would include sufficient fuel to proceed to an available landing area at which a landing can be made in accordance with the requirements of § 42.78 and to arrive there at an altitude of at least 1,000 feet directly over the landing area.

(Sec. 205; 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601, 604, 52 Stat. 1007, 1010, as amended; 49 U. S. C. 551, 554)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
Secretary.

TITLE 16—COMMERCIAL PRACTICES

Chapter I—Federal Trade Commission

[Docket 6019]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

UNITONE CORP. AND JOSEPH BARROWS

Subpart—*Advertising falsely or misleadingly:* § 3.90 *History of product or offering;* § 3.170 *Qualities or properties of product or service.* In connection with the offering for sale, sale, and distribution of the drug product now designated as "B-Amino-Complex" or "BAC", or any other product containing substantially the same ingredients or possessing substantially similar properties, whether sold under the same name or under any other names, (1) disseminating, etc., any advertisement by means of the United States mails, or by any means in commerce, which advertisement represents, directly or by implication: (a) That said product will check or cure deafness, or will have any value in the treatment of deafness except that it may serve as a useful adjunct to other suitable therapy in cases of perceptive deafness caused by a disturbance in the carbohydrate metabolism when such disturbance results in a high pyruvic acid content in the blood and causes dysfunction of the auditory nerve; (b) that said product is a new medical discovery for the treatment of deafness; and (2) disseminating, etc., any advertisement by any means for the purpose of inducing, etc., the purchase of said product in commerce, which advertisement contains any of the above representations; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719; 15 U. S. C. 45) [Cease and desist order, Unitone Corporation and Joseph Barrows, New York, N. Y., Docket 6019, Apr. 8, 1954]

In the Matter of Unitone Corporation, a Corporation, and Joseph Barrows, Individually and as an Officer of Said Corporation.

This proceeding was heard by Abner E. Lipscomb, hearing examiner, upon the complaint of the Commission, charging respondents with the use of unfair and deceptive acts and practices in commerce in violation of the provisions of the Federal Trade Commission Act, respondents' answer thereto, and hearings at which testimony and other evidence in support of and in opposition to the allegations of the complaint were received into the record by said examiner, theretofore duly designated by the Commission, and were duly filed in the office of the Commission.

Thereafter the proceeding regularly came on for final consideration by said examiner on the complaint, the answer thereto, testimony and other evidence, proposed findings as to the facts and conclusions presented by counsel, and oral argument thereon, and said examiner, having duly considered the record in the matter, and having found that the proceeding was in the interest of the public, made his initial decision, comprising certain findings as to the facts,[1] conclusion drawn therefrom,[1] and order to cease and desist.

Thereafter, following appeal from said initial decision by both counsel supporting the complaint and respondents, the matter was disposed of by "Order Modifying Initial Decision and Adopting such Decision as Modified and Order to File Report of Compliance", dated April 8, 1954, as follows:

This case having come on for hearing before the Commission upon the appeals filed by the respondents and by counsel supporting the complaint from the initial decision of the hearing examiner; and

The Commission having determined that the appeal of the respondents should be denied and that the appeal of counsel supporting the complaint should be granted in part and denied in part; and

The Commission, for reasons stated in its opinion which is separately issuing herein, having additionally determined that the findings as to the facts, conclusion, and order contained in the initial decision are in all respects appropriate, save and except for certain of the provisions contained in Paragraph 1 (a) of the order to cease and desist which the record now requires to be modified;

It is ordered, That respondents' appeal be, and it hereby is, denied.

It is further ordered, That the appeal of counsel supporting the complaint be, and it hereby is, granted to the extent that such appeal challenges Paragraph 1 (a) of the order contained in the initial decision as inconsistent with the findings as to the facts appearing in the initial decision and that such appeal be, and it hereby is, denied in all other respects.

It is further ordered, That subparagraph (a) of Paragraph 1 of the order contained in the initial decision be, and it hereby is, modified to read as follows:

That said product will check or cure deafness, or will have any value in the treatment of deafness except that it may serve as a useful adjunct to other suitable therapy in cases of perceptive deafness caused by a disturbance in the carbohydrate metabolism when such disturbance results in a high pyruvic acid content in the blood and causes dysfunction of the auditory nerve.

It is further ordered, That the initial decision as modified herein and by the Commission's opinion be, and it hereby is, adopted as the decision of the Commission.

It is further ordered, That the respondents shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

The order to cease and desist in said initial decision, as thus modified and made the decision of the Commission, is as follows:

It is ordered, That respondent Unitone Corporation, a corporation, and its officers, and Joseph Barrows, individually and as an officer of said corporation, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the offering for sale, sale and distribution of the drug product now designated as "B-Amino-Complex" or "BAC", or any other product containing substantially the same ingredients or possessing substantially similar properties, whether sold under the same name or under any other names, do forthwith cease and desist from:

1. Disseminating or causing to be disseminated any advertisement by means of the United States mails or by any means in commerce, as "commerce" is defined in the Federal Trade Commission Act, which advertisement represents, directly or by implication:

(a) That said product will check or cure deafness, or will have any value in the treatment of deafness except that it may serve as a useful adjunct to other suitable therapy in cases of perceptive deafness caused by a disturbance in the carbohydrate metabolism when such disturbance results in a high pyruvic acid content in the blood and causes dysfunction of the auditory nerve.

(b) That said product is a new medical discovery for the treatment of deafness;

2. Disseminating or causing to be disseminated any advertisement by any means for the purpose of inducing or which is likely to induce, directly or indirectly, the purchase of said product in commerce, as "commerce" is defined in the Federal Trade Commission Act, which advertisement contains any of the representations prohibited in paragraph 1 hereof.

Issued: April 8, 1954.

By the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

PART 6—AIR COMMERCE REGULATIONS

DOCUMENTS OF ENTRY

Section 6.8 *Documents for entry,* of Title 19, such section being also designated as § 71.508 of Title 42, is hereby amended by revising subparagraphs (1) and (2) of paragraph (b) to read as follows:

(b) * * *

(1) A crew manifest. This manifest is not required if the aircraft is arriving directly on a trip which originated in Canada.

(2) A passenger manifest, which shall show the surname, given name, and middle initial of each arriving passenger. This manifest is not required if the aircraft is arriving directly on a trip which originated in Canada.

(R. S. 161, 251, sec. 23, 39 Stat. 892, sec. 24, 43 Stat. 166, sec. 624, 46 Stat. 759, secs. 201, 367, 58 Stat. 683, 706; 5 U. S. C. 22, 8 U. S. C. 102, 222, 19 U. S. C. 66, 1624, 42 U. S. TITLE 26—INTERNAL REVENUE

Chapter I—Internal Revenue Service, Department of the Treasury

Subchapter C—Miscellaneous Excise Taxes

[T. D. 6070; Regs. 3]

PART 182—INDUSTRIAL ALCOHOL

REQUIREMENTS FOR DENATURING AND PACKAGING ETHYL ACETATE

In order (1) to permit the use of undenatured ethyl acetate in processes where it is shown that it is necessary to use such material in its pure state, (2) to permit the transfer of ethyl acetate in tank cars and tank trucks after the producer has divested himself of ownership, (3) to permit producers to transfer ethyl acetate by pipeline to the premises of an affiliate or wholly owned subsidiary entitled to receive ethyl acetate, and (4) to permit wholesale dealers receiving denatured ethyl acetate in tank cars, tank trucks and by pipeline to package denatured ethyl acetate in containers not exceeding 55 gallons in capacity, and, subject to authorization of the Assistant Regional Commissioner, to transfer denatured ethyl acetate in tank trucks from their premises to the premises of others entitled to receive denatured ethyl acetate, Regulations 3, (26 CFR Part 182) are hereby amended as follows:

PARAGRAPH 1. Section 182.837 is amended as follows:

(A) By striking the word "Manufacture" in the headnote and inserting in lieu thereof the word "Denaturation".

(B) By striking the period at the end thereof and adding the following: ": *Provided further,* That upon a showing to the satisfaction of the Commissioner that undenatured ethyl acetate is necessary in a manufacturing process other than for the production of pharmaceutical, scientific, food or toilet preparations or for the production of specially denatured alcohol he may, as provided in § 182.838, authorize the use and shipment of such undenatured ethyl acetate. Undenatured ethyl acetate procured by a user may not be resold without prior approval of the Commissioner."

PAR. 2. Section 182.838 is amended by striking the entire section with headnote and inserting in lieu thereof the following:

§ 182.838 *Ethyl acetate without denaturants or with optional denaturants.* Any user desiring to procure undenatured ethyl acetate for use in a manufacturing process other than the production of pharmaceutical, scientific, food or toilet preparations or for the production of specially denatured alcohol, as provided in § 182.837, shall make application to the Commissioner, stating fully the purpose for which the ethyl acetate is to be used and why he cannot use denatured ethyl acetate. The application shall contain a complete description of the process. Any user desiring to procure ethyl acetate denatured with products or chemicals in lieu of calol ethatate, denaturing grade wood alcohol, or methyl isobutyl ketone, shall make application to the Commissioner, stating fully the purpose for which the ethyl acetate is to be used and why he cannot use ethyl acetate denatured with authorized denaturants. The application shall show the kind and quantity of products or chemicals that he desires to have substituted for the calol ethatate, denaturing grade wood alcohol or methyl isobutyl ketone, in order that it may be determined that such products or chemicals possess satisfactory denaturing properties. The application shall also show the name of the producer of ethyl acetate from whom the applicant desires to procure the ethyl acetate covered by the application. If the ethyl acetate is to be procured from a producer located in the same region, the application shall be filed

in quadruplicate, and if the ethyl acetate is to be procured from another region, the application shall be filed in quintuplicate. If the Commissioner approves the application, he will note his approval on all copies thereof, retain the original copy, return one copy to the applicant, forward one copy to the producer, and one copy to the Assistant Regional Commissioner of the region in which the applicant is located, and, where shipment is to be made from another region, one copy to the Assistant Regional Commissioner of such region.

PAR. 3. Section 182.840 is amended by striking the entire section and inserting in lieu thereof the following:

§ 182.840 *To whom may be sold.* Denatured ethyl acetate produced with specially denatured alcohol may be sold by producers thereof to (a) other producers, (b) legitimate users for solvent or other manufacturing purposes satisfactory to the Commissioner, not including manufacture, for sale, of preparations which do not contain sufficient quantities of other materials to definitely change the composition and character of the ethyl acetate, (c) reputable wholesale dealers engaged in a bona fide paint or chemical trade, for resale to legitimate users in the producer's original packages, in tank trucks or in packages not in excess of 55 gallons filled from stationary storage tanks on the premises of the wholesale dealer or from the producer's original packages, and (d) reputable retail dealers engaged in a bona fide paint or chemical trade, for resale in accordance with § 182.843.

PAR. 4. Section 182.841 as last amended by Treasury Decision 5767 is further amended by striking paragraph (b) thereof with headnote and inserting in lieu thereof the following:

(b) *Transfers in tank cars, tank trucks or by pipeline.* Upon written authorization of the Assistant Regional Commissioner, shipments of ethyl acetate may be made by producers in railroad tank cars, or in tank trucks operated by motor carriers as defined in this part, or in tank trucks operated or controlled by producers, their bona fide agents or wholesale dealers, to themselves at other locations, to their bona fide agents and to wholesale dealers; and producers, their bona fide agents and wholesale dealers may make shipment of ethyle acetate by such means to (1) other producers, (2) their bona fide agents, (3) wholesale dealers, and (4) to actual users for solvent or manufacturing purposes and not for resale. Upon written authorization of the Assistant Regional Commissioner, producers may transfer denatured ethyl acetate by pipeline to the premises of an affiliate or a wholly owned subsidiary entitled to receive denatured ethyl acetate. In the case of railroad tank car shipments the consignee must have railroad siding facilities to receive such tank car shipments. In the case of tank car or tank truck shipments the consignee must have sufficient stationary storage tank facilities to receive such tank car or tank truck shipments. The ethyl acetate must be run directly from the tank car or tank truck to the stationary storage tank and may not be drawn into portable, unmarked containers. In the case of transfers by pipeline the pipeline must be connected with stationary storage tanks on the premises of the consignee.

Because the amendments made by this Treasury decision are of a liberalizing character, it is unnecessary to issue this Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitations of section 4 (c) of said act.

This Treasury decision shall be effective upon its publication in the FEDERAL REGISTER.

(53 Stat. 375; 26 U. S. C. 3176. Interpret or apply 53 Stat. 358, 365; 26 U. S. C. 3105, 3124)

[SEAL] T. COLEMAN ANDREWS,
Commissioner of Internal Revenue.

Approved: April 13, 1954.

M. B. FOLSOM,
Acting Secretary of the Treasury.

TITLE 20—EMPLOYEES' BENEFITS

Chapter III—Bureau of Old Age and Survivors Insurance, Social Security Administration, Department of Health, Education, and Welfare

[Regulation No. 1, Further Amended]

PART 401—DISCLOSURE OF OFFICIAL RECORDS AND INFORMATION

DISCLOSURE OF INFORMATION WITH RESPECT TO AGREEMENTS WITH STATES UNDER SECTION 218 OF THE SOCIAL SECURITY ACT

1. Section 401.3 of Regulation No. 1 as amended (20 CFR 401.3) is further amended by adding a new paragraph (o) reading as follows:

§ 401.3 *Information which may be disclosed and to whom.* Disclosure of any such file, record, report or other paper, or information, is hereby authorized in the following cases and for the following purposes:

* * * * *

(o) In connection with agreements and modifications of agreements for the coverage of State and local employees entered into pursuant to section 218 of the Social Security Act, the following may be disclosed when efficient administration permits:

(1) The name of a State (or instrumentality of two or more States) with whom an agreement or modification has been entered into, the name or title of the official charged with carrying out the State's responsibilities with respect to an agreement, and the date of an agreement or modification;

(2) The contents of an executed agreement or modification;

(3) Information as to whether or not a State (or instrumentality of two or more States) has indicated an intention or desire to enter into such an agreement or modification, but not including information as to provisions being considered for inclusion in the proposed agreement or modification;

(4) Information reported by a State as to whether or not there is in effect in such State or in a political subdivision a retirement system providing benefits to employees thereof;

(5) Statistical information, classified by State and county, with respect to public employment and remuneration therefor (other than information relating to any identified or identifiable employee).

2. Section 401.4 of Regulation No. 1 as amended (20 CFR 401.4) is further amended by amending paragraph (f) to read as follows:

§ 401.4 *Definitions.* As used in this part the term:

* * * * *

(f) "Person" includes an individual, a firm, an association, a corporation, a State, a "political subdivision" of a State (as defined in section 218 of the act), or an instrumentality of two or more States.

(Sec. 1102, 49 Stat. 647, as amended; 42 U. S. C. 1302. Interpret or apply sec. 1106, 53 Stat. 1398; 42 U. S. C. 1306. Reorg. Plan No. 1 of 1953, 18 F. R. 2053, 67 Stat. 18)

[SEAL] JOHN W. TRAMBURG,
Commissioner of Social Security.

Approved: April 14, 1954.

OVETA CULP HOBBY,
Secretary of Health, Education, and Welfare.

TITLE 32—NATIONAL DEFENSE

Chapter VII—Department of the Air Force

Subchapter F—Reserve Forces

PART 861—OFFICERS' RESERVE MOBILIZATION AND TRAINING

MISCELLANEOUS AMENDMENTS

1. Section 861.1001 is revised to read as follows:

§ 861.1001 *General.* (a) Sections 861.1001 to 861.1009 establish procedures for the assignment or designation of Air Force Reserve officers and airmen to specific mobilization positions.

(b) Within mobilization personnel authorizations allotted by Headquarters USAF, each major air command will individually determine which mobilization position constitute a replacement requirement and which positions constitute an augmentation requirement. Mobilization positions (replacement) primarily, but not limited to, those presently authorized active establishment positions for which it has been determined that the incumbent should be a rated officer on flying status. Commanders must assume that active establishment combat readiness training (formerly minimum individual training) rated personnel presently assigned to these positions will be available to meet attritional and rotational rated replacement requirements after mobilization. Mobilization positions (augmentation) will constitute those additional military personnel spaces, required to be filled by the command in the event of full or partial mobilization.

(c) Each major air command at its discretion, and within command mobilization plans, will individually determine which mobilization assignment positions are appropriate for assignment of Ready or Standby Reservists. Those positions designated as Ready Reserve should constitute the anticipated individual augmentation and/or replacement requirements under limited emergency conditions short of full mobilization. All other positions will be designated as Standby.

(d) Persons assigned to designated Ready Reserve mobilization assignment positions will be members of the Ready Reserve and must comply with § 861.1003.

(e) Persons assigned to designated Standby Reserve mobilization assignment positions may be members of the Ready or Standby Reserve and must comply with § 861.1003 (a) (1). In no case will an otherwise qualified applicant be denied assignment to a position designated as Standby Reserve on the basis that he must be a Ready Reservist by operation of law (applicants who are not eligible for elective Standby status).

2. Paragraph (a) of § 861.1002 is amended to read as follows:

§ 861.1002 *Definitions*—(a) *Mobilization position.* Additional or existing military personnel authorizations (augmentation or replacement) required to be filled in Air Force commands and activities in the event of full partial mobilization. A mobilization position is filled by either a mobilization assignee or designee.

* * * * *

3. Paragraphs (b) (2) and (c) (2) of § 861.1005 are amended to read as follows:

§ 861.1005 *Training attachments.*
* * *

(b) *Restrictions.* * * *

(2) Mobilizations assignees may not be given inactive duty training attachments with Air Force Reserve units, but may be given such attachments to the various Continental Air Command Reserve training centers.

* * * * *

(c) *Mobilization designees.* * * *

(2) A mobilization designee may be given an inactive duty training attachment to an Air Reserve group or squadron, with the consent of the unit commander and the commander of the activity with which the person holds a designation.

* * * * *

4. Section 861.1006 and the heading thereof is revised to read as follows:

§ 861.1006 *Requests for mobilization position*—(a) *Specific requests.* An individual Reservist desiring a mobilization position may request the position by military letter to the headquarters of the major air command concerned. Letters of applicants not selected will be returned to the Air Reserve Records Center. The Air Reserve Records Center will notify these Reservists of their nonselection.

(b) *Nonspecific requests.* A person who desires to request a mobilization position without specifying the major air command of assignment may submit his letter application to the Air Reserve Records Center. These applications will be used by the Air Reserve Records Center in filling the requisitions referred to in § 861.1007.

(c) *Approving applications.* At the discretion of the major air commander, authority for approval of applications for mobilization positions may be delegated to subordinate units. Commanders of major air commands who desire to delegate approval authority will advise the Air Reserve Records Center. Subordinate commands may then correspond directly with the Air Reserve Records Center.

(d) *Issuing orders.* Orders, with the exception of those pertaining to general officers, will be issued by the Air Reserve Records Center directing assignments to specifically designated units within the major air command concerned. Requests for orders for the assignment, reassignment, training attachment, or active duty of any nature for general officers will be submitted to the Deputy Chief of Staff, Personnel, Headquarters USAF, Attention: General Officers Branch, Washington 25, D. C.

(e) *Limiting requests.* Individual requests for a mobilization position will not be submitted to more than one command at a time.

5. Section 861.1007 is revised to read as follows:

§ 861.1007 *Requisitioning Air Force Reserve personnel.* (a) Major air commands will requisition from the Air Reserve Records Center (ConAC), 3800 York Street, Denver, Colorado. Reserve personnel by grade and Air Force Specialty Code to fill mobilization positions for which applicants are not available (see § 861.1006). The Air Reserve Records Center will provide career summaries on qualified personnel. Based upon the career summaries, major air commands will select persons desired for mobilization positions, and contact them directly regarding such assignment. Major air commands will request the Air Reserve Records Center to issue appropriate assignment orders for those applicants who are selected, inclosing a copy of the application for assignment for placement in the Reservist's master personnel record. Career summaries on persons not desired for assignment will be returned to the Air Reserve Records Center with a remark to that effect.

(b) Major air commands desiring the assignment of persons known by name may request the Air Reserve Records Center to furnish career summaries on such personnel prior to corresponding with the person regarding the assignment.

6. Section 861.1008 and the heading thereof is revised to read as follows:

§ 861.1008 *Relief from mobilization position.* (a) In the event a Reservist is found to be surplus or unsuitable for a mobilization position, the major air command concerned, other than Continental Air Command, will issue appropriate orders relieving the Reservist from the mobilization position and from assignment to the command, and will reassign him for administrative control to the Headquarters Continental Air Command (NARS), Air Reserve Records Center. A statement as to the reason for relief will be included in the orders.

(b) A member of the Air Force Reserve ordered to extended active duty who holds a mobilization position will be relieved of such position.

7. Paragraph (h) of § 861.1009 is amended to read as follows:

§ 861.1009 *Training.* * * *

(h) *Waivers of training requirements for mobilization designees.* Minimum participation requirements may be waived for mobilization designees whose civilian occupations are so directly allied with the duty Air Force Specialty Codes of the mobilization positions for which they have been designated that proficiency is considered to be retained by virtue of the civilian occupation. Individual applications for waivers will be submitted by military letter, through channels for approval action, to the major air command of assignment, or to the Air Reserve Records Center for personnel under the jurisdiction of Continental Air Command. Such letters will include a complete description of the person's civilian occupation. Waivers which are approved will be effective until there is a change in the person's Reserve assignment, duty Air Force Specialty Code, or civilian occupation. In each instance, a copy of approved waivers will be forwarded to the Air Reserve Records Center, for inclusion in the person's master personnel record.

TITLE 33—NAVIGATION AND NAVIGABLE WATERS

Chapter I—Coast Guard, Department of the Treasury

Subchapter B—Military Personnel

[CGFR 54-17]

PART 40—CADETS OF THE COAST GUARD

PHYSICAL STANDARDS

By virtue of the authority contained in Title 14, United States Code, section 92, 633 (section 1, 63 Stat. 503, 545), the following amendment to the regulations is prescribed and shall be effective on and after the date of publication of this order in the FEDERAL REGISTER:

1. Section 40.26 (s) is amended to read as follows:

§ 40.26 *Physical standards.* * * *

(s) Hearing must be normal for each ear by the whispered voice and speech

voice tests, the denominator of the fraction being /15 for the whispered voice and /30 for the spoken voice. Any chronic disease of the external, middle, or internal ear will be sufficient cause for rejection. Hearing in each ear must be normally acute to the spoken and whispered voice. In examining the acuteness of hearing with the voice, one ear of the candidate shall be closed while the other ear is being examined, and his eyes shall be covered to prevent lip reading.

(Sec. 1, 63 Stat. 503, 545, as amended; 14 U. S. C. 92, 633. Interprets or applies sec. 1, 63 Stat. 506, as amended; 14 U. S. C. 182)

Dated: April 2, 1954.

[SEAL] H. CHAPMAN ROSE,
Acting Secretary of the Treasury.

Appendix—Public Land Orders

[Public Land Order 953]

ALASKA

MODIFYING EXECUTIVE ORDER NO. 6957 OF FEBRUARY 4, 1935 SO AS TO PERMIT MINERAL LEASING OF THE RESERVED LANDS

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910, c. 421 (36 Stat. 847; 43 U. S. C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 6957 of February 4, 1935, withdrawing certain public lands in Alaska from settlement, location, sale, entry, or other form of appropriation, and reserving them for classification and in aid of legislation, so far as such order has not heretofore been modified for the purposes herein expressed, is hereby further modified so as to permit the leasing of the mineral deposits in such withdrawn lands, including the reserved minerals in such of the lands as have subsequently been entered or patented, pursuant to the provisions of the Mineral Leasing Act of February 25, 1920 (41 Stat. 437; 30 U. S. C. 181), as amended and supplemented, and the act of October 20, 1914, c. 330, 38 Stat. 742, as amended by the act of March 4, 1921, c. 152 (41 Stat. 1363; 48 U. S. C. 432–445; 446–452) for such lands.

DOUGLAS MCKAY,
Secretary of the Interior.

APRIL 13, 1954.

[Public Land Order 954]

ARKANSAS

REVOKING EXECUTIVE ORDER NO. 6912 OF DECEMBER 3, 1934, WITHDRAWING PUBLIC LANDS FOR CLASSIFICATION

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910 (36 Stat. 847; 43 U. S. C. 141), and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 6912 of December 3, 1934, temporarily withdrawing the following-described lands in Arkansas for classification as to their suitability for wildlife refuge purposes, is hereby revoked:

FIFTH PRINCIPAL MERIDIAN

T. 14 N., R. 9 E.,
Sec. 1, lot 1.

The tract described contains 9.82 acres.

The lands are subject to the laws of the State of Arkansas relating to the organization, government and regulation of drainage districts, by virtue of the act of June 17, 1920 (41 Stat. 392; 43 U. S. C. 1041–1048) and are included in an application for patent of Drainage District No. 17 of Mississippi County, Arkansas, pursuant to an order of the Mississippi Chancery Court, Chickasawba District, of September 27, 1926, approving a Commissioner's deed to the land for non-payment of Drainage District assessments.

DOUGLAS MCKAY,
Secretary of the Interior.

APRIL 13, 1954.

TITLE 49—TRANSPORTATION

Chapter I—Interstate Commerce Commission

Subchapter B—Carriers by Motor Vehicle

[Ex Parte MC-43]

PART 207—LEASE AND INTERCHANGE OF VEHICLES

INTERCHANGE OF EQUIPMENT

At a general session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 12th day of April A. D., 1954.

Upon consideration of the record in the above-entitled proceeding and of petition of Refrigerated Transport Co., Inc., Watkins Motor Lines, Inc., C. E. McBride, doing business as Colonial Fast Freight, Belford Trucking Co., Inc., Alterman Transport Lines, Clay Hyder Trucking Lines, Tompkins Motor Lines, Inc., Arctic Express, Inc., Seaboard Food Express, Bonney Motor Express, Inc., Frigidways, Inc., Frozen Food Express, and C & D Transportation Co., dated February 2, 1954, for exemption of all carriers of commodities requiring refrigeration from § 207.5 (c) of the leasing rules; and good cause appearing therefor:

It is ordered, That on and after the date of this order and until March 1, 1955, common carriers authorized to transport, in interstate or foreign commerce, perishable commodities in refrigerated equipment be, and they are hereby, exempted from complying with the provisions of § 207.5 (c) of the rules and regulations prescribed in the above-entitled proceeding, solely with respect to drivers of refrigerated equipment which is being utilized in the transportation of perishable commodities.

It is further ordered, That the said § 207.5 (c) of the rules and regulations prescribed in the above-entitled proceeding, except insofar as it relates to the inspection of equipment, be, and it is hereby, reopened for further hearing at a time and place to be hereafter fixed.

It is further ordered, That the said petition, insofar as it seeks relief from § 207.4 (a) (3) of the rules and regulations prescribed in the above-entitled proceeding, be, and it is hereby, denied, for the reason that our notice of March 4, 1954, as modified by order of March 24, 1954, provides for further hearing on June 14, 1954, with respect to that section.

It is further ordered, That the order dated March 23, 1954, in this proceeding be, and it is hereby, vacated and set aside.

And it is further ordered, That this amended order shall be effective as of the date hereof.

Notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission at Washington, D. C., and by filing a copy with the Director, Division of the Federal Register.

(49 Stat. 546, as amended; 49 U. S. C. 304)

By the Commission.

[SEAL] GEORGE W. LAIRD,
Secretary.

PROPOSED RULE MAKING

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 921]

[Docket No. AO 222-A5]

HANDLING OF MILK IN THE SPRINGFIELD, MISSOURI, MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENTS TO TENTATIVE MARKETING AGREEMENT AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Deputy Administrator, Agricultural Marketing Service, United States Department of Agriculture, with respect to proposals to amend the tentative marketing agreement and the order, as amended, regulating the handling of milk in the Springfield, Missouri, marketing area (herein redesignated as the Ozark marketing area). Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C., not later than the close of business the 15th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

Preliminary statement. The hearing, on the record of which the following findings and conclusions were formulated, was conducted at Springfield, Missouri, on September 28–30, 1953, pursuant to notice thereof which was issued on September 8, 1953 (18 F. R. 5496) and in Fayetteville, Arkansas, on December 1–3, 1953, pursuant to notice thereof which was issued on November 10, 1953 (18 F. R. 7249).

The material issues of record are concerned with:

1. A temporary increase in the Class I price;
2. An extension of the marketing area;
3. An extension of regulation to the handling of non-Grade A milk for fluid consumption;
4. The establishment of standards which a plant must meet in order to be qualified as a pool plant;
5. The application of compensatory payments on unpriced milk disposed of as Class I milk in the marketing area;
6. The application of compensatory payments on Class I milk disposed of in the marketing area by handlers regulated under another order issued pursuant to the act;
7. The need for immediate action by the Secretary with respect to Issue No. 1;
8. The adoption of a base and excess plan for the payment of producers;
9. A price differential to be applicable to Class I milk received at specified locations;
10. An extension in the area to which milk may be transferred for Class II use;
11. Level of the Class I price.

Findings and conclusions. By an emergency decision of the Assistant Secretary issued October 26, 1953 (18 F. R. 6829), action has been taken with respect to Issues No. 1 and No. 7. Findings and conclusions with respect to the remaining material issues, all of which are based on the evidence introduced at the hearing, and the record thereof, are as follows:

2. *Extension of marketing area.* The marketing area should be expanded to include all the territory within the limits of Benton, Boone, Marion and Washington counties in Arkansas, and Barry, Christian, Douglas, Greene, Howell, Laclede, Lawrence, Ozark, Taney, Webster, and Wright counties and the Fort Leonard Wood Military Reservation in Missouri. At the present time, the marketing area is limited to the city of Springfield, Missouri, which municipality does not represent the natural marketing area of Springfield distributors. Only about one-third of the Class I milk distributed on routes by handlers regulated under the order is sold in Springfield. Evidence on the record indicates that a substantial majority of the Grade A Class I sales throughout the proposed expanded marketing area is from the plants of these handlers.

Handlers now regulated under the order are the principal distributors in most of the larger cities in the marketing area herein proposed. Approximately one-half or more of the milk sold to stores in Lebanon, Monett and West Plains, Missouri, and Rogers, Harrison and Siloam Spring, Arkansas, comes from presently regulated plants. Approximately 75 percent of the milk sold to stores in Fayetteville, Arkansas, one of the most distant points within the expanded marketing area, is milk from regulated plants. These are the largest cities in the area which would be added to the marketing area.

The prices paid to producers by the handlers who would come under regulation by reason of expansion of the marketing area have been on a basis which may not be related to utilization at the plant of the buying handlers. Testimony at the hearing indicated that such prices are, in some cases, based on the blend prices paid by handlers subject to the Springfield and St. Louis orders, and these pay prices frequently represent payment for milk, all or most of which was used for Class I purposes. In some cases, part of the milk sold for Class I was obtained by handlers from ungraded sources.

Some of the handlers maintain their purchases from dairy farmers to the extent that such deliveries approximate their Class I sales in the months of flush production. Supplementary supplies are obtained by these handlers during the season of low production from Springfield handlers. In effect, these handlers are not handling their proportionate share of the reserve milk of the market. Acquisition of milk from the Springfield pool results in forcing producers now under the order to bear a disproportionate share of surplus milk. The fact that unregulated handlers selling in competition with regulated milk may buy milk from producers at fluid prices which reflect a disproportionate share of surplus, and sell such milk largely for Class I use, results in a considerable disparity of cost between handlers and in unstable competitive conditions.

Milk sold in the proposed expanded marketing area moves in the current of interstate commerce or directly burdens or affects such commerce. Substantial quantities of milk sold in the Arkansas portion of the marketing area are bottled in Missouri, and handlers located in Arkansas distribute milk in Missouri. The production areas from which handlers operating in both the Missouri and Arkansas parts of the area receive milk overlap. In addition, these production areas also include producers whose milk is delivered to plants of handlers supplying the St. Louis, Missouri; Tulsa, Oklahoma; and Dallas, Texas markets. Producers can and do shift back and forth between handlers in these markets and handlers in the proposed marketing area.

Comparable requirements of the municipal, county, and State health authorities having jurisdiction in the marketing area proposed herein facilitate the movement of milk between the various communities in the marketing area. The Missouri State Board of Health adopts as its regulations the U. S. Public Health Service Milk Ordinance, and, in turn, various of the Missouri cities in the proposed marketing area adopt the same regulation. Specifications and standards for milk sold as Grade A in Missouri are established by the State and are uniformly applicable to handlers in the Missouri portion of the proposed marketing area.

Sanitary standards for Grade A milk marketed in Arkansas are prescribed and administered by the Arkansas State Health Department. All inspections for any municipality or county in the State are made by representatives of the State Health Department. Approval for Grade A distribution in one location of the State is equivalent to approval for distribution anywhere in the State.

The flow of milk back and forth between Arkansas and Missouri communities, or between communities in these States within the marketing area herein proposed, is relatively free. The movement of milk between various localities in the proposed marketing area is further facilitated by various health jurisdictions accepting each others' inspection determinations.

Expansion of the marketing area as proposed will promote orderly marketing by assuring producers prices equivalent

to those contemplated under the act. Prices paid farmers for milk for fluid use have generally been below the Class I prices which the order would provide. Many of the farmers do not know how their milk is utilized at the various plants to which they deliver, have no advance notice of what price they will receive for their milk, or whether the basis on which they are being paid from month to month will be revised. In some instances, farmers were notified of price changes some days after such changes had been made effective by the handler. Weights and butterfat tests of milk have been verified only in rare instances. Several handlers in the area have dealt with farmers in such a way as to discourage cooperative action by these farmers. Joint action by such farmers has been under the influence of handlers in some cases.

Prices paid to producers throughout the area proposed to be added to the existing marketing area are generally at the option of the handlers. The record indicates that prices are, in some instances, arbitrarily arrived at. A variety of pricing plans are used. Some handlers pay $1.00 over the local condensery price and others base their producer pay prices on the blend prices paid by St. Louis and Springfield order handlers in their localities. Where producers are paid on a base and excess plan, such plans are frequently revised by handlers at their discretion. Evidence shows that all producers delivering to the same handler are not always paid on the same basis. One producer received a "surplus" price for all his deliveries during a period when, according to testimony of the handler, all producers delivering to that plant received the "base" price for all milk delivered.

Fort Leonard Wood Military Reservation is the only locality in the marketing area proposed herein which is not contiguous to any other part of the proposed area. Since reactivation in 1950 this military reservation has been served regularly by handlers under the order, even though invitation to bid on the contract each six months is sent to milk distributors over a wide area. These handlers who supply the Reservation must meet the standards of quality imposed by the Veterinary Corps, which is responsible for inspecting the milk used on the Reservation. Procurement policies of order handlers bidding on this contract have been established and maintained to give consideration to providing an adequate supply of fluid milk for Fort Leonard Wood on a year-round basis. In effect, this military establishment has become a significant part of the natural sales area served by handlers under the order.

Seven of the counties in Missouri (Cedar, Dade, Dallas, McDonald, Polk, Stone and Texas) which were proposed as part of the expanded marketing area are not included in the marketing area herein proposed. Evidence for including these counties was not conclusive. Much of the Class I milk in such areas is not produced under Grade A standards. As stated elsewhere in this decision, it is not found possible or desirable to regulate the handling of such milk. Although some of the handlers who will be regulated under the proposed order sell in these counties, it was not established on the record that marketing conditions in these counties warrant their inclusion in the marketing area at the present time.

A proposal was made at the hearing to rename the marketing area to more accurately reflect the geographic limits which it would contain. The designation as "Ozark Marketing Area" instead of "Springfield, Missouri, Marketing Area," as herein provided, will accomplish this purpose.

3. *Regulation of handling of ungraded milk sold for fluid consumption.* The order should not be amended to provide for regulation of the handlers of ungraded milk for fluid consumption. The production and distribution of non-Grade A or ungraded milk in this area is not subject to the jurisdiction of any health authority.

Sales of ungraded milk in the marketing area herein proposed are extremely small in relation to the total sales of milk for fluid consumption. Proponents of the proposal to extend regulation to handlers of ungraded milk contended that regulated handlers in the marketing area were losing Class I sales to handlers of ungraded milk and that sales of producer milk under the order which might go into Class I disposition were forced into a surplus utilization because of loss of sales to ungraded milk. It was not shown that such displacement would be averted if ungraded milk were priced under the order at a level which would assure adequate supplies of such milk.

Ungraded milk is generally sold to consumers at prices below those charged for graded milk. The dairy farmer who produces milk for an ungraded market receives a price approximating that paid for milk for manufacturing purposes but significantly lower than that paid producers of graded milk for fluid use. A farmer producing ungraded milk is not required to undergo the expense of a Grade A producer in the establishment and maintenance of facilities on his farm for the production of milk.

Ungraded milk sold for fluid consumption and milk produced for a Grade A market are not of the same value. The greater value of the Grade A product by reason of the higher sanitary standard under which it is produced and its superior overall quality is widely recognized.

The principal handler of ungraded milk in the proposed marketing area testified that he is in the process of or planning to change his operation to a Grade A basis.

As health ordinances establishing standards for graded milk are instituted throughout the area, ungraded milk sales will be replaced by Grade A. Until such time as the quality of milk in all regulated plants is approximately similar, it is not considered feasible or desirable to provide for such regulation.

Proponents of the regulation of ungraded milk did not show that suitable standards for determining which distributing or supply plants involved in the sales of ungraded milk would be subject to regulation and pooling could be provided. In the absence of such standards, returns from the sale of Class I ungraded milk might be pooled over so many producers as to destroy the effectiveness of any pricing program for such milk.

4. *Pool plant standards.* A marketwide pooling system, such as is provided in the order, is characterized by provisions which require equalization of returns to producers from all sales of regulated milk in the marketing area. This method of distributing returns to producers results in equal sharing of the higher returns for the total market Class I sales and of the lower returns realized from the disposition of reserve or Class II milk. The uniform price which represents the blend value of all producer milk received and disposed of for all purposes in the market, therefore, depends upon the handlers included in the pool and the utilization such handlers make of milk received from producers.

Under the present provisions of the order, any person who operates a milk plant, which is approved by the appropriate health authority of the marketing area for the receiving or processing of Grade A milk, and from which Grade A milk is disposed of on routes in the marketing area, is a handler. All handlers, except producer-handlers, who so distribute any quantity of Class I milk are subject to full regulation under the order, and must be and are included in the marketwide pool. If minimum producer prices which a handler must pay or to be fixed, then his sales and producer payments must be equalized with all other handlers for whom such prices are fixed.

Since the marketwide pool results in the payment to producers on the average utilization for the market, the individual handler is relieved of any responsibility for maintaining a high Class I utilization in order to support his pay rates to producers. Whatever utilization of milk a handler may have, his rate of pay to producers will be the same as that of all other handlers in the market. Under the present order, it is possible for any approved plant to make distribution of a small quantity of milk in the marketing area and share in the marketwide pool. Thus, the marketwide pool provides both opportunity and incentive for any distributor, wherever located, to sell a token quantity of milk in the marketing area if such distributor had a relatively low percentage utilization as Class I milk in relation to the market average. He would then draw money from the equalization fund of the pool, thereby reducing the price received by regular market producers. This is commonly called "riding the pool." Without some performance standards, such plants may enter the market whenever it is advantageous to do so for the sole purpose of "riding the pool." Such dissipation of returns from the sale of Class I milk would not be in the interest of either producers, handlers, or consumers in the market.

Plants selling primarily to other markets or plants shipping milk on an opportunity basis to any market where supplies happen to be short do not represent reliable sources of milk upon which the order market may depend. If such plants were allowed to sell a token quantity of milk in the marketing area whenever their Class I sales were low and then withdraw when their Class I sales were high as compared with receipts, the result would be that the in-and-out handler would be able to gain advantage in paying producers. The market would have no compensating gain from the payment of equalization to such a handler. Such a distribution of equalization payments would, in fact, reduce the blend prices to producers regularly supplying the market and thereby have an adverse effect on the milk supplies upon which the market depends. This could result in the need for higher Class I prices than would otherwise be required.

If a distributor is only casually or incidentally associated with the market he may prefer not to be subject to complete regulation under the order. It may be disadvantageous to such a distributor to require him to equalize his sales with all other handlers in the market. Such a distributor may be selling his milk primarily to Class I outlets in an unregulated market. If such distributor were to be fully subject to the order and have prices fixed on all milk purchased by him from producers, he might be handicapped in competing in such unregulated market.

For these reasons, provision should be made in the order that a distributor must dispose of not less than 5 percent of his total receipts of milk from producers on routes in the marketing area in order to be included in the marketwide pool and share in the equalization of market sales. The performance standard herein provided is designed to accomplish the objective as set forth above. On the basis of evidence available, it appears that it should accomplish such objective. If actual operating experience proves it inadequate, the standard should be revised on the basis of such experience. Such a standard should apply uniformly to all milk distributors. Any plant, regardless of its location, should have equal opportunity to comply with the standard and thereby participate in the marketwide pool and have its producers share in Class I sales of the market. Any producer who meets the appropriate health department requirements should be permitted under the order to sell his milk to plants meeting the standard of qualification. Whether or not distributors or producers choose to supply the market will depend on the economic circumstances with which they are confronted, such as prices, transportation costs, and alternative outlets.

Plants not distributing milk in the marketing area, but supplying milk to regulated distributing plants, should be qualified as pool plants if they are associated with the market. The standards of such association should be those now contained in the order for plants which do not bottle or package milk, but make their milk available to the market through offers of milk for sale on specified terms. In the absence of such offers and during months of short production actual shipments are required.

5. *Provisions relative to unpriced milk.* Milk is at times purchased by those who would be handlers under the order from sources other than producers or handlers. Although this milk may be assigned to Class I use, provision is not now made in the order for pricing such milk. Except for requiring prior allocation of producer milk to Class I, the purchase and sale of other source milk is not affected by the order program. The handler is free to obtain such milk whenever and wherever he can. The price he pays and the utilization he makes of the milk are not regulated in any way by the order. If handlers in the market may obtain unpriced milk at a cost advantage and sell it for Class I purposes, it would endanger, and could destroy, the effectiveness of the classification and pricing program of the order.

The prices fixed under the order clearly cannot be effective in encouraging the production of milk which is appropriate to the needs of the market if handlers can circumvent these prices by purchasing milk from other markets for Class I use. Adjustments upward in the Class I price would provide additional incentive for handlers to purchase unpriced milk and encourage them to refuse producer milk whenever low cost milk was available from other sources. To lower the Class I price would reduce blend prices and discourage production of milk for the market.

If some handlers purchase unpriced milk for Class I use at a lesser cost than producer milk, then those handlers using producer milk will be placed temporarily at a competitive disadvantage. This tends to be disruptive to the orderly marketing of milk and would tend to force all handlers under the order to curtail their purchases of producer milk.

It is a well recognized fact that a minimum amount of milk in excess of actual Class I disposition is necessary to operate a fluid milk business. Because of a seasonal fluctuation in production not matched by seasonal changes in consumption, this excess is particularly large in certain months of the year. This excess or reserve milk is surplus to the fluid operation, and can only be marketed in manufactured form in competition with products made from ungraded milk. Thus, such reserve milk yields a considerably lower return than is necessary to sustain graded milk production for the order market. Likewise, it yields a lower price than would be necessary to purchase graded milk on a regular basis in other supply areas and pay the cost of transporting such a bulky and perishable product to the marketing area.

The existence of this reserve Grade A milk, which must be marketed at a lower price, is the primary cause of the instability which affects fluid milk markets. If a handler were able to use milk he purchased at Class II prices for Class I use, he would stand to gain advantage, but in so doing he demoralizes the Class I market price.

One of the paramount reasons why regulation of prices is considered necessary in the market is to insure that the position of handlers paying producers a Class I price for fluid milk will not be undermined by others using the market's excess or surplus producer milk for Class I use. It is equally important that the Class I market be protected from the use of seasonal excess milk from other markets as well as from its own surplus. The order provisions as they now stand permit a handler to curtail purchases of producer milk to his own advantage and secure low cost supplies from elsewhere for Class I use. These supplies are easily and cheaply acquired during the months of flush production when surrounding markets are receiving milk greatly in excess of their current fluid needs. Some surplus milk is normally present in unregulated as well as regulated markets, however, throughout the year. If adjacent milksheds try to dump their surplus on each other's Class I markets, the result would soon be market chaos, particularly in the spring months. Class I prices would be demoralized and the rate of milk production would suffer. The end result would be to discourage production and bring about periodical shortages of milk in both markets. Such marketing conditions would be contrary to the stated purpose of the act. It is necessary, therefore, in order to insure the effectiveness of the classified pricing program of the order and to promote orderly marketing, that some measure be taken to remove the incentive which handlers have to acquire unpriced milk (milk not paid for in accordance with its utilization) and undermine the Class I pricing structure of the order.

One possible alternative would be to extend price regulation in accordance with order provisions to all milk dealers who supplied milk either directly or indirectly to the marketing area. This alternative is both economically and administratively unacceptable in such an order program. It would extend regulation to plants only incidentally associated with the market on one hand, and, on the other, it would open the order pool to anyone who supplied even a token quantity of milk to handlers serving the marketing area. The objections to widespread distribution of pooled funds was discussed earlier in connection with the recommendations for standards of pool participation for distributing plants.

Such regulation would have the further disadvantage of being cumbersome, expensive, and difficult to enforce. The plants from which milk might be purchased by handlers are distributed over a wide area. In order to bring such plants under regulation, it would be necessary to set up a complete new set of transfer and allocation rules, perhaps with individual tailoring according to the various plant locations, markets and supplies. It would be necessary to follow milk from these plants to its various destinations and uses to determine classification. Also, it would be necessary to ascertain sources of supply other than receipts directly from farmers and determine what priority should be given such supplies in the allocation of Class I milk. In the case of a plant which made an incidental shipment of milk, perhaps at

the end of the month, or in the case of such items as storage cream, additional complications would be involved. Earlier inventories as well as sales would have to be ascertained and classified. Classification might depend upon transactions made in the past concerning which adequate records were not kept. Producer prices would be fixed for milk already purchased and sold. Required record keeping and auditing problems would be greatly multiplied with the extension of regulation.

Such extension of regulation might interfere with the acquisition of needed supplemental milk supplies for a market. Potential suppliers might be reluctant to sell milk to order handlers if such sale would mean that they would be subject to producer price fixing and complete regulation provided for under the order. Also, the terms of the order, such as pooling and equalization, might work to the disadvantage of such a supplier selling primarily to an unregulated Class I market.

It is concluded that it is not feasible to price all milk which may enter the market and that a provision is necessary in the order which will insure against the displacement of producer milk by such unpriced milk for the purpose of cost advantage. There is no choice as to what type of provision can be used for this purpose. The only alternative is to levy a charge against unpriced milk used in Class I to the extent it is required for the removal of any advantage there may be in using such milk instead of regulated producer milk.

Several problems are involved in establishing rules for any charge or payment designed to bring about the removal of the advantage of using unregulated milk. The rate of a compensation payment for this purpose must not be so low that it will permit a handler to have temporary or permanent advantage through sale of unpriced milk as Class I in the marketing area. It should not be so high that it will penalize suppliers of unpriced milk who offer milk needed by the market and who are not in a position of gaining an unfair advantage by such sale of milk. The payment must be provided for in a manner which is administratively feasible and which does not bring about unjustified administrative inconvenience or expense.

One method for setting the rate of payment would be to ascertain the actual cost to the regulated handler of milk which he purchases from unregulated plants and charge as a compensation payment any amount by which the Class I price exceeded the cost of the unregulated milk used in Class I. Such a scheme is not sound from the standpoint of administrative feasibility and it would not necessarily remove the advantage in using unregulated milk even though it were feasible. Rates at which milk sales are billed may not represent actual cost to the purchaser. In the case of a firm which owns or controls pool plants under the order as well as unregulated plants, the rate of payment from one plant to another, if any were made, would have little or no significance. If such a provision were to be adopted, the billing rate might be deliberately set in each instance at a level which would avoid any payments without regard to the value of the milk.

A handler having no unregulated plants would no doubt find it possible to arrange a billing price on purchased milk which would avoid any compensatory payments. If a handler had the choice of paying money to the market-wide pool or to a person from whom he was buying milk, he would probably choose the latter. A kick-back arrangement or offsetting purchase and sale might readily be arranged, perhaps through a third party. Since the billing price for milk would be a self-serving figure for both parties to the transaction, it would be virtually impossible to ascertain that it represented the true cost to the purchaser.

If the stated purchase price were a true cost, it would still not fulfill the purpose of removing the advantage to unregulated milk to base compensation payments on the difference between such price and the Class I price. Sales of priced milk between regulated handlers ordinarily take place at the class price plus a handling charge. This handling charge varies according to circumstances, but represents a payment to the receiver of the milk to offset his purchasing and receiving costs, such as receiving, weighing, testing and cooling the milk, and other costs of doing business. The cost of receiving the milk in bulk form is somewhat less than receiving it from producers. Thus, in order to remove the advantage to unregulated milk, it would be necessary to provide that the cost of bulk unregulated milk be somewhat more than the Class I price. It would be exceedingly difficult to determine what this excess rate should be, particularly in the case of products such as skim milk and cream where the allocation of additional processing costs among more than one end product is involved. Furthermore, the marketing agreement act does not give the Secretary express authority to enforce prices other than producer prices. This scheme for removing the advantage in using unregulated milk is rejected for these reasons.

Another suggested method is to determine the price actually paid dairy farmers by the unregulated milk dealer who first received the milk, and base the compensation payment thereon. This method has several shortcomings. The various payment plans which are used in paying farmers for milk would make the determination of pay rates to individual farmers a next to impossible task. For example, unregulated milk dealers may use varying rates of butterfat differentials, different types of base rating plans, or payments based on volume of deliveries. Various devices such as these for paying farmers often make it impossible to determine actual rate of payment per hundredweight of milk. Stated prices may be illusory, since the cost of the milk itself may be modified by unrealistic charges for various items of supplies and services. Whatever payment plan an unregulated milk dealer may use is a matter of his own choice and it can be changed readily. Calculation of compensation payments according to this suggestion would give any affected dealer special incentive to resort to these or other special payment plans which he might devise for purposes of evading payments. Such practices could not be prohibited by the order.

The further problem of establishing the rate of payment to be required would by itself preclude use of the actual cost of the milk purchased from farmers by unregulated handlers as a basis for calculating the payment to be required. If a payment were to be required on the unregulated milk based on the difference between prices paid farmers and some other price, the unregulated handler could avoid payments by increasing his prices to farmers. This would give an unregulated handler the advantage over regulated handlers in that a regulated handler has no choice as to what he is required to pay producers nor how this money is to be distributed. Likewise, it would enable unregulated suppliers to dispose of Class I milk in the marketing area with no obligation to equalize such sales with other suppliers of the market.

Even though the rate of payment to producers for all milk might be known, it would still be impossible to ascertain the rate of payment on that portion of the milk disposed of in the marketing area. Since milk marketed outside the marketing area would represent most of the total supply in the unregulated plant, it would be necessary to determine payment for milk marketed to the various outlets. When handlers have both surplus as well as Class I milk in their plants, it is not realistic to assume that the purchase price for milk for each use is the same.

It has been suggested that in order to overcome this objection the plant of the unregulated handler be subject to audit and that the rate of compensation payment be based on the difference between the average utilization value at order prices in the unregulated plant and the average rate of payment to producers. This method would not recover the entire advantage of selling surplus milk as Class I in the marketing area. This method has not only the disadvantages associated with other schemes based on actual pay rates to producers, but, under the circumstances of this market, it would involve an extremely complicated and administratively impracticable system of accounting and determination in such plants. The unregulated plants which are actual or potential sources of supply for supplemental milk for order handlers are numerous and widely scattered. Determination of utilization value in these plants would involve the same complications and administrative expense and difficulties as discussed earlier which would be involved in complete regulation of such plants. To make the detailed accounting necessary to establish classification, such unregulated dealers would need to maintain the same detailed records as wholly regulated handlers.

Another alternative method for determining the rate of compensation payments would be to base the rate of payment on the difference between blend prices prevailing in an area and the Class I price. This method has been suggested because it is assumed that unregulated handlers will be forced by competition to pay farmers approximately average blend prices. This assumption is not valid to the degree that a payment based on the difference between such prices could be expected to insure that unregulated milk would not be used to displace regulated milk for cost reasons at all times throughout the year. Unregulated plants, as well as regulated plants, have some surplus milk at all times and particularly during the seasons of flush production. As a result, prices paid farmers are, in fact, blend prices made up of returns from the sale of milk in Class I outlets, as well as sales to the surplus market. If an unregulated plant were in a position to sell its surplus milk for Class I use in the marketing area and maintain its own Class I outlets, it would have a competitive advantage over regulated handlers who found it necessary to dispose of part of their milk as surplus.

In the absence of a compensation payment, the unregulated plants located anywhere in the potential supplemental supply area might sell milk for Class I use in other markets at substantial handling charges whenever fluid milk tended to be in short supply, and then dispose of milk for Class I use in the order market to maintain the blend price during the season of flush production when Class I sales elsewhere were difficult to make. A plant which could thus keep its disposition of milk largely as Class I and avoid qualification as a pool plant would be in a position to pay its farmers at a higher rate than that received by producers under the order, or it could retain the extra return as profit. In either case, however, pool milk would be at a disadvantage relative to unregulated milk.

Handlers under the order seeking to purchase unregulated milk will naturally resort to the lowest cost source from which suitable milk is available. In fixing the rate of compensation payment, it is necessary, therefore, to determine what the lowest cost source may be and to base the payment on the difference between the cost of such milk and the cost of milk priced under the order for similar use. Milk supplies are invariably larger in spring and summer than in fall and winter, and because of relatively constant sales of fluid milk, the excess increased production must be marketed largely as manufactured products. This outlet represents the opportunity cost of the surplus milk since it is the highest price at which the milk can otherwise be sold. It is this opportunity cost or value of such milk which would be effective in determining the price at which the unregulated plant would sell such milk.

The relationship between the supply of milk in the order supply area and the demand for such milk will tend to fluctuate considerably from year to year according to production conditions. Fluctuations will tend to be similar in the production area for the market and surrounding milksheds. However, the record indicates that some milk which must otherwise be sold for manufacture will be available most of the time in the Ozark area.

By choosing a rate of compensation payment which reflects the cost of the cheapest milk which may be expected to be available, any advantage to individual handlers relative to others, in obtaining such cheap milk and substituting it for producer milk in Class I, is removed insofar as administratively possible and no handler is given the clear opportunity to gain an unfair advantage which otherwise would exist. Although the unfair advantage of obtaining other source milk is removed by the rate of payment herein provided, nevertheless, if other source milk is to be purchased, the incentive for purchasing the cheapest of such milk remains; for the lower the price which a handler pays for other source milk, the lower will be his total cost of purchasing such milk. This follows from the fact that the measure of the compensation payment is an objective one and does not depend upon the particular price which the handler paid for the other source milk.

As pointed out heretofore in connection with material issue No. 4, the process of marketwide pooling creates an unnatural incentive for milk to come into the market to gain certain advantages. Such milk would not be associated with the market in the absence of regulation.

The rate of payment recommended here will tend to equalize the competitive position of priced and unpriced milk, and will avoid displacement of producer milk for reasons of cost. However, if experience proves that milk is available to handlers at prices lower than those anticipated, or that such payments otherwise interfere with the purposes of the order, then it will be necessary to reconsider the rate of compensation payment on the basis of that experience.

In addition to that other source milk which enters the marketing area through pool plants, some other source milk may be distributed within the marketing area from nonpool plants and the milk from such plants will be unpriced milk. The compensation charges applicable to other source milk disposed of in the marketing area from distributing plants which are nonpool plants should be the same as those applicable to other source milk distributed from pool plants discussed above. It would not be possible to stabilize the market under the classified pricing program if nonpool plants were allowed to distribute unpriced milk in the marketing area without such payments. Such milk should be classified and treated the same as unpriced milk distributed through any other channels.

Handlers distributing such unpriced milk in the marketing area from nonpool distributing plants have the same opportunity to buy milk at the opportunity cost level as do the operators of pool plants who purchase other source milk. Moreover, the operator of the nonpool plant in all probability has surplus milk in his own plant which he would want to dispose of on any basis which would yield a higher return than the surplus value. It would be particularly easy to dispose of such milk for Class I use in the marketing area by bidding for large contracts such as hospitals, defense establishments or large institutions. With surplus outlets as the alternative, and no compensation payments to make, the nonpool handlers would have considerable incentive or margin to underbid the seller of priced milk for such sales. A nonpool plant might also use such price advantage in selling his surplus milk to Class I outlets for the purpose of establishing a regular trade on retail or wholesale routes to homes and stores in the marketing area. The nonpool plant might sell up to 5 percent of its milk into the marketing area as Class I without becoming subject to regulation. To allow a nonpool plant to use its surplus milk in this manner for establishing a regular trade in the marketing area without compensation payments would mean that such plant would have a marked competitive advantage over regulated handlers selling priced milk. Such conditions could readily lead to disorderly marketing conditions.

It is considered inappropriate also that a plant distributing a small share of its milk in the marketing area should be subject to full regulation because of that small share of its milk so marketed. Such regulation might place a plant of this kind at a competitive disadvantage with respect to its unregulated competition. In some cases, a nonpool plant may be disposing of a larger share of its milk as Class I than the average utilization for the market. In such cases, the compensation payments herein provided might cost the handler less than the equalization payments such plant would pay if fully regulated as a pool plant. In these instances, the sale of small quantities of milk in the marketing area would be more likely to take place under the compensation payment provisions herein provided than if full regulation were extended to all plants.

The rate of compensation payment provided for nonpool plants making distribution directly in the marketing area should be the same as that for pool plants which obtain and use unpriced milk in Class I. The administrative feasibility of any other method of levying compensation payments is substantially the same as that described in the case of unpriced milk distributed in the marketing area by pool plants.

No compensation payments should be required on milk classified and priced as Class I under another Federal milk marketing order. The minimum prices for Class I milk under other Federal orders where handlers under this order might obtain supplemental supplies approximate or exceed the Springfield order Class I prices as adjusted for location of the supplying plants. Since handlers under other Federal orders must pay for producer milk on a utilization basis, they would not be in a position to unload any surplus producer milk into the market for Class I use at less than Class I prices.

There is no other alternative disposition of funds collected as compensation payments under the authority of the act other than that herein provided. In order that the money accruing under this provision should provide the maximum benefit, it is concluded that it should be added to the producer-settlement fund and disbursed monthly to producers through the uniform price.

It is necessary that the order specify the handler obligated to make the compensation payments. If the unpriced milk is distributed in the marketing area from a non-pool plant, the operator or such plant should make the payment. In the case of supplemental milk received at pool plants from unpriced sources, either the buying or selling plant might be assessed. From the standpoint of the economics involved, it would make no difference, since the amount of payment would be the same in both cases.

From the standpoint of administration and enforcement, it would be much easier and simpler for the regulated plant to make the payment. It is the regulated handler with whom the market administrator regularly deals. Such handler would be expected to know and understand the terms and provisions of the order. He is the handler who would be responsible for distributing the milk in the regulated market. Whether or not a compensation payment would be required would depend upon the application of the allocation provisions of the order to the plant of the receiving handler.

The seller, on the other hand, would not be aware until later whether a compensation payment would be required, and might not even know at the time of the sale, particularly if the sale took place through a broker, whether his milk would be moved to a regulated market for disposition. If enforcement proceedings were to be required, it would be more convenient and logical to bring the case to trial in the area of the regulated market where the problem arose.

The compensation payments herein provided will not prohibit the marketing of milk nor limit the marketing of milk products from any production area of the United States. The rate of payment required would be uniform to any plant regardless of whether it is located in the marketing area or at any distance from the marketing area.

The quantity of milk and milk products which may be sold in any regulated market is dependent to a considerable extent upon the price fixed under the order for the particular class of utilization. Such influence should not be construed, however, as a limitation of the type precluded under the act. No price can be fixed without influencing, to some extent, the quantity of milk and milk products which may be sold from either regulated or unregulated sources. No quantitative limitations are imposed under the order on the amounts of unpriced milk which may be disposed of in the marketing area nor do they prohibit such use or any other use of unpriced nonpool milk or milk products. The compensation payment herewith provided will not discriminate against producers by areas, but will provide for equalization of competitive prices by type of transaction with respect to relationship between regulated and unregulated milk.

The payment will not deprive suppliers of unpriced milk of a high priced market which they might otherwise enjoy. The alternative sale value of the unpriced milk is recognized, and this value is returned to these sources when sale is made to the order market. If marketing facilities and outlets are such that it is advantageous for unpriced sources to dispose of their surplus milk to the Class I market under the order, they may be expected to do so. The return which they receive should be equal to the return for such milk if manufactured in their own plants.

The compensation payment herewith provided has as its primary purpose the elimination of economic incentives for handlers to use unpriced milk to displace minimum priced milk in Class I sales. The rate of payment found to be appropriate for this purpose is one which recognizes general competitive conditions in the purchase and sale of regulated and unregulated milk.

It is recognized, however, that general competitive conditions do not prevail in all cases. Each handler is situated differently and each individual transaction is made under different circumstances. It is not possible, however, to adjust prices or payment to individual circumstances or transactions. Such an individual approach would not be administratively or economically feasible. Compensatory payments must therefore be applied at a definite and certain rate applicable to all handlers similarly situated. No single rate of payment can be determined, however, which would result in complete equality of cost to all handlers. Consequently, instances will undoubtedly arise which will appear to indicate that the objectives of the compensatory payment are not being achieved in particular cases. Therefore, the payments required may, in some instances, appear harsh.

6. *Distribution in the marketing area by handlers under other Federal orders.* The order now provides for a compensatory payment on Class I milk disposed on a route in the marketing area by a handler regulated under another Federal order. The payment on such milk, which is required only when the Class I price under this order is below that under the other Federal order, is made to the producer-settlement fund at the rate of the difference between this order's Class I price and the Class I price under the other Federal order as adjusted for differentials provided under the order.

It was proposed at the hearing that this provision be deleted from the order. Proponents contended that if milk is properly priced under the provisions of a Federal order, the addition of transportation costs from the supplying market to the deficit market equalizes the cost to a point where the receiving handler pays a price that is at least equal to that paid for locally produced milk.

Testimony indicated that since inception of the order in March 1951 no Class I milk is being distributed in the marketing area now regulated from plants subject to other Federal orders. Very little milk is being distributed from such plants in the area as proposed to be expanded. The relationship between Class I prices under the Ozark and other Federal order markets is such as to give no unnatural incentive for such distribution.

No compensation payment should be required on milk classified and priced as Class I under another Federal order if such milk is received from the other order market in bulk tank shipments. The same is true if the milk is distributed in the marketing area directly by the handler regulated under the other order. The findings and the discussion pertaining to the recommended amendments concerning such bulk tank shipments is applicable to the proposal for removing from the order the provision for requiring a compensatory payment on milk distributed in the marketing area by or for a handler regulated under another Federal order. The provision for such payment should therefore be removed.

Official notice is here taken of Order No. 28, as amended, regulating the handling of milk in the Neosho Valley marketing area. That order provides that a handler subject to another Federal order shall make payment to the Neosho Valley market administrator on Class I milk disposed of in the Neosho Valley marketing area of the amount by which the Neosho Valley Class I price exceeds the Class I price under the other order. The Neosho Valley order provides further that funds thus collected may be transferred to the market administrator of the order to which the handler is subject, if such order provides for receipt of such funds and their distribution to producers. The necessary provision should be included in the Ozark order to enable the market administrator to receive payments from the Neosho Valley market administrator on Class I milk distributed in that marketing area from pool plants under this order. Such payments should be deposited in the producer settlement for distribution to all producers.

8. *Base and excess plan.* A base and excess plan for making payment to producers should not be incorporated into the order at this time. Proponents of the plan contended that its adoption would even out production. Paying each producer the surplus price for flush month deliveries which are in excess of his fall deliveries, it was claimed, would discourage unneeded production during the flush months.

The class prices under the order are on a seasonal basis. In the spring months, the price for Class I milk is but 63 cents over the basic formula price. During the fall and winter months, the Class I differential is significantly greater, the differential having reached a high of $2.02 in December 1952. The higher Class I differential, increased Class I sales, and lower production in the fall and winter months combine to make the blend price to producers for deliveries during these months substantially above that paid in the months of flush production. The average monthly blend price under the order for 3.5 percent milk for April through June 1953 was $3.61 compared to $5.55 for October through December 1952, the preceding period of short production.

It cannot be expected that the base and excess plan proposed would improve materially, if at all, the seasonal pattern of production for the market over that which is now obtained with seasonal pricing. In the spring months, heavy production and a low Class I differential result in a blend price comparatively

little above the Class II or manufacturing milk price. For April, May, and June 1953, the uniform price exceeded the Class II price by 35.5, 24 and 25 cents, respectively. This small spread between the blend and manufacturing milk prices will in itself tend to act as a deterent to greater flush month production. Moreover, the incorporation of a base and excess plan would, at the present time, be of limited value in the order since there would be such small difference between the prices paid for base milk and excess milk.

Production areas of the St. Louis and Springfield markets overlap and pricing provisions of the Springfield order are related to those of the St. Louis order. In some instances, Springfield order handlers pay premiums of their producers to bring their paying prices in line with those of St. Louis plants in the area. To incorporate a base and excess plan in the Springfield order while none is provided in the St. Louis order would tend to impede the orderly transfer of producers from one market to the other when such transfer might be in the best interest of orderly marketing.

9. *Transportation and location differentials.* A change in the marketing area from that of a single city to a territory in which some of the points are more than 175 miles apart would require giving recognition to the difference in value at various locations of milk received from producers and to the costs in moving milk which is received at plants outside the marketing area to points in the area. A proposal before the hearing provided that a differential of 30 cents per hundredweight be paid by handlers for Class I milk received from producers at pool plants located in Washington and Benton counties, Arkansas. It was contended that, historically, prices paid to producers at these locations for Class I milk were higher than prices paid at Springfield or at other locations in the marketing area. Testimony submitted at the hearing indicated that since inception of the order in March 1951 through November 1953 the prices paid producers by Fayetteville handlers for base milk (and at times for all milk) averaged approximately 15 cents per hundredweight above the Springfield order Class I price.

Milk from Chicago milkshed and southwestern Missouri plants is frequently shipped to markets in southwestern United States for fluid use. Such shipments are made during periods of short supply to supplement an inadequate local supply of producer milk. Prices for milk shipped from northern markets to deficit markets in the south must return to the seller the value of the milk at his plant and the costs involved in moving the milk to the buyer. The greater the distance that a deficit market is from the selling plant the larger is the total cost of the milk. The value of milk delivered by a producer to a plant at Springfield, Missouri, for example, is less than the value of the same milk, f. o. b. Dallas, Texas. The difference in value at the two locations is brought about chiefly by transportation costs. Producer prices prevailing in the two markets will generally reflect these differences in value.

The value of milk in Benton and Washington counties, Arkansas, is affected by the prices paid in other markets to which producers located in the production area for these counties may, and do, ship. Handlers under the Dallas, Tulsa, and St. Louis orders receive milk from farms located in this common production area. Some producers who had been associated with the Fayetteville market have discontinued their deliveries to Fayetteville handlers and are shipping directly to handlers under the Dallas and Tulsa orders. The gross price which a producer receives for his milk at these markets is reduced by the increased transportation costs, so that his net return is generally in line with the net return which he would have received at plants in Benton and Washington counties.

Plants in southwestern Missouri are logical sources for supplemental supplies of milk for handlers in Benton and Washington counties. Milk has been purchased during periods of short supply by handlers in these Arkansas counties from plants in southwestern Missouri under the Springfield order, and it can reasonably be expected that supplemental supplies in the future will be from the same sources.

Any differential established in the order for Class I milk delivered by producers to plants in Benton and Washington counties should be at a rate which will maintain and encourage an adequate supply of producer milk for that segment of the marketing area. On the other hand, fixing such a differential at too high a level would encourage handlers to replace producer milk by purchases from other handlers and would be detrimental to the best interests of producers and of the market. It is concluded that the Class I price for milk received from producers at pool plants located at Benton and Washington counties should be 15 cents per hundredweight above that provided in the order for Class I milk received from producers at other plants. The money received from handlers in payment of the 15 cent differential would be distributed to producers delivering to these handlers. The rate of such payment would be computed each month after determining the percentage that the aggregate Class I sales of such handlers is of their total receipts from producers. If the percentage thus calculated is less than 100 percent it would be multiplied by 15 cents to obtain the differential payable to producers. If the percentage calculated is 100 percent or more, the rate payable to producers would be 15 cents.

The transportation differential applicable to Class I milk received from producers at a plant located outside the marketing area should be minus 1.5 cents per hundredweight of milk for each 10 miles that such plant is located from the nearest point in the marketing area. Deduction of a location differential from payments to producers making deliveries to these plants would be at the same rate. The adjustment and the rate thereof herein provided are representative of those prescribed in other Federal milk marketing orders.

On an overall basis, production for the Springfield marketing area has been high in relation to demand for milk for fluid use. The record indicates that the supply of producer milk on a market-wide basis for the expanded marketing area would likewise be ample. Such handlers as may be in short supply at certain periods of the year would generally be able to obtain supplemental supplies from other handlers whose plants are located in the marketing area. However, when milk is received from producers at plants outside the marketing area the price should reflect its value to the market at that location. The transportation and location differentials herein provided, will contribute toward this end.

10. *Expansion of the area to which transfers for Class II use may be made.* Enlargement of the marketing area will require revision of the transfer provisions of the order. As now provided, transfers or diversions in bulk form as milk, skim milk, or cream to a nonpool plant located more than 125 miles from the City Hall in Springfield, Missouri, are classified in Class I. Similar transfers or diversions within a 125-mile radius of the Springfield City Hall may be classified in Class II if the buyer maintains records of utilization of all skim milk and butterfat at his plant, makes such records available to the market administrator for the purpose of verification, and uses not less than an equivalent amount of skim milk and butterfat as Class II milk at his plant during the month.

As proposed herein, classification in Class II of transfers or diversions in bulk form as milk or skim milk to nonpool plants would be permitted if such nonpool plants are in the marketing area or are located not more than 50 miles from the nearest place in the marketing area. Classification in Class II of cream transferred in bulk form to a nonpool plant wherever located would be permitted when such cream is transferred without Grade A certification of any health authority. The conditions now provided in the order requiring the buyer to maintain records of utilization, have such records available for audit, and use an equivalent amount of product in Class II during the month would be continued.

The change herein proposed would be appropriate for all handlers in the expanded marketing area and would not restrict the manner in which they are now operating with regard to disposing of surplus milk to nonpool plants. Because of the comparatively large geographic area included in the marketing area as proposed, it can be expected that the majority of Class II fluid milk transfers to nonpool plants will be to those in the marketing area. The limitation of 50 miles to the nearest point in the marketing area on Class II shipments of milk and skim milk to nonpool plants outside the marketing area will provide adequate leeway for all handlers, and especially for those handlers whose plants are located outside of, or in the outer limits of, the marketing area.

11. *Level of the Class I price.* The Class I price for July through March

should be the St. Louis Class I price minus 27 cents. The level of the Class I price for the other months, April, May, and June, is the basic formula price plus 63 cents.

The order now provides that for each of the months of July through March the Class I price shall be the higher of (1) the Class I price announced for such month under the St. Louis order minus 27 cents; or (2) the basic formula price for the preceding month plus $1.08 for July through December, and plus 83 cents for January through March. Since the amendment providing for the above became effective December 1, 1951, the alternative of the basic formula price plus $1.08 or 83 cents has always been lower than the St. Louis Class I price minus 27 cents for the applicable month.

The St. Louis milkshed overlaps the supply area for the proposed expanded marketing area to a very large degree. Milk routes picking up milk for country plants of St. Louis handlers are conveniently located with respect to a large share of the producers supplying the marketing area proposed herein. There are about half as many St. Louis order producers as there are producers under the present order in the counties from which the present pool draws supplies. The bulk of these St. Louis producers supply milk to plants which are subject to a minus 27-cent zone differential under the St. Louis order.

The size of the St. Louis market in relation to the marketing area herein proposed makes it essential that the prices be closely aligned between the two markets in order to avoid any abnormal shifting back and forth of producers between the two markets. Relating the order Class I price to St. Louis will provide greater stability to the market. A direct tie to the St. Louis price will provide a sound economic basis for interchange of supplies between the two markets. On the other hand, an unrealistic basis for pricing Class I milk in the two markets might well force handlers under this order to go to some other market for supplemental Class I supplies when such supplies would be available from nearby St. Louis order plants. The reverse of this situation could likewise apply when St. Louis order handlers are in need of supplemental supplies for Class I purposes and handlers under this order have supplies in excess of their Class I needs.

Producers can and do shift back and forth between handlers under this and the St. Louis orders. During the short season supplemental supplies of milk are purchased by milk distributors in southwestern Missouri and northwest Arkansas for plants under both orders located in the same vicinity. A basis of pricing at these plants giving consideration to the location differential applicable to the farther away market will place both plants on an equal competitive basis.

Except for the three months of flush production, changes in the Class I price under the St. Louis order should be promptly reflected in the Class I price under this order. At present this is accomplished by the order provision which establishes the Class I price at not less than the St. Louis order Class I price minus 27 cents. The other alternative used in determining the Class I price during the months of July through March has outlasted any usefulness it may have had. As indicated above, the alternative of adding $1.08 and 83 cents to the basic formula price during the months of July through December and January through March, respectively, has not been more than the St. Louis Class I price minus 27 cents since the order has been in effect. Removing this alternative formula for determining the Class I price would provide a consistent alignment with the St. Louis order Class I price in each month. This would insure that handlers in both markets, where plants are located in the same vicinity, would be on an equal competitive basis. Since the bulk of the milk received by St. Louis handlers in the milkshed common to this area is at the minus 27-cent location differential in the St. Louis order, the value of the milk for Class I purposes available from such plants under either order would be the same for those months, July through March, when they might be competing for Class I sales.

If for any reason the St. Louis order were suspended or if the Class I price under that order were unavailable for computing the Class I price under this order, the order should provide that the market administrator use a price which is determined by the Secretary to be an equivalent or comparable price. Such a provision in the order will insure against some unforeseen contingencies which may arise in connection with determining the Class I price on the basis provided herein.

General findings. (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determine pursuant to Section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk, in the marketing area and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

Rulings on proposed findings and conclusions. Briefs were filed by or on behalf of producers and handlers interested in this proceeding. Such briefs contained statements of fact, proposed findings and conclusions, and arguments with respect to the provisions of the proposed amendments. Every point covered in the briefs was carefully considered along with the evidence in the record in making the findings and reaching the conclusions hereinbefore set forth. To the extent that the findings and conclusions proposed in the briefs are inconsistent with the findings and conclusions contained herein, the request to make such findings or to reach such conclusions is denied on the basis of the facts found and stated in connection with the conclusions in this recommended decision.

Recommended marketing agreement and amendment to the order. The following order, as amended, is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order, as amended, and as hereby proposed to be further amended.

DEFINITIONS

§ 921.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 921.2 *Secretary.* "Secretary" means the Secretary of Agriculture or other officer or employee of the United States authorized to exercise the powers or to perform the duties, pursuant to the act of the Secretary of Agriculture.

§ 921.3 *Department.* "Department" means the United States Department of Agriculture or such other Federal agency as is authorized to perform the price reporting functions specified in this part.

§ 921.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 921.5 *Cooperative association.* "Cooperative association" means any cooperative marketing association of producers which the Secretary determines (a) to be qualified under the provisions of the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act," (b) to have full authority in the sale of milk of its members, and (c) to be engaged in making collective sales or marketing milk or its products for its members.

§ 921.6 *Ozark marketing area.* "Ozark marketing area," hereinafter called the marketing area, means all of the territory within the limits of Benton, Boone, Marion, and Washington counties in Arkansas, and Barry, Christian, Douglas, Greene, Howell, Laclede, Lawrence, Ozark, Taney, Webster, and Wright counties and the Fort Leonard Wood Military Reservation in Missouri.

§ 921.7 *Producer.* "Producer" means any person other than a producer-handler who produces milk (a) under a dairy farm permit issued by a health authority duly authorized to administer regulations governing the quality of milk disposed of in the marketing area, or (b) acceptable to agencies of the United States Government for fluid consumption in its institutions or bases in the marketing area; which milk is delivered from the farm to a pool plant or diverted from a pool plant to a nonpool plant for the account of a handler. Milk so diverted shall be deemed to have been received at the pool plant from which diverted if diverted for the account of the operator of such plant. Milk so diverted by a cooperative association shall be deemed to have been received by such association. This definition shall not include a person who produces milk which is received at the plant of a handler partially exempt from the provisions of this order pursuant to § 921.62 with respect to milk received by such handler.

§ 921.8 *Handler.* "Handler" means: (a) Any person in his capacity as the operator of an approved plant or a pool plant; or (b) any cooperative association with respect to the milk from any producer member of such association which is diverted from a pool plant to a nonpool plant by such cooperative association for its account.

§ 921.9 *Approved plant.* "Approved plant" means a plant where milk is processed and packaged and from which milk, skim milk or cream as disposed of as Grade A Class I milk in the marketing area to wholesale or retail outlets (including sales through vendors or plant stores).

§ 921.10 *Supply plant.* "Supply plant" means a plant, except an approved plant, at which milk is received from dairy farmers producing milk (a) under a dairy farm permit issued by a health authority duly authorized to administer regulations governing the quality of milk disposed of in the marketing area, or (b) acceptable to agencies of the United States Government for fluid consumption in its institutions or bases in the marketing area; and which plant is approved by such health authority or agencies of the United States Government to furnish milk to an approved plant.

§ 921.11 *Pool plant.* "Pool plant" means: (a) An approved plant from which not less than 5 percent of its receipts of producer milk during the month is disposed of as Class I milk in the marketing area to wholesale or retail outlets (including sales through vendors or plant stores); or (b) a supply plant from which producer milk is shipped during the month to an approved plant which is a pool plant: *Provided*, That such supply plant shall not be a pool plant for the months of April, May, June and July, unless such plant makes its milk available to other handlers for distribution as Class I milk in the marketing area. Such milk shall be considered to have been made available if the operator of such plants files with the market administrator on or before the first day of each of the preceding months of August through March a statement offering milk for sale and specifying terms and conditions of sale, including the price or handling charge above the Class I price; such offer to be posted in the market administrator's office.

§ 921.12 *Nonpool plant.* "Nonpool plant" means any milk processing, distributing or manufacturing plant which is not a pool plant.

§ 921.13 *Producer milk.* "Producer milk" means all skim milk and butterfat produced by a producer, which is received at the pool plant directly from producers or diverted pursuant to § 921.7.

§ 921.14 *Other source milk.* "Other source milk" means all skim milk and butterfat other than that contained in (a) producer milk, (b) milk, skim milk or cream received from a pool plant, or (c) Class II nonfluid milk products which are received and held or disposed of without further processing or packaging.

§ 921.15 *Producer-handler.* "Producer-handler" means any person who produces milk and operates an approved plant, but who receives no milk from producers.

MARKET ADMINISTRATOR

§ 921.20 *Designation.* The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by, and shall be subject to removal at the discretion of, the Secretary.

§ 921.21 *Powers.* The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To receive, investigate, and report to the Secretary complaints of violation;

(c) To make rules and regulations to effectuate its terms and provisions; and

(d) To recommend amendments to the Secretary.

§ 921.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including but not limited to, the following:

(a) Within 45 days following the date upon which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee who handles funds entrusted to the market administrator;

(d) Cause to be paid out of the funds provided by § 921.88 the cost of his bond and those of his employees, his own compensation, and all other expenses (except those incurred under § 921.87) necessarily incurred by him in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part and upon request by the Secretary surrender the same to such other person as the Secretary may designate;

(f) Submit his books and records to examination by the Secretary and furnish such information and reports as the Secretary may request;

(g) Audit all reports and payments of each handler by inspection of such handler's records and the records of any other handler or person upon whose utilization the classification of skim milk and butterfat for such handler depends;

(h) Publicly disclose at his discretion unless otherwise directed by the Secretary, the name of any person who, after the date upon which he is required to perform such acts, has not made (1) reports pursuant to §§ 921.30 through 921.32, or (2) payments pursuant to §§ 921.80 through 921.88;

(i) Publicly announce on or before:

(1) The 6th day of each month, the price and butterfat differential for Class I milk and on or before the 6th day after the end of each month the price and butterfat differential for Class II milk; and

(2) The 12th day after the end of such month, the uniform price computed pursuant to § 921.71, the butterfat differential computed pursuant to § 921.81, and the location differential pursuant to § 921.82 (b);

(j) Prepare and disseminate publicly such statistics and information as he deems advisable and as do not reveal confidential information; and

(k) On or before the 15th day after the end of each month, report to each cooperative association of producers which so requests the percentage in each class of the producer milk caused to be delivered by the cooperative association or by its members to each handler during the month. For the purpose of this report, the milk so received shall be allocated in each class for each handler in the same ratio as milk received from all producers by such handler during the month.

REPORTS, RECORDS AND FACILITIES

§ 921.30 *Reports of receipts and utilization.* On or before the 7th day after the end of each month, each handler, except a producer-handler, shall report to the market administrator in the detail and on forms prescribed by the market administrator:

(a) The quantities of skim milk and butterfat contained in all receipts at each of his approved and supply plants within such month:

(1) Of producer milk (including his own farm production),

(2) Of milk, skim milk and cream from other handlers, and

(3) Of other source milk;

(b) The quantities of skim milk and butterfat contained in produce milk diverted pursuant to § 921.7;

(c) The quantities of skim milk and butterfat contained in inventories of Class I products on hand at the beginning and end of the month;

(d) The utilization of all skim milk and butterfat required to be reported pursuant to paragraphs (a), (b) and (c) of this section, including a separate statement of the disposition of Class I milk outside the marketing area;

(e) The name and address of each producer from whom milk was not received during the preceding month, and

the date on which such milk was first received;

(f) The name and address of each producer who discontinued deliveries of milk, and the date on which delivery ceased; and

(g) Such other information with respect to receipts and utilization of skim milk and butterfat as the market administrator may prescribe.

§ 921.31 *Reports of payments to producers.* On or before the 20th day after the end of each month, each handler who purchased or received milk from producers shall submit to the market administrator his producer payroll for such month which shall show for each producer:

(a) The total pounds of milk received and the average butterfat content thereof, and

(b) The amount of payment to each producer or cooperative association, with the prices, deductions, and charges involved.

§ 921.32 *Reports of producer-handlers.* Each producer-handler shall make report to the market administrator at such time and in such manner as the market administrator may prescribe.

§ 921.33 *Records and facilities.* Each handler shall maintain and make available to the market administrator or to his representative during the usual hours of business, such accounts and records of his operations, and such facilities as are necessary for the market administrator to verify or establish the correct data with respect to:

(a) The skim milk and butterfat received, utilized or disposed of in any form;

(b) The weights and tests for butterfat and other content of all milk, skim milk, cream and milk products handled;

(c) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream, and each milk product on hand at the beginning and end of each month; and

(d) Payments to producers and cooperative associations.

§ 921.34 *Retention of records.* All books and records required under this order to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain: *Provided*, That if within such three year period the market administrator notifies the handler in writing that the retention of such books and records or of specified books and records is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records or specified books and records until further written notification from the market administrator. In either case, the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the books and records are no longer necessary in connection therewith.

CLASSIFICATION

§ 921.40 *Basis of classification.* All skim milk and butterfat received within the month by a handler and which is required to be reported pursuant to § 921.30 shall be classified by the market administrator pursuant to the provisions of §§ 921.41 to 921.46.

§ 921.41 *Classes of utilization.* Subject to the conditions set forth in §§ 921.43 and 921.44, the classes of utilization shall be as follows:

(a) Class I milk shall be all skim milk and butterfat disposed of in fluid form as milk, skim milk, buttermilk, milk drinks (plain or flavored), cream (fresh or sour) and mixtures of fresh milk, skim milk and cream (except aerated cream, ice cream mix or eggnog); and all skim milk and butterfat not specifically accounted for under paragraph (b) of this section.

(b) Class II milk shall be all skim milk and butterfat (1) used to produce any product other than those specified as Class I in paragraph (a) of this section, (2) in inventory variation of milk, skim milk, cream, or any Class I product, (3) in shrinkage allocated to receipts of milk from producers, but not in excess of 2 percent of such receipts of skim milk and butterfat, respectively, and (4) in shrinkage allocated to receipts of other source milk.

§ 921.42 *Shrinkage.* The market administrator shall allocate shrinkage over a handler's receipts as follows:

(a) Compute the total shrinkage of skim milk and butterfat, respectively, for each handler; and

(b) Prorate the resulting amounts between the receipts of skim milk and butterfat in producer milk and in other source milk.

§ 921.43 *Responsibility of handlers and reclassification of milk.* (a) All skim milk and butterfat shall be Class I milk unless the handler who first receives such skim milk or butterfat can prove to the market administrator that such skim milk or butterfat should be classified otherwise.

(b) Any skim milk or butterfat shall be reclassified if verification by the market administrator discloses that the original classification was incorrect, or if reused in Class I milk after first being classified as Class II milk.

§ 921.44 *Transfers.* Skim milk or butterfat disposed of from a pool plant either by transfer or diversion shall be classified:

(a) As Class I milk if transferred in the form of milk, skim milk, or cream to the pool plant of another handler (except a producer-handler) unless utilization in Class II is claimed by both handlers in their reports submitted to the market administrator pursuant to § 921.30 on or before the 7th day after the end of the month within which such transaction occurred: *Provided*, That the skim milk or butterfat so assigned to Class II milk shall be limited to the amount thereof remaining in Class II in the plant of the transferee-handler after the subtraction of other source milk pursuant to § 921.46 and any additional amounts of such skim milk or butterfat shall be assigned to Class I milk: *And provided further*, That if either or both handlers have received other source milk, the skim milk or butterfat so transferred or diverted shall be classified at both plants so as to result in the greatest possible assignment of Class I milk to producer milk;

(b) As Class I milk if transferred to a producer-handler in the form of a product designated as Class I milk pursuant to § 921.41 (a);

(c) As Class I milk if transferred or diverted in the form of milk, skim milk or cream to a nonpool plant except as otherwise provided in paragraphs (d) and (e) of this section;

(d) As Class I milk if transferred or diverted in bulk form as milk or skim milk to a nonpool plant located in the marketing area or not more than 50 miles by the shortest highway distance as determined by the market administrator from the nearest point in the marketing area unless:

(1) The handler claims Class II on the basis of utilization mutually indicated in writing to the market administrator by both buyer and seller on or before the 7th day after the end of the month within which such transaction occurred;

(2) The buyer maintains books and records showing the utilization of all skim milk and butterfat at his plant which are made available if requested by the market administrator for the purpose of verification; and

(3) Not less than an equivalent amount of skim milk and butterfat was actually used as Class II milk in such buyer's plant.

(e) As Class I milk if transferred in bulk form as cream to a nonpool plant unless:

(1) Such cream is transferred without Grade A certification of any health authority;

(2) The handler claims Class II in his report submitted to the market administrator pursuant to § 921.30 on or before the 7th day after the end of the month within which such transaction occurred;

(3) The buyer maintains books and records showing the utilization of all skim milk and butterfat at his plant which are made available if requested by the market administrator for the purpose of verification; and

(4) Not less than an equivalent amount of skim milk and butterfat was actually used as Class II milk in such buyer's plant.

§ 921.45 *Computation of skim milk and butterfat in each class.* For each month the market administrator shall correct mathematical and other obvious errors in the report of receipts and utilization submitted by each handler, and shall compute the total pounds of skim milk and butterfat, respectively, in Class I milk and Class II milk for such handler.

§ 921.46 *Allocation of skim milk and butterfat classified.* After computing the classification of all skim milk and butterfat for each handler pursuant to § 921.45, the market administrator shall determine the classification of producer milk received by such handler as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class II milk the pounds of skim milk determined pursuant to § 921.41 (b) (3);

(2) Subtract from the remaining pounds of skim milk in each class the pounds of skim milk received from pool plants of other handlers in a form other than milk, skim milk, or cream, according to its classification pursuant to § 921.41;

(3) Subtract from the pounds of skim milk remaining in Class II milk the remaining pounds of skim milk in other source milk which was not subject to the Class I pricing provisions of an order issued pursuant to the act: *Provided*, That if the pounds of skim milk to be subtracted is greater than the remaining pounds of skim milk in Class II milk, the balance shall be subtracted from the pounds of skim milk in Class I milk;

(4) Subtract from the pounds of skim milk remaining in Class II milk the pounds of skim milk in other source milk which was subject to the Class I pricing provisions of another order issued pursuant to the act: *Provided*, That if the pounds of skim milk to be subtracted is greater than the remaining pounds of skim milk in Class II milk, the balance shall be subtracted from the pounds of skim milk in Class I milk;

(5) Subtract from the pounds of skim milk remaining in each class the skim milk received in milk, skim milk or cream from pool plants of other handlers according to its classification pursuant to § 921.44 (a);

(6) Add to the pounds of skim milk remaining in Class II milk the pounds of skim subtracted pursuant to subparagraph (1) of this paragraph;

(7) If the pounds of skim milk remaining in both classes exceed the pounds of skim milk received in milk from producers, subtract such excess from the remaining pounds of skim milk in series beginning with Class II milk. Any amount so subtracted shall be known as "overage."

(b) Determine the pounds of butterfat in each class to be allocated to producer milk in the same manner prescribed for skim milk in paragraph (a) of this section.

(c) Add the pounds of skim milk and the pounds of butterfat allocated to producer milk in each class, respectively, as computed pursuant to paragraphs (a) and (b) of this section and determine the weighted average butterfat content of the milk in each class.

MINIMUM PRICES

§ 921.50 *Basic formula price.* The basic formula price per hundredweight to be used in determining the prices set forth in § 921.51 shall be the higher of the prices per hundredweight for milk of 3.5 percent butterfat content computed pursuant to paragraphs (a) and (b) of this section.

(a) Determine the arithmetical average of the basic or field prices to be paid per hundredweight for milk of 3.5 percent butterfat content received from farmers during the month at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture:

Present Operator and Location

Carnation Co., Ava, Mo.
Carnation Co., Seymour, Mo.
Pet Milk Co., Greenville, Ill.
Litchfield Creamery Co., Litchfield, Ill.
Borden Co., Mount Pleasant, Mich.
Carnation Co., Sparta, Mich.
Pet Milk Co., Hudson, Mich.
Pet Milk Co., Wayland, Mich
Pet Milk Co., Coopersville, Mich.
Borden Co., Orfordville, Wis.
Carnation Co., Chilton, Wis.
Carnation Co., Berlin, Wis.
Carnation Co., Richland Center, Wis.
Carnation Co., Oconomowoc, Wis.
Pet Milk Co., New Glarus, Wis.
Pet Milk Co., Belleville, Wis.
Borden Co., New London, Wis.
White House Milk Co., Manitowoc, Wis.
White House Milk Co., West Bend, Wis.

(b) The price per hundredweight computed as follows: Multiply by 3.5 the simple average as computed by the market administrator of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the Department during the month, add 20 percent thereof, and add or subtract, as the case may be, to such sum 3½ cents for each full ½ cent that the weighted average of carlot prices per pound for nonfat dry milk solids, spray and roller process, respectively, for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month by the Department, is above 5½ cents.

§ 921.51 *Class prices.* Subject to the provisions of §§ 921.52 and 921.53, the minimum prices per hundredweight to be paid by each handler for milk received from producers during the month shall be as follows:

(a) *Class I milk.* For each of the months of July through March the Class I price shall be the Class I price announced for such month under Order No. 3, as amended, regulating the handling of milk in the St. Louis marketing area, minus 27 cents, and for the months of April, May and June the price for Class I milk shall be the basic formula price for the preceding month plus 63 cents: *Provided*, That 15 cents shall be added to the price for Class I milk at pool plants located in Benton and Washington counties, Arkansas.

(b) *Class II milk.* For the months of August through February, the price for Class II milk shall be the basic formula price. For all other months, the Class II price shall be an amount computed as follows:

(1) Multiply by 4.24 the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade AA (93-score) bulk creamery butter per pound at Chicago, as reported by the Department during the month: *Provided*, That if no price is reported for Grade AA (93-score) butter, the highest of the prices reported for Grade A (92-score) butter for that day shall be used in lieu thereof;

(2) Multiply by 8.2 the weighted average of carlot prices per pound for spray process nonfat dry milk solids for human consumption, f. o. b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the immediately preceding month through the 25th day of the current month, by the Department; and

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph subtract 75 cents.

§ 921.52 *Butterfat differentials to handlers.* If the weighted average butterfat content of the milk received from producers classified, respectively, in Class I milk or Class II milk for a handler is more or less than 3.5 percent, there shall be added to, or subtracted from, the respective class price computed pursuant to § 921.51 for each one-tenth of 1 percent that such weighted average butterfat content is above or below 3.5 percent, a butterfat differential computed by multiplying the simple average, as computed by the market administrator, of the daily wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk creamery butter per pound at Chicago, as reported by the Department, by the applicable factor listed as follows:

(a) *Class I milk.* Multiply such price as computed for the preceding month by 0.120, and round to the nearest one-tenth cent.

(b) *Class II milk.* Multiply such price as computed for the current month by 0.115, and round to the nearest one-tenth cent.

§ 921.53 *Transportation differential.* If milk is received from producers at a pool plant located outside the marketing area, the Class I price for such milk shall be 1.5 cents less per hundredweight for each 10 miles or fraction thereof that such plant is from the nearest point in the marketing area than the Class I price. For the purpose of this section, the distance which a plant is from the nearest place in the marketing area shall be the shortest highway distance as determined by the market administrator.

§ 921.54 *Use of equivalent prices.* If for any reason a price specified by this part for computing class prices or for other purposes is not available in the manner described in this part, the market administrator shall use a price determined by the Secretary to be equivalent to the price which is specified.

APPLICATION OF PROVISIONS

§ 921.60 *Producer-handlers.* The provisions of §§ 921.40 through 921.46, 921.50 through 921.54, 921.70, 921.71, and 921.80 through 921.89, shall not apply to a producer-handler.

§ 921.61 *Handlers operating nonpool plants.* None of the provisions from §§ 921.44 through 921.53, inclusive, or from §§921.70 through 921.85, inclusive, shall apply in the case of a handler in his capacity as the operator of a nonpool plant, except that such handler shall, on or before the 15th day after the end of each month, pay to the market administrator for deposit into the producer-settlement fund an amount calculated by multiplying the total hundredweight of butterfat and skim milk disposed of as

Grade A Class I milk from such plant to retail or wholesale outlets (including plant stores) in the marketing area during the month, by the price arrived at by subtracting from the Class I price adjusted by the Class I butterfat and location differentials the Class II price adjusted by the Class II butterfat differential.

§ 921.62 *Plants subject to other Federal orders.* In the case of any approved plant which the Secretary determines disposes of a greater portion of its milk as Class I milk on retail or wholesale routes (including plant stores) in another marketing area regulated by another order issued pursuant to the act than is disposed of as Class I milk on retail or wholesale routes (including plant stores) in the Ozark marketing area, the provisions of this order shall not apply except as follows: The operator of such plant shall, with respect to the total receipts and utilization of skim milk and butterfat at the plant, make reports to the market administrator at such time and in such manner as the market administrator may require, and allow verification of such reports by the market administrator.

DETERMINATION OF UNIFORM PRICE

§ 921.70 *Computation of the value of milk for each handler.* For each month the market administrator shall compute the value of milk for each handler as follows:

(a) Multiply the quantity of milk in each class computed pursuant to § 921.46 (c) by the applicable class price, and add together the resulting amounts;

(b) Add an amount computed as follows: Multiply the hundredweight of skim milk and butterfat subtracted from Class I milk pursuant to § 921.46 (a) (3) and (b) by the price arrived at by subtracting from the Class I price adjusted by the Class I butterfat and location differentials the Class II price adjusted by the Class II butterfat differential;

(c) Add the amounts computed by multiplying the pounds of overage deducted from each class pursuant to § 921.46 (a) (7) and (b) by the applicable class prices.

§ 921.71 *Computation of the uniform price.* For each month the market administrator shall compute the uniform price per hundredweight of milk of 3.5 percent butterfat content, f. o. b. market, received from producers as follows:

(a) Combine into one total the values computed pursuant to § 921.70 for all handlers who made the reports prescribed in § 921.30 and who are not in default of payments pursuant to § 921.84;

(b) Add an amount equal to the total deductions to be made pursuant to § 921.82 (a);

(c) Subtract an amount equal to the total payments to be made pursuant to § 921.82 (b);

(d) Subtract if the weighted average butterfat content of producer milk is more than 3.5 percent, or add if such average butterfat content is less than 3.5 percent, an amount computed by multiplying the producer butterfat differential by the difference between 3.5 and the average butterfat content of producer milk and multiplying the resulting figure by the total hundredweight of such milk;

(e) Add the unobligated balance in the producer-settlement fund;

(f) Divide the resulting amount by the total hundredweight of producer milk; and

(g) Subtract not less than 4 cents nor more than 5 cents from the prices computed pursuant to paragraph (f) of this section. The resulting figure shall be the uniform price per hundredweight of milk testing 3.5 percent butterfat, f. o. b. market.

PAYMENTS

§ 921.80 *Time and method of payment.* Each handler shall make payment as follows:

(a) On or before the 15th day after the end of each month, to each producer for whom payment is not received from the handler by a cooperative association pursuant to paragraph (c) of this section, at not less than the uniform price computed pursuant to § 921.71 adjusted by the butterfat and location differentials computed pursuant to §§ 921.81 and 921.82 and less the amount of (1) payment made pursuant to paragraph (b) of this section, (2) marketing service deductions pursuant to § 921.89, and (3) proper deductions authorized in writing by the producer: *Provided*, That if by such date such handler has not received full payment for such month pursuant to § 921.85, he may reduce his total payments to all producers uniformly by not more than the amount of the reduction in payments from the market administrator; and the handler shall, however, complete such payments not later than the date for making payments pursuant to this paragraph next following after receipt of the balance due pursuant to § 921.85.

(b) On or before the 28th day of each month, to each producer for whom payment is not received from the handler by a cooperative association pursuant to paragraph (c) of this section, for milk received from him during the first 15 days of the month at not less than the Class II price for the preceding month.

(c) On or before the 13th day after the end of each month and on or before the 26th day of the month, in lieu of payments pursuant to paragraphs (a) and (b), respectively, of this section, to a cooperative association which so requests, with respect to producers for whose milk such cooperative association is authorized to collect payment, an amount equal to the sum of the individual payments otherwise payable to such producers.

(d) In making payments to producers pursuant to paragraph (a) of this section, each handler shall furnish each producer or each cooperative association which receives payment for such producer pursuant to paragraph (c) of this section with a supporting statement in such form that it may be retained, which shall show:

(1) The month and the identity of the handler and of the producer;

(2) The total pounds of milk delivered by the producer, and the average butterfat test thereof, and the pounds per shipment, if such information is not furnished to the producer each day;

(3) The minimum rate or rates at which payment to the producer is required under the provisions of this section;

(4) The rate which is used in making the payment if such rate is other than the applicable minimum rate;

(5) The amount or the rate per hundredweight of each deduction claimed by the handler, including any deduction claimed under paragraph (b) of this section and § 921.87, together with a description of the respective deductions; and

(6) The net amount of payment to the producer.

(e) Nothing in this section shall abrogate the right of a cooperative association to make payment to its member producers in accordance with the payment plan of such cooperative association.

§ 921.81 *Producer butterfat differential.* In making payments to producers pursuant to § 921.80, a handler shall adjust the uniform price by adding or subtracting, as the case may be, for each one-tenth of 1 percent by which the average butterfat content of such producer milk is more or less than 3.5 percent, an amount equal to the butterfat differential computed pursuant to § 921.52 (b): *Provided*, That such differential shall be rounded to the nearest one-half cent.

§ 921.82 *Location differentials.* (a) In making payments to producers pursuant to § 921.80 for milk received at a pool plant located outside the marketing area, the price per hundredweight shall be reduced 1.5 cents for each 10 miles or fraction thereof that such plant is from the nearest point in the marketing area. For the purpose of this paragraph, the distance which a plant is from the nearest point in the marketing area shall be the shortest highway distance as determined by the market administrator;

(b) In making payments to producers pursuant to § 921.80 for milk received each month at pool plants located in Benton and Washington counties, Arkansas, the price per hundredweight shall be increased by an amount obtained by dividing the total hundredweight of milk received from producers at such plants during the month into the sum resulting from the multiplication of the total hundredweight of Class I milk of such plants during such month by 15 cents: *Probided*, That the resultant price per hundredweight shall be rounded to the nearest one-half cent: *And provided further*, That the price per hundredweight shall not be increased pursuant to this paragraph by more than 15 cents.

§ 921.83 *Producer-settlement fund.* The market administrator shall establish and maintain a separate fund known as the "producer-settlement fund" into which he shall deposit all funds received pursuant to paragraphs (a) and (b) of this section, and out of which he shall make all payments required pursuant to paragraph (c) of this section.

(a) Payments made by handlers pursuant to §§ 921.61, 921.84 and 921.86;

(b) Payments received from the administrator of another order issued pursuant to the act which have been required under such order with respect to milk distributed in the marketing area regulated by such other order from pool plants;

(c) Payments due handlers pursuant to §§ 921.85 and 921.86: *Provided*, That payments due a handler shall be offset by payments due from such handler.

§ 921.84 *Payments to the producer-settlement fund.* On or before the 12th day after the end of each month, each handler shall pay to the market administrator the amount by which the value of the milk received by such handler from producers, as determined pursuant to § 921.70, is greater than an amount computed by multiplying the hundredweight of such milk by the uniform price adjusted by the producer butterfat and location differentials.

§ 921.85 *Payments out of the producer-settlement fund.* On or before the 14th day after the end of each month, the market administrator shall pay to each handler the amount by which the value of the milk received by such handler from producers, as determined pursuant to § 921.70, is less than an amount computed by multiplying the hundredweight of such milk by the uniform price adjusted by the producer butterfat and location differentials: *Provided*, That if the unobligated balance in the producer-settlement fund is insufficient to make full payment to all handlers entitled to payment pursuant to this paragraph, the market administrator shall reduce such payments at a uniform rate and shall complete such payments as soon as the appropriate funds are available.

§ 921.86 *Adjustment of accounts.* Whenever audit by the market administrator of any reports, books, records, or accounts discloses errors resulting in moneys due (a) the market administrator from a handler, (b) a handler from the market administrator, or (c) any producer or cooperative association from a handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made on or before the next date for making payments set forth in the provisions under which such error occurred.

§ 921.87 *Marketing services*—(a) *Deductions.* Except as set forth in paragraph (b) of this section, each handler in making payments to producers (other than himself) pursuant to § 921.80 shall deduct 5 cents per hundredweight, or such lesser amount as the Secretary may prescribe, with respect to all producer milk received by such handler during the month and shall pay such deductions to the market administrator on or before the 15th day after the end of such month. Such moneys shall be used by the market administrator to verify weights, samples and tests of milk received from, and to provide market information to such producers.

(b) *Deductions with respect to members of a producers' cooperative association.* In the case of producers for whom a cooperative association is actually performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions from the payments to be made directly to producers pursuant to § 921.80 (a) as are authorized by the membership agreement or marketing contract between such cooperative association and such producers, and on or before the 15th day after the end of such month, pay over such deductions to the cooperative association rendering such services.

§ 921.88 *Expense of administration.* As his pro rata share of the expense of administration of this part, each handler shall pay to the market administrator on or before the 15th day after the end of the month for such month 5 cents or such lesser amount as the Secretary may prescribe for each hundredweight of milk (a) received from producers, (b) received at a pool plant as Grade A other source milk (except milk subject to the Class I pricing provisions of another order issued pursuant to the act) and allocated to Class I, or (c) distributed as Class I milk in the marketing area from a nonpool plant.

§ 921.89 *Termination of obligations.* The provisions of this section shall apply to any obligation under this part for the payment of money irrespective of when such obligation arose.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain, but need not be limited to, the following information:

(1) The amount of the obligation;

(2) The month during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to a cooperative association, the name of such producer or cooperative association, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this order, to make available to the market administrator all books and records required by this part to be made available, the market administrator may, within the two year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or wilful concealment of a fact, material to the obligation on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

EFFECTIVE TIME, SUSPENSION OR TERMINATION

§ 921.90 *Effective time.* The provisions of this part or any amendment to this part shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated pursuant to § 921.91.

§ 921.91 *Suspension or termination.* The Secretary may suspend or terminate any or all of the provisions of this part, whenever he finds that they obstruct or do not tend to effectuate the declared policy of the act. This part shall terminate, in any event, whenever the provisions of the act authorizing it cease to be in effect.

§ 921.92 *Continuing power and duty of the market administrator.* If, upon the suspension or termination of any or all provisions of this part, there are any obligations arising under this part, the final accrual or ascertainment of which require further acts by any person (including the market administrator), such further acts shall be performed notwithstanding such suspension or termination.

§ 921.93 *Liquidation after suspension or termination.* Upon the suspension or termination of any or all provisions of this part, except this section, the market administrator, or such liquidating agent as the Secretary may designate, shall, if so directed by the Secretary, liquidate the business of the market administrator's office, dispose of all property in his possession or control, including accounts receivable, and execute and deliver all assignments or other instruments necessary or appropriate to effectuate such disposition. If a liquidating agent is so designated, all assets, books and records of the market administrator shall be

transferred promptly to such liquidating agent. If, upon such liquidation, the funds on hand exceed the amounts required to pay outstanding obligations of the office of the market administrator and to pay necessary expenses of liquidation and distribution, such excess shall be distributed to contributing handlers and producers in an equitable manner.

MISCELLANEOUS PROVISIONS

§ 921.100 *Agents.* The Secretary may, by designation in writing, name any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

§ 921.101 *Separability of provisions.* If any provision of this part, or its application to any person or circumstances, is held invalid, the application of such provision and of the remaining provisions of this part to other persons or circumstances shall not be affected thereby.

Filed at Washington, D. C. this 15th day of April 1954.

[SEAL] ROY W. LENNARTSON,
Deputy Administrator.

FEDERAL TRADE COMMISSION

[16 CFR Part 302]

[File No. 205-1]

ARTICLE OF WEARING APPAREL; HANDKERCHIEFS AND SCARFS

INTERPRETATION OF TERM

In the matter of an interpretation of the term "Article of Wearing Apparel" as used in the Flammable Fabrics Act with respect to its applicability to handkerchiefs and scarfs; File No. 205-1.

Notice is hereby given all interested parties that the Federal Trade Commission on May 11, 1954, at its offices in Washington, D. C., will give consideration to an interpretation of the term "article of wearing apparel" as it is used in the Flammable Fabrics Act.

The matters to be considered are: (1) Whether handkerchiefs up to a finished size of 24 inches square, and (2) whether handkerchiefs and scarfs (irrespective of size) fall within the definition of the term "article of wearing apparel" as it is used in the Flammable Fabrics Act.

Interested parties may participate by submitting in writing and in duplicate to the Commission on or before such date their views, arguments, or other data pertinent to the matter.

This action is taken pursuant to the authority given the Federal Trade Commission under section 5 of the Flammable Fabrics Act (Pub. Law 88—83d Cong. Chap. 164—1st Sess., 67 Stat. 111).

Issued: April 15, 1954.

By direction of the Commission.

[SEAL] ROBERT M. PARRISH,
Secretary.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 440]

UNIFORM SYSTEM OF ACCOUNTS FOR FREIGHT FORWARDERS

NOTICE OF PROPOSED RULE MAKING

APRIL 15, 1954.

The Commission, having under consideration the provisions in the "Uniform System of Accounts for Freight Forwarders, Issue of 1943," which now require that depreciation accounting shall be in accordance with the "group method," has approved proposed amendments to cancel the present provisions and substitute the requirement that the "unit method" of accounting for depreciation be used.

The Commission has also approved the creation of an additional account "Terminal and Platform Equipment," in order to segregate freight handling equipment from office furniture and fixtures, with which it is now includible.

The following modifications have been approved:

1. Cancel the present text of paragraph (a) of instruction § 440.0-5 *Depreciation and amortization accounting,* and substitute the following:

(a) There shall be charged monthly to operating expenses or other appropriate accounts and credited to account 149, "Depreciation and amortization reserve—Transportation property," during the service life of depreciable property, amounts which will approximate the loss in service value not restored by current repairs or covered by insurance. The charges for currently accruing depreciation shall be computed in conformity with the unit method by applying to the original cost or estimated original cost such percentage rates as will distribute the service value by the straight-line method in equal annual charges to operating expenses or other accounts during the estimated life of the property.

2. Cancel the present text of Note B to § 440.0-5 (a), and substitute the following as Note B:

NOTE B. The term "unit method" means the method under which depreciation charges are computed and the records maintained so that the total amount of depreciation accrued applicable to each unit of property can be determined. Upon the retirement of any such unit the amount of depreciation accrued to date of retirement and carried in account 149, "Depreciation and amortization reserve—Transportation property," is chargeable to that account. The difference between the amount accrued and carried in account 149 with respect to each unit or item of property retired and the service value is includible in account 622, "Depreciation adjustment."

3. Cancel the text of subparagraph (1) of instruction § 440.0-43, *Retirements,* and substitute the following:

1. Depreciable property: The value of the salvage recovered shall be charged to account 108 "Material and supplies," or other appropriate asset account, according to the disposition of the material recovered. The service value shall be charged to account 149, "Depreciation and amortization reserve—Transportation property," to the extent of the amount carried in that account and the remainder shall be included in account 622, "Depreciation adjustment." (See § 440.0-5 *Depreciation and amortization accounting.*)

4. Change the caption of account § 440.141, *Furniture, fixtures, and equipment,* to read *"Furniture and office equipment,"* and delete the following from "Items":

Block and falls.	Electric motor trucks.
Carts.	Platform trucks.
Chain hoists.	Warehouse trucks.
Dollies (platform).	Weighing devices.

5. Change the number of account § 440.144, *Other property account charges,* to read § 440.145.

6. Add the following new account and the text and list of items pertaining thereto:

§ 440.144 *Terminal and platform equipment.* This account shall include the cost of electric and gasoline motor trucks, other wheeled equipment, and similar types of equipment used at terminals and loading platforms in connection with handling freight.

Items

Blocks and falls.	Gasoline motor trucks.
Carts.	Hand trucks.
Chain hoists.	Platform trucks and tractors.
Dollies (platform).	Warehouse trucks.
Electric motor trucks.	Weighing devices.
Fork lift trucks.	

7. Cancel paragraph (b) of the text of account §440.149 *Depreciation and amortization reserve—Transportation property* and substitute the following:

(b) At the time of retirement of depreciable property the amount of depreciation accrued and included herein with respect to the particular unit or item shall be charged hereto. (See § 440.0-43 *Retirements.*)

8. Change the note under account § 440.149 to read "Note B".

9. Add to the text of account § 440.149, *Depreciation and amortization reserve—Transportation property,* the following note:

NOTE A. This account shall be subdivided to show the reserve separately for classes of property corresponding to the property investment accounts as follows:
Furniture and office equipment.
Motor and other highway vehicles.
Public improvements (depreciable property).
Terminal and platform equipment.
Other property account charges (depreciable property).

10. Add this new account number, title and text:

§ 440.622 *Depreciation adjustment.* This account shall include the difference between the amount of depreciation accrued and credited to account 149, "Depreciation and amortization reserve—Transportation property," with respect to any unit or item of depreciable property accounted for as retired from service, and the service value of such unit or item. (See § 440.0-5 *Depreciation and amortization accounting.*)

Any interested person may on or before June 1, 1954, file with the Commission written views or arguments to be considered in this connection, and may request oral argument thereon. Unless otherwise decided after consideration of representations so received, an order will be entered making the said modifications effective August 1, 1954. However, the order will contain a provision that nothing contained therein shall be construed as prohibiting application retroactively to January 1, 1954.

[SEAL] GEORGE W. LAIRD,
Secretary.

[Amdt. 1]

ALASKA

ALASKA PUBLIC SALE ACT CLASSIFICATION NO. 13

MARCH 26, 1954.

Pursuant to the authority delegated to me under Section 2.21 of Order No. 1, Bureau of Land Management, Region VII, approved by the Acting Secretary of the Interior August 20, 1951 (16 F. R. 8625, 8627), Alaska Public Sale Classification No. 13 of December 29, 1953, is hereby amended as follows:

The classification for industrial and commercial purposes only, which was applied to the lands in T. 1 S., R. 1 W., FM, is revised to include classification for housing purposes for a portion of these lands, the amended description to read:

T. 1 S., R. 1 W., Fairbanks Meridian,
Section 24: $NW\frac{1}{4}NW\frac{1}{4}SW\frac{1}{4}NW\frac{1}{4}$, $W\frac{1}{2}SW\frac{1}{4}NW\frac{1}{4}NW\frac{1}{4}$, that portion lying south of the Richardson Highway.

Containing approximately 5.1 acres.

Classified for industrial, commercial and housing purposes.

T. 1 S., R. 1 W., Fairbanks Meridian,
Section 24: $N\frac{1}{2}N\frac{1}{2}NW\frac{1}{4}SW\frac{1}{4}$, $S\frac{1}{2}SW\frac{1}{4}NW\frac{1}{4}$, $NE\frac{1}{4}SW\frac{1}{4}NW\frac{1}{4}$, $S\frac{1}{2}NW\frac{1}{4}SW\frac{1}{4}NW\frac{1}{4}$, $NE\frac{1}{4}NW\frac{1}{4}SW\frac{1}{4}NW\frac{1}{4}$, and those portions of the $SE\frac{1}{4}NW\frac{1}{4}NW\frac{1}{4}$ and the $E\frac{1}{2}SW\frac{1}{4}NW\frac{1}{4}NW\frac{1}{4}$ lying south of the right-of-way of the Richardson Highway.

Containing approximately 53.4 acres.

Classified for industrial and commercial purposes.

FRED J. WEILER,
Chief,
Division of Land Planning.

Bureau of Reclamation

COLORADO RIVER STORAGE PROJECT, ARIZONA

ORDER OF REVOCATION

MARCH 3, 1953.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Orders of February 19, 1929, June 4, 1930, and October 6, 1931, insofar as said orders affect the following described lands; provided, however, that such revocation shall not affect the withdrawal of any other lands by said orders or affect any other orders withdrawing or reserving the land hereinafter described.

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 4 S., R. 22 W.,
Secs. 1 to 25, incl., all.
T. 3 S., R. 23 W.,
Secs. 1 to 4, incl., 9 to 16, incl., 21 to 29, incl., and 32 to 36 incl., all.
T. 4 S., R. 23 W.,
Secs. 1 to 6, incl., 8 to 17, incl., and 22 to 24, incl., all.

The above area aggregates approximately 44,630 acres.

G. W. LINEWEAVER,
Assistant Commissioner.

[Misc. 1329982]

APRIL 13, 1954.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The lands in T. 4 S., R. 22 W., aggregating 16,000 acres, are withdrawn for use of the Department of the Army in connection with the Yuma Test Station, by Public Land Order No. 848 of July 2, 1952. The remaining lands lie in a rough, barren, and mountainous area in Yuma County, Arizona. They are east of, but do not adjoin, the Colorado River. Any application that is filed will be considered on its merits.

This order shall not otherwise become effective to change the status of the described lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall become subject to application, petition, location and selection, under the applicable public-land laws, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference-right filing period for veterans of World War II and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279-284), as amended.

Inquiries concerning the lands shall be addressed to the Manager, Land and Survey Office, Phoenix, Arizona.

EARL G. HARRINGTON,
Acting Assistant Director,
Bureau of Land Management.

FAIR AND REASONABLE WAGES FOR PERSONS EMPLOYED IN PRODUCTION, CULTIVATING, OR HARVESTING OF SUGARCANE IN FLORIDA

NOTICE OF HEARING AND DESIGNATION OF PRESIDING OFFICERS

Pursuant to the authority contained in subsections (c) (1) and (c) (2) of section 301 of the Sugar Act of 1948, as amended, (61 Stat. 929; 7 U. S. Sup. 1131), notice is hereby given that a public hearing will be held in Clewiston, Florida, in the Sugarland Park Auditorium on May 11, 1954, beginning at 10:00 a. m.

The purpose of this hearing is to receive evidence likely to be of assistance to the Secretary of Agriculture in determining (1) pursuant to the provisions of section 301 (c) (1) of the act, fair and reasonable wage rates for persons employed in the production, cultivation, or harvesting of sugarcane in Florida during the period July 1, 1954 through June 30, 1955, on farms with respect to which applications for payment under the act are made, and (2) pursuant to the provisions of section 301 (c) (2) of the act, fair and reasonable prices for the 1954 crop of sugarcane to be paid, under either purchase or toll agreements, by producers who process sugarcane grown by other producers and who apply for payments under the act.

In the interest of obtaining the best possible information, all interested persons are requested to appear at the hearing to express their views and present appropriate data in regard to wages and prices.

The hearing, after being called to order at the time and place mentioned herein, may be continued from day to day within the discretion of the presid-

ing officers and may be adjourned to a later day or to a different place without notice other than the announcement thereof by the presiding officers.

Ward S. Stevenson, Linwood K. Bailey, and Wilmer M. Grayson are hereby designated as presiding officers to conduct either jointly or severally the foregoing hearing.

Issued this 15th day of April 1954.

FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 8258, 8753]

TEXAS STAR BROADCASTING CO. AND KTRH BROADCASTING CO.

ORDER ADDING ISSUE

In re applications of Roy Hofheinz and W. N. Hooper, d/b as Texas Star Broadcasting Company, Dallas, Texas, Docket No. 8258, File No. BP-5820; KTRH Broadcasting Company (KTRH), Houston, Texas, Docket No. 8753, File No. BP-6525; for construction permits.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 13th day of April 1954;

The Commission having under consideration a petition filed on September 18, 1953, by Chief, Broadcast Bureau, FCC for enlargement of issues in the above-entitled proceeding and petition for relief filed on September 28, 1953, by KTRH Broadcasting Company; and

It appearing that the said petition by Chief, Broadcast Bureau, FCC requests enlargement of the issues to include as Issue 4 in the said proceeding:

4. To determine if the proposed operation would involve radiations in excess of those permitted under the proposed agreement with Canada concerning the assignment of Class II Standard Broadcast Stations to clear channels (Docket No. 10453).

It further appearing that in response to the said petition of Chief, Broadcast Bureau, FCC, KTRH Broadcasting Company filed a petition for relief requesting (1) that the Commission determine prior to consideration of this matter whether the Canadian Government would be willing to accept the signal values proposed by KTRH Broadcasting Company at the Canadian border; (2) that the time for filing the reply to the petition for enlargement of issues be extended to ten days after a reply by the Canadian Government to the Commission's inquiry; and (3) that no date be set for the further hearing pending disposition of the said pleadings; and

It further appearing that hearing in this proceeding has been continued without date; that prior to action on the instant pleadings the Commission did refer the above-entitled application of KTRH Broadcasting Company to the Canadian Government; that on September 29, 1953, the Commission was advised by the Canadian Government of its objection to the operation proposed in the said application of KTRH Broadcasting Company due to objectionable interference under the provisions of the proposed agreement to the service being rendered by Canadian I-A stations on the channel involved; that on October 23, 1953, KTRH Broadcasting Company was advised of the objection by the Canadian Government to the operation proposed in its above-entitled application; and that no reply to the petition of Chief, Broadcast Buerau, FCC has been filed by KTRH Broadcasting Company, other than the aforesaid petition for relief; and

It further appearing that the issue requested by the Chief, Broadcast Bureau, FCC relates to matters upon which evidence should be adduced in the above-entitled proceeding in order to facilitate consideration of the applications therein; and

It further appearing that the prayers of the said petition for relief filed by KTRH Broadcasting Company have been effectively granted through the actions of the Commission subsequent to the filing of said petition;

It is ordered, That the petition for relief filed by KTRH Broadcasting Company is dismissed as moot and that the petition of Chief, Broadcast Bureau, FCC for enlargement of issues is granted and the issues set forth in the Memorandum Opinion and Order adopted on May 21, 1953, herein are amended to include the following issue:

4. To determine if the operation proposed in the above-entitled application of KTRH Broadcasting Company would involve radiations in excess of those permitted In re Proposed Agreement between United States and Canada respecting Assignment of Class II Standard Broadcast Stations to clear channels (Docket No. 10453).

Released: April 14, 1954.

[Docket No. 10851]

AKRON BROADCASTING CORP. (WCUE)

ORDER AMENDING ISSUES

In re application of Akron Broadcasting Corporation (WCUE), Akron, Ohio, for construction permit; Docket No. 10851, File No. BP-8478.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 13th day of April 1954;

The Commission having under consideration a motion filed by Akron Broadcasting Corporation (WCUE) on February 5, 1954, requesting that the Commission enlarge the issues in the above-entitled proceeding;

It appearing that by Order dated January 13, 1954, the Commission designated the application for hearing principally with respect to whether the proposal would be in compliance with the Commission's rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations with particular reference to the coverage of the city and metropolitan district of Akron, Ohio, and the excessive number of persons residing between the normally protected and actual nighttime interference-free contours; and

It further appearing that Akron Broadcasting Corporation (WCUE) alleges in support of its motion that under the designated issues it would be precluded from showing that the needs of the persons residing within the area would outweigh the departure from the Commission's rules; and

It further appearing that the public interest would be served by an enlargement of the issues as set forth below;

It is ordered, That the above-described motion to enlarge the issues is granted; and

It is further ordered, That the above-entitled application shall proceed to hearing on the following designated issues:

1. To determine the areas and populations which may be expected to gain or lose primary service from the operation of the proposed station and the availability of other primary service to such areas and populations.

2. To determine whether the installation and operation of the proposed station would be in compliance with the Commission's Rules and Standards of Good Engineering Practice Concerning Standard Broadcast Stations with particular reference to service to the city and metropolitan district of Akron and excessive population residing between the normally protected and actual nighttime limitation contours.

3. To determine the type and character of program service proposed to be rendered during nighttime hours and whether it would meet the requirements of the populations and areas proposed to be served.

4. To determine the type and character of program service rendered during nighttime hours by other standard broadcast stations licensed in Akron, Ohio.

5. To determine whether in light of the evidence adduced pursuant to the foregoing issues the operation of WCUE as proposed would serve the public interest, convenience and necessity.

Released: April 14, 1954.

[Docket No. 10943]

KLEIN PRODUCTS CO., INC.

ORDER CONTINUING HEARING

In the matter of Cease and Desist Order to be directed to Klein Products Company, Inc., 47 Great Jones Street, New York 12, New York; Docket No. 10943.

The Commission having under consideration a request filed April 13, 1954, by Klein Products Company, Inc., respondent herein, asking that the proceedings in the above-entitled matter be postponed; and

It appearing that said Company has advised the Commission it has commenced the work necessary to achieve compliance with the Commission's rules, and anticipates obtaining certification of its equipment approximately April 28, 1954;

It further appearing that Commission's representatives have verified the information furnished by respondent as to having commenced shielding of its plant, and that the Commission's Field Engineering and Monitoring Bureau has assented to the granting of respondent's request for postponement;

It further appearing that the public interest would be served by granting the request of respondent for postponement of the proceedings herein, and by affording the Commission's Field Engineering and Monitoring Bureau sufficient time to determine whether respondent has achieved compliance with the Commission's Rules, as proposed by said respondent;

Accordingly, it is ordered, This 14th day of April 1954, that the request of respondent for postponement of the proceedings in this matter is granted, and that the hearing herein, heretofore scheduled for April 16, 1954, at New York, New York, is continued to May 14, 1954, at 10:00 a. m.

Released: April 14, 1954.

FEDERAL POWER COMMISSION

[Docket No. E-6482]

PACIFIC GAS AND ELECTRIC CO.

ORDER SETTING DATE FOR FURTHER ARGUMENT

By order of the Commission issued March 5, 1954, the record in this proceeding was reopened and a further hearing set to commence at 10 a. m., e. s. t., March 23, 1954, in the Commission's hearing room at 441 G Street NW., Washington, D. C., such further hearing to be limited to the receipt of evidence relating to the answering of specified questions as to which further argument was initially ordered by Commission order issued September 21, 1953, in the above-entitled matter.

At the conclusion of such further hearing on March 24, 1954, counsel for all parties requested on the record (Tr. 1375-1376) that a date for the further argument referred to above to set subsequent to April 19, 1954.

The Commission orders: The above-entitled matter is set for further argument before the Commission in the Commission's hearing room at 441 G Street NW., Washington, D. C., commencing at 10 a. m., e. s. t., April 23, 1954, concerning those matters set forth in the above-mentioned order of the Commission issued September 21, 1953, in this proceeding. Each party, including staff counsel, on or before April 21, 1954, shall notify the Secretary of the Commission, in writing, as to whether such party will participate in the oral argument, and the amount of time desired for presentation of argument.

Adopted: April 14, 1954.

Issued: April 14, 1954.

By the Commission.

[F. R. Doc. 54-2945; Filed, Apr. 19, 1954; 8:49 a. m.]

[Docket No. G-2360]

EAST TENNESSEE NATURAL GAS CO.

ORDER FIXING DATE OF HEARING

This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, applicant having requested that its application, filed on January 25, 1954, pursuant to section 7 of the Natural Gas Act, for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities as described in said application, be heard under the shortened procedure provided by the aforesaid rule for non-contested proceedings. Subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on February 6, 1954 (19 F. R. 740), several petitions for leave to intervene were filed with the Commission; however, such petitions were withdrawn prior to Commission action thereon, and no protests or petitions are now on file.

The Commission finds: It is reasonable and in the public interest, and good cause exists for fixing the date of hearing in this proceeding less than 15 days after publication of this order in the FEDERAL REGISTER.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7, 15, and 16 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on April 19, 1954, at 9:30 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved in and the issues presented by the application: *Provided, however*, That the Commission may, after a non-contested hearing, forthwith dispose of the proceedings, pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: April 13, 1954.

Issued: April 14, 1954.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 54-2946; Filed, Apr. 19, 1954; 8:50 a. m.]

[Docket No. G-2392]

KANSAS-NEBRASKA NATURAL GAS CO., INC.

NOTICE OF APPLICATION

APRIL 13, 1954.

Take notice that Kansas-Nebraska Natural Gas Company, Inc. (Applicant), a Kansas corporation having its principal place of business in Phillipsburg, Kansas, filed on March 18, 1954, an application (1) pursuant to section 7 of the Natural Gas Act for authorization to construct and operate the following prescribed facilities:

(a) An additional 1,200 H. P. of compressors with auxiliary equipment at Big Springs, Nebraska, Compressor Station.

(b) Install 1,500 H. P. of compressors together with auxiliary equipment in a new compressor station to be located near North Platte, Nebraska.

(c) Construct approximately 2 miles of 12 inch gas pipeline around the city of North Platte, Nebraska.

(d) Construct approximately 23 miles of 10 inch gas pipeline to replace equal quantities of an existing 6 inch gas pipeline between North Platte and Cozad, Nebraska.

(e) Construct approximately 45 miles of 10 inch and 50 miles of 8 inch gas pipeline from Cozad to Grand Island, Nebraska.

(f) Construct approximately 44 miles of 12 inch gas pipeline from Big Springs, Nebraska, compressor station to a point approximately 6 miles south of Sidney, Nebraska.

(g) Construct approximately 11 miles of 10 inch gas pipeline southeast of Northport, Nebraska, and 35 miles of 6 inch gas pipeline from Northport to Alliance, Nebraska, and town border station to serve Alliance.

(h) Construct measuring equipment to serve the Alliance Municipal Power Plant located at Alliance, Box Butte County, Nebraska.

(i) Construct approximately 11 miles of 10-inch gas pipeline from end of 12-inch line approximately 6 miles south of Sidney ((g) above) to delivery point from West Sidney Field approximately 5 miles north of Sidney, Nebraska.

And (2) pursuant to section 16 of the Natural Gas Act for permission to modify its application filed at Docket No. G-2186, and delete therefrom Item 3 (b) on page 2 of the application reading as follows:

(b) Construct 14.1 miles of 10-inch gas pipeline to replace the bare portion of an existing 6-inch gas pipeline between Cozad and Elm Creek, Nebraska.

The application recites (1) that the proposed facilities will provide capacity to serve increased firm demands of existing markets, and connect additional reserves of Applicant; and (2) Applicant proposes to serve Alliance, Nebraska, at retail by utilizing portions of the system of North Central Gas Company.

The estimated capital costs of the proposed facilities is $4,096,890. Applicant proposes to finance the costs of the facilities described herein from the proceeds to be realized from the issuance and sale of $4,400,000 of sinking fund debentures, 10,000 shares of cumulative preferred stock (no par value) realizing $970,000 and 85,090 shares of $5.00 par value common stock realizing $1,871,980. Estimated proceeds from the securities referred to will be $7,241,980.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.10) on or before the 3d day of May 1954. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 54-2943; Filed, Apr. 19, 1954; 8:49 a. m.]

[Docket No. G-2398]

PHILADELPHIA ELECTRIC CO.

NOTICE OF APPLICATION

APRIL 14, 1954.

Take notice that on March 25, 1954, Philadelphia Electric Company (Applicant), a Pennsylvania corporation with its principal place of business in Philadelphia, Pennsylvania, filed an application pursuant to section 7 (b) of the Natural Gas Act for permission and approval to abandon the sale of gas to Delaware Light and Power Company (Delaware), and to abandon the presently authorized use of the following natural-gas facilities used for such sale:

(a) Approximately 4 miles of 12-inch natural gas pipeline, together with metering facilities, commencing at a connection at 4th and Booth Streets in Chester, Pennsylvania, with Applicant's 12-inch gas main from Applicant's Tilgham Street plant and extending to Ridge Road at the Pennsylvania-Delaware State Boundary.

(b) Approximately 1.1 miles of 16-inch and 6.9 miles of 12-inch pipeline, together with metering and pumping facilities, extending from Applicant's Tilgham Street plant in Chester, Pennsylvania, to the Pennsylvania-Delaware State line, near Booth Corner, Pennsylvania, and 1.4 miles of 12-inch pipeline extending from Applicant's Tilgham Street plant to 4th and Booth Streets in Chester, Pennsylvania.

In support of its application Applicant states that by an order issued February 11, 1954, at Docket No. G-2267, the Federal Power Commission authorized Transcontinental to construct and operate specified facilities to transport and sell to Delaware certain volumes of straight natural gas, Delaware has advised Applicant that the straight natural gas authorized to be delivered by Transcontinental is adequate to enable Delaware to furnish straight natural gas to all of its customers, and that effective upon the completion of the change-over, Delaware desires and proposes permanently to discontinue the purchase of gas from Applicant.

Applicant further states that it is willing that Delaware shall so discontinue the purchase of gas from Applicant effective upon Delaware's completion of its change-over and Applicant is willing to cooperate with Delaware in effectuating such conversion and change-over. That upon discontinuance of the purchase by Delaware of gas from Applicant on or about June 1, 1954, the above described facilities of Applicant will cease to be used as facilities under the Natural Gas Act.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 5th day of May 1954. The application is on file with the Commission for public inspection.

OFFICE OF DEFENSE MOBILIZATION

[ODM (DPA) Request No. 59—DPAV-46 (a)]

REQUEST TO PARTICIPATE IN THE VOLUNTARY AGREEMENT RELATING TO FOREIGN PETROLEUM SUPPLY, AS AMENDED

Pursuant to section 708 of the Defense Production Act of 1950, as amended, the request set forth below to participate in a voluntary agreement entitled "Voluntary Agreement Relating to Foreign Petroleum Supply," dated May 1, 1953, as amended, was approved by the Attorney General after consultations with respect thereto between the Attorney General, the Chairman of the Federal Trade Commission, and the Director of the Office of Defense Mobilization. The companies listed below have accepted the request to participate in the voluntary agreement as amended. The request to participate in the voluntary agreement of May 1, 1953, and the list of companies accepting it were published on July 22, 1953, in 18 F. R. 4262.

This agreement has been amended to conform to an organizational change within the Department of the Interior. This amended agreement has been approved by the Director of the Office of Defense Mobilization and found to be in the public interest as contributing to the national defense.

CONTENTS OF REQUEST

Reference is made to the letter heretofore sent to you requesting your participation in the Voluntary Agreement Relating to Foreign Petroleum Supply dated May 1, 1953, a copy of which was inclosed. The Secretary of the Interior has informed me that he proposes to terminate the activities of the Petroleum Administration for Defense and to transfer functions, including activities under the Voluntary Agreement, to the Oil and Gas Division of his Department. In order to make the existing agreement conform to the contemplated organizational change within the Department of the Interior, the Secretary has requested me to approve the following modifications to that agreement.

1. The definition of "Administrator" in section 3 (a) to be amended to read:

"(a) 'Administrator' means the Secretary of the Interior or the Assistant Secretary of the Interior—Mineral Resources."

2. The definition of "Director" in section 3 (d) to be amended to read:

"(d) 'Director' means such person in the Oil and Gas Division of the Department of the Interior as the Administrator may designate. All powers granted herein to the Director shall be possessed also by the Administrator."

You are requested to participate in the Voluntary Agreement Relating to Foreign Petroleum Supply as amended. A copy of this amended agreement may be obtained from the Chairman of the Committee.

The Attorney General has approved this request after consultation with respect thereto between his representatives, representatives of the Chairman of the Federal Trade Commission, and my representatives pursuant to section 708 of the Defense Production Act of 1950, as amended.

I approve the voluntary agreement as amended and find it to be in the public interest as contributing to the national defense. You will become a participant therein upon notifying me in writing of your acceptance of this modified request. Immunity from prosecution under the Federal antitrust laws and the Federal Trade Commission Act will be given upon such acceptance, provided that your acts relative to such participation are within the limits set forth in the Voluntary Agreement, as amended.

Your cooperation in this matter will be appreciated.

Sincerely yours,

ARTHUR S. FLEMMING, *Director.*

INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 29068]

CREOSOTE OIL SOLUTION FROM GOOD HOPE, LA., TO HATTIESBURG, MISS.

APPLICATION FOR RELIEF; AMENDED NOTICE

APRIL 15, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for the Fernwood, Columbia & Gulf Railroad Company and other carriers parties to schedule listed below.

Commodities involved: Creosote oil solution (creosote oil and tar) carloads and tank-car loads.

From: Good Hope, La.

To: Hattiesburg, Miss.

Grounds for relief: Competition with rail carriers, and circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1400, supp. 20.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 29139]

ROOFING MATERIAL AND SHEATHING FROM CINCINNATI, OHIO, TO HOUSTON, TEXAS

APPLICATION FOR RELIEF

APRIL 15, 1954.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to schedule listed below.

Commodities involved: Roofing material, sheathing, asbestos wallboard, and related articles, carloads.

From: Cincinnati, Ohio.

To: Houston, Tex.

Grounds for relief: Competition with rail carriers, competition with motor, motor-water carriers, and market competition.

Schedules filed containing proposed rates: F. C. Kratzmeir, Agent, I. C. C. No. 3899, supp. 196.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Binder or baler twine, carloads.

From: New Orleans, La., Gulfport, Miss., Chalmette, La., Mobile, Ala., and Pensacola, Fla.

To: Illinois territory and Ohio River Crossings, Cairo, Ill., to Cincinnati, Ohio, inclusive.

Grounds for relief: Rail competition, circuity, market competition, and to maintain grouping.

Schedules filed containing proposed rates: W. P. Emerson, Jr., Agent, I. C. C. No. 410, supp. 29.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[No. 31483]

IDAHO INTRASTATE FREIGHT RATES AND CHARGES

NOTICE OF INVESTIGATION AND HEARING

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 9th day of April A. D. 1954.

It appearing that in Ex Parte No. 185, Increased Freight Rates, 1951, 280 I. C. C. 179; 281 I. C. C. 447; and 284 I. C. C. 589, the Commission authorized carriers subject to the Interstate Commerce Act parties thereto to make certain increases in their freight rates and charges for interstate application throughout the United States, and that increases under such authorizations have been made;

It further appearing that a petition, dated February 4, 1954, (which brought in issue intrastate rates in the State of Idaho and Utah) has been filed by the Camas Prairie Railroad Company and other common carriers by railroad, named in appendix A to the petition, operating to, from, and between points in the State of Idaho, averring, among other matters, that the Idaho Public Utilities Commission has refused to authorize or permit petitioners to establish for the intrastate transportation upon their railroads in Idaho increases in freight rates and charges corresponding to those authorized by this Commission and made by petitioners for application on interstate traffic in the proceeding above cited; such refusal being alleged in the manner and to the extent as more fully set forth in the said petition;

It further appearing that petitioners allege that the refusal of the Idaho Public Utilities Commission to permit the increase on intrastate traffic referred to in the preceding paragraph causes and results in undue and unreasonable advantage, preference, and prejudice as between persons and localities in intrastate commerce, on the one hand, and interstate commerce, on the other hand, and in undue, unreasonable and unjust discrimination against interstate and foreign commerce, in violation of section 13 of the Interstate Commerce Act;

It further appearing that there have been brought in issue by the said petition rates and charges made or imposed by authority of the State of Idaho;

And it further appearing that the Idaho Public Utilities Commission on March 8, 1954, filed an answer containing a motion to require petitioners to amend their petition by severing the causes of action as between the States of Idaho and Utah, and to dismiss the petition as to Idaho upon the grounds that evidence sufficient to satisfy State statutory requirements had not been offered by petitioners, and that the matter before the said Commission was reopened January 7, 1953, and it appearing that no further proceedings have been had therein and that investigation of petitioners' alleged violations of the Interstate Commerce Act should be made as required by the provisions of that act;

It is ordered, That the said motion of the Idaho Public Utilities Commission to dismiss be, and it is hereby, overruled, without prejudice, pending presentation of evidence; and that separate investigations be instituted with respect to the rates brought in issue in Idaho and Utah respectively;

It is further ordered, That in response to the said petition, an investigation be, and it is hereby, instituted, and that a hearing be held therein for the purpose of receiving evidence from the respondents hereinafter designated and any other persons interested to determine whether the rates and charges of the common carriers by railroad, or any of them, operating in the State of Idaho for the intrastate transportation of property made or imposed by authority of the State of Idaho, cause or will cause, by reason of the failure of such rates and charges to include increases corresponding to those permitted by the Commission for interstate traffic in the proceeding cited above, any undue or unreasonable advantage, preference, or prejudice, as between persons or localities in intrastate commerce, on the one hand, and interstate or foreign commerce, on the other hand, or any undue, unreasonable, or unjust discrimination against interstate or foreign commerce; and to determine what rates and charges, if any, or what maximum or minimum, or maximum and minimum rates and charges shall be prescribed to remove the unlawful advantage, preference, prejudice, or discrimination, if any, that may be found to exist;

It is further ordered, That all common carriers by railroad operating within the State of Idaho which are subject to the jurisdiction of this Commission be, and they are hereby, made respondents to this proceeding; that a copy of this order be served upon each of the said respondents; and that the State of Idaho be notified of the proceeding by sending copies of this order and of said petition by registered mail to the Governor of said State and to the Idaho Public Utilities Commission at Boise, Idaho;

It is further ordered, That notice of this proceeding be given to the public by depositing a copy of this order in the office of the Secretary of the Commission, at Washington, D. C., for public inspection, and by filing a copy with the Director, Division of the Federal Register, Washington, D. C.;

And it is further ordered, That this proceeding be, and the same is hereby assigned for hearing May 17, 1954, at 9:30 o'clock a. m., U. S. Standard Time (or 9:30 a. m. local daylight saving time, if that time is observed), at the rooms of the Idaho Public Utilities Commission, Boise, Idaho, before Examiner M. Witters.

By the Commission, Division 1.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[No. 31484]

UTAH INTRASTATE FREIGHT RATES AND CHARGES

NOTICE OF INVESTIGATION AND HEARING

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C., on the 9th day of April A. D. 1954.

It appearing, that in Ex Parte No. 175, Increased Freight Rates, 1951, 280 I. C. C.

179; 281 I. C. C. 447; and 284 I. C. C. 589, the Commission authorized carriers subject to the Interstate Commerce Act parties thereto to make certain increases in their freight rates and charges for interstate application throughout the United States, and that increases under such authorizations have been made;

It further appearing, that a petition, dated February 4, 1954 (which brought in issue intrastate rates in the States of Utah and Idaho) has been filed by the Bamberger Railroad Company and other common carriers by railroad, named in appendix A to the petition, operating to, from, and between points in the State of Utah, averring, among other matters, that the Public Service Commission of Utah has refused to authorize or permit petitioners to establish for the intrastate transportation upon their railroads in Utah increases in freight rates and charges corresponding to those authorized by this Commission and made by petitioners for application on interstate traffic in the proceeding above cited; such refusal being alleged in the manner and to the extent as more fully set forth in the said petition;

It further appearing that petitioners allege that the refusal of the Public Service Commission of Utah to permit the increase on intrastate traffic referred to in the preceding paragraph causes and results in undue and unreasonable advantage, preference, and prejudice as between persons and localities in intrastate commerce, on the one hand, and interstate commerce, on the other hand, and in undue, unreasonable and unjust discrimination against interstate and foreign commerce, in violation of section 13 of the Interstate Commerce Act;

It further appearing that there have been brought in issue by the said petition rates and charges made or imposed by authority of the State of Utah;

And it further appearing that the Public Service Commission of Utah on March 12, 1954, filed an answer containing a motion to dismiss the petition herein upon the ground that evidence sufficient to satisfy State statutory requirements had not been offered by petitioners before that Commission, and it appearing that investigation of petitions' alleged violations of the Interstate Commerce Act should proceed in due course:

It is ordered, That the said motion of the Public Service Commission of Utah be, and it is hereby, overruled, without prejudice, pending presentation of evidence;

It is further ordered, That in response to the said petition, an investigation be, and it is hereby, instituted, and that a hearing be held therein for the purpose of receiving evidence from the respondents hereinafter designated and any other persons interested to determine whether the rates and charges of the common carriers by railroad, or any of them, operating in the State of Utah for the intrastate transportation of property made or imposed by authority of the State of Utah, cause or will cause, by reason of the failure of such rates and charges to include increases corresponding to those permitted by the Commission for interstate traffic in the proceeding cited above, any undue or unreasonable advantage, preference, or prejudice, as between persons or localities in intrastate commerce, on the one hand, and interstate or foreign commerce, on the other hand, or any undue, unreasonable, or unjust discrimination against interstate or foreign commerce; and to determine what rates and charges, if any, or what maximum or minimum, or maximum and minimum rates and charges shall be prescribed to remove the unlawful advantage, preference, prejudice, or discrimination, if any, that may be found to exist;

It is further ordered, That all common carriers by railroad operating within the State of Utah which are subject to the jurisdiction of this Commission be, and they are hereby, made respondents to this proceeding; that a copy of this order be served upon each of the said respondents; and that the State of Utah be notified of the proceeding by sending copies of this order and of said petition by registered mail to the Governor of said State and to the Public Service Commission of Utah at Salt Lake City, Utah;

It is further ordered, That notice of this proceeding be given to the public by depositing a copy of this order in the office of the Secretary of the Commission, at Washington, D. C., for public inspection, and by filing a copy with the Director, Division of the Federal Register, Washington, D. C.;

And it is further ordered, That this proceeding be, and the same is hereby assigned for hearing May 20, 1954, at 9:30 o'clock a. m., U. S. Standard Time (or 9:30 a. m. local daylight saving time, if that time is observed), at the rooms of the Public Service Commission of Utah, Salt Lake City, Utah, before Examiner M. Witters.

By the Commission, Division 1.

SECURITIES AND EXCHANGE COMMISSION

[File No. 70-3208]

NATIONAL FUEL GAS CO. ET AL.

SUPPLEMENTAL ORDER RELEASING JURISDICTION WITH RESPECT TO FEES AND [redacted]

APRIL 14, 1954.

In the matter of National Fuel Gas Company, Iroquois Gas Corporation, United Natural Gas Company, Pennsylvania Gas Company, Republic Light, Heat and Power Company, Inc.; File No. 70-3208.

The Commission on March 29, 1954, having issued its Order herein, pursuant to sections 6, 7, 9 (a), 10, and 12 (f) of the Public Utility Holding Company Act of 1935 and Rules U-43 and U-50 thereunder, authorizing National Fuel Gas Company ("National") and its subsidiaries Iroquois Gas Corporation ("Iroquois"), United National Gas Company ("United"), Pennsylvania Gas Company ("Pennsylvania"), and Republic Light, Heat and Power Company, Inc. ("Republic") to consummate certain proposed security transactions, as follows:

National, to issue and sell, under the competitive bidding requirements of Rule U-50, $15,000,000 principal amount of debentures;

Iroquois, to issue and sell 45,000 shares of its common stock to National, for $4,500,000 cash;

United, to issue and sell 92,000 shares of its common stock to National, for $2,300,000 cash;

Pennsylvania, to issue and sell 46,080 shares of its common stock at $15 per share, pursuant to subscription rights and subject to National's agreement to purchase all unsubscribed shares; also to issue and sell to National its serial notes aggregating $1,500,000;

Republic, to issue and sell 30,000 shares of its common stock to National, for $3,000,000 cash; also to issue and sell to National its serial notes aggregating $720,000; and

The Commission having in said Order reserved jurisdiction with respect to all fees and expenses to be paid in the several transactions; and

Applicants-declarants, by amendment filed herein on April 9, 1954, having supplied further data with respect to said fees and expenses, including detailed memoranda in support of all legal, engineering and accounting fees, which data may be summarized as follows:

National's fees and expenses:	
Legal (four firms)	[1] $7,925
Accounting	3,400
Engineering (survey of gas supply)	15,000
Trustee (including counsel)	7,000
Federal stamp tax	16,500
Filing fee, S. E. C.	1,530
Printing, engraving, and postage (estimated)	25,300
Miscellaneous (estimated)	4,475
Total	$81,400
Legal	1,500
New York Public Service Commission	2,050
U. S. documentary stamps	4,950
Miscellaneous	400
Total	9,000
United's fees and expenses:	
Legal	250
U. S. documentary stamps	3,450
Pennsylvania excise tax	1,584
Miscellaneous	200
Total	5,484
Pennsylvania's fees and expenses:	
Legal	3,500
Subscription agent	2,000
U. S. documentary stamps and fees	4,010
Printing	2,500
Miscellaneous	3,000
Total	14,010
Republic's fees and expenses:	
Legal	2,000
New York Public Service Commission	2,272
U. S. documentary stamps	3,300
Miscellaneous	600
Total	8,172

[1] Not including fee of counsel to the underwriters in the amount of $7,500, to be paid by the successful bidders.

Iroquois' fees and expenses:

And the Commission having examined the evidence submitted with respect to the aforesaid fees and expenses, and on the basis of its examination finding that the amounts proposed to be paid are not unreasonable and that it is appropriate in the public interest to release jurisdiction with respect thereto:

It is ordered, That jurisdiction heretofore reserved with respect to the payment of the aforesaid fees and expenses, including fees and expenses payable to counsel for the successful bidders for National's debentures, be and the same hereby is released.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3233]

JERSEY CENTRAL POWER & LIGHT CO.

NOTICE OF FILING REGARDING ASSUMPTION OF LIABILITY ON A PURCHASE MONEY BOND AND MORTGAGE

APRIL 14, 1954.

Notice is hereby given that Jersey Central Power & Light Company ("Jersey Central") a public utility subsidiary of General Public Utilities Corporation, a registered holding company, has filed with this Commission an application pursuant to the Public Utility Holding Company Act of 1935 ("act"), designating sections 6 and 7 of the act as applicable to the proposed transactions, which are summarized as follows:

Jersey Central proposes to acquire legal title to a tract of land of about 36 acres now subject to a $160,000 purchase money bond and mortgage and, by reason of said acquisition, in effect to assume the obligations of such purchase money bond and mortgage. Amortization installments on the bond of $10,000 each are payable semi-annually from November 2, 1953, with semi-annual interest at the rate of 4 percent per annum. The property to which legal title is thus to be acquired is located in the vicinity of Point Pleasant Beach, Ocean County, New Jersey, and it is contemplated that such property will serve as a site for a future generating station.

Jersey Central has filed a petition with the Board of Public Utility Commissioners of the State of New Jersey seeking approval of the proposed transactions.

It is estimated that expenses in connection with the foregoing transactions will be $1,500 including legal fees and expenses estimated at $1,250.

It is requested that the Commission's order be made effective upon issuance.

Notice is further given that any interested person may, not later than April 29, 1954, at 5:30 p. m., e. d. s. t., request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date said application, as filed or as amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3235]

CONSOLIDATED NATURAL GAS CO. ET AL.

NOTICE OF FILING OF JOINT APPLICATION-DECLARATION REGARDING ISSUANCE AND SALE OF PRINCIPAL AMOUNT OF DEBENTURES AND BORROWING FROM BANKS BY PARENT

APRIL 14, 1954.

In the matter of Consolidated Natural Gas Company, The East Ohio Gas Company, Hope Natural Gas Company, The Peoples Natural Gas Company, New York State Natural Gas Corporation, The River Gas Company; File No. 70-3235.

Notice is hereby given that Consolidated Natural Gas Company ("Consolidated"), a registered holding company, and its wholly owned subsidiaries The East Ohio Gas Company ("East Ohio"), Hope Natural Gas Company ("Hope"), The Peoples Natural Gas Company ("Peoples"), New York State Natural Gas Corporation ("New York State") and The River Gas Company ("River") have filed a joint application-declaration with this Commission pursuant to the provisions of the Public Utility Holding Company Act ("act") and rules thereunder. The companies have designated sections 6 (a), 6 (b), 7, 9 (a), 10, 12 (b) and 12 (f) of the act and Rules U-43, U-45 and U-50 thereunder as applicable to the proposed transactions which are summarized as follows:

Consolidated proposes to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, $25,000,000 principal amount of its __ percent Debentures to be dated June 1, 1954, and to mature June 1, 1979. Consolidated anticipates issuing its invitation for bids on or about May 14, 1954, and receiving such bids on or about May 25, 1954.

The Debentures will be issued pursuant to an Indenture dated June 1, 1954 between Consolidated and Bankers Trust Company of New York City, Trustee. According to Consolidated the Indenture will contain provisions for regular sinking fund redemptions aggregating $20,000,000 and certain covenants regarding the issuance of funded debt and preferred stock, the payment of dividends and execution of mortgages or other liens.

Consolidated also proposes to borrow $15,000,000 from one or more banks on or about August 1, 1954, on a commercial note or notes without collateral and at the then prevailing prime interest rate which at present is 3 percent, maturing one year from the date of the borrowings with the right of Consolidated to prepay the loan at any time.

The proceeds from the sale of debentures will be added to the general funds of Consolidated and, along with other cash resources, will be used (1) to pay on or before June 10, 1954, Consolidated's outstanding bank loans aggregating $15,000,000 due March 1, 1955, and (2) to provide approximately $10,000,000 of new long-term capital for the purchase, from time to time, of securities of its operating subsidiaries. The funds, thus made available to subsidiaries together with other corporate funds will be used by them for the construction of additional plant facilities and for other corporate purposes. The proceeds from the bank borrowings are to be made available to the subsidiary companies for the purchase of storage gas to meet customer demands during the winter of 1954–1955.

As the means of supplying the subsidiaries with funds, Consolidated proposes to purchase capital stock from and make loans to the subsidiaries and the subsidiaries propose to issue and sell to and borrow from Consolidated, the following aggregate amounts of capital stock and notes or loans:

Capital stock:	
New York State Natural Gas Corp	$3,000,000
Long-term loans:	
The East Ohio Gas Co., maturing $500,000 each May 31, 1959, to 1963, inclusive	2,500,000
Hope Natural Gas Co., maturing $250,000 each May 31, 1959, to 1974, inclusive	4,000,000
The Peoples Natural Gas Co., maturing $250,000 each May 31, 1964, to 1971, inclusive	2,000,000
The River Gas Co., maturing $15,000 each May 31, 1969, to 1971, inclusive and $5,000 on May 31, 1972	50,000
Total	11,550,000

In each instance the notes are to be non-negotiable. The loans are to be made from time to time within the twelve-month period ending June 30, 1955 as financing is required by each subsidiary in carrying out its construction program.

It is expected that the interest rate for each of the above borrowings will be determined by Consolidated as soon as the results of competitive bidding for the proposed $25,000,000 of Debentures are known, and that such interest rate will be predicated on and will substantially equal the effective cost of the money secured through the issuance of such Debentures.

Consolidated proposes to make short-term loans bearing the same rate of interest as its bank loan to three of its subsidiaries, in the following amounts:

The East Ohio Gas Co	$2,000,000
Hope Natural Gas Co	5,000,000
New York State Natural Gas Corp	8,500,000
Total	15,500,000

Such loans to subsidiaries will mature on or before the date of maturity of the

bank loan borrowing proposed by Consolidated.

A copy of the applications by East Ohio, Hope, Peoples and River to the State commissions of Ohio, West Virginia and Pennsylvania and the orders of those commissions to be issued in respect of the borrowings from Consolidated are to be supplied by amendment.

Consolidated requests that the Commission issue an order on or about May 11, 1954 permitting the proposed issuance and sale of Debentures and the bank borrowings.

Notice is further given that any interested person may, not later than May 5, 1954 at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said joint application-declaration which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date said joint application-declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 54-2925; Filed, Apr. 19, 1954; 8:46 a. m.]

[File No. 54-188]

EASTERN UTILITIES ASSOCIATES

ORDER WITH RESPECT TO THE FILING OF REPORTS CONCERNING FEES AND EXPENSES IN CONNECTION WITH SECTION 11 (E) PLAN

APRIL 14, 1954.

The above-entitled proceeding involves a plan and amendments thereto filed pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935 ("act") by Eastern Utilities Associates ("EUA"), a registered holding company, to effectuate, in part, compliance with section 11 (b) of the act. The Commission has heretofore reserved jurisdiction with respect to the fees and expenses paid or to be paid by EUA for services rendered in connection with this plan and related proceedings.

Pursuant to notice given by the Commission, applications for allowances or approval of amounts already paid have been filed with the Commission and with EUA but no procedure with respect to the disposition of such applications has been fixed.

The Commission has decided that it is necessary or appropriate in the public interest or for the protection of investors or consumers that, as a first step in fixing the ultimate procedure to be followed and as an aid to the Commission in determining what fees and expenses it should ultimately approve, an order should be entered, under the authority conferred by section 11 of the act, requiring that EUA file with the Commission a report or reports setting forth certain information.

It is therefore ordered, That on or before July 15, 1954, EUA shall file with the Commisison 10 copies of a report or reports which shall set forth:

(1) The amounts of fees and expenses claimed by the respective applicants for services rendered in connection with the above-entitled proceeding and related proceedings;

(2) The amounts of fees and expenses which EUA has already paid or is prepared to pay without modification;

(3) The amounts of fees and expenses, if any, which EUA is willing to pay and which the claimants after negotiation with EUA have indicated a willingness to accept; and

(4) In cases where such negotiations have been unsuccessful, the amounts of fees and expenses which EUA considers to be reasonable and which it is willing to pay.

It is further ordered, That any agreement as to amount as contemplated by paragraph (3) above shall be subject to the provisions of the plan and to approval by the Commission and the exercise by the Commission of its full powers with respect to fees and expenses conferred by the Act in connection with plans filed under section 11 (e) thereof.

It is further ordered, That with respect to the information required to be furnished by paragraph (4) above, such information shall be submitted directly to the Chairman of this Commission and shall be kept confidential unless and until a further order of this Commission shall require otherwise.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[F. R. Doc. 54-2927; Filed, Apr. 19, 1954; 8:46 a. m.]

[File No. 70-3240]

COLUMBIA GAS SYSTEM, INC., AND NATURAL GAS COMPANY OF WEST VIRGINIA

NOTICE OF FILING OF APPLICATION-DECLARATION REGARDING ISSUANCE AND SALE OF COMMON STOCK AND INSTALLMENT NOTES BY SUBSIDIARY AND ACQUISITION THEREOF BY PARENT

APRIL 14, 1954.

Notice is hereby given that The Columbia Gas System, Inc. ("Columbia"), a registered holding company, and one of its wholly owned subsidiary companies, Natural Gas Company of West Virginia ("Natural Gas") have filed a joint application-declaration pursuant to the Public Utility Holding Company Act of 1935 ("act"), designating sections 6 (b), 9 and 10 of the act and Rule U-50 (a) (3) as applicable to proposed transactions which are summarized as follows:

Natural Gas proposes to increase its authorized common stock, $100 par value, from 50,000 to 70,000 shares and to issue and sell to Columbia 10,000 shares of such stock at a price equivalent to the par value thereof.

Natural Gas also proposes to issue and sell to Columbia $250,000 principal amount of __ Percent Installment Promissory Notes at a price equivalent to the principal amount of such notes. The notes are to be registered and will be payable in equal annual installments on February 15 of each of the years 1956 to 1980 inclusive. Interest on the unpaid principal amount of the notes is to be payable semi-annually on February 15 and August 15 at the rate of 4 percent per annum or such lower rate, being a multiple of ⅛ of 1 percent, as shall be not less than the "cost of money" to Columbia in respect of its next sale of Senior Debentures. It is Columbia's present intention to sell Senior Debentures later this year and during the interim period the proposed installment notes will carry interest at the rate of 4 percent per annum subject, however, to an adjustment in the rate following the sale of Senior Debentures.

It is anticipated that Natural Gas will first issue and sell its common stock when and as funds are required by it up to a maximum amount of $1,000,000, and thereafter Natural Gas will sell its installment notes to Columbia up to a maximum amount of $250,000. However, none of the common stock or installment notes will be sold or purchased subsequent to March 31, 1955.

According to the filing the financing is for the purpose of supplying Natural Gas with funds which are needed in connection with its 1954 construction program involving estimated expenditures of $1,339,550 for gas wells, transmission and distribution lines and other facilities.

The estimated fees and expenses aggregate $1,825 of which $1,375 is attributable to the Federal original issue tax.

The proposed issue and sale of common stock and notes has been authorized by the Public Utilities Commission of Ohio.

Notice is further given that any interested person may, not later than April 28, 1954, at 5:30 p. m., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said filing which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, said joint application-declaration, as filed or as amended, may be granted and permitted to become effective, as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transactions as provided in Rule U-20 (a) and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

FEDERAL REGISTER

VOLUME 19 NUMBER 77

Washington, Wednesday, April 21, 1954

TITLE 3—THE PRESIDENT

EXECUTIVE ORDER 10527

INSPECTION OF INCOME, EXCESS-PROFITS, DECLARED VALUE EXCESS-PROFITS, CAPITAL STOCK, ESTATE, AND GIFT TAX RETURNS BY THE SENATE COMMITTEE ON BANKING AND CURRENCY

By virtue of the authority vested in me by sections 55 (a), 508, 603, 729 (a), and 1204 of the Internal Revenue Code (53 Stat. 29, 111, 171; 54 Stat. 989, 1008; 55 Stat. 722; 26 U. S. C. 55 (a), 508, 603, 729 (a), and 1204), it is hereby ordered that any income, excess-profits, declared value excess-profits, capital stock, estate, or gift tax return for the years 1942 to 1953, inclusive, shall, during the 83d Congress, be open to inspection by the Senate Banking and Currency Committee, or any duly authorized subcommittee thereof, for the purpose of its investigation of loan projects under section 608 of Title VI of the National Housing Act, as added by the Act of May 26, 1942 (56 Stat. 303), as amended, and the amounts of the mortgages, the cost of construction, and the cost of land of such projects, in accordance and upon compliance with the rules and regulations prescribed by the Secretary of the Treasury in Treasury Decision 6064,[1] relating to the inspection of returns by certain committees of the Congress, approved by me February 11, 1954.

This Executive order shall be effective upon its filing for publication in the FEDERAL REGISTER.

DWIGHT D. EISENHOWER

THE WHITE HOUSE,
April 19, 1954.

TITLE 32—NATIONAL DEFENSE

Chapter XIV—The Renegotiation Board

PART 1470—PRELIMINARY INFORMATION REQUIRED OF CONTRACTORS

EXTENSION OF TIME FOR FILING FINANCIAL STATEMENTS UNDER RENEGOTIATION ACT OF 1951[2]

Every person having a fiscal year which ended during the month of December 1953 is hereby granted an extension of time, until not later than June 1, 1954, to file the financial statement (Forms RB–1 and RB–1B) for such year required of such person by section 105 (e) (1) of the Renegotiation Act of 1951.

(Sec. 109, 65 Stat. 22; 50 U. S. C. App. 1219)

Dated: April 16, 1954.

By order of The Renegotiation Board.

GEORGE C. MCCONNAUGHEY,
Chairman.

TITLE 7—AGRICULTURE

Chapter III—Agricultural Research Service, Department of Agriculture

[P. P. C. 601, Rev.]

PART 301—DOMESTIC QUARANTINE NOTICES

SUBPART—MEXICAN FRUIT FLY

ADMINISTRATIVE INSTRUCTIONS REQUIRING STERILIZATION OF GRAPEFRUIT

Pursuant to the authority conferred upon the Chief of the Plant Pest Control Branch by § 301.64–4 (e) of the regulations supplemental to the Mexican fruit fly quarantine (7 CFR 301.64–4 (e)) administrative instructions to appear as § 301.64–4f in Title 7, Code of Federal Regulations, are hereby issued to read as follows:

§ 301.64–4f *Administrative instructions requiring sterilization of grapefruit.* It is hereby required that effective 12:01 a. m., April 19, 1954, and continuing throughout the 1953–54 harvesting season, all grapefruit, as a condition of issuance of permits for interstate movement from the regulated area of Texas, shall be sterilized in accordance with the methods authorized in B. E. P. Q. 575, revised effective February 1, 1949 (§ 301.64–4a).

Imposition of sterilization requirements is dependent upon the presence and development of Mexican fruit flies, which conditions cannot be predicted within narrow time limits. Mexican fruit flies are now present in such numbers in the Lower Rio Grande Valley that

it has become necessary to impose the foregoing requirements for the sterilization of grapefruit as soon as possible. For the reasons stated, it is found upon good cause, pursuant to the provisions of section 4 of the Administrative Procedure Act (5 U. S. C. 1003), that notice and public procedure on these administrative instructions are unnecessary, impracticable, and contrary to the public interest, and good cause is found for issuing these instructions effective less than thirty days after their publication in the FEDERAL REGISTER.

(Sec. 8, 37 Stat. 318, as amended; 7 U. S. C. 161)

Done at Washington, D. C., this 14th day of April 1954.

C. S. LAIDLAW,
Manager,
Federal Crop Insurance Corporation.

§ 420.63 *Iowa.*

§ 420.63–2 *Humboldt County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Humboldt County, Iowa, Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for each insured crop shall be reduced 10 percent for any acreage not harvested and not planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting, all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10 of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, oats or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel, determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (determined in accordance with section 4 of this rider) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop, produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production*[1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not harvested and not planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 10 percent of the harvested coverage divided by the predetermined price for the crop.
3. Acreage harvested	The actual production harvested plus an appraisal of any production left in the field after harvest and an appraisal of corn used for ensilage or fodder.
4. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
5. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
6. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

8. *Insurance unit.* Notwithstanding the provisions of Section 13 of the policy or any election made on the application for insurance, combination of insurance units will not be recognized; however, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit.

9. *Definitions.* "Harvest" with respect to any acreage of corn means picking from the stalk either by hand or machine or cutting for fodder or ensilage an amount of corn which is equal in value (determined in accordance with section 4 of this rider) to 10 percent or more of the harvested coverage for such acreage.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.63–12 *Hamilton County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Hamilton County, Iowa, Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for each insured crop shall be reduced 10 percent for any acreage not harvested and not planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting, all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Valuing production.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (determined in accordance with section 4 of this rider) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production* [1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
1. Acreage not harvested and not planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 10 percent of the harvested coverage divided by the predetermined price for the crop.
3. Acreage harvested	The actual production harvested plus an appraisal of any production left in the field after harvest and an appraisal of corn used for ensilage or fodder.
4. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
5. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
6. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

8. *Insurance unit.* Notwithstanding the provisions of section 13 of the policy or any election made on the application for insurance, combination of insurance units will not be recognized; however, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit.

9. *Definitions.* "Harvest" with respect to any acreage of corn means picking from the stalk either by hand or machine or cutting for fodder or ensilage an amount of corn which is equal in value (determined in accordance with section 4 of this rider) to 10 percent or more of the harvested coverage for such acreage.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.63–13 *Emmet, Delaware, Howard, Ida, Kossuth, Tama, Union, Warren, Winnebago, Worth Counties.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Delaware, Emmet, Howard, Ida, Kossuth, Tama, Union, Warren, Winnebago, and Worth Counties, Iowa, Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown in the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production* [1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced by not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount table: November 30.

Cancellation date: February 28.

8. *Definitions.* Notwithstanding the provisions of section 13 of the policy, in any case where a share tenant rents land for a share of the crop and rents other land owned by the same person for cash, for a fixed commodity payment, or for other consideration, all such land which is planted to insurable crops shall constitute an insurance unit except in cases where a combination unit is in effect for the crop year.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.66 *Louisiana.*

§ 420.66–2 *St. Landry Parish.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in St. Landry Parish, La., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(b) Rice planted for harvest.

(c) Sugarcane, including acreage harvested for seed, and excluding (i) acreage of less than one acre on an insurance unit and (ii) acreage on which three successive crops have been harvested from one planting.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop, except for the second and third year crop of sugarcane, in which case insurance shall attach on December 1 provided there is a stand at that time sufficient that farmers in the area generally would leave it for harvest the following harvest season. Insurance shall cease with respect to any portion of the cotton crop upon picking, the rice crop upon threshing, the sugarcane crop upon cutting, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10 of the calendar year in which the crop is normally harvested (January 31 following the normal time of harvest for sugarcane) unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of rice which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the

planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

Crop	Acreage classification	Total production [1]
1. Each insured crop except cotton.	Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Each insured crop except cotton.	Acreage not planted to a substitute crop.	The appraised production or the actual production.
3. Cotton	Acreage released by the Corporation because of damage occurring prior to laying by the crop.	That portion of the appraised production for such acreage which is in excess of 60 percent of the harvested coverage divided by the predetermined price.
4. Cotton	Acreage on which the crop is laid by and not harvested.	That portion of the appraised production for such acreage which is in excess of 25 percent of the harvested coverage divided by the predetermined price.
5. Cotton	Acreage harvested	Production, including an appraisal of production left in the field after harvest.
6. Each insured crop	Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
7. Each insured crop	Acreage with reduced yield due solely to cause(s) not insured against.	Appraised amount by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the amount of production harvested.
8. Each insured crop	Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised amount by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production and allowances shall be in pounds for cotton and rice, and tons (rounded to tenths), for sugarcane. If any part of the sugarcane production from the insurance unit is processed for sugar, the total number of tons of sugarcane shall be adjusted to standard sugarcane (as determined in accordance with regulations issued by the U. S. Department of Agriculture for the crop year involved).

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

8. *Definitions.* (a) For all purposes under the contract sugarcane for harvest within the crop year shall be considered to have been planted as follows: (1) the first crop from seed, on the date the planting operation is actually accomplished, and (2) second and third year crops on December 1 preceding the calendar year in which the crop is normally harvested.

(b) "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

(c) In addition to the provisions of section 13 of the policy, any share of an insured crop paid or to be paid for irrigation water shall be considered for the purpose of determining insurance units only as a part of the share of the insured.

(d) "Flood" as a cause of loss insured against shall not include damage caused by the use or overflow of the Atchafalaya River Spillway.

9. *Irrigation.* In addition to the causes of loss not insured against as stated in section 8 of the policy, the contract also will not cover loss of the rice crop due to a shortage of irrigation water where the acreage planted to rice is in excess of the acreage which could be irrigated properly with the irrigation facilities available and with a supply of irrigation water which reasonably could be expected.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.71 *Minnesota.*

§ 420.71–5 *McLeod County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in McLeod County, Minn., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, popcorn, broom corn or corn planted for the development of hybrid seed corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Soybeans planted for harvest as beans.

(f) Spring wheat planted for harvest as grain.

(g) Sweet corn planted for commercial processing.

(h) Mixtures of insurable small grains or mixtures of flax and insurable small grains planted for harvest as grain or seed.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of field corn except acreage released and planted to a substitute crop shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 7 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Determining coverage(s) and premium(s) for mixtures.* (a) If a mixture of insurable crops is planted the coverage of the predominant crop shall apply.

(b) For the purpose of determining the premium, any acreage of a mixture of insurable crops shall be considered as acreage of the predominant crop.

4. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insured shall cease with respect to any portion of the field corn or sweet corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

5. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, field corn, flax, oats or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

6. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

7. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production of such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. In determining production on acreage where a mixture of flax and an insurable small grain is insured, the production of each commodity shall be determined and handled separately. In determining production on acreage where a mixture of insurable small grain (excluding flax) is insured, all production shall be counted as the predominant small grain on a weight basis. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	Total production [2]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised amount by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the amount of production harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised amount by which production for such acreage has been reduced because of cause(s) not insured against.

[2] Production shall be in bushels for all crops except sweet corn which shall be in tons (rounded to tenths). No production shall be counted for any field corn acreage on which the coverage is reduce 10 percent under section 2 (b) of this rider.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

8. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.71–6 *Stearns County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Stearns County, Minn., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Spring wheat planted for harvest as grain.

(f) Mixtures of insurable small grains or mixtures of flax and insurable small grains planted for harvest as grain or seed.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 7 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Determining coverage(s) and premium(s) for mixtures.* (a) If a mixture of insurable crops is planted the coverage of the predominant crop shall apply.

(b) For the purpose of determining the premium, any acreage of a mixture of insurable crops shall be considered as acreage of the predominant crop.

4. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10 of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

5. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, or oats which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

6. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

7. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. In determining production on acreage where a mixture of flax and an insurable small grain is insured, the production of each commodity shall be determined and handled separately. In determining production on acreage where a mixture of insurable small grains (excluding flax) is insured, all production shall be counted as the predominant small grain on a weight basis. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production*[1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

8. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.71–12 *Dakota, Goodhue, Kandiyohi, Stevens, Swift Counties.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Dakota, Goodhue, Kandiyohi, Stevens, and Swift Counties, Minn., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Soybeans planted for harvest as beans.

(f) Spring wheat planted for harvest as grain.

(g) Mixtures of insurable small grains or mixtures of flax and insurable small grains planted for harvest as grain or seed.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 7 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Determining coverage(s) and premium(s) for mixtures.* (a) If a mixture of insurable crops is planted the coverage of the predominant crop shall apply.

(b) For the purpose of determining the premium, any acreage of a mixture of insurable crops shall be considered as acreage of the predominant crop.

4. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

5. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

6. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

7. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. In determining production on acreage where a mixture of flax and an insurable small grain is insured, the production of each commodity shall be determined and handled separately. In determining production on acreage where a mixture of insurable small grains (excluding flax) is insured, all production shall be counted as the predominant small grain on a weight basis. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production*[1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.

[1] Production shall be in bushels for all crops. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

PRODUCTION SCHEDULE FOR EACH INSURED CROP—Continued

Acreage classification	*Total production*[1]
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

Discount date: November 30.

Cancellation date: February 28.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.71–13 *Dodge, Nicollet, Faribault Counties.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Faribault, Dodge, and Nicollet Counties, Minn., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Soybeans planted for harvest as beans.

(f) Mixtures of insurable small grains and mixtures of flax and insurable small grains planted for harvest as grain or seed.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 7 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Determining coverage(s) and premium(s) for mixtures.* (a) If a mixture of insurable crops is planted the coverage of the predominant crop shall apply.

(b) For the purpose of determining the premium, any acreage of a mixture of insurable crops shall be considered as acreage of the predominant crop.

4. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

5. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats or soybeans, which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

6. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

7. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. In determining production on acreage where a mixture of flax and an insurable small grain is insured, the production of each commodity shall be determined and handled separately. In determining production on acreage where a mixture of insurable small grains (excluding flax) is insured, all production shall be counted as the predominant small grain on a weight basis. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production*[1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4 Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

8. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.73 *Missouri.*

§ 420.73–1 *Audrain County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Audrain County, Mo., Beginning With the 1954 Crop year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn. The contract will not provide insurance for true typesilage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Oats planted for harvest as grain.

(c) Soybeans planted for harvest as beans.

(d) Winter wheat planted for harvest as grain.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, of the calendar year in which the crop is normally harvested unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production* [1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.82 *North Dakota.*

§ 420.82–8 *Richland County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Richland County, N. Dak., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Rye (winter only) planted for harvest as grain.

(f) Soybeans planted for harvest as beans.

(g) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) October 31 of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats, rye, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined

in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. However, with respect to any acreage of corn which is not or will not be harvested as corn for grain, the production shall be the appraised production of corn for grain or the appraised or actual production of ensilage, whichever has the higher total value (on the basis of the price per bushel for corn as provided under section 4 above, or the value per ton for ensilage as determined by the Corporation): *Provided, however,* That if the appraised or actual production of corn which was or could have been used for ensilage is one ton or more per acre, the value of such production shall not be less than $3.00 per acre. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production* [1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.82–10 *Barnes, Ransom, Sargent, Dickey, La Moure Counties.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Barnes, Dickey, La Moure, Ransom, and Sargent Counties, N. Dak., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Rye (winter only) planted for harvest as grain.

(f) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) October 31, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats or rye which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. However, with respect to any acreage of corn which is not or will not be harvested as corn for grain, the production shall be the appraised production of corn for grain, or the appraised or actual production of ensilage, whichever has the higher total value (on the basis of the

price per bushel for corn as provided under section 4 above, or the value per ton for ensilage as determined by the Corporation): *Provided, however,* That, if the appraised or actual production of corn which was or could have been used for ensilage is one ton or more per acre, the value of such production shall not be less than $3.00 per acre.

Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop. The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production* [1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.
Cancellation date: February 28.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.82–11 *Pierce, Steele, Grand Forks Counties.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Grand Forks, Pierce, and Steele Counties, N. Dak. Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.
(b) Flax planted for harvest as seed.
(c) Oats planted for harvest as grain.
(d) Rye (winter only) planted for harvest as grain.
(e) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10 of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, oats, or rye which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel, determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the planted acreage to the premium computed for the acreage and interest shown on the acreage report. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop, produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production* [1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.
Cancellation date: February 28.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.89–2 *Hutchinson County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Hutchinson County, S. Dak., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.
(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.
(c) Oats planted for harvest as grain.
(d) Rye planted for harvest as grain.
(e) Soybeans planted for harvest as beans.
(f) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10 of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract,

Cancellation date: February 28.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.89 *South Dakota.*

§ 420.89–1 *Bon Homme County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Bon Homme County, S. Dak., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.
(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.
(c) Oats planted for harvest as grain.
(d) Rye planted for harvest as grain.
(e) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10 of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, oats, or rye which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel, determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the planted acreage to the premium computed for the acreage and interest shown on the acreage report. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop, produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production* [1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, oats, rye, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production*[1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under Section 2 (b) of this rider.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

§ 420.89–11 *Miner, Day Counties.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Day and Miner Counties, S. Dak., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Rye planted for harvest as grain.

(f) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (1) the end of the normal harvest period for such crop or (ii) December 10, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn, flax, oats or rye which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production*[1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised number of bushels by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the number of bushels harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised number of bushels by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for all crops. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.89–12 *Lake, Deuel, Hamlin, McCook, Hanson, Kingsbury Counties.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Deuel, Hamlin, Hanson, Kingsbury, Lake, and McCook Counties, N. Dak., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Corn normally regarded as field corn. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Flax planted for harvest as seed.

(d) Oats planted for harvest as grain.

(e) Rye (winter only) planted for harvest as grain.

(f) Soybeans planted for harvest as beans.

(g) Spring wheat planted for harvest as grain.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.90 *Tennessee.*

§ 420.90–1 *Henry County.*

RIDER No. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Henry County, Tenn., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(c) Sweet potatoes (excluding acreage of less than one acre on an insurance unit).

(d) Tobacco, types 23 and 35.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

(c) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, the sweet potato crop upon digging, or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco later than March 31 following harvest, unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 31, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per bushel determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

Crop	Acreage classification	Total production [1]
1. Each insured crop except cotton.	Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Each insured crop except cotton.	Acreage not planted to substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Cotton	Acreage released by the Corporation because of damage occurring prior to laying by the crop.	That portion of the appraised production for such acreage which is in excess of 60 percent of the harvested coverage divided by the predetermined price.
4. Cotton	Acreage on which the crop is laid by and not harvested.	That portion of the appraised production for such acreage which is in excess of 25 percent of the harvested coverage divided by the predetermined price.
5. Cotton	Acreage harvested	Production, including an appraisal of production left in the field after harvest.
6. Each insured crop	Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
7. Each insured crop	Acreage with reduced yield due solely to cause(s) not insured against.	Appraised amount by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the amount of production harvested.
8. Each insured crop	Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised amount by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for corn and sweetpotatoes and in pounds for cotton and tobacco. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of the rider.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

8. *Definitions.* "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.90–2 *Lincoln County.*

RIDER No. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Lincoln County, Tenn., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Alfalfa hay.

(b) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn

planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(c) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(d) Tobacco, type 31.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

(c) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop except alfalfa in which case insurance shall attach on November 1 (preceding harvest), provided there is a stand at that time sufficient that farmers in the area generally would leave the crop for harvest the following harvest season. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, the hay crop upon baling or stacking, or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco later than February 28 following harvest unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

Crop	Acreage classification	Total production [1]
1. Each insured crop except cotton.	Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Each insured crop except cotton.	Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Cotton	Acreage released by the Corporation because of damage occurring prior to laying by the crop.	That portion of the appraised production for such acreage which is in excess of 60 percent of the harvested coverage divided by the predetermined price.
4. Cotton	Acreage on which the crop is laid by and not harvested.	That portion of the appraised production for such acreage which is in excess of 25 percent of the harvested coverage divided by the predetermined price.
5. Cotton	Acreage harvested	Production, including an appraisal of production left in the field after harvest.
6. Each insured crop	Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
7. Each insured crop	Acreage with reduced yield due solely to cause(s) not insured against.	Appraised amount by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the amount of production harvested.
8. Each insured crop	Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised amount by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for corn, pounds for cotton and tobacco, and in tons (rounded to tenths) for hay. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

8. *Definitions.* (a) For all purposes under the contract alfalfa for harvest within the crop year shall be considered to have been planted as of the beginning of the insurance period for that crop year.

(b) "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.90–4 *Dyer County.*

RIDER No. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Dyer County, Tenn., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(c) Soybeans planted for harvest as beans in rows 24 inches or more apart, excluding soybeans interplanted in the same row with corn.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (deter-

mined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

(c) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, all other insured crops upon threshing, or with respect to any portion of any insured crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 31 of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Any production of soybeans interplanted in the same row with corn shall not be counted as production.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

Crop	Acreage classification	Total production [1]
1. Each insured crop except cotton.	Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Each insured crop except cotton.	Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Cotton	Acreage released by the Corporation because of damage occurring prior to laying by the crop.	That portion of the appraised production for such acreage which is in excess of 60 percent of the harvested coverage divided by the predetermined price.
4. Cotton	Acreage on which the crop is laid by and not harvested.	That portion of the appraised production for such acreage which is in excess of 25 percent of the harvested coverage divided by the predetermined price.
5. Cotton	Acreage harvested	Production, including an appraisal of production left in the field after harvest.
6. Each insured crop	Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
7. Each insured crop	Acreage with reduced yield due solely to cause(s) not insured against.	Appraised amount by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the amount of production harvested.
8. Each insured crop	Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised amount by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for corn and soybeans and in pounds for cotton. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

8. *Definitions.* "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.90–5 *Obion County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Obion County, Tenn., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(c) Oats (Fall only) planted for harvest as grain.

(d) Soybeans planted for harvest as beans, in rows 24 inches or more apart excluding soybeans interplanted in the same row with corn.

(e) Tobacco, types 23 and 35.

(f) Wheat planted for harvest as grain.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

(c) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing, or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, all other insured crops upon threshing, or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco

later than March 31 following harvest unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 31 of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, oats, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation. Wheat which does not grade No. 3 or better and does not grade No. 4 or 5 on the basis of test weight only (determined in accordance with the Official Grain Standards of the United States) because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be similarly evaluated.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop. Any production of soybeans interplanted in the same row with corn shall not be counted as production.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

Crop	Acreage Classification	Total Production [1]
1. Each insured crop except cotton.	Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Each insured crop except cotton.	Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Cotton	Acreage released by the Corporation because of damage occurring prior to laying by the crop.	That portion of the appraised production for such acreage which is in excess of 60 percent of the harvested coverage divided by the predetermined price.
4. Cotton	Acreage on which the crop is laid by and not harvested.	That portion of the appraised production for such acreage which is in excess of 25 percent of the harvested coverage divided by the predetermined price.
5. Cotton	Acreage harvested	Production, including an appraisal of production left in the field after harvest.
6. Each insured crop	Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
7. Each insured crop	Acreage with reduced yield due solely to cause(s) not insured against.	Appraised amount by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the amount of production harvested.
8. Each insured crop	Acreage with reduced yield due partially to cause (s) not insured against and partially to cause(s) insured against.	Appraised amount by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for corn, oats, soybeans and wheat and in pounds for cotton, and tobacco. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

8. *Definitions.* "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.90–6 *Weakley County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Weakley County, Tenn., Beginning With the 1954 Crop Year)

1. *Insurance crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(c) Lespedeza (annual only) for hay, including volunteer annual lespedeza.

(d) Soybeans planted for harvest as beans in rows 24 inches or more apart, excluding soybeans interplanted in the same row with corn.

(e) Sweet potatoes, excluding acreage of less than one acre on an insurance unit.

(f) Tobacco, Types 23 and 35.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

(c) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop, except volunteer annual lespedeza on which insurance shall attach on May 1 (preceding harvest) provided there is a stand at that time sufficient that farmers in the area generally would leave it for harvest the following harvest season. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, the hay crop upon baling or stacking, the sweetpotato crop upon digging, the soybean crop upon threshing, or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco

later than March 31 following harvest unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 31 of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Any production of soybeans interplanted in the same row with corn shall not be counted as production.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE

Crop	Acreage classification	Total production [1]
1. Each insured crop except cotton.	Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Each insured crop except cotton.	Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. Cotton	Acreage released by the Corporation because of damage occurring prior to laying by the crop.	That portion of the appraised production for such acreage which is in excess of 60 percent of the harvested coverage divided by the predetermined price.
4. Cotton	Acreage on which the crop is laid by and not harvested.	That portion of the appraised production for such acreage which is in excess of 25 percent of the harvested coverage divided by the predetermined price.
5. Cotton	Acreage harvested	Production, including an appraisal of production left in the field after harvest.
6. Each insured crop	Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
7. Each insured crop	Acreage with reduced yield due solely to cause(s) not insured against.	Appraised amount by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the amount of production harvested.
8. Each insured crop	Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised amount by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for corn, sweet potatoes, and soybeans and in pounds for cotton, and tobacco and in tons (rounded to tenths) for hay. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2(b) of this rider.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

8. *Definitions.* (a) For all purposes under the contract volunteer lespedeza for harvest within the crop year shall be considered to have been planted as of the beginning of the insurance period for that crop year.

(b) "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.90–8 *Coffee County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Coffee County, Tenn., Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Corn normally regarded as field corn, including corn with which soybeans are interplanted. The contract will not provide insurance for true type silage corn, corn planted thick for silage or fodder purposes, sweet corn, popcorn, broom corn, corn planted for the development of hybrid seed corn, or any type of corn other than that normally regarded as field corn.

(b) Cotton, restricted to American upland cotton and not including cotton planted primarily for experimental purposes.

(c) Potatoes (excluding acreage of less than one acre on an insurance unit) commonly known as Irish potatoes.

(d) Soybeans planted for harvest as beans, in rows 24 inches or more apart, excluding soybeans interplanted in the same row with corn.

(e) Tobacco, type 31.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop, except cotton, shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

(c) The coverage per acre for cotton shall be reduced as follows: (1) 60 percent for any acreage which is released by the Corporation because of damage occurring prior to laying by the crop, and (2) 25 percent for any acreage on which the crop is laid by and not harvested.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to (a) any portion of the tobacco crop upon weighing-in at the tobacco warehouse, transfer of interest in the tobacco after harvest, removal of the tobacco from the insurance unit (except for curing, packing or immediate delivery to the tobacco warehouse), or weighing of the tobacco for casing, (b) any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the cotton crop upon picking, the soybean crop upon threshing or with respect to any portion of any crop (except tobacco) upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to tobacco later than February 28 following harvest unless such time is extended in writing by the Corporation, (b) with respect to any other crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 31, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (c) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of corn, potatoes or soybeans which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested, except that any corn may be used for ensilage or fodder without a release by the Corporation if the insured leaves a number of rows considered by the Corporation to be an adequate representative sample for appraising the yield.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production

PRODUCTION SCHEDULE

Crop	Acreage classification	Total production [1]
1. Each insured crop except cotton.	Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Each insured crop except cotton.	Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest and an appraisal of corn used for ensilage or fodder.
3. [illegible]	Acreage released by the Corporation [illegible] occurring prior to laying by the crop.	That portion of the appraised production for such acreage which is in excess of 60 percent of the harvested coverage divided by the predetermined price.
4. Cotton	Acreage on which the crop is laid by and not harvested.	That portion of the appraised production for such acreage which is in excess of 25 percent of the harvested coverage divided by the predetermined price.
5. Cotton	Acreage harvested	Production, including an appraisal of production left in the field after harvest.
6. Each insured crop	Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
7. Each insured crop	Acreage with reduced yield due solely to cause(s) not insured against.	Appraised amount by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the amount of production harvested.
8. Each insured crop	Acreage with reduced yield due [illegible] against and partially to cause (s) insured against.	Appraised amount by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production shall be in bushels for corn and soybeans, and in pounds for cotton, potatoes and tobacco. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

Notwithstanding the other provisions of this paragraph (a) regarding the determination of the total production of cotton, in any case where the quality of any cotton production is reduced solely by insured causes to the extent that the value per pound, as determined by the Corporation, is less than 75 percent of the predetermined price, the number of pounds of such poor quality cotton shall be adjusted downward to the number of pounds obtained by dividing the total value of such cotton, as determined by the Corporation, by 75 percent of the predetermined price.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount Date: November 30.

Cancellation Date: February 28: .

8. *Definition.* "Harvest" with respect to any acreage of cotton means the removal (by manual or mechanical means) of an amount of cotton from the stalk which is equal in value (based on the predetermined price) to 10 percent or more of the coverage for such acreage.

Approved: Beginning with the 1954 crop year.

[SEAL] FEDERAL CROP INSURANCE CORPORATION.

§ 420.97 *Wisconsin.*

§ 420.97–1 *Fond du Lac County.*

RIDER NO. 1 TO THE MULTIPLE CROP INSURANCE POLICY

(Applicable in Fond du lac County, Wis. Beginning With the 1954 Crop Year)

1. *Insurable crops.* For the purpose of the multiple crop insurance program the insurable crops are:

(a) Barley planted for harvest as grain.

(b) Canning peas planted for commercial processing.

(c) Corn planted for grain, silage or fodder but not including sweet corn, popcorn, broom corn, or corn planted for the development of hybrid seed corn. However, corn for fodder will not be insured unless it is planted in time reasonably to expect the corn to mature as grain, as determined by the Corporation.

(d) Oats planted for harvest as grain.

2. *Coverage per acre.* (a) The coverage per acre for each insured crop shall be reduced 50 percent for any acreage released by the Corporation and planted to a substitute crop.

(b) The coverage for any acreage of corn, except acreage released and planted to a substitute crop, shall be reduced 10 percent if the value (at the predetermined price) of the total of all production therefrom (determined in accordance with section 6 of this rider) does not equal or exceed 10 percent of the coverage for such acreage.

3. *Insurance period.* Insurance shall attach at the time of planting to any insured acreage of any insured crop. Insurance shall cease with respect to any portion of the corn crop upon harvesting (picking the corn from the stalk either by hand or machine or cutting the corn for fodder or ensilage), the canning pea crop upon harvesting, all other insured crops upon threshing, or with respect to any portion of any crop upon removal from the field, whichever is earlier. However, in no event shall insurance remain in effect (a) with respect to any crop later than the earlier of (i) the end of the normal harvest period for such crop or (ii) December 10, of the calendar year in which the crop is normally harvested, unless such time is extended in writing by the Corporation, and (b) with respect to any insurance unit later than the date of submission of a claim for indemnity.

4. *Protection against loss of quality.* In determining any loss under the contract, production of each insurable crop shall be evaluated at the predetermined price established by the Corporation for that crop and shown on the county actuarial table. However, any production of barley, corn (as set forth below), or oats which will not meet the latest available requirements for a Commodity Credit Corporation loan or support because of poor quality due to insurable causes, and would not meet these requirements if properly handled, shall be evaluated at a value per unit determined by the Corporation. In order for corn to be eligible for a quality adjustment it must be a variety of corn adapted to the production of corn for grain and must be harvested as grain or fodder.

The fair market value for canning peas shall be based on prices contained in the insured's contract(s) with the canning company(ies) as determined by the Corporation. However, in any case there shall be added to the value of the production (see section 6) (a) an amount equal to 30 percent of the value of production from seed peas for which the insured is not required to pay under the terms of his contract(s) with the canning company(ies) and (b) the amount of any bonus(es) paid or owing to the insured under a contract(s) with a canning company(ies). If the insured does not have a contract with a canning company or the insured's contract with a canning company does not include a price for dry peas the Corporation may determine the fair market value on the basis of prices contained in the contract of any canning company operating in the county.

5. *Released crop.* Notwithstanding any other provision of the policy, any crop on any insured acreage may be released by the Corporation subject to an appraisal by the Corporation of the yield that would be realized if the crop were harvested.

6. *Amount of loss.* (a) The amount of loss with respect to any insurance unit shall be determined by (1) multiplying the planted acreage of each insured crop (exclusive of any acreage to which insurance did not attach) by the applicable coverage per acre, and the result by the insured interest, and (2) subtracting from the total thereof the insured interest in the value (based on the predetermined price) of the total production

on such acreage of all insured crops. However, if the premium computed for the planted acreage is more than the premium computed for the acreage and interest shown on the acreage report for the insurance unit, the amount of loss so determined shall be reduced on the basis of the ratio of the premium computed for the acreage and interest shown on the acreage report to the premium computed for the planted acreage. The total production for each insured crop on the insurance unit shall be the sum of all production determined in accordance with each of the applicable acreage classifications shown on the production schedule below. Production of corn shall be counted as grain, except that production for any corn harvested for silage and the appraised production for any true type silage corn and corn planted thick for silage but not harvested as silage shall be counted as corn silage. Where any small grains are seeded with an insured growing small grain crop on acreage not released by the Corporation, all production shall be counted as the insured small grain on a weight basis. In the case of a volunteer crop produced with an insured crop, the production of such volunteer crop shall be included in determining the production of the insured crop.

The Corporation reserves the right to determine the amount of production on the basis of an appraisal of any unharvested crop standing in the field.

PRODUCTION SCHEDULE FOR EACH INSURED CROP

Acreage classification	*Total production*[1]
1. Acreage released by the Corporation and planted to a substitute crop.	That portion of the appraised production for such acreage which is in excess of 50 percent of the harvested coverage divided by the predetermined price for the crop.
2. Acreage not planted to a substitute crop.	The appraised production or the actual production, including an appraisal of corn left in the field after harvest.
3. Acreage put to another use without the consent of the Corporation.	Appraised production for such acreage but not less than the harvested coverage divided by the predetermined price for the crop.
4. Acreage with reduced yield due solely to cause(s) not insured against.	Appraised amount by which production for such acreage has been reduced but not less than the harvested coverage divided by the predetermined price for the crop, minus the amount of production harvested.
5. Acreage with reduced yield due partially to cause(s) not insured against and partially to cause(s) insured against.	Appraised amount by which production for such acreage has been reduced because of cause(s) not insured against.

[1] Production and allowances shall be in bushels for barley, corn harvested or to be harvested for grain or fodder, and oats, in tons (rounded to tenths) for canning peas, and corn harvested for silage. No production shall be counted for any corn acreage on which the coverage is reduced 10 percent under section 2 (b) of this rider.

(b) If the production from an insurance unit is commingled with the production from any other acreage and the insured fails to keep records satisfactory to the Corporation of the acreages involved and the production from each, the Corporation may (1) deny liability with respect to all insurance units involved for the crop year and declare the premium on such units forfeited by the insured, or (2) allocate the commingled production in such manner as it determines appropriate.

7. *Date table.*

Discount date: November 30.

Cancellation date: February 28.

Approved: Beginning with the 1954 crop year.

Chapter VIII—Commodity Stabilization Service (Sugar), Department of Agriculture

Subchapter I—Determination of Prices

[Sugar Determination 263, Amdt. 1]

PART 877—SUGARCANE: PUERTO RICO

DETERMINATION OF FAIR AND REASONABLE PRICES FOR 1947–48 CROP

Pursuant to the provisions of section 301 (c) (2) of the Sugar Act of 1948, as amended, after investigation and due consideration of the evidence presented at the hearings held at San Juan, Puerto Rico, on September 29, 1947, and Yauco, Puerto Rico, on October 28, 1953, the determination of fair and reasonable prices for the 1947–48 crop of Puerto Rico sugarcane, issued January 16, 1948 (published as § 802.42j, 13 F. R. 290), is hereby amended (1) by striking the period at the end of paragraph (a) (2) of § 802.42j and adding the following: ", except as to any producer with whom the producer-processor has no agreement, the percentage shall be not more than that resulting from retention by the producer-processor of 3½ pounds of raw sugar per 100 pounds of sugarcane."; and (2) by striking the period at the end of the first sentence of paragraph (a) (3) of § 802.42j and adding the following: ", except as to any producer with whom the producer-processor has no agreement, the percentage retained by the producer-processor for such sugarcane yielding 9 pounds or more of 96° sugar per 100 pounds of sugarcane shall be not more than that resulting from the applicable percentage specified in subparagraph (1) of this paragraph, and for such sugarcane yielding less than 9 pounds of 96° sugar per 100 pounds of sugarcane shall be not more than that resulting from retention by the processor of 3½ pounds of 96° sugar per 100 pounds of sugarcane: *Provided*, That for all such sugarcane the yield of 96° sugar shall be determined by use of the sugar recovery formula issued by the Puerto Rico Public Service Commission on June 8, 1948."

STATEMENT OF BASES AND CONSIDERATIONS

(a) *General.* This amendment provides a definitive pricing basis for producer-processors who have not agreed with producers on a price for sugarcane of the 1947–48 crop yielding less than 9 pounds of sugar per 100 pounds of sugarcane and for inferior varieties of sugarcane. While the amendment is generally applicable, Central Rufina, Guayanilla, Puerto Rico (hereinafter referred to as "Rufina"), is apparently the only producer-processor which did not obtain agreements from all its producers.

(b) *Background.* At the fair price hearing held by the Department in September 1947, a representative of Rufina presented testimony to indicate that the then current pricing basis for inferior sugarcane was unfair to the processor and recommended that Rufina be allowed to settle under the price schedule used by another Central which also purchased inferior sugarcane from producers. In a supplemental brief Rufina recommended that the processor retain 3½ pounds of sugar per 100 pounds of sugarcane and that the sugar recovery formula applicable to noble cane varieties be adjusted downward to recognize the lower recovery of juice from inferior sugarcane.

The determination of fair and reasonable prices for 1947–48 crop sugarcane, issued January 16, 1948, provided that the price for inferior sugarcane was to be "* * * as may be agreed upon between the producer and the producer-processor for the effective settlement period." Under the determinations for previous crops, settlement for interior cane was tied to the 1942–43 crop grinding agreements between producers and processors. The change in the 1947–48 crop determination was made to permit producers and producer-processors to arrive at a more uniform and equitable sharing basis for such sugarcane in the light of changing conditions. Further, the rates of payment and the sugar recovery formula for inferior sugarcane were under study by the Public Service Commission of Puerto Rico.

In September 1947, the Public Service Commission issued a temporary ruling which specified that settlement for inferior sugarcane should be based on retention by the processor of 3½ pounds of 96° sugar per 100 pounds of sugarcane with no adjustment in the sugar recovery formula. Although this ruling was more favorable to Rufina than the settlement basis previously used, it objected to this ruling and requested reconsideration by the Commission. In November 1947, the Commission reaffirmed its former ruling. However, in June 1948, the Commission issued another ruling affecting inferior sugarcane under which the customary formula used to calculate the yield of sugar from all cane was adjusted downward when used with respect to inferior sugarcane so as to recognize higher fiber content and lower juice extraction from such sugarcane.

In February 1948, Rufina made provisional settlements with producers who had delivered inferior sugarcane by using a 4 pound retention rate and the customary sugar recovery formula.

Upon final settlement, Rufina still retained 4 pounds of 96° sugar per 100 pounds of sugarcane although it adopted the adjusted sugar yield formula for inferior sugarcane as prescribed by the Commission. Producer representatives complained to the Commission and to the Department of Agriculture that Rufina had not complied with existing regulations. Upon further investigation by the Commission, Rufina was directed by the Commission in September 1949 to abide by its ruling with respect to the rate of retention. Controversies arose among producers, Rufina, and the Commission with respect to the appropriate basis of settlement and legal actions were brought to decide the matter.

During 1948 and 1949 the Department directed several requests to Rufina to determine whether settlements would be made with producers as specified in the 1947–48 price determination. Rufina replied that the matter was in litigation and that any further action regarding settlements with producers would depend upon the decision of the court. Since agreements had not be reached between Rufina and its producers with respect to settlement for 1947–48 crop inferior sugarcane, it had not complied with the price determination so as to be eligible for the Sugar Act payment. Accordingly, the Department informed Rufina that it was not eligible for such payment. Rufina stated that in view of the pending litigation such determination by the Department might prejudice its right to obtain judicial review of the Public Service Commission's regulations. Accordingly, in 1950, in response to a request by Rufina, the Department agreed to the establishment of an escrow fund under which Rufina would deposit with an escrow agent funds adequate to liquidate any amounts which might later be determined to be due producers for inferior cane.

The parties to the escrow agreement presumed that in adjudicating the case the court would determine the proper retention rate for the purchase of 1947–48 crop inferior sugarcane and that settlement on such basis would constitute compliance with the fair price determination. In October 1952, the Supreme Court of Puerto Rico ruled that the regulations of the Commission were invalid on the ground that they established temporary and not final rates as required by the Statute. However, the court failed to rule on the question of the proper payment to be made for inferior sugarcane of the 1947–48 crop. Accordingly, on numerous occasions between October 1952 and August 1953, the Department requested Rufina to obtain agreements with growers as required by the price determination for settlement of inferior sugarcane. In reply to such requests Rufina took the position that the invalidation of the Commission's temporary regulations by the court validated the settlement previously made by Rufina, namely, the retention of 4 pounds of sugar for each 100 pounds of sugarcane.

In September 1953, the Department was advised by Rufina that the following form of agreement had been signed by 143 producers:

The Colonos whose signatures appear below, make it known for all proper effects that the liquidation for inferior canes made by Mario Mercado y Hijos, during the 1948 crop year is entirely satisfactory to us and we acknowledge to have been paid the share due us of the cane grown during that crop year. Guayanilla, Puerto Rico, August 1953.

However, at about the same time a number of growers informed the Department that although they had signed the agreement they desired to withdraw from the agreement because they had not fully understood the nature of the agreement nor the extent of their actions. Following discussions between Rufina and Department representatives, Rufina requested on September 14, 1953, that the Department hold a public hearing for the purpose of determining a specific rate for inferior sugarcane of the 1947–48 crop inasmuch as the Central was unable to obtain agreements from all of its producers and thereby comply with the 1947–48 price determination. Accordingly, a hearing was held at Yauco, Puerto Rico, on October 28, 1953.

(c) *1947–48 price determination amendment.* This amendment to the 1947–48 price determination provides (1) that for noble and inferior varieties of sugarcane yielding less than nine pounds of 96° sugar per 100 pounds of sugarcane a processor, in the absence of agreement as to the rate of payment, shall make payment therefor based on retention by the processor of not more than 3½ pounds of 96° sugar per 100 pounds of sugarcane; (2) that for interior varieties of sugarcane yielding 9 pounds or more of 96° sugar per 100 pounds of sugarcane a processor, in the absence of agreement as to rate of payment, shall make payment therefor at not less than the applicable percentages for noble varieties of sugarcane; and (3) that in the case of inferior varieties of sugarcane the yield of raw sugar per 100 pounds for such sugarcane shall be determined in accordance with the formula prescribed by the Public Service Commission on June 8, 1948.

At the recent public hearing a representative of producers presented testimony which indicated that prior to the first provisional settlement for 1947–48 crop inferior sugarcane he believed that payment would be made on the same basis as in previous years; that upon receipt of the first provisional settlement it was evident that a different basis of settlement was being followed by Rufina; that he discussed the settlement basis with a representative of Rufina and was told that Rufina proposed to settle for inferior sugarcane on the basis of the regulations issued by the Public Service Commission; that he was agreeable to settlements on that basis; that he believed that he had an oral agreement with Rufina to settle on the basis of Public Service Commission regulations; that final settlement ultimately was made on the basis of retention by Rufina of 4 pounds of sugar per 100 pounds of sugarcane which was greater than the retention rate in the Public Service Commission regulations; and that he appealed to the Public Service Commission and the Department of Agriculture for a ruling on the proper settlement rate. In a supplemental brief the representative of producers recommended that the fair price for 1947–48 crop inferior sugarcane should be based upon a retention by the processor of not more than 3½ pounds of sugar for each 100 pounds of sugarcane ground.

A representative of Rufina testified that the settlement basis used by the mill for inferior sugarcane in prior years was unfair in that it required a higher payment than the payment made by other Centrals grinding such cane; that Rufina ground a larger portion of inferior cane of the 1947–48 crop than any other Central; that it was the intention of Rufina to liquidate under the valid regulations of the Public Service Commission; that Rufina did not notify producers prior to delivery of the sugarcane that settlements would be made on the basis of 4 pounds; that Rufina withheld 4 pounds of sugar per 100 pounds of sugarcane in making final settlements for 1947–48 crop inferior sugarcane; that Rufina believed it proper to withhold 4 pounds of sugar inasmuch as it was classed as a public utility under the laws of Puerto Rico and, therefore, entitled to a fixed rate of return on its investment; that on the basis of the average raw sugar price for the period February through June 1948, average selling and delivery expenses, average manufacturing costs, and a retention rate of 4 pounds of sugar, Rufina lost about 12 cents per ton of 1947–48 crop inferior sugarcane ground; that under the Public Service Commission regulations Rufina was required to grind inferior sugarcane; that producers also were required to deliver sugarcane to Rufina unless they could show cause for transfer to another mill; that Rufina could not enter into agreements with producers as to the purchase price of sugarcane because such agreements would not have been valid under the Public Service Commission law; that 177 of 297 producers had signed an agreement to accept the settlement made for 1947–48 crop inferior sugarcane; and that for all crops subsequent to 1947–48 Rufina had settled for inferior cane on the basis of a retention rate of 3½ pounds for each 100 pounds of sugarcane ground. The witness recommended that Rufina be permitted to retain 4 pounds of sugar as the fair and reasonable price for inferior sugarcane of the 1947–48 crop because it would be unfair to require it to grind such sugarcane at a loss. Another representative of Rufina presented a technical statement indicating that the processing of inferior varieties of sugarcane increased factory costs as compared with milling noble cane and that the fair share for Rufina for all interior varieties sugarcane milled should be 3.98 pounds of 96° sugar per 100 pounds of sugarcane. Two other representatives

of Rufina testified that in August and September 1953, they obtained signatures of producers to an agreement stating that such producers were satisfied with settlements made for inferior sugarcane of the 1947–48 crop. In a supplemental brief Rufina contended that it is entitled to a retention rate of 4 pounds per 100 pounds of sugarcane because Rufina was a public utility under Puerto Rican law in 1948; that valid contracts, either express or implied in law, exist between Rufina and all of its colones for the crop in question; that written contracts for the 1947–48 crop establishing a retention rate of 4 pounds are presently in effect between Rufina and 170 out of its 297 colonos or growers; that a rate cannot be said to be "fair and reasonable" which is not compensatory; and that the only rate for the 1947–48 crop which would be even approximately compensatory for Rufina is a rate of not less than 4 pounds.

Individual producers testified at the hearing that they had signed the aforementioned agreement at the request of representatives of Rufina; that they did not intend to renounce any rightful claim they might have against Rufina; and that representatives of Rufina informed them that their signatures were needed on the document for presentation to the Department. Representatives of Rufina testified that prior to the hearing several producers who had signed the agreement requested that their signatures be stricken and that their requests were granted. A number of other producers testified that they were in agreement with the settlement already made and that they had signed an agreement presented to them by representatives of Rufina.

The standards used in determining fair and reasonable prices for sugarcane have been explained in previous fair price determinations. Generally, fair prices are established after taking into consideration the relative average costs, returns, profits, investments and other pertinent factors. The Sugar Act contemplates that consideration be given to the economic position of both processors and producers as a group. The test of a fair price under the Sugar Act is whether processors and producers receive on the average an equitable division of the proceeds from the sugar marketed. Data available to the Department indicate that generally equitable relationships have existed among processors and producers during the period that price determinations have been issued covering the marketing of sugarcane in Puerto Rico. As to the 1947–48 crop, processors in Puerto Rico received a larger proportion of total industry returns than they absorbed of total industry costs.

Testimony presented at the recent public hearing indicates that Rufina intended to use the basis for settlements as provided in the Commission's regulations. However, when grinding commenced and the condition of the 1947–48 crop appeared to be below average, Rufina apparently fearing that it might not realize the return on its investment for that crop consonant with that authorized by the Public Service Commission law adopted a rate of payment estimated to provide such a return.

Rufina contends that a retention rate of 4 pounds of sugar per 100 pounds of sugarcane is the appropriate rate on the grounds that no rate can be fair and reasonable which is not compensatory; that the only rate which would be even approximately compensatory is a rate of not less than 4 pounds; that such rate is justified because a larger percentage of inferior cane of the 1947–48 crop was ground than for other crops; and that valid contracts either express or implied in law exist between Rufina, as a public utility, and all its producers at that rate. In establishing fair and reasonable prices under the Sugar Act there is no requirement that a processor be given a specific guarantee of earnings or that prices be established which will return a profit on any particular variety of sugarcane ground. Rufina presented data at the hearing showing that it ground larger quantities of inferior sugarcane from each crop subsequent to the 1947–48 crop and that for all of these crops it has settled with producers on a retention rate of 3⅓ pounds of sugar per 100 pounds of sugarcane. The requirement of the 1947–48 crop fair price determination that the price for inferior sugarcane shall be as agreed upon between the producer-processor and producers, as a condition for payment under the Sugar Act, was not met by the court decision declaring the regulations of the Public Service Commission invalid as contended by Rufina.

In establishing the pricing basis in this amendment consideration has been given to the record of the public hearing held in San Juan, Puerto Rico on September 29 and 30, 1947, to the record of the supplemental hearing held in Yauco, Puerto Rico on October 28, 1953, and to information developed through investigations.

Accordingly, I hereby find and conclude that the foregoing amendment to the 1947–48 crop price determination will effectuate the price provision of the Sugar Act of 1948.

(Sec. 403, 61 Stat. 932; 7 U. S. C. 1153. Interprets or applies sec. 301, 61 Stat. 929; 7 U. S. C. 1131)

Issued this 16th day of April 1954.

[SEAL] TRUE D. MORSE,
Acting Secretary of Agriculture.

[F. R. Doc. 54-2907; Filed, Apr. 20, 1954; 8:45 a. m.]

TITLE 14—CIVIL AVIATION

Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 75]

PART 608—DANGER AREAS

ALTERATIONS

The danger area alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and is adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

In § 608.29, the Camp Edwards, Massachusetts, areas, published on April 21, 1949, in 14 F. R. 1949, republished on July 16, 1949, in 14 F. R. 4292, and amended on September 22, 1951, in 16 F. R. 9680, are redesignated as one area (D–14), and revised to read:

Name and location (chart)	Description by geographical coordinates	Designated altitudes	Time of designation	Using agency
CAMP EDWARDS (D-14) (Boston Chart)	[illegible] Unlimited	Unlimited	Continuous	Department of Army, Camp Edwards, Mass.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on April 27, 1954.

[SEAL] F. B. LEE,
Administrator of Civil Aeronautics.

[F. R. Doc. 54-2975; Filed, Apr. 20, 1954; 8:45 a. m.]

[Amdt. 78]

PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

PROCEDURE ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

[illegible]

City and State; airport name, elevation, facility name and identification; procedure No.; effective date	Inst. approach to facility (from—)	Course and distance (miles)	Minimum altitude (feet)	Type aircraft		Procedure turn (—) side of course; final approach fix and distance; outbound inbound altitudes; limitations

2. The high frequency range procedures prescribed in § 609.7 are amended to read in part:

VAR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.
When a VAR instrument approach is conducted at the below named airport, aircraft shall be operated in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation; facility class and identification, procedure No.; effective date	Initial approach to facility from—	Course and distance	Minimum altitude (ft.)	Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances	Minimum altitude over facility on final approach course (ft.) 4. The instrument landing system procedures prescribed in § 609.11 are amended to read in part:

ILS STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings and courses are magnetic. Distances are in statute miles unless otherwise noted. Elevations and altitudes are in feet MSL. Ceiling values are in feet above airport elevation. When ILS is not operating, use standard instrument approach procedure for the airport. Pilots in accordance with FAR [illegible] following standard approach procedure for the runway to be used, are cleared for the approach. Unless otherwise authorized by the Administrator for Civil Aeronautics for such airport, flight operations must be made over specified routes. Minimum altitudes shall correspond with those established for en route operation in the particular area or as set forth below.

City and State; airport name, elevation (facility class and chart number if procedure No., effective date	Transition to ILS				Procedure turn (Initial approach course, distance from final approach course (outbound and inbound) with altitudes, limiting distances)	Minimum safe altitudes (Use of glide slope not required) (ft.) PART 3—RADIO BROADCAST SERVICES

CLEAR CHANNELS; CLASS I AND II STATIONS

In the matter of amendment to § 3.25 (b) of the Commission's rules and regulations (Radio Broadcasting Services) to permit the inclusion of the frequency 1540 kilocycles as a Class I-B channel in the United States. Docket No. 10782.

1. On November 30, 1953, the Commission issued a notice of proposed rule making (FCC 53-1565) proposing to amend § 3.25 (b) of the Commission's rules and regulations to permit the inclusion of the frequency 1540 kilocycles as a Class I-B channel in the United States. The purpose of the proposed amendment is to provide for the establishment of a Class I-B station in the United States on 1540 kilocycles in Waterloo, Iowa (KXEL) as provided for by the terms of the 1950 North American Regional Broadcasting Agreement (NARBA). Interested parties were invited to submit written comments on the proposal, and, in response, James D. Shayard, the East-West Broadcasting Company and the Fort Broadcasting Industry, Inc., filed statements in opposition and the Josh Higgins Broadcasting Company filed a statement in support of the proposal.

2. James D. Shayard, part owner of Station WATH, Athens, Ohio (1540 kc, 1 kw, daytime only) contends that the granting of I-B status to Station KXEL in Waterloo would result in a severe limitation on the assignment of new facilities; prevent the improvement of existing facilities; and would not be in the public interest as it would preclude many communities from having local coverage which is so vital at the present time.

3. The East-West Broadcasting Company, licensee of Station KCUL, Fort Worth, Texas (1540 kc, 1 kw, nighttime, 5 kw daytime) urges that making 1540 kilocycles a United States I-B channel and KXEL a I-B station will not permit or enable KXEL to improve its present service or to give service to anyone it is not now serving. It argues conversely that the effect of making KXEL a I-B station will be to limit all existing stations operating on 1540 kilocycles and prohibit them from improving their present operations.

4. The Fort Broadcasting Industry, Inc., proposed assignee of Station WTKM (File No. BAL-1527) and applicant for construction permit to change location and power of Station WTKM from 500 watts daytime only on 1540 kc at Hartford, Wisconsin to 250 watts daytime only on 1540 kc at Ft. Atkinson, Wisconsin (File No. BP-8825), contends that the proposed amendment would result in the most inefficient use of the frequency 1540 kilocycles because it will preclude the use of this frequency at three widely

separated locations requested in pending applications before the Commission and further preclude the use of the frequency at many other locations which may be applied for in the future. Fort Broadcasting Industry urges in the alternative that should the Commission reclassify Station KXEL, it should make its action prospective in effect and subject to presently pending applications. It maintains that it has relied on the Rules and Regulations of the Commission, has expended considerable effort and money in preparing its application and obtaining a site, and that fairness and equity require the Commission to take such action subject to presently pending applications.

5. The Josh Higgins Broadcasting Company, licensee of Station KXEL, Waterloo, Iowa, maintains that the action of the Commission in adopting its proposed amendment to the rules and establishment of KXEL as a Class I–B station is only a natural and proper step to preserve for the United States the full benefits accruing to it under the provisions of the NARBA Agreement.

6. The frequency 1540 kilocycles is a clear channel and under past international agreement as well as the new North American Regional Broadcasting Agreement (NARBA), Washington, 1950, now pending before the United States Senate for ratification, priority is recognized on this frequency for a Class I–A station in the Bahamas. The new NARBA, in addition, recognizes a priority for a United States I–B station (KXEL, Waterloo, Iowa). Commission Rules reflect the Bahama priority but no rule has been promulgated covering the United States priority. Station KXEL at Waterloo, Iowa, was the first station in the United States assigned to 1540 kilocycles, having been so assigned in January of 1942. It is a Class II station operating with 50 kilowatts power and a directional antenna at night. Its assignment as a Class II station was originally made pursuant to the first NARBA and present Commission Rules.

7. We have carefully reviewed the comments filed in this proceeding and we are of the view that the proposed amendment specifying the frequency 1540 kilocycles as a Class I–B channel with KXEL as the dominant domestic station should be adopted. Designation of KXEL as a Class I–B station would make it possible to take full advantage of the priority afforded by international agreement now pending before the Senate for ratification. The primary purpose in the designation of certain frequencies as clear channels with the resulting powers and protection which dominant stations on such channels are afforded is to provide wide area service so that some service would be rendered to all areas of the United States and thus tend to an efficient use of these channels. The designation of a frequency as a clear channel with a priority for its use by one or more domestic Class I stations results in the requirement that secondary domestic assignments and foreign stations afford the necessary degree of protection from interference so that this objective may be realized. Failure to designate a dominant station on this frequency would be an improper utilization of a frequency which presently may be used for the rendition of wide area coverage: It would be contrary to the public interest for it would jeopardize the prospect of advantage to the United States from the priority which has been afforded the United States by international agreement now pending before the Senate.

8. The decision to designate KXEL as the dominant station on the frequency 1540 kilocycles is in accord with our allocations objectives for the use of such clear channels. Our action herein does not contemplate changes in existing operations, but Station KXEL will receive protection as a Class I–B station from any grants made after the date of our action herein. An over-all review of the utilization of clear channels is presently before us in the clear channel proceeding (Docket No. 6741). The designation of KXEL as a dominant station on the frequency 1540 kilocycles will be reviewed in that proceeding as will all other station designations on clear channels and this designation will not be prejudicial to any final decision which we reach in that proceeding.

9. Authority for adoption of the subject amendment is contained in sections 4 (i), 301, 303 (a), (b), (c), (d), (f), (h), and (r), and 307 (b) of the Communications Act of 1934 as amended.

10. In view of the foregoing: *It is ordered*, That effective thirty days after publication in the FEDERAL REGISTER, § 3.25 (b) is amended to read as follows:

(b) To each of the channels below there may be assigned Class I and Class II stations: 680, 710, 810, 850, 940, 1000, 1030, 1060, 1070, 1080, 1090, 1110, 1130, 1140, 1170, 1190 1500, 1510, 1520, 1530, 1540,[*b*] 1550, and 1560 kilocycles.
